I stand in strong support of the balanced budget amendment. The Congress has been unable to discipline itself and its spending habits over the last 20 years as evidenced by the fact that we have not come close to a balanced budget since 1969. The Federal budget has been balanced twice since 1960 and during that time our deficits have accumulated to an amount equaling half our national debt which has exploded over $1 trillion.

It is clear that the current budget process is inadeqaute to keep the Congress from spending this country into bankruptcy. The American people are tired of reckless Federal policy that deflates their doliars and causes their interest rates to soar. People in Texas see that Federal spending rose from $92 billion in fiscal year 1960 to projected outlays of $769.8 billion in fiscal year 1983. The jump in Federal outlays between 1970 and 1980 alone amounted to an increase of 194.7 percent. In my travel around Texas, people tell me they are tired of working for the Government from January through June just to pay their taxes. It is time to balance the budget—the way to do it is House Joint Resolution 350.

Let us talk about why we need the balanced budget amendment. House Joint Resolution 350 does two things. First, it requires a balanced budget—Congress cannot engage in deficit spending unless three-fifths of both Houses agree to a specific excess of outlays over receipts. Second, the amendment controls the growth of Federal spending by requiring that outlays not exceed receipts. The Heritage Foundation describes the effects of the lack of a spending limitation on Congress in the following way:

> Without a spending limitation, Members of Congress can accommodate one spending interest and gain political capital without reducing other spending programs and facing political disadvantages. The political costs of excessive spending are deferred, resulting in high inflation (if the debt is monetized), huge deficits, and higher taxes, while the political benefits of the spending are immediately appreciated by those affected by the program and the Congressmen who support it. By the time the negative effects are visible, it is possible that those responsible for the harm may have already left office. A similar process occurs through the progressive tax structure, because inflation and economic growth automatically generate more revenue without the need for a potentially unpopular tax increase.

We need the discipline of the balanced budget amendment because of what budget deficits are doing to average Americans. For instance, uncontrolled spending and giveaways has driven food stamp outlays up almost 20,000 percent from 1970 to 1983. HUD subsidized housing outlays increased over 1,517 percent in the same period. Federal outlays soared from $195.7 billion in 1970 to $731 billion this year. Those outlays increased over 10 percent in the last year alone. Look at what this spending has done to the deficit—which drives up interest rates as the Government borrows money in private markets to finance its overspending. The deficit has zoomed from $2.8 billion in 1970 to over $100 billion this year. Continual spending has driven the United States' debt from $382.6 billion in 1970 to $1.1 trillion today. The debt increased 139 percent between 1970 and 1980 alone and was up 13.3 percent this year from last. Taxes have also gone up to the point of breaking Americans' backs to finance the free-spending Congress. Individual Federal income taxes increased from $90.4 billion in 1970 to $244 billion in 1980 and will be $298.6 billion this year. Total taxes—capital taken out of productive use—have grown from $192.6 billion in 1970 to $631.7 billion this year. People have had it and are ready for this Congress to rein itself in so they can continue to make ends meet, to say nothing of pursing the American dream.

Let us look at what free spending in Congress has done to the financial position of average Americans. The tax burden on individuals and families has grown out of control to finance the Federal budget. The two-wage earner family of four with a median income has seen their tax liability more than double from $1,074 in 1970 to $2,717 this year. Those taxes increased 133.7 percent between 1970 and 1980 alone. The President brought taxes down for the first time in years this year—by 4.2 percent—in his administration's attempt to bring this country back to economic health.

Interest rates, which are driven up by hugh Federal deficits, are killing people: homeowners, farmers, small businessmen—everyone. Interest rates are kept high as the Government goes into the capital markets to finance itself and then has to go back to the markets for money to pay its interest on the gigantic debt it continues to pile up and saddle on the American people. Interest rates rose from 6½ percent in 1976 to 21½ percent in 1980. The President's economic recovery is beginning to cause the rates to moderate—they stand around 13 percent and must still be brought down. During the free-spending years of the 1970's interest rates went up 150 percent. They are down 37.2 percent from last year, however, as we begin to turn the trend toward big Government around.

High interest rates have just about killed average homeowners and made it nearly impossible for young people to buy a home. In 1970, when rates were around 8 percent, the monthly mortgage payment on a $21,000 loan was only $169.00. By 1980, interest rates had soared to 12.5 percent. With such a rate, a $48,400 loan now required to buy a price-inflated home resulted in a monthly mortgage payment of $523.69 for 26 years. This year, that mortgage payment would have been $615 a month. We must control spending with a balanced budget amendment to bring these rates down permanently.

Farmers, too, have been hard hit by interest rates caused by congressional red ink. They cannot afford to purchase equipment, buy fertilizer, and even keep their land to retain their farms. In a recent phone-in to Members of Congress sponsored by a major agricultural organization, farmers told of how the economy was affecting them. Seventy-four-percent reported cutbacks in equipment purchases, 49 percent were cutting back on fertilizer, 42 percent were reducing fuel consumption and 39 percent were buying less pesticides and other chemicals. We must not allow Federal deficit spending to crush American agriculture.

It is often argued that a constitutional amendment is unnecessary to achieve budgetary control. These critics say that a statutory requirement would be sufficient. They are wrong. The Federal Budget Control Act of 1974 required a balanced budget in 1981, yet there was a deficit of $57.9 billion that year. The liberal spenders

have already targeted the provision in last year's tax bill that requires the indexation of tax rates to eliminate bracket creep. Big spenders can always repeal statutes; what we need is a binding spending limitation.

I urge my colleagues to join me in working for the relief of Americans who are fed up with deficit spending and expect Congress to be as responsible with the Federal budget as they must be with their own.

I am hopeful we can achieve swift action on House Joint Resolution 350.

Mr. RODINO. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. DOWNEY).

Mr. DOWNEY. Mr. Chairman, it has been asked before, and it needs to be asked again. Mr. President, where is your balanced budget? When he was here not 2 months ago with a rally in the Capitol he said this is an emergency situation, we need a balanced budget right away, but not during his administration, because what he is doing is giving us the biggest deficits in the history of the Republic.

There are four principal reasons why one should vote against this. One, it has been talked about ad nauseam, this is not going to work. It is too cumbersome, it can be gotten around. No. 2, yesterday we saw the leading economic indicators were going down. On October 8, the worst kept secret in America will be news for all Americans, and that is we will have 10.1 or 10.2 percent unemployment.

Now, the President does not want people on election day focusing on the failure of Reaganomics. I do not blame him. I would not want to campaign just on hope. That runs out after a while. He would prefer some billowing smoke, the smoke of this amendment, to obscure the reality of what his economic plan is doing.

Do not be fooled. Economically there is another very good reason to vote against this.

We have goals in this country for our economy, full employment, stable prices, economic growth. That is achieved sometimes with a balanced budget and sometimes without a balanced budget. Let us not obscure the goals with one of the tools of economic policy.

And lastly, if anything is important to us in this Chamber, it should be the Constitution of this country. It is the foundation of the Republic. To chip away at that foundation for partisan political gain in an election year is worse than demagoguery. Let us reject it. There are a lot of good reasons. And let us have this October 1 be recorded as the day when the American people were served well by their Representatives in Congress.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Michigan (Mr. SILJANDER).

Mr. SILJANDER. Mr. Chairman, the ability to change the Constitution is what has allowed America to grow, and to survive.

As Thomas Jefferson said:

> Some men look at the Constitution with sanctimonious reverence, and deem it like the Ark of the covenent, too sacred to be touched. They ascribe to the men of the preceding age a wisdom more than human and suppose what they did to be beyond amendment. * * * I am certainly not an advocate for frequent and untried changes in laws and constitutions. But, I know also, that laws and institutions must go hand in hand with the progress of the human mind. As it becomes more developed, more enlightened, as new discoveries are made, new truths disclosed, and manners and opinions change with the change of circumstances, institutions must advance also and keep pace with the times.

It is not important whether we change or amend our Constitution as long as we never change or amend the spirit of intent behind the founding of our Nation.

They had not way of seeing these deficits, nor did they fortell of the individual income tax, but they did know that big government, and a government that taxes at a confiscatory rate was a danger to a free society. Economic conditions have proved their fear of big government correct.

Let us not hesitate to change our Constitution to maintain the strength and spirit intended by our Founding Fathers and pass this constitutional amendment.

Mr. Chairman, a number of knowledgeable publications and journalists have expressed their support of House Joint Resolution 350 the tax limitation-balanced budget constitutional amendment. For example, Barron's editorialized "that the balanced budget amendment would be a long overdue check to the 16th amendment, which spawned the income tax. As a political device * * * the amendment would give the House and the Senate a reason to say no to powerful constituencies calling for more and more spending."

William Safire, the distinguished columnist of the New York Times, wrote that with the amendment in place:

> The fear of whopping deficits will be replaced by a constitutional requirement to eliminate any deficit, whopping or not. The classic battle between the Welfare State and the Skinflint State will be fought out as a matter of course each year, bringing a long-over due discipline to what is now a chaotic process.

William Murchison, columnist for the Dallas Daily News, commented that—

> When something works, you leave it alone. But when it doesn't work—as the budgetary process doesn't, else we wouldn't have perennial and growing deficits, then you change it.

Robert Walters, nationally syndicated columnist for the Newspaper Enterprise Association, called the amendment an "eminently sensible concept" and "an idea whose time has come."

Walter Williams, the noted economist and author, commented in his syndicated column:

> The long run solution for our problems is a constitutional amendment limiting government spending. What we really need for next year is a hard and fast limit of say $600 billion on federal spending. That way Congress will have a bottom line, and the spending constituencies can fight it out.

The Wheeling (West Virginia) Intelligencer editorialized:

> We don't like tampering with the U.S. Constitution. But it has reached the point here where a constitutional amendment may be the vehicle necessary to ensure a stable economic future for the United States.

The Springfield (Missouri) News editorialized:

> If a Constitutional Amendment requiring a balanced budget is necessary to get the job done, then let it be done. If the Congress is ready, it's a safe bet the states are ready.

In 1924, Treasury Secretary Mellon said:

> In so far as this government is concerned, its policy has been to keep its own house in order, to maintain the gold standard unimpaired, to balance the budget and to carry out a reasonable program for the orderly liquidation of the war debt.

Barron's pointed out, each of these tenets was abandoned:

> Gold money was replaced by irredeemable paper, a balanced budget by chronic imbalance and the paying down of debt by its constant expansion. This year the voice of the people can be heard in Washington. It is saying: Enough.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. HILER).

Mr. HILER. Mr. Chairman, in 1789, our country adopted the Constitution of the United States. Its purpose was to limit the scope and power of the Federal Government in order to preserve the rights of its citizens. It was drawn from a philosophy that cherished freedom.

One hundred and ninety-three years later, we are debating a resolution that seeks to limit the powers of this Government to inhibit our economic freedom through unrestrained spending and taxation. We discuss this in the shadow of a $1 trillion debt that will be the burden of several generations. We discuss it in view of a level of taxation that denies the rights of our workers to use their wages as they so choose. We will vote on it recognizing that past economic policies have devastated our economy with high inflation, high interest rates, and low productivity.

The line that divides political and economic freedom is barely perceptible. To allow the economic policies of a centralized government to control the allocation of dollars others earn;

to control the dollars of future generations because of unreasonable debt, is to limit the free choice of us all. Our country has everything to do with free choice, Mr. Chairman, and should have nothing to do with centralized control. That is why we have a Constitution and that is why this resolution to balance the budget is appropriate.

Less than 2 years ago, we began the long, hard process of restoring our economy so that our citizens could again be free to participate in it as they saw fit. We did so by seeking to curb the Govenment's involvement in the free market system by its insistence on deficits and taxes. The signs of our success are apparent, and so are the hardships of past policy failures. Yet, our return to a free and prosperous economy has begun and will continue if we adopt the resolution that is before us today and that has been endorsed by 31 States. It is not a cure-all, but it is an important limitation.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from Missouri (Mr. COLEMAN).

Mr. COLEMAN. Mr. Chairman, today marks a historic moment for our Nation. After years of struggling to bring a constitutional amendment to balance the Federal budget to the floor of the House of Representatives, we have finally arrived at this important juncture. When the debate on this resolution ends and the fiscal vote is counted, I believe we will have taken the all important first step in the constitutional amendment process.

There are some who say we should not pass any constitutional amendment to require a balanced budget today—or any day. The question is not "if" but "when" we will have such an amendment and in "what" form. Let me remind my colleagues that if we do not act there is a very great possibility of enough States calling for a Constitutional Convention. What kind of product would emerge from a Convention? What other issue would the Convention delve into?

It's very simple. We, the elected Members of Congress have our jobs to do.

We should take the responsibility.

We should draft an amendment.

We should pass it.

We should submit it to the States for ratification.

To those of you who still question the need for this resolution, please take a look at our Nation's sorry record of deficit spending over the past two decades. This fact alone stands as ample evidence that this constitutional amendment is long overdue.

Many economic experts agree that our present economic problems are the direct result of the imprudent fiscal policy of the past. Deficit spending year in and year out has dug our Nation's economy into a deep hole out of which we are presently struggling to remove ourselves. The average American realizes this only too well. It is no coincidence that three out of four Americans believe that the balanced budget principle must be written into the constitution.

The amendment we are presently considering has been the subject of careful and deliberate study. It is drafted in a responsible manner. It purposely closes loopholes which might have led to it being ignored. Yet, at the same time, this resolution provides the safeguards and flexibility needed to protect our Nation during times of true national emergency. Because of this, I feel that any attempt to water it down here on the floor must be defeated.

House Joint Resolution 350 provides the much needed fiscal discipline that our Government has for so long lacked. For this reason alone it deserves our support. Therefore, I urge my colleagues to join me in supporting this measure which puts the Government back on the road of fiscal responsibility.

Mr. McCLORY. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Chairman, I rise in support of the bipartisan supported balanced budget-tax limitation constitutional amendment, House Joint Resolution 350. I am an original cosponsor of this joint resolution and joined my colleagues on both sides of the aisle in signing the discharge petition which succeeded in bringing this measure to the floor of the House today.

This amendment is not a panacea for the economic problems of this Nation and there are many differing prescriptions for overcoming these problems—however, it is my firm belief that the persistent high rate of unemployment, the still unacceptably high rates of interest and escalating public debt are directly or indirectly related to the fiscal policies and practices of the Federal Government. This proposed amendment addresses a serious spending bias in the present fiscal process—it would restore the traditional link between spending and revenues—it will provide the safeguards which are necessary to prevent the balance from being achieved on the backs of the taxpayer or the State and local governments.

Mr. Chairman, the American people strongly support a balanced budget amendment—we have had only one balanced budget in the last 22 years. The Federal budget is out of control and unless this amendment is approved, the States will take the matter in their own hands. Thirty-one States have already adopted resolutions calling for a Constitutional Convention to consider a balanced budget amendment if we fail to respond.

House Joint Resolution 350 represents both responsible economic policy and responsible constitutional policy. Passage of this resolution would constitute an appropriate response by the Congress to the adopted resolutions by nearly two-thirds of the States for a Constitutional Convention on this issue. Adoption of this amendment as a part of our Constitution is imperative to the future economic well-being of this great Nation—it is constructive, credible, and commonsense.

The CHAIRMAN. The Chair will inform the gentleman from Illinois (Mr. MCCLORY) and the gentleman from New Jersey (Mr. RODINO) that both have 11½ minutes remaining.

PARLIAMENTARY INQUIRY

Mr. McCLORY. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state his parliamentary inquiry.

Mr. McCLORY. Mr. Chairman, will the final time be allocated for the proponents on this side?

The CHAIRMAN. The final time will be allocated to the gentleman from New Jersey (Mr. RODINO).

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Chairman, there has been a lot of talk now about the amendment being a smoke screen, something we ought to be afraid of. It has almost become the political bogieman. So I made sure we have a chart here that expresses word for word what we are talking about, so that no Member can go home and say when this debate is over, "I didn't have an opportunity to know what I was voting on."

It is rather discouraging to find in the debate that has gone on that we have had three Members here castigate the idea of having a constitutional amendment to a balanced budget, when those three Members have been cosponsors of this provision for some time.

What does that say? Do we become cosponsors without looking at it? Can the excuse be that it has been so changed since first introduced that we no longer support it?

Well, of course we know that is not true, because this is word for word, paragraph for paragraph, period for period, as it was originally introduced.

□ 1330

I would suspect that those who are not supporting it now will have to explain why they have had a change of faith here.

One point that was just made by one of the previous speakers is extremely important and that is this. Do we think that the Constitutional Convention that will surely come about if we do not pass this amendment will do a better job than we can do, than the

U.S. Senate and the House of Representatives can do? That is the real issue before us.

You know we only need two or three more States to tell us to go to the Convention and we go to the Convention. We have no rules to govern such a convention. We have no idea who will be there. We have no idea what the form is going to be.

So the question is: not really do you think we need a constitutional amendment. The people are demanding it. The people are going to require us to go to the Convention.

The question is: Will we do our duty now and come up with the best vehicle as we see fit, or will we give up on it and say to the people, "Don't trust us in the House and the U.S. Senate. Go to a Constitutional Convention to do the job that you think must be done."

That is the real question that must be answered today.

Mr. RODINO. Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Chairman, it is regrettable, but I think appropriate, that we are taking this up on the last day of the session before the elections.

It is symbolic, I think, of the legislative shortcuts we have taken during the session, and the failure to deal with the economy in real terms, instead of trying to find simple answers to very complex problems.

It is symbolic of our disregard of our own legislative duties in carefully considering proposals that come to the floor.

And I think it is symbolic of an attitude that says that we can fool all the American people all the time.

The public must wonder how serious are we about trying to deal with their problems now. We are debating an amendment that if ever ratified will not go into effect for 8, 9 or 10 years. They need answers now.

They are worried about record unemployment now.

They are worried about record bankruptcies now.

They are worried about record deficits in this country now, not 9 or 10 years down the road.

They are tired of promises. They are tired of simple answers. They are tired of the snake oil. They want us to roll up our sleeves, make the tough decisions and get to work.

Balancing budget proposals are old chestnuts in the budget process. The prior administration promised a balanced budget in 1982. It did not happen.

This administration promised a balanced budget in 1984. It did not happen.

This amendment promises a balanced budget sometime within the next 8 or 9 years. It is not going to happen then.

There are ways around this kind of amendment through the use of capital budgets and taking whole sections of the budget and putting them off budget.

We know that to deal with these problems it takes courage on day-to-day votes. That is where the answer lies. It takes courage for a President to offer a proposal to this Congress that balances the budget. That is where courage lies. That is where the answer lies.

We are not fooling anybody. There are, and I will introduce into the RECORD, hundreds of editorials from across this country that denounce this amendment as a fraud. They are from Texas and from North Carolina and from New York and from papers in small towns across this country. They can see through this.

I know that in an election year there is a tendency for us to act like a lynch mob, to try to find somebody to hang, to blame somebody; but very frankly, what the people want today is for us not to find somebody to blame, but to find the courage to try to make the tough decisions that will produce a budget that is responsible for this country now.

Mr. McCLORY. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, I thank my colleague from Illinois for yielding to me.

Mr. Chairman, the issue of amending the Constitution of the United States is the most important the Congress can address. Unlike normal legislation, amendments to the Constitution alter the fundamental structure of the Government and its relation to the people.

Therefore, I believe that we should pause in the heat of this debate and think very clearly about an amendment which would, in the words of my distinguished colleague from New York, "create the presumption of a balanced budget." We should pause to consider the implications of this amendment upon the Constitution and the Government of the United States.

To begin with, there are three fundamental questions which we must answer. First, is a balanced budget a proper goal of economic policy? Second, is a constitutional amendment the proper manner for achieving a balanced budget? And third, what are the merits, if any, of this particular amendment?

Is balancing the budget—all other things being equal—a desirable goal? Of course it is. The idea that the Government should make good its debts is a good one. Many have commented that during our greatest periods of national progress we have had a balanced budget. I agree. I submit, however, that balanced budgets are the result of proper economic policy—not the reverse. Therefore, those who earnestly desire a balanced budget must also provide the means for achieving it. I submit that it was the broader economic policies of a stable currency, and low tax rates, and fiscal prudence that brought about the prosperity which in turn balanced the budget during our periods of national prosperity.

I ask my colleagues to remember that a budget be balanced with the Fedeal Government absorbing anywhere from zero to 100 percent of the Nation's annual resources. Moreover, in a $3.5 trillion economy, a deficit of $100 billion means one thing if the total Federal claim on resources is $800 billion, and another thing if this claim is $600 billion. My point is that a misleading accounting balance is not the overriding goal of public policy.

Second, is a constitution amendment the proper manner in which to achieve a balanced budget? Our constitution sets forth the basic principles of our people and the fundamental rules by which they will be governed. In essence, it provides the basic goals and framework for governimg the Nation and leaves the choice of individual tools to the wisdom of those elected by the people.

The Founding Fathers believed very much in fiscal responsibility. They dealt with the same issues we are dealing with. But they did not write a balanced budget into the Constitution. Why not? Because they did not believe the Government should never borrow—but, rather that the Government, when it did borrow, should do so for a useful purpose, and should repay its creditors in full.

We do not write into the Constitution the exact level of national resources to be used or directed by the Federal Government, even if we have very strong ideas about it. We do not set out the mix of purposes to which these resources are to be put. We do not do this because to do so would make positive change and flexibility a virtual impossibility. There is no question that by not specifying these things, we leave the discretion of Congress open to abuse. But this is unavoidable if we are to leave discretion for the public good.

Placing a balanced-budget limitation within the Constitution is no different from prescribing these other economic constraints. If we as a nation are so weak as to need a constitutional straitjacket to prevent abuse, then we are too weak to benefit from such a straitjacket. If we were ever to reach that point, budgetary imbalance would not be the greatest of our problems.

Third, we are not dealing with the question in the abstract. We are not called upon to vote upon whether it is desirable to balance the budget, nor whether a constitutional amendment is the best method. We are asked to

cast our votes about a specific plan. Let us consider how this plan would work.

According to the amendment, Congress must first adopt a budget resolution in which outlays equal receipts. An unbalanced resolution can be adopted by three-fifths of all Members in both Houses—not just those present, which means it takes 261 votes in the House, rather than a majority of 218.

Next, the amendment says:

> The Congress and the President shall, pursuant to legislation, or through the exercise of powers under the first and second articles, ensure that actual outlays do not exceed outlays set forth in such statement.

This has raised some serious questions about the executive power or impoundment.

Next, the amendment says, total receipts must not increase faster than national income. The problem is that national income is not defined, so that monkeying with the definition could create all sorts of problems.

It mentions outlays, but not borrowing and off budget loan authority—this I believe is a fatal mistake in the budget process of the amendment.

To raise taxes faster than the rate of increase in national income requires a majority vote of both Houses, on a bill directed solely to approving a tax increase. To raise outlays over receipts needs three-fifths.

Consider some flaws in the way this would work.

In making outlays equal receipts in the resolution, the numbers depend enormously on economic assumptions. One of the easiest things to do is to change the economic assumptions, or not to change them when the economic outlook changes. We have seen a lot of that lately. Even if this is not the case, the odds of being on target with economic predictions, as we have repeatedly seen, are very slight.

If outlays exceed receipts, Congress will face a showdown vote. But actual spending—outlays—is the last step in a long process which includes legislating entitlements, signing contracts, and so on. The outlay crisis is likely to arise in the last month of the fiscal year. At that point, the alternatives will be few and unfortunate. Shutting off entitlement programs, or shutting down other programs, for a month will not be practical.

The most likely alternatives, therefore, are: First, shutting down defense outlays; or second, raising taxes. Defense will account for more than three-quarters of discretionary outlays by fiscal year 1986, and the easiest thing to do is hold off payment and delivery on replacement equipment, ammunition, and so on. The Carter administration pulled that frequently, with disastrous results.

Raising taxes would be faster. As a rule, revenue changes can be effected more quickly than outlays. So the showdown vote might well be between raising taxes or voting for a deficit. And on this crucial point, under the amendment, it would take 44 fewer votes to pass a tax increase—more than the margin of difference on most budget votes.

This hardly exhausts the constitutional, economic and technical implications of the amendment vote. To place the total debate in its full perspective for the long term. I would like to set forth a number of these for my colleagues.

The amendment could result in a massive transfer of power to the Federal courts in the spending area, since important terms, such as national income, are not defined in the amendment. The possibility of last-minute reductions in entitlement programs at the end of the year would virtually guarantee that the Federal courts would be brought into deciding Federal spending issues.

The balanced budget amendment makes the deficit the primary focus of fiscal policy. In the past few years we have made extraordinary gains in restoring economic growths to its rightful place among the goals of the Nation. In the 1980 election, the American people showed their overwhelming support for policies leading to investment, job creation, and increased real incomes. To accomplish these goals they were willing to take the risk of some short-term deficits—deficits largely created by the built-in spending requirements of past Congresses—in order to increase the ability of the Nation to support the Government.

Many people are concerned particularly with deficit spending at present because of the high level of nominal and real interest rates. However, we now have come to realize the large role of the present monetary policy in this condition; and the attention of Congress needs to be focused on monetary policy if there is to be any hope of reducing interest rates. Passage of the balanced budget amendment will take the focus of monetary policy as the primary problem with the financial markets and interest rates.

By making it easier to raise taxes than to run a deficit, the amendment is contrary to how economic theory would teach us to structure incentives. Taxes can be raised by a majority vote while a deficit requires a 60 percent vote. In the House it would take 44 fewer votes to pass a tax increase.

Federal borrowing to cover a deficit is bad for the economy because it diverts a portion of private savings away for capital formation to enabale the Government to gain command over a portion of its current output. Taxing also enables the Government to have at its disposal a portion of current output. Both borrowing and higher taxes come directly out of private savings. However, while taxation reduces the resources available for capital formation, it also reduces private savings and produces disincentives which adversely affect future output.

While the amendment presumably includes off-budget expenditures in total outlays, the impact of the amendment is limited to direct Federal outlays. It does not limit Federal loans or loan guarantees. It also ignores direct expenditures mandated through Federal regulation.

The amendment may result in more credit programs and more expenditures for the private and State and local sectors through regulation. This is a more harmful form of spending since it is concealed from the American people. It is also much harder to measure these mandated expenditures and the harm they do to the economy. The big spenders are too clever to let themselves be shackled by this amendment.

The amendment only requires the Congress to adopt—a balanced budget. This has been done before in the regular budget process, for example in 1980. But by the end of the fiscal year we have had large deficits. Mild economic fluctuations can have a major impact on the deficit. There is no way to anticipate accurately.

With personal income tax rates indexed for inflation, it is highly likely that Federal spending commitments will outstrip revenues as much of our current spending programs were designed with inflation induced revenue increases in mind. At the beginning of each fiscal year an unbalanced budget would likely lead to a long series of tax increases regardless of the economic situation faced by the economy. The economic harm done by these tax increases would place the Nation in a never ending spiral of spending and taxing which would be locked into the Constitution.

In the current year, a major part of the deficit has come from the recession, both from reduced revenues and increased spending. Much of the deficit was unexpected at the beginning of the fiscal year. Under the amendment, which requires that outlays not exceed the original estimate the Congress would have been forced to reduce spending in the current year. This would pose a terrible dilemma.

Federal spending which is both appropriated and spent in the current year is spending for transfers to individuals either as salaries or benefits. It is unimaginable that social safety net spending would be reduced in the face of recession. The majority of Federal personnel costs are for military personnel and cannot be reduced without impairing national security.

Other Federal outlays occur as the result of longer term commitments. To

reduce these outlays would require breaking of legal obligations, international agreements or other firm commitments. While this course could conceivably be taken, it would be only with grave damage to the prestige of the U.S. Government. Moreover, by the time the amendment could be in effect, 76 percent of all discretionary Federal spending will be for national defense. Thus, enactment of the amendment would place national security at the mercy of economic forecasting and fluctuations.

As I mentioned earlier, major technical error in the amendment is the omission of any control on Federal credit activity. The Congress has been particularly adept at hiding Federal spending off the budget in the guise of credit programs. These occur both as direct loans, usually at rates of interest below those paid by the Treasury, and as loan guarantees which alter the pecking order for credit assigned by the marketplace. Moreover, in some cases, such as guarantees to the World Bank, these credit allocations are removed even from the nonbinding credit budget. Under the proposed amendment these hidden expenditures would surely become the lions share of Federal spending.

The amendment could inhibit necessary defense buildups. Although the amendment allows the Congress to waive the provision for a balanced budget in any fiscal year in which a declaration of war is in effect, it would not allow such a waiver in the hostile climate before a war when a crash buildup may be necessary. It particularly would work to inhibit a quick defense buildup at the same time as the economy were in a recession (such as before World War II). It gives control of the defense posture of the Nation to 40 percent of the Congress. President Reagan has often said himself he would accept a deficit if it was required to help rebuild our Nation's defenses.

CONCLUSION

Mr. Chairman, I wish that I could join with my colleagues who support this amendment. I agree with them that the Federal Government should balance its budget. Our only difference is the means to the goal. I realize that emotion is on the side of the amendment and that I am swimming against the tide, but as a fiscal conservative I beg my colleagues to go beyond the surface issue and look at the ramifications of this amendment.

Economic growth brought about by correct monetary and fiscal policy and a wise use of Government regulation is the only path to a balanced budget. Balancing the budget will not bring higher incomes to American taxpayers. Economic growth will bring them higher real incomes and an increase in Federal revenues. We need jobs—jobs for all Americans and if this Nation achieved the full employment and price stability so vital to our future, the budget will be balanced.

The economic decline which has occurred over the past few years has placed American industry a full $600 billion below its productive capacity. Economic policies which would return to us the use of these resources would add $100 billion to Federal revenues and reduce substantially Federal payments for unemployment and basic needs.

To my friends who support this amendment I simply say, the way to balance the budget is to continue the budget cuts, tax rate reduction and regulatory relief efforts begun under President Reagan and begin to reform our monetary policy so as to give the American economy and people what is most needed—an honest, stable currency and low interest rates for a healthy free-enterprise system.

Mr. McCLORY. Mr. Chairman, I yield 30 seconds to the gentleman from New Jersey (Mr. RINALDO).

Mr. RODINO. Mr. Chairman, I also yield 1 minute to the gentleman from New Jersey (Mr. RINALDO).

Mr. RINALDO. Mr. Chairman, I have listened attentively to the debate today and want to express my deep concern at what I have seen.

I believe in a balanced Federal budget. I have voted to reduce excessive Government spending; to weed out inflationary regulations, to establish Inspectors General in Government departments to eliminate fraud and waste, to revise Federal procurement procedures to make more efficient us of limited funds, and I have proposed a number of ways of reducing the deficit through revised contracting procedures, elimination of low-priority programs, and "sunset" legislation that would help Congress to eliminate agencies that have outlived their usefulness.

But we are not debating substance today. We are not witnessing an effort to balance the budget. This is a political tug of war in which the leaders of our two parties are calling one another's bluff on a very serious issue.

Congress should not consider amending the Constitution in this type of atmosphere. We are talking about the most fundamental law of the land. Yet we have seen this resolution hastily scheduled in direct violation of the rules of the House of Representatives for politics—pure and simple.

Mr. Chairman, I agree with my distinguished colleague from New York (Mr. KEMP) that this amendment in its present form may compel Congress to raise taxes so massively in order to balance the budget, that we will be destroying any hope for an economic recovery. Therefore, under these conditions, it is possible that this amendment will do the very opposite of what its proponents hope it will accomplish.

We must have the benefit of expert testimony in hearings and much more profound and extensive debate than we can have in this atmosphere today. Therefore, I intend to vote "no."

□ 1340

Mr. McCLORY. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, we have listened to extensive debate. I think anyone who takes this subject lightly, anyone who suggests that those serious minded and thoughtful, studious, intellectual persons who have recommended that we should have a constitutional amendment, are engaged in gimmickry, or fiddling with the Constitution, and such changes are, themselves, irresponsible.

This is serious business. We are talking about fiscal management of the Federal Government, and the management of the fiscal business of the Government in recent years has been very poor. The people are demanding that we do something about it.

Thirty-one State legislatures are demanding that we convene a Second Constitutional Convention in order to take care of the subject of providing better fiscal management of the Government's business.

Now, it seems to me it is high time, this is the final hour in the Congress, for us to take action. I supported the establishment of a Congressional Budget Office. That was my first action here when I came to the Congress 20 years ago. I am disappointed that the Congressional Budget Office has been unable to fulfill this goal, this dream of providing for responsible management of the Government's fiscal business, but they have not fulfilled that goal.

We have tried to discipline ourselves by statute and in other ways, but the demands upon us come in, the special interests demand that we spend more than we take in. We are the ones who need the discipline. This constitutional amendment that has been proposed in a bipartisan way by Mr. JENKINS and Mr. CONABLE provides the mechanism through which we can regain control of Federal receipts and expenditures, and thus go on with the important business of the Government.

Several Members have argued that this amendment grants to the Federal courts the power to impose a balanced budget along the lines they see fit. This is a legitimate and important objection, for, if it were true, this amendment would surrender the most cherished right of a free people and the supreme prerogative of this House to an appointed elite, unanswerable to the people. This argument deserves an answer, and, fortunately, a satisfactory answer exists.

The Supreme Court has time and again made plain that it will not interfere in political questions. Even the most activist Justices have adhered to this limitation on their power. Writing for the Court in *Baker* v. *Carr*, 369 U.S. 186, 217 (1962), Justice William Brennan said:

> Prominent on the surface of any case held to involve a political question is found a textually demonstrable constitutional commitment of the issue to a coordinate political department. . . .

The text of this constitutional amendment clearly commits the enforcement of spending limitations to the Congress and the President. The existing Constitution already forbids the courts from ordering revenue increases, because those measures must originate in this House. If the Court is true to the doctrines announced by its own most adventuresome members, it may not use this amendment as an excuse to reduce spending or increase taxes.

There is, of course, the risk that the Court will exceed the limitations placed upon it by the Constitution. Indeed, there is a risk in having Federal courts at all, and many of our ancestors opposed adoption of the Constitution for precisely that reason. We take a similar risk every time we pass a law, for every law is capable of being misunderstood. Nevertheless, insofar as the English language can protect against willful misinterpretation and usurpation of power, the language of this amendment does so. If judges choose to interfere in the budgetary process, then they will have violated their oaths, and the Constitution already affords us a remedy for that.

If we look at other nations, with regard to borrowing funds from our Nation, we look at them and if they have unbalanced budgets, if they have large deficits, we say, "No, put your economic house in order."

Well, how about putting our economic house in order? This is the time and this is the hour.

I never signed a discharge petition before. It is my committee that is being discharged, but this is the only way, the only vehicle by which we can vote upon this issue. The people are demanding it, and an overwhelming number of Members of this body, the 218 who signed the discharge petition, and more, are demanding we take action.

The hour has come. Today is the day. We have a chance to regain control of our fiscal business in this body and to see that our Government moves forward responsibly.

Mr. RODINO. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. EDGAR).

Mr. EDGAR. Mr. Chairman, I rise in strong opposition to the constitutional amendment.

It is not wrong for us to balance our budget, but it is more important today for us to balance the priorities within that budget. All of the gentlemen and congressional Members on both sides of the aisle who have said, "Why cannot the Federal Government act like a business? Why does not the Federal Government act like each of the States in balancing its budget," forget one basic principle, that we operate with a unified budget.

We do not separate out our capital expenditures from our operating expenditures; we do not fund the new investments we make in ourselves over a 20- or 30-year period. We do not make critical investments carefully and we do not adequately maintain existing capital investments. We pay cash for new veterans' hospitals, for Tennessee Tombigbee Waterways, for central Arizona projects, and we put those capital investments that we make in the Nation into our unified budget, and of course it looks out of balance.

What we ought to be doing here at this moment, when we have a $2.5 to $3 trillion infrastructure that we need to make in this Nation, is not to be talking about a constitutional amendment to balance the budget, but to be looking at ways, in the unified budget, to separate out capital expenditures from operating expenditures like every State and like every business does, and make sure that when we put new items into the Federal budget, we know how we are going to be fiscally responsible in caring for those items over their life expectancy.

I am amused at how many Members on both sides of the aisle jump and stand up and talk about a balanced budget amendment to the Federal Constitution but who are not hesitant to support the Clinch River breeder reactor pork-barrel water projects, tobacco subsidies, and excessive spending for pet weapons projects without looking at priorities or how we are funding essential maintenance over a period of time.

The Wharton School of Business in Philadelphia says that the trillion-dollar debt that we carry is not necessarily bad, in and of itself. The United States has carried a debt since 1790, and the Constitution itself specifically authorizes Congress to borrow money. What is bad is that we do not pay the principal and the interest off so we can continue, 20 years from now, to continue to make investments which represent the mortgage we must carry in order to have a healthy and growing economy at full employment.

This Nation needs an investment, not meddling with the Constitution.

I have introduced legislation (H.R. 6591, the National Capital Investment Budget Act) designed to address the "hidden crisis" found in many States and localities, urban and rural, throughout the Nation. I refer to the critical decay of our public infrastructure—the vast, vital network of roads, bridges, tunnels, water lines, and transit systems—which we have neglected through shortage of funds, inadequate maintenance, and porkbarrel decisionmaking and at our future peril. Infrastructure represents the economic foundation of any modern industrial society. If these foundations are neglected, our prospects for economic recovery and growth will remain only a dream.

The decline in investment in public capital stock has occurred in virtually every public works activity. Today, one-quarter of our 42,500-mile Interstate Highway System is worn out and needs rebuilding. One-half of Conrail's rails and roadbeds are seriously decayed. Half of all the communities in the country cannot expand because their water treatment plants are at or near full capacity. Boston continues to lose 20 percent of its water supply through leaky pipes each day, while Houston loses up to 30 percent of its purified water daily through inadequate pipes. And one-fifth of all bridges have deteriorated to the point that they are either restricted or closed.

Indeed, the decay and deterioration of our basic public infrastructure is beginning to thwart the recovery of our national economy. As a number of recent studies have shown, private sector investment decisions are strongly influenced by the location and availability of reliable public facilities. They are usually a more important locational consideration than are local tax incentives or the availability of revenue bond financing.

Yet, the current practices of the Federal Government in both the executive and legislative branches only serve to exacerbate this problem. Budgeting for public works programs still happens on a piecemeal, project-by-project basis. In fact, most capital expenditures are made in the absence of even the most basic information and policies. The Federal Government has no inventory of its physical investments; no assessments of the condition or capacity of its existing facilities; and no plan for maintenance, repair, rehabilitation, and new construction.

It is for these reasons—to reform the fragmented approach to public works decisionmaking—that Representative BILL CLINGER and I recently introduced the "Federal Capital Investment Budget Act" (H.R. 6591). The present Federal budget can be characterized as a unitary budget in which no distinction is made between operating and capital expenditures. H.R. 6591 requires the Federal Government to do what most State and local governments and private businesses do—present separate capital and operating budget plans each fiscal year.

This change would allow the Federal Government to bring together in one place—for the first time—an inventory of its investment in buildings, roads, bridges, water, and transit systems. It would provide a clear picture of our national assets, how much they cost to build and maintain, and what sources of revenue they draw upon.

Adoption of such a capital budget system would significantly enhance the structure and the accountability of the budget process. But it would not alter the Congressional Budget Act in any way. Instead, it would amend the authority from which the President makes his annual budget submission to Congress. Only the Office of Management and Budget (OMB) currently has the manpower and resources necessary to prepare a comprehensive Federal capital budget. Specifically, H.R. 6591 would require a special analysis of our capital investments to be included with the fiscal 1984 budget, and a full capital budget to be prepared for fiscal year 1985. In addition, it would call for an annual inventory and needs assessment of our Nation's public facilities.

But this concept of capital budgeting is neither new nor unique. Whether or not the Federal Government should have a capital budget has been the subject of debate for many years. Nearly 24 years ago, Senator Hubert H. Humphrey called upon Congress to establish a Federal capital budget. His message to the Nation was clear:

Mr. President, it has been my observation that discussions of the budget engender more emotional outbursts than rational thought. One of the main reasons is that our annual budget report does not reveal an accurate fiscal picture. No business would think of lumping current expenditures in with its investments; yet that is just what our federal government does under the present bookkeeping system.

I say it is time that we put our bookkeeping system in order. It is time that we adopted a modern, up-to-date capital budget.* * * Until we do, there will be all kinds of heat, thunder, and fury about budgets, but very little light and constructive information and return.

Senator Humphrey's words, in large part, ring true today. The adoption of a Federal capital budget continues to be one of the most important procedural reforms for improving the conduct of the business of the Federal Government, for setting an example for better program planning at all levels of government, and for casting off the blinders of the single fiscal year point of view in favor of longer range financial planning.

I feel very strongly that this Nation will have to come to a capital budget if we are to rebuild our economy and improve the quality of life of our citizens. The capital budget is a tool for looking ahead, for raising our sights to take into account the needs of generations to come.

The provisions of this bill are a moderate and constructive first step in making the Federal budget procedures more understandable and meaningful—both to Congress and to the public—and for providing a more orderly and coordinated program of capital expenditures. Having said this, I must again say that this is a bill of fundamental importance and I fully recognize that its consideration will require a great deal of discussion. I welcome that process and I hope that there will be plenty of constructive criticism of the proposal, particularly from those versed in the technical aspects of budgetmaking, economic policy, and public administration.

While supporters of the balanced budget amendment have been playing political tricks and trying to fool the voters about the economic hard times we face, I have been working with Members from both parties who are truly dedicated to finding a way out of the present mess. I hope we defeat this deceptive amendment so we can face up to the true task of rebuilding the United States and providing economic growth and jobs.

Mr. RODINO. Mr. Chairman, I yield 1½ minutes to the Delegate from the District of Columbia (Mr. FAUNTROY).

Mr. FAUNTROY. Mr. Chairman, after 12 years on Capitol Hill, I have learned that if you want to turn people on, talk nonsense; if you want to turn people off, talk sense.

This constitutional amendment proposal is nonsense. The irony is that the very President and the very Members of the Congress who are responsible for the largest deficit in the history of this country, who will go down in history as the biggest spenders of this country, have the nerve to come to the American people and say, "If you are going to keep us from doing it to you, pass a law to keep us from doing it to you."

If we want to balance the budget, then what this country needs to do, what this Congress needs to do, is adopt the Congressional Black Caucus constructive alternative budget which not only gave us a balanced budget but a $7 billion surplus, that gave us $2 billion more in tax relief than was given by this House, but it gave it to the middle-income people of this country, the small businesses of this country that can give us the kind of economic leadership that will make us world competitive in the businesses and industries of the world.

If we want to balance the budget, cut the military budget.

If we want to balance the budget, cut the $1.7 trillion expenditures over the next 5 years on the military, more in 5 years than one can spend if one spent $1 million a day since Jesus was born.

To my colleagues in the Republican Party, the party of Lincoln, I say be guided by his wisdom.

You can fool some of the people all of the time and all of the people some of the time, but you cannot fool all of the American people all of the time.

Cut out this nonsense.

Mr. McCLORY. Mr. Chairman, I yield 4 minutes to the principal cosponsor of House Joint Resolution 350, the gentleman from New York (Mr. CONABLE).

□ 1350

Mr. MICHEL. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the distinguished minority leader.

Mr. MICHEL. Mr. Chairman, I rise in support of this measure. I think it is important before we vote to set politics aside for a moment and talk about the merits of such an amendment.

This Government has been wading in a river of red ink for so long, hardly anyone in this House remembers what it is like to walk on dry land.

There have been all kinds of attempts to balance the budget, but most of those efforts were for political reasons, not fiscal ones.

I cannot help but recall the balanced budget submitted by President Carter and the impassioned plea our distinguished majority leader made on behalf of that phony document on the floor of this House. That supposedly balanced budget resulted in a deficit of $60 billion, but it was good politics.

Then, too, I remember the law we passed requiring this Congress to come up with a balanced budget by next year.

We all recall the balanced budget amendment efforts of our friend and colleague from California, Mr. ROUSSELOT. I think for a couple of years running, his economic assumptions were closer to the mark, than either the CBO's or the administration's.

This year Mr. ROUSSELOT again proposed a balanced budget, and I had to come to the very difficult conclusion not to vote for it, only because I knew it was impossible of achievement this year.

That is our dismal record on deficits and balanced budget.

We have set goals, we have adopted rules, we have passed laws, and we have even passed balanced budgets, but we have ony been able to actually produce one in the past 25 years.

The reason is simple, the Congresses of the past have never demonstrated the will to do what it takes to enact a balanced budget.

We have gone as far as we can with the balanced budget issue in this Congress.

It is time to turn it over to the American people. It is time to give them the issue. It is time to say simply

to the people that your Congress cannot come to terms with it, you decide, you tell us what to do.

We know full well that a balanced budget is several years away. We were in error last year thinking it was possible by 1984. We knew full well the depth and the breadth of a 20-year spending spree.

It was wrong to assume we could just change the course of Government overnight, change attitudes, policies, practices, and the politics of favoritism that had become so engrained in the legislative process.

If we have made any mistake in the last 2 years, it was underestimating the damage that had been done to this country's economy and overestimating our ability to turn it around on a dime.

What, after all, is our goal? It is to live within our means.

Surely this is not a radical notion. And we have the President's words to guide us. In his Inaugural address he said this about his economic program:

Through this program of action we address ourselves to putting our own national house in order and making income balance outgo.

"Make income balance outgo." The President's words are clear and unmistakable.

Perhaps I should tell you that the President I have just quoted is not Ronald Reagan, but Franklin Delano Roosevelt on March 4, 1933.

Is it not time we begin to redeem this pledge? It has been almost 50 years.

We know now the magnitude of the problem and we know now that no ordinary course of action will suffice in solving it.

Insuring the fiscal security of the Government, providing for the responsible management of American tax dollars in future years will require nothing less than a change in the basic framework of the law of our land.

That is what we sought to accomplish through the indexing of our tax system: Providing a long-term safeguard for the American taxpayer against the midnight raids on his paycheck.

That is what we seek to accomplish through this amendment: a safeguard against future irresponsibility and a goal that we are obligated to achieve.

It has been said that the amendment would not work. That is wrong. It will. The reason is that it will be founded on public mandate and public decree, not political whim.

Public mandates work. When the people speak, we do listen.

Those who oppose this amendment simply do not want the people to speak. They do not want to hear. They do not want to obey the voice of the people.

But the people have spoken. They want this opportunity to rule. If we do not heed their voices today, we are unworthy of the sacred trust they have placed in us.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I rise in support of the Conable resolution.

Mr. Chairman, I stand in support of House Joint Resolution 350 calling for a Federal balanced budget through a constitutional amendment

Approving an add-on debts to the already enormous Federal deficit escalates inflation and interest rates and decreased the earning power of America's working taxpayers. It crowds out investment and production and cripples the ability of individuals and the private sector to save, invest, expand, and develop new resources and techologies. This is what stimulates our economy and creates the permanent, meaningful jobs that our Nation is seeking. We can balance the budget by reining in wasteful spending and by expanding the tax base by maintaining the present economic recovery program that sparks economic growth.

The 1978, Senator WILLIAM PROXMIRE joined me in criticizing the excessive deficits that are added to the Federal budget year after year. In the additional views to the Joint Economic Committee report of 1978 he said:

I believe that both the President's proposed $500 billion budget and this Committee's estimate of expenditures of $500 to $505 billion are too high. These expenditures represent an enormous burden on American taxpayers. They should be cut by a minimum of $25 billion and better, yet by $35 billion in order to provide a freeze on Federal outlays of about $165 billion as the distingushed financial expert Henry Kaufman proposed before the House Committee on the Budget.

Further, as one who has routinely examined the budgets of numerous Government agencies as a member of the Senate Appropriations Committee, I assert without fear of contradiction that there is not a single general Government function where a 5 to 7 percent cut of the funds could not result in a more efficient or less wasetful program combined with better services to the American public. One can name the function . . . and know from experience that the budget could be cut without harming the function.

The ever-increasing deficits like those recommended by the majority constitute a trend so ominous that even many of the liberal economists are claiming that we are deficit-addicted. They admit that deficits are no longer stabilizing to the concomy and that, rather than simply acting as an occasional stimulus, deficits have occurred in greater magnitude and regularity every year. The weakness of our past economic policies is that it removes the discipline of the balanced budget. Further, politically popular, but economical unproductive expenditures, can be easily clothed in the virtue of deficit-creating stimulus packages.

It is time to place restraints on increases in spending. While many of the chairmen of various House committees have lamented about the deficit that is facing us, they are at the same time recommending increases of more than $50 billion in spending. Apparently, the philosophical difference is that they want more and more spending and more and more taxes. I believe we should have less spending, less taxes and more prosperity.

There has been some good economic indications in the news recently. Inflation has all but disappeared as a major issue. Housing starts were up in February by 6 percent from January and nearly 12 percent from the October low. Building permits for privately owned housing units were up 16 percent in February from October, indicating more future increases in housing starts. The Industrial Production Index increased 1.6 percent in February, the first rise since last July. A near-record 57 percent of the working-age population is employed. The record is 59 percent. Income from wages and salaries rose $7.7 billion in the period from January to February. The deficit for the first 5 months of this fiscal year is $2 billion less than the deficit for the same period in fiscal year 1981. And, finally, interest rates, though still unacceptably high, have taken a drop in the past year. The prime rate, which was over 20 percent last summer, has dropped to 16.5 percent.

There are signs of economic recovery. The U.S. economy is entering the early stages of a recovery. The consumer price index has declined for the first time in 17 years. Air travel, which traditionally signals a change in consumer sentiment, is picking up and the sales of U.S.-made autos managed to increase 6.1 percent for the middle 10 days of April compared with the same period last year. The semiconductor industry, one of the last sectors of the economy to cave in, is showing signs of being about the first to rebound.

The time is now for this Congress to take action to balance the Federal budget and to place our Nation on an economically sound basis.

I want to say that I recognize the hard work of the members of the Budget Committee and the difficulties that they have faced. But the appalling fact is that, even after all their hard work, all the difficult choices, they continue to bring to the floor of the House budget resolutions which project deficits exceeding $100 billion. That means, Mr. Speaker, that if we continue to pass these resolutions a majority of the U.S. House of Representatives must go on record as stating that the deficits which are appropri-

ated for this year, or the next, or the one after that, are OK.

That is hogwash. Perhaps a majority of you here can cast such a vote by supporting the out-of-balance committee budgets, I certainly am convinced that a majority of the American people would not cast any such vote. I certainly cannot.

I support the President's economic recovery program. Because the President has shown the determination to control rampant Federal spending I have continued to not only support, but to advocate many of his restraints proposed for Government spending.

But coupled with that we have huge deficits—deficits which are now apparent to us all, but which also have put a hamstring on the control of Federal spending.

If we are to have any hope of getting on a sound economic basis, if we are to reduce interest rates, if we are to encourage job-creating economic growth, if we are to continue to hold down inflation, then I believe the present budget process must be substantially reshaped. Whenever Congress funds this deficit spending with increased revenues it means higher and higher taxes for our constituents. Revenues are too high.

The projected deficits are too alarming to be permitted to stand.

I do not contend that these deficits can be cut without discomfort, but the longer we put off getting on a sound economic basis the more difficult it will be for everybody—the rich and poor alike.

The Defense Department must be aware, for example, that while a strong national defense is essential, it cannot be maintained in the long run without a sound economy and soundly based financial structure. Entitlement programs cannot be exempt from reductions, except where we are awaiting the report of the committee which is not studying the entire scope of the social security program, with the mission of preserving its solvency.

We must have a credible program of deficit reduction—otherwise, the critical element of business and consumer confidence will be lacking, and a sound based and sustainable economic recovery will not be forthcoming.

I have discussed this subject with many prominent and noted economists and they overwhelmingly agree that while the seeds of recovery are in the ground—it does not insure a bumper crop. What is needed to tend to these seeds, the necessary nutrients and water and sunshine, is a drop, a substantial drop in interest rates. These economists all agree that an elimination of the Federal deficit would be just what the farmer ordered for these seeds.

What remains to be seen are the strength, the scope, and the duration of any such recovery. And the determination of that will depend to a significant extent on what is done by the Congress in acting on the budget.

The immediate and actual consequences of our budgetary decisions are considerable. But the psychological effects are even greater.

In summary, I must support the balanced budget amendment before us today for two basic reasons: One, spending is too high and, two, the deficits are too great.

For the past 11 years I have offered my balanced budget substitute resolution. The need for this resolution is even more pressing this year. It is imperative that the Congress send a signal—and a strong one—to Wall Street and the business community.

The deficits incurred by the rampant Federal spending of previous years is affecting the economy of this country. A lot of people lend money or have money loaned to them by others. They know about deficits and they know we have got to somehow do something about it. If not, we will have another period of superinflation. The Federal Reserve is going to be forced to loosen money enormously to prevent a disaster unless we have fiscal restraint here in the Congress.

Any approach that does not substantially reduce deficits will not be credible to those that lend money. Interest rates will not come down if large deficits are passed by the Congress. People have become educated about our deficit. Our colleague on the Senate side, Senator DOMENICI, has stated on the floor of the Senate that the budget process, for all its shortcomings, has finally convinced people that they ought to look at the budget for a few years into the future, make some projections and say, "something is wrong," or "gee, things are great."

Can you imagine, Mr. Chairman, how the business community would respond if we told them we had a balanced budget? I can tell you—they would say that interest rates would go down. That this is the signal that Wall Street has been waiting for.

Now, Mr. Chairman, can you imagine what these same lenders will say if we produced a budget with the deficits skyrocketing or even camouflaged with a social security budget shifted to the side? Surely, interest rates would not be lowered. It is now time to solve these deficit problems.

It is unrealistic to expect interest rates to come down when a $100 billion 1983 Federal deficit coupled with Federal off-budget borrowing will consume 80 percent of the personal savings of Americans.

As the Federal Government borrows more and more money, it leaves only a tiny residue of savings which can be used for personal and business loans. That scarcity of available savings keeps interest rates high. And if we do not bring interest rates down dramatically, and I am talking not 2 to 4 but 6 to 8 percentage points, we will face higher unemployment, ever greater numbers of bankruptcies, and the prospect of a return to double-digit inflation as pressures mount to increase the money supply to finance Federal borrowing.

Courage is what is needed here today. The American people want to go back to work. A balanced budget amendment will help accomplish this. Otherwise, we will have a weak economy, high unemployment, and further deficit spending.

Let us bear in mind that while reducing the interest rates—we will be putting Americans back to work.

While balancing the budget is not easy—and by no means politically popular in all circles—it is necessary. It is a budget that can initiate action and a budget that will show Americans that we mean action and can do it in a limited timeframe.

Judging by our current fiscal policy, the Congress has no intention of balancing the budget through an expanding economy. Today's high interest rates are wiping out all the economic gains that we could be making in response to the tax cuts that were enacted last year, 1981.

Day by day, inflation is increasing the tax burden levied on labor and capital. In so doing, it is virtually guaranteeing a recession. Inflation is a monetary phenomenon, and until we start trading tobacco leaves in the economy, as our forefathers did, inflation will continue to be a monetary phenomenon—caused by too much money chasing too few goods. If we are trying to slow down inflation, we should slow down the Federal Reserve's printing presses, not the productive economy, and the only way feasible to do this is to eliminate deficit spending.

Despite all the myths, we must face the cold facts as to what budget deficits are, and are not. Budget deficits represent an obligation that the Government has to those citizens from whom it has borrowed. It is an obligation to levy taxes on the general citizenry upon the maturity of the debt. In some instances the budget deficit is financed via the Federal Reserve bank's printing presses and this can be inflationary. Historically, the Fed's role in financing the debt has been partly to blame for our current high interest rates. The real problem with running budget deficits is that in most cases they are simply an expedient way of redistributing earnings from one segment of our society to another segment by forcing future generations to pay for the tab.

Unfortunately, today's generation of taxpayers is already paying part of the tab. With deficits growing, the Federal Government's obligation to increase

tax rates has also been growing. As a consequence, our Nation's financial managers have been systematically turning down high risk projects with paybacks too far off in the future. The bottom line has been that investment has been dropping off over a period of years and along with it productivity. The only reason investment has not fallen completely out of bed is because of the tax cuts we enacted last session.

Mr. Chairman, there can be no doubt of the need to balance the Federal budget. Large deficits associated with increased Federal spending either contribute to inflation or serve only to stifle investment because of the expectation of higher taxes in future years. Nor can there be any doubt that the drafters of our Constitution ever intended to provide the Congress with a free ride to spend to their heart's content by virtue of inflation and higher taxes. They adopted provision to limit the Federal Government—but adoption of the 16th amendment has lead to the emergence of powerful special interest groups in society who are competing for larger and larger shares of a growing Federal spending pie.

The Congress is in need of a new set of fiscal rules which automatically limits the growth and the size of the Federal pie by constraining the power to raise taxes either through inflation or by direct vote. Ironically, the more the Federal Government has spent, the less productive our economy has become.

Congress must renavigate its fiscal course and reduce the size and scope of Federal Government. We must put an end to the unconscionable Federal intrusions into the workings of our national economy. Congress has the power to restrain Federal Government spending and balance the budget.

But, do they have the courage?

If they do, they will face that tough decision and vote for a balanced budget amendment.

Mr. Chairman, the balanced budget substitute I have offered in previous years has experienced growing support among the Members of the House of Representatives. In 1975, when I first introduced it, it received 95 aye votes. In 1978 it received 170 aye votes. And in May 1980 this balanced budget resolution received 191 ayes to 218 noes—only a 27 vote margin. The reason?

The reason is simple. The balanced budget substitutes are based on an economic model which soundly stresses the interrelationships between large deficits and low productivity, high tax rates and low productivity, and high interest rates, caused by excessive money growth and Federal borrowing, and increasing tax rates. Together these factors influence our tax revenues and rate of economic growth. Unfortunately, the interrelationships of these factors is not well understood by some of the Members of this body.

Large deficits and higher tax rates will impede our Nation's economic development. The Members of this House have a chance to vote on a Balanced Budget Constitutional Amendment which does incorporate the interrelationship of these factors.

A yea vote will be for less Government, lower taxes, no deficits, less inflation, lower interest rates, and more productivity and greater employment opportunities. A nay vote will be for more Government, bigger deficits, more inflation, higher interest rates, less productivity and more unemployment.

The people of America will be watching with great interest how the Members vote on the reasonable balanced budget amendment.

Mr. Chairman, I will vote for this amendment and I hope that my colleagues will follow the lead of Mr. CONABLE and the 218 individuals that have signed the discharge petition in support of this proposal and cast their vote—and the vote of their constituents—for a Federal budget that will be balanced in future years.

Mr. MYERS. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Indiana.

Mr. MYERS. Mr. Chairman, I thank my colleague and my friend, Mr. CONABLE, of New York, for yielding to me. I strongly support this amendment. I regret that it had to come to the floor in this manner. A discharge petition, especially when in involves a constitutional amendment is not the proper and best way to consider such an important matter. And it is regrettable that the Congress of the United States has not shown the courage to discipline itself without holding a constitutional provision over our heads. If that is what it takes however, I am going to support it. We must take whatever means it takes to live within our means.

Mr. CONABLE. Mr. Chairman, we are now at the end of this general debate. We are about to move on to the discussion of the specific proposals. I would like to suggest to my colleagues that one way or another, we are going to have a constitutional amendment which will inhibit our total freedom of action to go on spending indefinitely as though there were no tomorrow. It may not be exactly in this form. It may not pass today, but we are going to have it.

The people expect it and are aware that it is in this body that our problems arise. Now, I have listened to the debate so far. There have been all kinds of efforts to discredit the constitutional amendment that is before us—ridicule; people who say it cannot be done; people who want to argue that we ought to have different priorities and therefore we could cut back on some of our major spending; people who deplore the timing of this as though it were political, even though those people themselves have more control over the timing than those who brought the petition of discharge.

Now, if we do not get it here as a result of our careful deliberations, as a result of negotiations between the House and Senate, over a period of 4 years, we are going to get it in a constitutional convention. We are very close to that now. I wish I could tell the Members that next year the peril is past, but next year we are going to be under great fiscal pressure again, and next year is the time when all the legislatures are going to be meeting again, and they are going to be pointing with alarm at what is happening in the Federal Government because of the avalanche of fiscal difficulty that rolls down our uncontrolled slopes.

Now, one way or another we are going to have it. The question is, Are we going to have it here as a result of our own work, or let it be taken away from us by people in a constitutional convention who do not have to live with the results of what they do? We know we have to live with those results, and this amendment is crafted so that we can live with it and so that we will nonetheless find ourselves operating in an environment where there is a considerably greater presumption in favor of fiscal discipline.

That should be our goal rather than a straitjacket. What comes out of a constitutional convention, assuming it can be successfully carried off, is very likely to be a straitjacket crafted by people who do not have to live with the results.

I have heard people ask that if President Reagan wants a balanced budget, why does he not come forward with it? We all know the condition that faces us right now. This House itself can dare President Reagan to submit a balanced budget, but it would not be supported, and we all know it. We know it would tear the social fabric were we to try to force it in 1 year.

One of the advantages of the proposal before us is that it gives plenty of notice to all involved that within a reasonable period of time we are going to have to live with this measure, elevated to a constitutional measure. It is a procedural change, not a substantive change, and as such it starts us down a road leading ultimately to the goal we all seek; namely, a budgetary process the American people can live with.

I hope, Mr. Chairman, that reason will prevail today. If it does not, mark my words, we will have it in some other way, in some other form, and quite possibly at a time and under circumstances that will be very much an embarrassment to the American people and to us.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

The gentleman from New Jersey (Mr. RODINO) has 3 minutes remaining.

Mr. RODINO. Mr. Chairman, I yield 1 minute to the gentleman from New York (Mr. MCHUGH).

Mr. McHUGH. Mr. Chairman, there are times when it is vital for the interests of our country that the Congress put responsible government above all other considerations, including narrow political ones. This should always be the case, of course, but it is essential when we are considering an amendment to the Constitution of the United States.

The Constitution is the fundamental law of our land. It embodies the basic precepts and values our people hold by consensus. It is the political compact which binds together past, present, and future generations of Americans. It must not be dealt with lightly.

Both proposals before us today would amend the Constitution and, for the first time, include therein a particular budget policy. Serious and responsible legislators must ask whether this unprecedented action is necessary and appropriate. I believe it is neither, Mr. Chairman, and I urge my colleagues to vote against these amendments.

A constitutional amendment is not necessary to balance the budget. In those years when a balanced budget is sound economic policy, the President and Congress have the means available to achieve that goal. It is, and always has been, a question of whether they have the political wisdom and will to do so.

The passage of a constitutional amendment will not provide wisdom or will. If those qualities are absent, ways can be found to get around the constitutional mandate. More spending can be put off-budget, or a separate capital budget can be established, to cite just two obvious examples. Thus, a constitutional amendment gives no assurance that future budgets will be balanced, but merely gives the illusion that its proponents are doing something about deficits. This may be good politics, but it is irresponsible government.

It is particularly ironic that the most vigorous supporters of a constitutional amendment, including President Reagan, are the very people who have given us the largest budget deficits in our history. If they are serious about a balanced budget, let them produce one. They do not need to fiddle with the Constitution to do so.

But it is clear that they are not serious. They have presented no balanced budget or anything close to one. Rather than deal with the wreckage of their current economic programs, they seek to divert attention by proposing a constitutional amendment which, under the best of circumstances, would have no effect for some years in the future.

This country faces serious economic problems today. We are experiencing the worst record of bankruptcies and unemployment since the Depression—today. We have the worst budget deficits in our history—today. Let the President and Congress deal with these problems today, not at some undetermined date in the future.

The people of our country want honesty and leadership from their representatives, not misleading and hypocritical rhetoric. Mr. Chairman, I agree with the Washington Post editorial of June 21, 1982, which said:

> It is grotesque for Senators and a President who cannot get their current deficit under $100 billion to support, piously, constitutional language putting it at zero.

The basic point, Mr. Chairman, is that constitutional language alone will not assure sound economic policies. Only sensible tax and spending decisions can do that. Tampering with our Constitution is no guarantee that such decisions will be made, and if the political wisdom and will exist to make them, no constitutional mandate is required.

In a very real sense, therefore, a constitutional amendment is not necessary. Beyond that, it is inappropriate and in certain circumstances even dangerous. I would agree with most economists who say that in good economic times when we have full employment, we should have our budgets in balance. I also agree that Congress has not been sufficiently diligent about this in the past. However, this is no argument for a fundamentally flawed constitutional amendment. It is an argument for greater diligence, wisdom, and political will year to year.

The constitutional amendment is flawed and even dangerous because it will preclude Congress from responding appropriately to changing economic conditions. There are times when economic conditions require some deficit spending. In a recession, for example, higher Government expenditures are inevitable and indeed necessary. People who are unemployed must rely upon unemployment benefits, medicaid, food stamps, and other support programs to survive. Tax revenues also decline at such times. If a balanced budget were mandated by the Constitution, Congress would either have to raise taxes or cut spending programs deeply. In many cases, this would impose intolerable hardships or deepen the economic crisis, or both. Congress must retain the flexibility to deal with these economic conditions.

The proponents of the amendment argue that in such cases a three-fifths majority of Congress could vote to suspend the balanced budget requirement. Experience teaches, however, that such a majority is difficult to achieve even on less controversial matters. In effect, a determined minority of Congress could thwart what would clearly be in the interest of the majority of Americans.

Mr. Chairman, we must not allow political expediency to override responsible government. The Constitution is not the place to write economic policy or enshrine a rigid economic formula. Let us deal wisely with our current economic problems, but let us not put future legislators in a straitjacket which could prevent them from dealing with future economic circumstances in a way which they think necessary.

I urge my colleagues to reject these constitutional amendments.

Mr. RODINO. Mr. Chairman, I yield 30 seconds to the gentleman from Iowa (Mr. HARKIN).

Mr. HARKIN. Mr. Chairman, I rise in opposition to House Joint Resolution 350 and in support of the Alexander substitute.

Mr. Chairman, I rise in opposition to House Joint Resolution 350 and in support of the substitute offered by the gentleman from Arkansas (Mr. ALEXANDER). I have many problems with House Joint Resolution 350.

First of all is that it would involve the courts, and certainly the Supreme Court, in writing the budget of the United States. For example in section 1 of the proposed constitutional amendment it says:

> SECTION 1. Prior to each fiscal year the Congress shall adopt a statement of receipts and outlays for that year in which total outlays are no greater than total receipts.

My question is; Who determines what a fiscal year is? We must rely upon the report of the Senate Judiciary Committee on its balanced budget amendment which is about the same as House Joint Resolution 350. On page 44 of that report, it defines fiscal year as follows:

> Fiscal year is intended as a term defined by statute, and as such, is to have no constitutional standing apart from its statutory definition . . . the amendment does not require an immutable definition of fiscal year; other fiscal years could be defined without straining the intent.

So there you have it. We could have a 12-month fiscal year, or a 15-month fiscal year, or a 24-month fiscal year. And who would be the final arbiter of this? The courts. This could create all kinds of problems for future Congresses.

The second problem I have with this proposed amendment is in the statement concerning "national income" in section 2. That is the section that says that tax receipts could not increases any faster than the rate of increases of national income during the previous calendar year. What is national income? Give me 10 economists and I can give you 10 different definitions. Again I refer to the Senate report, on page 49, which states that:

The precise concept of the national income is intended to remain subject to the discretion of the Congress. Currently reported concepts include Gross National Product, Net National Product, National Income, Personal Income, Disposable Personal Income, and Gross Domestic Product. Any of these may be chosen, as might some new measure determined by the Congress.

So again there you have it. If some future Congress were to get in trouble and needed to increase taxes at a greater rate, they would simply redefine "national income" and again you invite the courts in to decide the question.

The third problem I have with this proposed amendment is section 3, which provides for a waiver of a balanced budget when a declaration of war is in effect. We spent a lot of money in the years 1939-41 to help our allies before we ever declared war on Nazi Germany. There might be, in fact there probably will be, instances in the future when we wish to assist our allies in defeating totalitarianism, but we may not wish to have a formal declaration of war in effect. This section is particularly onerous and would not allow for flexibility in meeting international crises.

The fourth problem I have with this proposed amendment is that it focuses entirely on Congress. However, in the last 39 years, the President of the United States has requested more money than Congress has spent in all but two of those 39 years. Just think of it, Congress appropriated less money than President Eisenhower requested. Congress even appropriated less money than Richard Nixon requested. So as the leader of our country, the Chief Executive ought to be required to also pay attention to a balanced budget.

It is for these reasons that I will support the substitute offered by Representative ALEXANDER. While it also is not perfect, it certainly is a good deal better than House Joint Resolution 350.

First, the Alexander substitute specifically does not involve the courts in determining our budgets in the future. Second, the Alexander substitute does not require some algebraic determination of national imcome to be made by the Congress or by the courts.

Third, the Alexander substitute recognizes that we may wish to meet a national emergency without a declaration of war and thus wisely allows an unbalanced budget in case Congress determines national emergency exists. This is wise. The voters could then decide whether or not their elected representative should have voted to declare a national emergency or not, and thus decide whether to hold that representative accountable or not for voting for an unbalanced budget. It would not require a formal decaration of war.

But most importantly, the Alexander substitute involves the Chief Executive, our President, in this process by holding our future Presidents' feet to the fire also. Section 1 of the Alexander substitute states:

The President shall, no later than the 15 days after the Congress convenes, submit to the Congress a proposed statement of receipts and outlays for the next fiscal year in which total outlays are no greater than total receipts.

This is most important because as our country's leader, the focus should be on the President's determination of priorities, and by mandating the President to submit a balanced budget, the people of this country will know very clearly what their Chief Executive wants during that President's term in office.

The Alexander substitute provides the kind of clear, simple, and straightforward statement of basic principles which is appropriate for inclusion into the U.S. Constitution. Unlike House Joint Resolution 350, it does not mandate specific procedures, economic formulas, and open the floodgates for judicial intervention. The basic system of separation of powers put into the Constitution by our forefathers should not be so lightly tampered with. The judicial branch has no business being involved in a legislative process.

The Alexander substitute also properly requires that the President share responsibility for balancing the budget. After all, he is the Chief Executive, and the Chief Executive of this country like the chief executives of any private business or corporation, must be involved in setting the course and the priorities for this country.

So I support the Alexander substitute as the best possible constitutional amendment. However, I remain firm in my conviction that if the Congress were to act responsibly and adopt the pay-as-you-go budget offered this year by Representative GEORGE MILLER, it would be the best solution to this problem of burgeoning deficits. Remember the Miller budget was the only one, I repeat, the only one of the budget votes this year that, according to the nonpartisan Congressional Budget Office, would have guaranteed a budget surplus by 1985.

This budget proposal received 181 votes, the second highest number of all the budgets we voted on. This proposed constitutional amendment, either the Alexander substitute or House Joint Resolution 350, may not even go into effect for the next 10 years. But we will be broke by then, and I really mean broke, unless we change our ways. That is why we must adopt the pay-as-you-go budget.

If the financial markets of this country knew that we would have a balanced budget by 1985, interest rates would plummet, farmers' incomes would rise, homebuilders would be back at work, and we would truly be on the road to economic recovery.

I have the feeling that most people who are pushing this constitutional amendment feel they may not be here 10 years from now when it would take effect, but they will be here between now and 1985 and they do not want to make the hard decisions that the Miller pay-as-you-go budget would require. So this whole hoopla about this constitutional amendment I see as just another attempt by many Members to shirk their responsibility and to push off into the future these hard choices. So while I will support the Alexander substitute as the best one presented, I will continue to push for and fight for adoption of the pay-as-you-go budget which will really bring our budget into balance and introduce a concept that may be somewhat strange to many Members: The concept of responsibility.

I just want to read for the Members and for those who may read this the text of the Alexander substitute:

SECTION 1. The President shall, no later than the fifteen days after the Congress convenes, submit to the Congress a proposed statement of receipts and outlays for the next fiscal year in which total outlays are no greater than total receipts.

SECTION 2. Prior to each fiscal year the Congress shall adopt a statement of receipts and outlays for that year in which total outlays are no greater than total receipts, except that the Congress may, by declaration of National Emergency, adopt a statement of receipts and outlays in which total outlays are greater than total receipts.

SECTION 3. The Congress shall implement this Article by appropriate legislation.

SECTION 4. This Article shall not be deemed to provide any person with any legal right or cause of action not otherwise provided by this Constitution or the laws of the United States.

SECTION 5. This article does not provide any powers to the President to enforce its provisions other than any powers which may be established by law.

SECTION 6. This article shall take effect for the second fiscal year beginning after its ratification.

Mr. RODINO. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania (Mr. WILLIAM J. COYNE).

Mr. WILLIAM J. COYNE. Mr. Chairman, I suspect that most of my colleagues, like myself, are distressed by the trillion-dollar national debt and the unprecedented deficit confronting us this year.

I doubt, however, that most are yet aware that the balanced budget-tax limitation amendment is a delusion.

Something called a balanced budget amendment will rule out unbalanced Federal budgets in the future, right? Wrong. The amendment itself contains language permitting Congress to continue to vote for deficits.

This amendment is supported by those who, having exhausted all existing means to balance the budget, now

turn in desperation to the Constitution, right? Wrong. President Reagan pleads for public support for this amendment without so much as a whisper that his own budget proposals comprised the biggest budget-busting operations ever witnessed on Capitol Hill.

While I shall not provide the charts and shrinking dollar bills that President Reagan finds so helpful in describing the reasons for his economic decisions, let me share with you some rather stark facts about the administration which asks that we adopt a balanced budget amendment:

Even with the adoption of the recent $98 billion tax increase, the Federal deficit is expected to average $143 billion a year over the 4 years of the Reagan administration.

By the end of President Reagan's term of office, the total national debt is expected to reach $1.7 trillion. This administration alone will have amassed 41 percent of that debt.

Despite President Reagan's contention that the economic ills of our country must be laid at the door of the previous administration, the smallest deficit of the Reagan administration, $112 billion, is nearly twice as large as the largest deficit of the Carter administration, $60 billion.

Those of us in Congress who tried to restore budget sanity last year and this year were overwhelmed by the White House. Every Democratic alternative budget considered this year, it should be noted, would have produced lower deficits cumulatively over 3 years than any Republican proposal, including the administration's.

Some would suggest the balanced budget amendment is supported by those who put the Nation's fiscal well-being ahead of personal interest and social philosophy. Wrong again. Major proponents of this amendment include those who consistently oppose social programs for the underprivileged while championing the cause of the military-industrial establishment. It is more than curious in this connection that social programs typically are financed out in the open through the budget process, while many of the programs which aid the wealthy and giant corporations are provided through the back door through tax loopholes that never appear as budget items.

The arguments in favor of this amendment are more ideological than fiscal. Few believe that the administration and its allies would, if the amendment were in effect this year, press for decreases in military spending or for changes in some of the income tax cuts adopted last year. Based on every indication to date, the administration would try to cut housing, mass transit, social security, welfare, health, and other social programs.

Mr. Chairman, the question of the hour for the Nation is not whether we balance the budget. It is whether this Congress, and this administration, will employ the unemployed. I ask the sponsors of this amendment the question that thousands of Pennsylvanians would ask about any measure considered in the final hours of this session: What will this bill do for new jobs?

It will, of course, do nothing. Moreover, by straitjacketing the Congress in the midst of a severe recession, it could prevent the necessary decisions which could forestall economic calamity. The Reagan administration's economic policies have caused our economy to go into a state of shock. A balanced budget amendment could make it comatose.

A vote or statement for the balanced budget amendment may ease some consciences and fool some of the public for a short time. It is not a substitute for biting the bullet in the hard decisions in setting the Nation's spending and tax priorities.

Amendments to the Constitution do not balance budgets. That is the function of the elected representatives. Our actions are appropriately judged by the people at election time. That is how we have conducted the affairs of this Nation for more than 200 years. I see no reason, politically attractive though a balanced budget may be in an election year, to alter our Constitution, and our budgetmaking process, in so radical a manner.

I urge my colleagues to defeat this resolution.

Mr. RODINO. Mr. Chairman I yield such time as he may consume to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Chairman, One of the true signs of genius among the Nation's Founders lay in the nature of the document they produced under which to operate our democracy.

Simple, straightforward, and flexible.

The Founders also made it difficult to amend.

And for good reason.

Were it easy, they reasoned, transitory political pressures or some temporary social attitude might suddenly be enshrined in our most organic and basic political document.

A lengthy process, requiring an extra majority would be sufficient to allow for a reasoned examination, a dispassionate review and deliberate judgment.

Could it be that the Founders had in mind the vacuous sophistry that is embodied in the probalanced budget amendment; the antiabortion amendment; the proschool prayer amendment; the antischool busing amendment?

The Constitution was not designed to freeze permanently in concrete answers to sensitive social and economic issues that this Congress should be addressing every day that we are in session.

This Congress must squarely confront the Nation's problems without resorting to putting the Constitution on the rack, torturing and distorting it to provide a quick fix for the perceived problems of the moment.

Mr. Speaker, the balanced budget amendment proposed by the President is nothing more than a diversionary tactic aimed at deflecting the growing public perception that it is the President who is responsible for the state of our economy; it is the President who is to blame for soaring unemployment rates and painfully high interest rates; and it is the President who is responsible for a recession that continues to bankrupt American busineses at a higher annual rate than at any time since the Great Depression.

Worse than a mere diversion, the Republican balanced budget amendment would dangerously trivialize the Constitution. Our Constitution has served us nobly for two centuries unchanged in the beauty of its form, structure, balance and symmetry. Let us resist the impulse to tinker and meddle. Let us get on with the job of bringing sanity and rationality to the management of the fiscal affairs of our Government.

We are paid to fulfill this responsibility, we are competent to meet this challenge. Let us get on with it, without further ado or diversionary sallies

Mr. RODINO. Mr. Chairman, I yield such time as he may consume to the gentleman from Michigan (Mr. CONYERS) a member of the committee.

Mr. CONYERS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, today we are debating a constitutional amendment to require a balanced budget for the Federal Government. The President has forced Congress to vote on the measure. In so doing, the House is being asked to vote on a fundamental issue without any thorough debate. It is doing so on the last day before the election recess, hardly a method for judicious consideration of such a weighty matter.

The Nation today is in the throes of a major economic crisis, a national economic depression, as I see it, a severe recession, for the euphemistically inclined.

The crisis today is one of intolerable unemployment and economic collapse, especially in the industrial sector. A balanced budget, desirable as it may be in principle, is not the answer to our problems. It will not and cannot provide the magical solution that its proponents promise. Balancing the Federal budget will not create any new jobs, or make American industry more competitive with Japan and others, or increase factory orders so that industry, now operating at roughtly two-

thirds capacity, can return to full production. Without addressing ourselves to these issues, there is no hope to turn the economy around.

The constitutional amendment to balance the Federal budget is a gigantic smokescreen, plain and simple, to divert attention from the real problems of the economy and the real faults of current economic policy. Sadly, a great many citizens have bought the alibi of a balanced budget since their President, one of the great symbolmakers of recent years, has thrust it before them.

Citizens are understandably upset and frightened about economic conditions. In the past few years they have heard the administration promise a dramatic turnabout only to find that matters went from bad to worse. Nor have citizens reason to depend on Congress to solve the economic problem. Our track record in the recent past is not laudable.

The Constitution is not the proper place for making economic policy, just as it was not the place for prohibition or other social and moral measures in the past.

Recently, over 400 economists, many of them among the most distinguished in the Nation, urged Congress to defeat a balanced budget amendment. They warned that such an amendment would rob Congress of any flexibility in dealing with changing economic conditions and economic emergencies. They warned that such an amendment would probably force Congress to cut taxes whenever the economy is strong, which would only fuel inflation, or cut spending when the economy is on its knees, which only would make matters even worse.

A recent study of the economic impact of a balanced budget amendment shows that the unemployment rate would be even higher today, and the economic growth rate, even lower, if we had in place a constitutional amendment mandating a balanced budget. This study indicated that in the 1974-75 recession, under a balanced budget, the jobless rate then would have been above 12 percent, rather than the actual 8.5 percent, and real GNP would have plunged by 12 percent rather than the 2.5 percent, as was the case back then.

It simply does not make sense to require Congress to cut Federal spending in the throes of a severe recession, which the constitutional amendment would require. That was tried in the late 1920's under Herbert Hoover, and the result was the Great Depression.

Can this body, without any serious debate, at the last possible moment, and working under the gun, render a prudent decision on this basic issue? Of course, not. Are we about to repeat the experience of last year, when the President forced Congress to vote on a budget resolution, which few Members had any time to digest or understand, and which led to such regrettable results? I hope not.

Congress and the Nation should concentrate now on reviving the Nation's economy, not straitjacketing the Federal Government through a constitutional amendment requiring a balanced budget.

What the Nation needs today is a full employment policy, a policy that places job creation as the top Federal priority. We need also a framework for intelligent, long-range, democratic community and national economic planning. A good start, but a small one, was recently made in fashioning a major new job training program. Congress should also return to the framework proposed in the Full Employment and Balanced Growth Act of 1978—which is the law, and yet has been so completely disregarded by the past two administrations.

● Mr. BROWN of California. Mr. Chairman, we have before us today an "apple pie" issue—an issue which, on the surface—appears logical and reasonable. In the best of all possible worlds, House Joint Resolution 350 to provide for a balanced budget amendment to the Constitution might be ideal. But this is not the best of all possible worlds. On such a momentous decision we must not only be pragmatic, but apolitical.

This morning's Washington Post reported that the Congressional Budget Office has warned against the consequences of forcing a balanced budget. Other nonpartisan economic analysts have issued similar warnings. To balance the budget by fiscal year 1985 would require higher taxes and more spending cuts that "would add up to $170 billion, or 4 percent of GNP." Such governmental fiscal policy could plunge our Nation into further recession—a recession which is already the worst since World War II. And with a deepening recession comes further losses in revenues. It has been estimated that for each percentage point of unemployment, the Federal Government loses $25 to $40 billion in lost revenue and increased costs. In addition, should a national emergency arise, whether economic, political, or natural, the Congress hands would be tied under this amendment.

Mr. Chairman, the Congress, along with the executive branch, has the responsibility to formulate a solid fiscal policy. But a balanced budget amendment to the Constitution, the most sacred of U.S. political documents, is not the proper approach. Instead, Congress—and the executive branch—should concentrate its efforts toward improving the economy, providing more productive jobs, eliminating wasteful governmental programs, and preparing our Nation for a more competitive international marketplace. By supporting a balanced budget amendment as outlined in House Joint Resolution 350 with its severe restrictions, Congress will be abdicating its fiscal responsibility; and such a measure could actually exacerbate our economic problems.

Mr. Chairman, after careful consideration and with some reservations, I shall support the substitute offered by Mr. ALEXANDER. I will support this measure because, one, it recognizes the shared fiscal responsibility of the executive and legislative branches by requiring the President to submit to Congress a balanced budget; and two, the Alexander substitute would allow Congress to define a national emergency. Many of us here today might consider a national unemployment rate creeping over 10 percent a national emergency. Many of us here might consider a major natural disaster, such as a great earthquake, a national emergency. Many of us here might consider the widespread deterioration of our industrial base—the failures we have seen in our steel and auto industry—as a national emergency. I am one Member who is not willing to abdicate this responsibility.

Congress has had for nearly 200 years the responsibility for providing a fiscal policy for this country. I cannot say that I have always agreed with its policies, but I will not abdicate it. Nor will I abdicate my responsibility to provide for the citizenry of this nation in times of emergency. Resolving these two responsibilities can, at times, be difficult, but it is part of the job we have been elected to do. Let us be permitted to do that job.●

● Mr. HILLIS. Mr. Chairman, it has been a long road to bring the House of Representatives to the point we now find ourselves. Clearly, we have waited too long to respond to the desires of the majority of the American people and to the economic problems created by huge Federal deficits.

No rational person can examine the fiscal state of the Federal Government and not come to the conclusion that a balanced budget amendment is needed. Earlier this year the Federal Government surpassed the trillion-dollar debt figure. We now have an annual deficit in excess of $100 billion. The interest alone in fiscal year 1983 to finance the public debt will be $113 billion. We simply cannot continue to allow these deficits to go unabated.

I realize there are some who will argue that a balanced budget amendment is unnecessary. Some seem to believe that if the Congress and the President had the same desire to produce a balanced budget, any amendment to the Constitution would be rendered moot.

That position neglects to recognize the realities of the world in which we live. We currently have a President who would deeply love to see the Fed-

eral budget balanced. President Carter before him, and President Ford before him, shared in that desire. Further, I am reasonably sure that well over a majority of both the House and Senate would like to see the fiscal year 1983 Federal budget balanced. And yet the deficit for fiscal year 1983 will probably be over $100 billion. Obviously, the Congress and the President lack the institutional tools to overcome the political pressures to spend more than we should.

There are some Members of the House who rightfully worry that chaos would result if we were forced to operate under a balanced budget. I would say to those Members that before coming to Congress in 1971, I served 4 years in the Indiana General Assembly. Then, as now, Indiana had a constitutional requirement that the State budget be balanced. Chaos did not result, fiscal responsibility resulted. Indiana does not have to finance a debt and is in much better condition than most States because of that balanced budget requirement.

Earlier today I heard some Members question the timing of this resolution. If someone did not know the history of this issue, one could conclude that the fact we are only a month away from an election might have had something to do with the timing of this debate.

For anyone who might draw that conclusion, consider the fact that House Joint Resolution 350 was introduced in October 1981. The leadership of the House has had numerous opportunities to bring this measure before the House for a full debate and vote. Earlier this year we spent months meeting but 1 or 2 days a week.

The only reason we find ourselves debating this most important issue before the Nation today, on the last day we meet before the election, is that leadership's hand was forced into action by the discharge petition. It would have been preferable to have had this amendment before us in the summer like the Senate did. Then there would have been a much better opportunity to study the substitute amendment offered by the gentleman from Arkansas.

No one who supports House Joint Resolution 350 takes amending the Constitution lightly. Any amendment to the Constitution should be very carefully studied. We should all be reluctant to support a proposed amendment until we are convinced of its merits. Notwithstanding some of the claims that this particular amendment has been poorly drafted or brought before the House in a hurried manner, this amendment is the result of considerable effort and study. Its provisions have been carefully drafted to insure that it is the best possible amendment which can be brought before the House. It allows by a vote of 60 percent of both Houses of Congress for deficit spending when a national emergency exists which would necessitate additional spending.

We should also keep in mind that passage of this amendment, even if the other body concurs in our action, does not ratify the amendment. It will still have to be ratified by 33 States before it becomes operable. Further, the Congress will have 2 years to prepare itself for whatever changes in rules and procedure may be necessary after the 33 States have ratified the amendment.

This is good legislation. It is good policy. It is what the American people want. It is the only realistic opportunity we have to save our children and grandchildren from crippling deficits and interest rates. House Joint Resolution 350 is the only hope we have to force the Congress to act in a fiscally responsible manner. We have tried to change the budget process, most recently with the Budget Act of 1974. We have passed laws requiring balanced budgets. We have tried zero based budgeting. We seem to have tried almost everything and nothing has worked. We must have a constitutional amendment if we are to be successful.

I urge defeat of the Alexander amendment and passage of House Joint Resolution 350.●

● Mr. ROBERTS of South Dakota. Mr. Chairman, as an original cosponsor of House Joint Resolution 350, I rise in strong support of the resolution calling for a balanced budget constitutional amendment.

I think it is clear that the people of this country are demanding that Congress take a more responsible approach to dealing with the enormous task of putting together the Federal budget.

In essence, this voting card which we use is the public's credit card. Our constituents have given us the use of their credit card, and it is up to us to see that we do not exceed the credit limit. The Congress has not done a good job in meeting that fiscal responsibility. Congress has consistently used the public credit card to charge more than America's taxpayers could cover.

The citizens of this country are tired of the reckless spending that has become a way of life here in Washington. They want a balanced budget, and they know that the only way to insure that this Congress meets that directive is to have a constitutional amendment mandating that balanced budget.

Those who have determined that we should represent them here in Congress are urging us to meet the challenge of fiscal responsibility.

I plan to meet that challenge by voting in favor of the resolution calling for a balanced budget constitutional amendment, and I would urge my colleagues to do the same.●

● Mr. MAVROULES. Mr. Chairman, I rise in opposition to the balanced budget amendment proposal.

Excessive Federal spending has cast a dark shadow over this Nation's economic prospects.

Today Federal deficits are making it difficult for every American to plan for his future. School loans are harder to come by, as a result. So are homes.

Over 17,000 small businesses went bankrupt last year; 25,000 are expected to go bankrupt this year. And of course, we have over 10 million unemployed Americans—the result of the ill conceived economic program now in place.

We cannot afford to wait any longer. The Federal Government must confront the problems generated by its fiscal policy head on.

But a constitutional amendment to balance the budget, for all its political appeal, is a copout.

It would effectively handcuff Government from dealing in a meaningful way with our recession. Second, a constitutional amendment would let us all off the hook.

A constitutional amendment would essentially put the economy on automatic pilot, usurping Congress authority to use its taxing and fiscal powers to address national needs during time of economic urgency.

I believe this administration and Congress can balance the budget responsibly, effectively—and fairly—without resorting to snake oil, and what at first blush is an extremely attractive idea.

Instead, what is needed to balance the budget is a moral commitment and the courage on the part of Congress to bite the bullet and strike a balance now between revenues and spending.

During earlier budget considerations this summer, we had the opportunity to force Congress to meet its responsibilities head on and make the hard choices.

First proposed by the gentleman from California, GEORGE MILLER, the pay as you go method presents a commonsense approach to meeting our fiscal responsibilities.

It is not based on radical, punitive domestic cuts. Or unreasonable tax increases. Or massive deficits.

It is based on the notion that what we want, we pay for—either by voting for the revenues in the clear light of day, or voting for the budget cuts that would now fund the programs we want.

It treats all programs, all interests and all constituencies as equals. And sends a message to Congress and the President that when a new program is proposed or an existing one expanded, we must demonstrate the courage of our conviction to stand up and pay for that spending.

Using this approach, the Congressional Budget Office projects a budget surplus of over $27 billion by 1985. All other budget plans still leave us in the red.

Time is running out on all of us. Let us face up to our responsibilities and address head on our problems.

A constitutional amendment to balance the budget would not do this, but the pay as you go scheme does exactly that for those of us who make budget decisions each day.●

● Mr. FRENZEL. Mr. Chairman, I have been a reluctant supporter of the balanced budget amendment. I sponsored it. I signed the discharge petition. But, I have never felt it is anything near a good solution to the problem.

The problem is not the Constitution. It is the Congress. A responsible Congress would drive all thoughts of constitutional amendment from the minds of the most flinthearted.

We have the power to control spending now. We have always had it. We are just unwilling to act responsibly, so the people of this country have begun to demand a constitutional restraint device to keep our greedy little fingers out of their Treasury.

Will it work? Nobody knows, not even its most enthusiastic backers. Will it do any harm? We do not know that, either, but it is certainly not without heavy risk.

But one stark fact dominates the discussion, and forces all others into the background. That is, there is no other way to bring the Congress into the world of reality. The status quo of continuous deficits is unacceptable.

We have talked about the difficulties of the constitutional amendment for years. It may be draconian in time of recession. It may simply drive taxes up to their real levels, rather than having people pay both taxes and inflation tribute. It may jolt us back to chiseling on budget estimates as we did in the earlier years of the budget process. The courts will surely have a field day with it.

Those are real problems, but they do not overshadow the fact that we have no other weapon to attack our own weakness.

For years, I have pushed for a balanced budget law. It would be a great way to get a little practice, or to work the lumps out of an amendment, if one should still be needed. But, our spenders, led by our Speaker, have repeatedly stifled that approach. They wanted no limits on their ability to dispense largesse, and in a real sense, their willfullness has spawned today's confrontation. They could have worked the problem. They chose to stonewall it.

It takes two-thirds of this body to pass a constitutional amendment. That is unlikely to be achieved today. But I think the balanced budget amendment is the only two by four left. To attract the attention of the congressional mule, the people must use it, although it is admittedly a blunt instrument, to continue battering their profligate representatives until they do achieve discipline.

There is one other less persuasive reason to vote for the amendment. It is the only sane way to forestall the growing momentum for a Constitutional Convention, which, in my judgment, is worth avoiding.

Therefore, I shall vote for the balanced budget amendment, not with powerful enthusiasm, nor with a strong hope of passing it today, but with security in the knowledge that there is no other way to attack the fiscal problem which will destroy us if we do not solve it.●

● Mr. SMITH of Iowa. Mr. Chairman, I oppose both of these so-called balanced budget amendments that are before the House today. The Constitution of the United States is the fundamental law of the land. It has served this country very well for two centuries and only in one instance has it been changed in a way that the people would not want to last for an indefinite period of time—perhaps hundreds of years. It is not an instrument to be used to create a national referendum for temporary political convenience and should never be amended with provisions that could not carry out the purpose of the amendment.

Even if one were to be for an amendment to the Constitution to require a balanced budget, neither one of these amendments would meet the test because neither one really requires a balanced budget. They only require that receipts and assets be balanced and do not require that capital assets even be considered. For example, to spend more than is taken in in receipts would only require selling some gold out of Fort Knox or a few million acres of timber or some of the Federal Government's oil and gas inventories or cleaning out the reserves of agricultural products. Since deficits are most likely in times of recession, these sales would be made at the very time when the supply was already in excess of demand and the products would bring the least amount of money and create the maximum amount of additional unemployment and economic difficulty.

Another way to avoid outlays exceeding receipts would be to merely estimate that they will not do so. This is what the administration did last year. They estimated that receipts would be high enough so that there would be a $37 billion deficit even though econometric projections of several sources were estimating that it would be $108 billion which it turned out to be. So a mere phony estimate is all that would be required to get around it.

What we really need is a statute requiring that we use a capital assets budget separating capital assets from ordinary expenditures instead of continuing to consider money spent for investments the same as money spent for salaries or expendable items. If the big growth companies of the United States which are considered the most successful were to keep books like we do under the present budget and like what would be locked in under these budget amendments, they would appear to be in very bad condition because most of them have outlays exceeding receipts but they also have increases in net worth exceeding the amount by which outlays exceed receipts. In other words, they are increasing their investments and their ability to earn in the future. If either of these constitutional amendments were to pass, they would take effect in about 1992. They would act merely as a shield to distract attention from our present problems and take the pressure off doing something about them now. Passage of either of these amendments to take effect in 1992 is not a substitute for keeping military spending under control or for revising the way we keep books or for getting more discipline into our budget system today; and, under no condition should we garble up the Constitution of the United States for a temporary political convenience ever.

From time to time since I have been in public life, there has been an increase or decrease in the extent to which people trust government officials, the media, unions, businesses, and other institutions in our society but there has been no time that I can remember when people did not trust the Constitution of the United States as the basic long-term document which would prevent excesses and would assure a method of overcoming whatever problem we may have. It would be a drastic mistake to clutter up the Constitution with either of these meaningless amendments or deceptive amendments and I urge Members to vote against both of these proposals today.●

● Mr. GONZALEZ. Mr. Chairman, it is a terribly sad thing to see, for the first time in history, a President who throws the Constitution itself into the vortex of last-minute electioneering. What we have here is an attempt to write a campaign slogan into the Constitution, notwithstanding the universal judgment of thoughtful minds that the amendment is likely to do more harm than good, that it could indeed wreck Government and the economy alike, and that at best it will either be evaded or rendered meaningless.

All of this is done at the insistence of those who authored, demanded, and won the 1981 tax bill, which has aptly been called "the single most irrespon-

sible fiscal act of all time." That is a judgment confirmed this year, when much of that tax giveaway had to be rescinded.

All of this is done at the insistence of those who authored, fought, and won a program that has brought about the greatest economic crisis in 50 years, and a program that moreover makes fiscal sanity all but impossible to achieve. They do not accept responsibility for what they have done, but today seek to immunize themselves by proclaiming their fidelity to balanced budgets.

Where was their fidelity to balanced budgets last year, and where was it this year? Where was their fidelity to balanced budgets when they accepted doctored projections, designed to prove that the Reagan program would produce all the miracles that it could not ever do? Where were they this year when they demanded yet again that the Congress accept phony projections designed to hide the depth of the Republican failure?

The hypocrisy is astonishing. These authors of the greatest of all deficits now say that they want a balanced budget. They want to outlaw their own deeds.

They are like a certain former President who proclaimed, "I am not a crook." They want to proclaim, "I am fiscally responsible." How sad it is to see this kind of posturing by the very authors of the great economic disaster that haunts the land today.

They are not concerned with the merits of either proposal before the House today. They only want a quick vote on a slogan that they can use this year.

Their shame is evidenced, not just by the hypocrisy of this last-minute maneuver, but by the fact that we are supposed to vote on a constitutional amendment with the benefit of only a few hours' debate. We are to vote on a document that few have studied, few have reflected on, and that no one can explain in its practical, real terms.

This is an amendment, had it been in place, that would have outlawed the Reagan program that the very authors of the amendment supported.

This is an amendment that in its concept, was characterized by the gentleman from New York (Mr. CONABLE) as "a meat ax approach that would take fiscal discretion out of the hands of the President and Congress." Yet he authors it.

This is an amendment that in its application will make it extremely difficult for Congress to respond in any appropriate way to economic crisis, or even to approaching national security dangers, by making it impossible to adopt a deficit budget except with a huge majority—meaning that fiscal policy will be effectively in the hands of a few radicals, who will be able to veto sensible programs in the name of whatever ideology that bedevils them at the time.

This is an amendment that would have outlawed not only the 1981 Reagan tax cut, it would have outlawed the 1982 Reagan tax increase. Yet he is its chief apostle. Those who author and support this amendment do not have any idea how it would be implemented, or even if it could be. Mr. Reagan himself, for all his devotion to the amendment, does not dream of submitting a balanced budget. Should this not tell us something of the dangers that we are confronting here? If the chief advocate of this amendment is in fact the same person who does not and will not ever have to live with its requirements, the same person who incurred the greatest deficits of all time, the same person whose every economic move has been a disaster, should we not be forewarned?

The Constitution is not meant for election year politics, and it cannot be reduced to slogans. It cannot be reduced from organic law to ordinary statute, without destroying its integrity and meaning. Yet, that is what the pending amendment would do.

The purposes of the authors could be embodied in ordinary law, yet they have offered no such bill. They could achieve their stated goals by use of the ordinary budget processes, but they have not done so—in fact, their every move has been to increase the deficits they claim to abhor. They simply want to be able to say in this election year, "It is not my fault." They seek the same absolution as the man who said, "I am not a crook." Their claims are of the same order. They deserve the same contempt.

Anyone who understands the meaning of the Constitution, anyone who is concerned about reason and good order, anyone who cares about the future good of the Nation, would be shocked and shamed by this proceeding today. How sad, how terribly sad, that the very Constitution has been thrust into the arena of political imagery. If the proponents really believed in this amendment, they would have offered ordinary bills embodying its purpose, but they have not done so. If they really believed in this amendment, their every major action in this Congress would have been different.●

● Mr. FUQUA. Mr. Chairman, I rise today in strong support of the concept of a constitutional amendment to mandate a balanced Federal budget. Ever since 1976 I have had before this body my own proposal to require a balanced budget. This is the first time that the issue has reached the floor of the House of Representatives and I intend to cast a vigorous aye vote.

In 1929, we had a budget surplus of some $734 million. Basically, we have been going downhill ever since. As a matter of fact, the last time we had a balanced Federal budget was the last budget under President Lyndon Johnson when we had a budget surplus of $3.2 billion. In the Nixon-Ford years we ranged from deficits of $2.8 billion in 1970 to a deficit of over $66 billion in 1976. The Carter administration reduced deficits for several years but we never achieved our objective of balancing the budget.

Now, under President Reagan's latest budget, we face a deficit in excess of $100 billion—a staggering amount. Fiscal sanity must regain control and we absolutely must lower spending levels for domestic and military programs.

We can balance the budget without doing undue harm to older Americans and those living below the poverty line. We have made these commitments and we must stick to them. To do otherwise would be to betray the trust of the American people. There are, however, many, many areas of Federal spending that can be reduced. We must rely more on the taxing powers of the States and communities. The Federal Government simply cannot afford to fund every worthwhile project and program. Each State and community must make internal funding decisions without resorting to the National Treasury for the money.

There are some who would say that we in Congress have failed. I disagree. We have lived up to the expectations of the people and funded those programs that needed and deserved Federal support. The time has come, however, to listen to the voice of the people. The people recognize that huge budget deficits mean the Government is in the money markets borrowing money that would otherwise be utilized in the private sector. This drives up interest rates and lessens the chances for economic recovery. The Government just cannot continue to borrow money to pay its bills. We already have a national debt of over $1 trillion. A massive amount that is difficult to comprehend.

Fiscal responsibility and commonsense must rule in this House today and we must take the action expected of us by the American public. There is an overwhelming clamor for a balanced budget amendment and we should submit this proposal to the States for possible ratification and inclusion in our national Constitution.

I am not unaware of those who oppose this effort. I say to them that it is far preferable for Congress to submit this amendment to the States rather than face the alternative of a constitutional convention as called for by over 30 State legislatures. Such a convention could actually rewrite our entire Constitution and do irreparable damage to our form of government.

The document before us today is not perfect. I would have preferred it to

contain a clause contained in my proposal which would require a two-thirds vote to unbalance the budget rather than the three-fifths vote called for in this measure. I believe the tougher standard is important and I would have wanted the opportunity to amend this proposal if that were possible. Unfortunately, it is not permitted and I must accept this as the only game in town today.

We cannot look upon this amendment as a panacea for all the economic ills afflicting our Nation. It may take years to ratify and, in the meantime, we still must press ahead with efforts to reduce overall Government spending. I am very sensitive to the growing unemployment throughout our land. It is shocking to realize that approximately 10 percent of the American people cannot find work. This amendment, taking effect in a number of years, will not get those people back to work tomorrow. It is up to the Federal Government to come forth with programs and initiatives to encourage employment in the private sector. This amendment will not solve our balance of trade troubles and will not reduce the price of oil.

While not a panacea, this amendment is a good starting point. It will make us reduce spending in the coming years to prepare for the time when it takes effect. It will demonstrate to Wall Street and the world alike that we are serious about getting the Federal Government out of the money markets. It is needed, it is necessary, and it is an idea who's time has come.

I have made a commitment, Mr. Chairman, to the people of the Second Congressional District of Florida. I have told them that I support the concept of a constitutional amendment to require a balanced budget and I shall not break my bond with them.●

● Mr. FORD of Michigan. Mr. Chairman, I rise in opposition to the proposed balanced budget amendment to the Constitution. Like most Americans, I believe in a balanced budget. However, there is little doubt that a constitutional amendment is the wrong way to achieve this goal. The lead editorial in today's New York Times concisely and eloquently spells out the arguments against this fraudulent approach to solving our economic problems. I am pleased to insert it at this time.

[From the New York Times, October 1, 1982]

THE RAINMAKERS RIDE AGAIN

The "balanced budget amendment" has sprung back to life for a tawdry purpose—to improve Republican chances in next month's Congressional election. On the day he closed out a fiscal year with a deficit of about $110 billion, President Reagan and his allies sought to drown out this news with the irresponsible promise that the amendment would, someday, protect the economy.

They may not even care about passing it. Daring House Democrats to oppose it in mid-campaign was the first order of business. "It will be hard to go back home right before the election and explain a 'no' vote on this one," says Representative Trent Lott. And indeed, Speaker O'Neill feels compelled to minimize the risks by bringing the amendment up for the quickest possible vote—today.

Anything could happen in the parliamentary melee. The worst would be passage of this constitutional restraint on deficits and taxing authority. It is a phony and potentially damaging restraint; the arguments against it bear repeating.

The amendment can do nothing for current economic problems. Its ratification by the states would take years. Even then it could have only negligible effect. It permits Congress to waive the restraint on deficits by a three-fifths vote and on taxes by a simple majority. It does not in any case prevent Congress from pushing spending off the budget, as it has done for years.

Then again, if future Congresses take the amendment seriously the result could be paralysis. The three-fifths requirement on outlays that exceed expected revenues could tie up the lawmakers for months; conflicts with the White House over enforcement could even lead to constitutional crisis. And compliance would depend on unreliable forecasts up to 18 months into the future.

Read seriously, the amendment is also bad economics. Balanced budgets are not always wise; a rigid ban on deficit spending can prolong recession. That is precisely why Mr. Reagan secretly welcomes the present deficit; had the amendment he champions been in effect over the last year, the nation's predicament might be even worse.

But the White House, it seems, is alarmed above all at the prospect of losing seats in the House and of more bad news about unemployment before Election Day. It prefers to impress voters with false religion and an absurd claim that passage of the amendment would impress the financial markets.

To vote yes, in sum, is to participate in a blatant fraud for campaign advantage. To vote no is to express faith in the voters' intelligence, and in a lean and principled Constitution.

Frankly, Mr. Chairman, in my 18 years in Congress, I cannot recall a piece of legislation more damaging to our economy. Should this political gimmickry be allowed to become law, I shudder to think of the consequences. I do not exaggerate when I say it could lead us into the darkest economy hole ever imagined in modern times.

Sadly, the American people are being tricked into thinking that this is sound economic policy—that it will cure all our economic ills.

That this reckless idea could gather any popular support is a tragic commentary on the depths of the Republican-engineered recession.

It is human nature that in times of great suffering and uncertainty people will be tempted to reach out for any line that is thrown to them, heedless of what is at the other end.

The author H. L. Mencken, who had a keen understanding of American politics, once said that "for every problem there is a solution that is simple, neat and wrong."

This is truly the case here. The idea of an amendment to force a balanced budget is appealing because it seems so simple. But it would be so terribly wrong.

It is indeed ironic that the proposal comes from a President who continues to chalk up the biggest deficits in the history of our country. For the fiscal year that begins today, that deficit will be more than $150 billion. This is 2½ times the last Carter deficit.

We have this horrendous red ink not because of past Democratic big spending, as the President says, but because Reaganomics has failed, because supply-side economics has proven to be a colossal blunder.

It was apparent from the beginning that we could not have the biggest tax cut in history and the biggest defense buildup in history without having, as well, the biggest deficit in history.

Now Mr. Reagan wants to divert attention from that costly failure that has caused the worst recession since the Great Depression with unemployment that is almost certain to pass the 10-percent mark in a few days.

This is not economic policy, it is political chicanery. The very President who created the biggest deficit in the 206-year history of our country wants to trick the American people into believing that he is the foremost champion of fiscal integrity—that he has a simple solution.

Let us look at what enormous problems this measure would create:

It would deny the Federal Government flexibility in dealing with ever-changing economic conditions. It would put us in an economic straitjacket the likes of which we have never seen. Government would be helpless in dealing with periods of recession and unemployment. It could not, for instance, pass laws to put people to work and get the economy moving if that meant a deficit.

Federal courts would be given an unintended and dangerous role in setting economic policy. Take a situation where Federal law says that so much money must be spent on a specific program—such as social security—and where meeting this obligation would be in conflict with a balanced budget amendment to the Constitution. Federal judges would do the deciding. We would, in effect, have government by the judiciary.

It would immobilize the congressional fiscal power to meet national needs by adjusting tax and spending levels. The Federal Reserve Board, an elected body, would gain increased power to use monetary policy to control the Nation's well-being. Millions of American workers now are suffering from the present economy. As I have said before and will say again, balancing the budget during a recession only aggra-

vates the downturn and has devastating effects.

It would guarantee the kind of economic roller coaster that is characterized by depressions and booms. We would be prevented from shifting funds from the public to the private sector in the form of unemployment benefits and payments if this would mean a deficit. In times of boom, it would also worsen inflation since Congress, under the tax limitation requirement, would be obliged to cut taxes during inflationary periods when tax receipts tend to rise. Thus, inflation would be fueled by pumping money into the economy at the very worst of times.

If this proposed amendment had been in force last year, we would have had far deeper budget cuts. And this would have resulted in a much more serious recession.

This is a fact that surely has not escaped the attention of the President and his zealous budget cutters. And it may well be at the very heart of what the President is trying to do.

The third step of the President's historic tax cut for wealthy corporations and individuals comes next July. The defense buildup will continue. This is certain to result in huge new deficits.

Under the proposed amendment, such a deficit would not be allowed. The only alternative would be wholesale slashing of entitlement programs—social security, unemployment compensation, welfare, medicare, student loans among them.

This, it seems to me, is the real strategy behind what is portrayed as a way of restoring economic order. In fact, it is a way of guaranteeing economic disaster.

What the President is proposing can be likened to a family making a firm decision not to spend more than its income regardless of what tragedies it may encounter. Then there is a catastrophic illness or the furnace needs to be replaced. If the family sticks to its decision, the consequences will be disastrous. But, of course, it would not. The Federal Government, under this proposal, however, would have no choice. It could spend beyond its income only in case of a declared war, and it seems we have about outgrown that option in today's complex and dangerous world, or by a vote of three-fifths of the entire membership of Congress. Today's difficulty in getting a majority to agree to measures to deal with the present recession reveals how hard it would be to muster a three-fifths vote.

In cases of depression, inflation, natural disaster, foreign entanglements, and other crises, Congress would probably be paralyzed.

President Reagan paid Congress a visit yesterday to stump for the amendment, warning that Democrats may try to sabotage it. The truth is that both Democrats and Republicans should defeat this preposterous scheme to save the American people from certain calamity in the future.

In the 206 years of our Nation, the Constitution has been changed only 26 times to deal with fundamental shifts in our society. The Founding Fathers carefully wrote the document to preserve it from political expedience and whim. It was not intended that it be used to deal with problems of a temporary nature.

To tamper with it now to deal with a problem that has a political solution would set a dangerous precedent.●

● Mr. AuCOIN. Mr. Chairman, the Constitution is not defective. The economic policies of this administration are defective. What we need to change is the economic plan of this administration—not the basic law of the land.

It strikes many of us in this Chamber as pretty strange—as it should the American people—that an administration which has succeeded in running up the highest budget deficits in history should now be urging the Congress to adopt a constitutional amendment to require a balanced budget.

Thanks to this administration and its allies, this year's budget deficit will exceed $100 billion. Under the administration's economic program, next year's budget deficit will certainly exceed $100 billion, and so will the deficit the year after.

Now they are saying we have got to have a constitutional amendment to stop these deficits. Out of one side of their mouth they are defending a reckless economic program that has produced these deficits, while arguing out of the other side of their mouth that what they have done ought to be against the law.

Mr. Chairman, it is a sham, a bald attempt to dupe the American people and escape accountability for their actions, and the taxpayers of this country will not be taken in by it.

It is a sham because the amendment will not do anything to eliminate or even reduce the deficits being inflicted on the economy now, and the deficits that will be inflicted next year and the year after that by their economic program. The problem is now. Any amendment will take years to ratify. Without a change in "Reaganomics," the Government could go bankrupt by that time.

If providentially the Nation is spared a full-scale economic catastrophe in the interim, what happens on the day the amendment is ratified as part of the Constitution? What happens if by that day the economy has not made the robust recovery the administration keeps predicting, but is still bumping along the bottom? How shall Congress discharge its constitutional responsibility on that day to balance the budget? Will it push through a massive tax increase, as Herbert Hoover, did in 1932? Or will it end unemployment assistance or slash social security benefits? Unless the Nation happens to be at war on that day, those are the basic choices the Congress will be limited to making.

Mr. Chairman, many people wonder how this amendment would be enforced. Section 1 of the amendment says only that "the Congress and the President shall insure that actual outlays do not exceed the outlays set forth" in a statement of receipts and outlays adopted by Congress prior to each fiscal year. The powers of Congress are clear enough. But what powers would be conferred upon the President to discharge his responsibility under section 1? Clearly the President would be able to impound funds already appropriated. It would give him line-item veto power over those parts of budget or appropriations bills he does not like.

Congress took away the power of the President to impound funds in 1974, precisely because of the abuse of that power in the Nixon administration. Shall the power of impoundment now be given back?

It is chilling to imagine how that power might be exercised today by the Reagan administration. In my region of the country, vital fish hatcheries would today be shut down; millions of dollars in public and private investment made in the Portland metropolitan area on the basis of prior Federal commitments for transportation assistance would be going down the drain; the Coast Guard would be floundering.

Are we going to cede to the executive branch of Government sole authority to decide what our national budget priorities are going to be? If we do, we might as well declare one-man rule.●

● Mr. AKAKA. Mr. Chairman, I rise in opposition to the balanced budget amendments offered today. Such amendments, no matter what form they take, will not work the fiscal magic claimed by their supporters.

The U.S. Constitution is the fundamental document of this Republic. It lays out the rights and freedoms of the people and defines the parameters and responsibilities of the three branches of Government. This fundamental structure of our Government was carefully crafted by our Founding Fathers. Our Constitution is not a document that should dictate any one economic theory or policy. It is not a document to be shaped by economic theories currently in vogue.

The amendments to balance the Federal budget would alter the fundamental nature of this Government's structure. The current language of the Constitution states that Congress has the "Power to lay and collect Taxes, Duties, Imports and Excises, to pay

the Debts and provide for the common Defense and general Welfare of the United States." Thus, under the Constitution it is the Congress, a body of duly elected individuals, which makes the decisions on how to operate the Federal Government. If a balanced budget amendment were adopted, this fundamental responsibility of Congress would be abrogated. The Federal courts composed of judges appointed for life would be drawn into the budget process. Federal judges would make decisions controlling the tax system and could dictate the manner in which outlays were distributed among budgetary items vying for funding. Furthermore, a constitutional link would be established between the conduct of foreign policy and the constraints of economic policy. Except in times of war, the President would be restricted in his foreign policy decisions by the amendment's requirement that the Federal budget be in balance every year. The Congress would not be able to vote for foreign aid in response to a Presidential request and thus, our foreign policy would be severely handicapped, our national security interests compromised.

Under the terms of these amendments, one Congress will be allowed to bind successive Congresses to certain economic policies—this kind of bondage is something the original framers of the Constitution would certainly have disagreed with. Under the Constitution, the Congress is given the right—

To make all laws which shall be necessary and proper for carrying into Execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States, or in any other Department or officer thereof.

Thus, any balanced budget amendment would detract from the right of Congress to set its own rules for budgeting in each fiscal year.

Under a balanced budget amendment, current economic realities would force our Government to adhere to a "cash and carry" policy which no one in this modern day world practices. The argument that individuals only purchase what they can afford ignores the long-term debt that most individuals carry in order to make big purchases such as a home or a car. The Federal Government, too, must make those types of expenditures for long-term capital investments. How else could we maintain our highways and pay for sophisticated weapons systems? Of course, the Congress could simply drop the unified budget system and adopt the capital accounting procedure used by many States. In fiscal year 1983, we would have a budget surplus of $25 billion if the capital accounting procedure were used. Adoption of the balanced budget amendment would make conformance to this particular accounting system almost irresistable. The balanced budget amendment uses words such as outlays, receipts, debts, and national income. Adoption of either balanced budget amendment offered today would require the Congress to adopt implementing legislation defining exactly what these terms mean. There is, however, no consensus among economic experts on the specific definitions of these terms. The terms are useful as general concepts to explain economic behavior but are impossible to reduce to specific definitions of certain actions and activities in the economy.

Adoption of either balanced budget amendment would have a profound affect upon the relationship between the Federal Government and the States. There would be a shift in debt burdens from the Federal Government to the States. In those States that have adopted balanced budget amendments, an Associated Press survey found that 18 States have either cut spending and/or raised taxes or simply settled for deficits; 20 States have raised taxes and 20 States have laid off State workers. Given this record of experience with balanced budget amendments, the Federal Government should not be quite so eager to bind itself to one peculiar economic theory.

Had a balanced budget amendment been part of the Constitution this year, the loss to the States in most cases would average over $200 a person. In order to maintain the level of services in these States, all State taxes would have to be raised by an average of 37.5 percent in 1982 and again by 38.6 percent in 1983.

Even if the supporters of a balanced budget amendment believe that the Federal Government has no business redistributing the income of this Nation, they cannot believe that the Federal laws promoting uniformity for the protection of the environment and the health and education of its citizenry should be abolished. For example, many Federal laws set out minimum standards to promote clean air or clean water or special education for certain groups of the population—groups such as the handicapped or disadvantaged adults and children. Without the monetary incentive to set up these programs to protect the environment, to promote the health and education of the people, most States would just not agree to be bound by a uniform Federal law. We would all lose if uniform laws were no longer applied in a majority of States. There would be a proliferation of disparate laws regulating the environment and affecting business and individuals.

I favor a balanced budget. But, the budget will only be balanced by making the daily decisions to cut back on Government programs. Those decisions are difficult to make; during the past 2 years, this Congress has made those tough decisions. The Congress has responded to constituent concern about the increases in Federal spending. The system is working. Clearly, there is a continuing need to refine the budget process and be alert to excess expenditure, waste, fraud, and abuse. We in Congress are responsible individuals. I have confidence that we will continue to meet the demands of the people of this Nation for a responsible Government.●

● Mr. MITCHELL of Maryland. Mr. Chairman, I rise in strong opposition to House Joint Resolution 350, to amend the Constitution to require a balanced budget. I will not support this measure.

I submit to my colleagues that I am truly saddened and resentful that, while our national unemployment level hovers near 10 percent, we are literally ignoring the problem by debating the enactment of an initiative which is neither economically feasible nor practically applicable in most national economic situations. It is most distressing to realize that the administration and those Members who support House Joint Resolution 350 have led the American people to believe that the enactment of this constitutional straitjacket will provide, among other things, tax relief, an end to unscrupulous Government spending, and an answer to such critical problems as inflation and unemployment.

My colleagues, it is also ironic that the balanced-budget amendment is based upon, among other things, a presumption of an extremely strong relationship between high deficits and high inflation. Ironically, we are willing to ignore economists after economists who stress that no such close correlation is confirmed and the data do not substantiate such a contention.

On another note, the issue of a balanced budget has been so sensationalized that we must wonder if this purported mandate from the people is clouded by the rhetoric of its proponents that Government spending as a percent of the GNP is the sole culprit in our Nation's economic ills. Again, we would rather prophetically allude to the positiveness of putting severe restraints on the ability of the Government to do its job than face the fact that econometric models have confirmed that such spending restraints would boost unemployment, and fail to have a significant effect on inflation—econometric models from CRS with use of economic assumptions and models from the Urban Institute.

Mr. Chairman, the proponents of the balanced budget amendment, to include the present administration, are feeding the American people some fantastic lies. They are leading these constituents to believe that the enactment of this initiative will provide the panacea for the solving of our critical

economic problems. These proponents are well aware that such contentions are just unfounded.

Mr. Chairman, I must mention that one optimistic member of the National Taxpayers Union contends that with the enactment of a balanced budget amendment, such marginal spending as that targeted for the wasteful Clinch River breeder project might be eliminated. The proponent also envisions that such a restraint will finally move us toward attacking and eliminating wasteful defense spending. While I do wish that I could share this optimism, I must be realistic enough to maintain that it will not be the pork-barrel projects or the defense budget spending, but rather the vital human services programs which will be jeopardized. If the Government is restricted in its expenditures and outlays, it will make the same choices it does under the present administration—the defense budget will remain sacrosanct, and the elderly, unemployed, students, children, minorities, and the poor will just have to suffer.

I emphatically urge defeat of House Joint Resolution 350.●

● Mr. VENTO. Mr. Chairman, it is time for Members to face the facts today. Amending our Constitution surely should not be accomplished in the waning days of session. Clearly, the careful consideration that this proposed amendment merits has been sacrificed to the political sloganeering that has characterized this issue. The budget amendment is a sham and a mockery that will fracture the basic framework that has held our country together throughout history. Trumpeted by the Reagan administration, this initiative appears to be a cynical attempt to divert attention from its own embarassingly bankrupt economic policies and raging deficit. All of us have seen reelection grandstanding before, but never have I seen an administration and a Congress willing to exact the price that this initiative extracts levies on our Nation.

It is bad enough that this Congress turned the legislative process on its head to pass the reconciliation measures that have thrown millions of Americans out of work. These actions while regrettable are still possible to correct. However, if the balanced budget amendment were to be adopted, the damage to our form of government and to the majority's ability to establish national policy, and the damage to our Nation's ability to act responsibly to improve the condition of our existence will be permanent and grave. This Congress and the President may not accept the credit for the consequence of their actions or choose to address the problems of the American people, but what right have we as a Congress to impose, to handicap the tools of future administrations and Congresses and their rights to address such serious issues and priorities.

I hope that the experience with our journey into never never land economics would give Members pause to consider what they are asked to vote for today. It is my hope that Members will not respond to the deficiencies of the current economic program by imposing an unrealistic discipline on some future Congress and President. We cannot justify this travesty by imposing future restrictions which we now refuse to accept directly or indirectly. As Members of Congress we have a responsibility to lead as well as to reflect the wishes of our constituents. I sincerely believe that the vast majority of Americans would reject this amendment if they were exposed to a sustained national debate on the issue rather than just the bumper sticker arguments made by the amendment's proponents.

It is our responsibility as national leaders to instigate this national debate. We will not be acting responsibly if we vote in favor of this amendment in order to provide ourselves or our constituents with an easy answer to the very difficult questions of our economy and the raging national deficits.

Our democracy has been so stable and successful in part because our Constitution speaks only to basic fundamental issues. These issues include: An absolute guarantee of certain individual rights; the relationship between three equal branches of Government; the relationship between the Federal Government and the States; and the method for electing the people's representatives.

The size of a Federal budget is a very different type of question than the issues historically addressed in the Constitution. Whether a budget is balanced or whether it exceeds a specific percentage of gross national product is an economic question, not a question of Federal responsibilities of individual liberties. The size and nature of the Federal budget must be determined in view of the economic situation at that time and the needs and political desires of the American people. For these reasons, I feel it is inappropriate to amend our most basic document to require adherence to a specific economic and budgetary philosophy.

In addition to the questionable appropriateness of placing a purely economic consideration in the Constitution we must also consider the economic policy that would be required by this amendment. In testimony before the House and Senate Committees, it was clear that economists from all schools except perhaps the cocktail napkins school of economics oppose without qualification a balanced budget requirement. There are economic conditions, other than a state of war, when it is essential to have the flexibility to use deficit spending to meet extraordinary demands. A balanced budget must be our goal but a constitutional amendment is not needed to accomplish this. Indeed, if President Reagan or congressional supporters of this amendment really believe in a balanced budget they should propose such a budget and if they can gather a majority of Congress to agree, a balanced budget will be adopted.

I certainly and seriously question the ability of this amendment to produce a balanced budget. It is rather the type of action that would result in a constitutional crisis and a breakdown of powers divided between the judiciary, the administration, and Congress. In addition, it is likely to be a final straw with many people who would completely lose confidence in Congress. We need no further fuel to cause disillusionment and estrangement of our National Government from the people we represent and indeed this measure will add significant fuel to that fire.

The legislation requires the adoption of a budget in which expenditures do not exceed receipts. Aside from questions about the definition of these terms and the inevitable explosion of off-budget spending that could result from this measure, our ability to accurately forecast Federal revenues and expenditures is very limited. Currently, the Government is required, by law, to enact a budget which establishes Federal revenues, expenditures, and any deficit or surplus. President Reagan's fiscal year 1982 budget established a deficit of $38 billion. Even though President Reagan's budget was followed scrupulously, the actual Federal deficit for fiscal year 1982 is projected at $115 billion. This explosion in the deficit was a result of experimental economics, phony economic assumptions, a deepening recession, record unemployment and high interest rates. No Congress or President can predict with 100-percent certainty that unemployment will not increase, that farm prices will be adequate or that the price of oil will not rise dramatically. Each of these factors, to name a few, decrease the amount of Federal revenues, and increase Federal spending. During periods of economic crisis, the amendment would bar the Government from fulfilling its essential role in our economy at precisely the moment when stability and certainty would be most desperately needed.

Finally, the amendment has no specific enforcement mechanism. Without this provision, one has to assume that the Federal courts would have to enforce the spending and tax requirements. Considering the controversial history of the courts on other issues, I

am very hesitant to invest in them such an awesome and poorly defined economic and political responsibility.

All too often, Congress votes for spending programs but is very reluctant to support the taxes necessary to maintain the spending without a deficit. This free-lunch approach must come to an end. I can well understand the frustration of the people we represent when the 1982 deficit is $115 billion, the 1983 deficit is nearly $200 billion and the future deficit, as far ahead as the forecasters can project, is at $150 billion plus. The National Government needs answers today as well as tomorrow. In proper perspective, this is an attempt by the Republicans to take the focus, light, and heat off the affect and facts and focus on rhetoric better suited for political campaigning than the thoughtful management of our national economy.

This so-called balanced budget amendment may be the political slogan that will serve the reelection needs of some Members today. But it is too high a price to pay. The price will cripple our National Government tomorrow. This measure before the House today deserves a "no" vote.●

● Mr. FOUNTAIN. Mr. Chairman, I will be brief. America needs for the Congress to pass House Joint Resolution 350, the balanced budget amendment.

I, for one, do not take the U.S. Constitution lightly. Our Founding Fathers put together a beautiful and powerful document which has stood the test of time. And it should only be amended when events make it absolutely necessary, not at whim. Getting the Federal budget deficit under control is absolutely necessary.

Indeed, Government officials and the American people alike just have to realize that the U.S. Government cannot continue to spend more money than it takes in. The results of such spending policies have been disastrous in the past and will continue to cripple our economy unless we bring spending in line with revenues.

The balanced budget amendment will not solve our economic problems overnight, but its passage would be a big step in the right direction—the direction America must follow if we are to avoid economic ruin in the future.

If we are ever to get a handle on Government borrowing, inflation, excessively high interest rates, and if we are to encourage renewed economic growth, we must act boldly here today.

Passage of House Joint Resolution 350 would demonstrate to the American people a long-term congressional commitment to fiscal responsibility. We all talk a great deal about curbing Government spending, about doing some fiscal belt-tightening. Today we have the opportunity to put our money where our mouth is and pass House Joint Resolution 350.

I strongly urge my colleagues to support House Joint Resolution 350. It is a vote for fiscal responsibility.●

● Mr. YOUNG of Florida. Mr. Chairman, I rise in support of House Joint Resolution 350, an amendment to the Constitution requiring a balanced Federal budget.

The Constitution of the United States is a simple, all-inclusive, and highly flexible document that has served as the cornerstone of our Government for more than 200 years.

The fact that it has been amended just 16 times since the Bill of Rights was adopted in 1791 is further proof that our forefathers authored a document that has withstood the test of time and has provided stability to our Nation.

For this reason, I believe amending the Constitution must be approached cautiously, with a great deal of thought and debate, and should be reserved for those matters for which there is no other legislative recourse.

The legislation we consider today would amend the Constitution to require the Congress to adopt a balanced Federal budget, except in time of war or when three-fifths of the Members of the House and Senate find it necessary to authorize a budget in which outlays exceed receipts.

As an elected public official for the past 22 years, I have always believed in fiscal responsibility, including balanced State and Federal spending. Unfortunately, too few in Government share my views, and as a result, our national debt now exceeds $1 trillion.

For years, many of us have warned that a day of reckoning was approaching when the Federal Government's persistent habit of spending more money than it had would result in economic havoc throughout our Nation. Faced with the specter of a trillion dollar debt and more than $115 billion in annual interest payments to finance that debt, I am afraid our day of reckoning has arrived.

The idea of an amendment requiring a balanced budget is not new. However support has grown recently because many of my colleaugues now realize the penalties that are being paid as a result of decades of financial neglect and irresponsibility.

It has always been my belief that if the required two-thirds of the Members of the House and Senate supported an amendment to balance the budget, then there already should be enough support to actually have a balanced budget, with the simple majority votes needed to accomplish such a goal through a normal legislative process. If there was a genuine interest in Congress to insure fiscal responsibility, an amendment requiring a balanced Federal budget would not be needed.

Unfortunately, the budgets of the past 30 years graphically illustrate a lacking commitment to controlled Federal spending, so it has become obvious that an amendment to the Constitution is the only avenue available to guarantee responsible budgeting in the future. The people of Pinellas County, who I represent, agree, as more than 70 percent of those who responded to my latest congressional questionnaire said they support a constitutional amendment to require a balanced Federal budget.

Mr. Speaker, as I cautioned earlier, amending the Constitution should be reserved only for those matters where no other legislative recourse exists. This is such a case however, and you can be sure that as a cosponsor of the resolution, I am sure this amendment to the Constitution has been given the same careful thought and foresight that our Founding Fathers used in drafting our guideline for democracy.●

● Mr. MILLER of Ohio. Mr. Chairman, I am pleased that at long last the proposed balanced budget constitutional amendment is being considered in the House of Representatives. I am a cosponsor of House Joint Resolution 350. I was an early signer of the discharge petition which was intitiated to force this measure out of committee and bring it up for debate and a vote on the floor of the House of Representatives. I watched with anticipation as the number of signatures on this discharge petition increased. Yet even when we had over 200 signatures, the Judiciary Committee refused to report the measure out for House action.

The other body has passed a balanced budget constitutional amendment. Thirty-one of our State legislatures called for a constitutional convention to provide for a balanced budget constitutional amendment. Still, this measure remained bottled up in committee. It began to look as though this Congress would come to a close without this important issue even being brought up for consideration here in the House of Representatives. It was a discouraging prospect for those of us who have long been worried that this Nation was heading toward national bankruptcy.

But I am happy to say that opponents of this measure have failed in their attempt to deny us the opportunity to consider this measure here in the House of Representatives. This constitutional amendment is being debated on the floor of the House today because the people want us to take action on this matter. They made their will known to enough of their Representatives, and we finally obtained the necessary 218 signatures on the discharge petition.

The people understand that we cannot go on year after year piling up deficit upon deficit, adding billions to the already staggering national debt. When that national debt passed the

trillion dollar mark last fall, Americans all across the land knew were in trouble. They began to look at how that debt had accumulated, and they learned that over half of it had been added in the last 8 years. It took us over 180 years to accumulate a national debt of half a trillion dollars. It took us less than a decade to double that amount.

The American people looked at Washington and saw a spending machine out of control. They knew that something had to be done to put the brakes on this runaway spending machine. That is why the American people want a balanced budget constitutional amendment. And they are right. We need it.

There are those who say that an amendment like this does not belong in the Constitution. They say that if Congress would exercise the necessary self-restraint, we would not need this constitutional amendment. Of course, the key word is "if." It is true that if Congress would exercise the necessary self-restraint, we would not need this constitutional amendment. But look at the record. Congress has failed to keep spending under control. In the last 20 years, only once have we had a balanced budget. Do we wonder why the suggestion of congressional self-discipline rings hollow? Do we wonder why the American people are calling for stronger measures? There is no point in talking about what Congress could do, if the record clearly shows that Congress is not doing it. The constitutional amendment is necessary in order to force Congress to do what it is clearly failing to do on its own. It is time to stop living in the world of wishful thinking about what Congress could do, or might do. It is time to take the strong action that will require that we will in fact finally bring the runaway spending under control. I urge my colleagues to support House Joint Resolution 350, the original balanced budget constitutional amendment.

The substitute is about as effective as a watchdog without bark or bite. The American people are tired of phony gestures. They want effective action. House Joint Resolution 350 is the measure with real teeth in it. I urge my colleagues to reject the phony substitute, and support House Joint Resolution 350.●

● Mr. LEE. Mr. Chairman, colleagues, I want to record my most enthusiastic support for the Conable-Jenkins balanced budget substitute before this House today.

Since the first day I entered this Chamber, I have taken every opportunity to speak on behalf of, to cosponsor, and to actively support this straightforward approach to our national budget. I take great pride in my association with this amendment. It is a solid proposal which can be a most positive addition to our Constitution.

I reject the arguments of those who say it belongs in statute instead of the Constitution. Each of us in this Chamber knows how easily Congress subverts the laws which have gone before. We need the bonds that would be created by the addition of this element to our Constitution for our own good and for the Nation's.

I also reject those, primarily on the other side of our House aisle, who would cast off this amendment as purely symbolic. In the first place, the Conable-Jenkins substitute is a dynamic and workable frame for fiscal commonsense in Government. In the second place, consider that we might just need a symbol.

Historically, the Constitution of the United States of America has itself served as a symbol, the paper-borne embodiment of the very precepts of this Nation: truth, freedom, equality, and justice. We may, individually, bicker over the meaning of the words but we do not disagree over the meaning of the ideas and the promises made by our Constitution.

I consider this amendment to be a precise reflection of the Founding Fathers' hopes and intentions for this Nation. While it is true that something as critical as balancing the national budget was not included in the original Constitution, it's equally true that the document's original draftsmen probably never thought the problem would be presented. For most of the first century of this Nation's existence, taxes were nonexistent, and the national debt was inconsequential.

Gentlemen and ladies of the 97th Congress, we have the opportunity today to make a difference, a real difference. The instrument for that is the Conable-Jenkins proposal, not the plastic imitations, not high-sounding rhetoric. The people of the United States—the same ones who sent us here in the first place and are responsible for making out the return ticket next month—believe in and want this amendment passed.

We must abide by their wishes. I urge your support of the Conable-Jenkins substitute balanced budget amendment.●

● Mr. LUNDINE. Mr. Chairman, I rise in opposition to House Joint Resolution 350, proposing an amendment to the Constitution to balance the Federal budget.

While I strongly agree with the need for a balanced Federal budget, I cannot support a constitutional amendment as the means for achieving this goal. I believe my voting record illustrates my concern with fiscal responsibility. I have voted against most of the budgets since I came to the House because they did not embody sufficient fiscal discipline, nor the appropriate budget priorities.

However, I do not believe that imposing rigid constitutional requirements will result either in greater fiscal discipline or in a balanced budget. We in New York certainly know that constitutional provisions are no guarantee of fiscal responsibility. Both new York City and New York State have long operated under provisions requiring balanced budgets. Yet this has not prevented serious fiscal difficulties at the State level, nor did it prevent New York City from balancing on the brink of bankruptcy.

A constitutional amendment also cannot address the essential problem confronting Congress on the question of Government spending. An amendment cannot be ratified and in place to assure a balanced budget until at least 1985 or 1986. The problem is that Congress must confront the task of reducing deficit spending, and do so today.

Congress must begin to resist providing new funds for questionable "big ticket" budget items. We must begin to reduce excessive defense expenditures that perpetuate high interest rates. We must resist continuing to spend billions annually on traditional "pork barrel" projects. And we must act to keep entitlement programs from growing out of control. Only when each Member of Congress is prepared to face up to these responsibilities, can we even begin to have a hope of balancing the Federal budget.

I am disappointed that we are letting the politics of this debate direct our attention away from more practical and more immediate solutions to our budget problems. I refer specifically to the proposal of my colleague from California (Mr. MILLER) that offers what I believe to be a workable compromise on the budget issue. This so-called "Pay As You Go" plan would permit increases in spending above prior levels only if Congress specifically votes to increase taxes or make equal and offsetting spending cuts to pay for the increase. This plan could be put into effect immediately and, according to estimates by the Congressional Budget Office, could produce a sizeable budget surplus by 1985.

When legislative solutions are available for what are essential economic and political problems, I see no need to clutter the Constitution with matters that are irrevelant to its fundamental purpose. The Constitution clearly is not the place for rigid and complicated solutions to economic and budgetary problems.

The purpose of the Federal budget is to provide accurate estimates of future Government revenues and spending based on reliable assessments of economic conditions. The proposal we are considering today, I fear, will only encourage the continued manipulation of this essential data for political purposes. Budget estimates for fiscal year

1983, for example, originally placed the deficit at $43 billion. As the fiscal year begins, this figure has risen to nearly $150 billion, and will possibly go higher.

The Constitution is too essential to our basic liberties, and the Federal budget too important to our economic well-being, to permit both to be politically manipulated in the manner proposed by this amendment. This is not the appropriate answer to our current budget problems and I urge my colleagues to reject it.●

● Mr. FITHIAN. Mr. Speaker, I rise in support of the Alexander substitute to House Joint Resolution 350.

The Alexander substitute provides the kind of clear, simple, and straightforward statement of basic principles which is appropriate for inclusion in the U.S. Constitution.

As many other speakers today have noted, the Federal budget has been balanced in only 8 of the 35 years since the Second World War and only once since 1961. During the 1970's budget deficits increased substantially. Since the Reagan administration took over in January 1981, we've seen a veritable orgy of deficit spending. According to the Congressional Budget Office, the size of the Federal debt will increase by half before the end of the Reagan administration's 4-year term of office.

These budget excesses are the reason a constitutional amendment for a balanced Federal budget has won the overwhelming support of the American people. According to recent public opinion polls, such an amendment has the support of more than three-fourths of our people.

In recent years specific proposals for constitutional amendments to balance the budget have abounded, some of them good, some of them bad. I myself offered one such proposal, House Joint Resolution 181. The Alexander substitute incorporates many of the most positive aspects of my bill, unlike the other proposal we are presented with today, the Conable-Jenkins substitute.

The Alexander substitute recognizes that action by Congress to balance the Federal budget must start with a Presidential budget request that is, itself, balanced. I think that this is a particularly important point to remember in view of the current administration's fiscal policies, policies which will leave us with a $140 billion deficit next year. I note with dismay that the Conable-Jenkins substitute imposes no such requirement.

The Alexander substitute provides for a waiver of the balanced budget requirement only in the event of a national emergency. The Conable-Jenkins proposal allows the proposed constitutional requirement for a balanced budget to be waived on a three-fifths majority in each House. Such an arrangement poses no barrier to fiscal excesses by the Congress. A review of the CONGRESSIONAL RECORD shows that every appropriations bill passed by the House this year passed by a margin exceeding the proposed three-fifths margin. Had such a rule been applied to any of these bills, not one penny would have been saved.

Perhaps most important of all, from a constitutional point of view, the Alexander substitute states specifically that it confers no new powers on the President. Conable-Jenkins, if it became the supreme law of the land, would direct the President to exercise the type of arbitrary budget powers denied him in article II of the constitution and by the Budget Act.

The Alexander substitute, in short, is the type of balanced budget resolution I've been working for in Congress for the past 8 years. The Conable-Jenkins substitute is not, in my view, worthy of being called a balanced budget resolution. That is why I will support Alexander and oppose Conable-Jenkins.●

● Ms. FERRARO. Mr. Chairman, I strongly oppose the Conable-Jenkins constitutional amendment to require a balanced Federal budget. I equally strongly believe that this country cannot afford the deficits the Reagan administration's policies have caused, and I am prepared to work to bring those deficits under control so that a balanced budget will be achievable.

Frankly, the Conable-Jenkins proposal is all smoke and no fire. While its supporters, including President Reagan, maintain that the amendment is the way out of the fiscal crisis we are in, the facts are contrary to that view.

Fact: The proposed amendment would not take effect until at least 1986. This means that in 1983, 1984, and 1985, when Federal deficits could reach $450 billion, this amendment would not even be in place.

Fact: A study prepared by a leading economic forecasting firm found that if the amendment had been in place last year, there would have been virtually no Federal funds left after paying for social security, defense, veterans programs, medicare, and interest on the national debt. That means all Federal education, housing, law enforcement, transportation, and pollution control programs would simply end.

Fact: The same study reported that the amendment would have resulted in unemployment increasing to almost 14 percent, putting 4.5 million more Americans out of work.

Fact: The amendment would have required the elimination of all Federal aid to cities and States. In New York, the result could be tax increases of $1,360 per year for a family of four just to provide services now supported with Federal funds.

Fact: The amendment does not specify how it would be enforced. If the President and Congress failed to produce a balanced budget, could citizens bring court action to enforce the amendment? Would the courts rewrite the budget?

Far from being a cure for our Nation's economic ills, this proposed constitutional amendment is a formula for economic disaster and constitutional crisis. It is also a blatant attempt by the administration and those who have supported its economic policies to divert attention from the failure of those policies, and especially from the historic deficits they have created.

It is terribly hypocritical for an adminstration which has given us deficits exceeding $100 billion, and which has at no time submitted anything even close to a balanced budget, to call for a constitutional amendment to balance the budget. If the President wants to balance the budget, he should find $140 billion in budget cuts and tax increases and propose them to Congress.

The President has, instead, taken the politically easy course. It is easy to go before the television cameras and criticize Congress and say the answer is to amend the Constitution. It sounds good, and it allows the President to duck responsibility for his deficits.

But we are not on television. We have to face the consequences of our action today. We have to face the fact that if we amend the Constitution to require a balanced budget, we will either have to destroy programs that millions of Americans depend on, and in the process wreck the economy, or we will have to ignore the Constitution.

Today's vote is not a free ride. Do not vote for a constitutional amendment with the idea that you can go home and tell your people you are doing something about the budget deficits, and that that will be the end of it. It will not be the end of it. It will go to the States for ratification, and if they ratify it, we will have to live with an economic straitjacket.

There are alternative proposals to deal with the problem of rising Federal deficits which allow greater consideration of competing Federal responsibilities and which do not involve burdening the Constitution with economic policy. I support those efforts. I hope we will defeat the constitutional amendments before us today and move on to consider more practical means of achieving the goals we all share.●

● Mr. DREIER. Mr. Chairman, as we all know, this country is disillusioned with Congress. We hear time and time again that Congress is ineffective; that Congress is incapable of dealing with our economic problems; and that Con-

gress is out of touch with the people we are elected to serve.

Today, we can prove our critics wrong. We have an opportunity to return home to our constituents and say: "Yes. We did it. Yes, we are on the road to restoring the health of our economy."

You know, as well as I do, that people across this Nation are suffering from high interest rates. You know that high interest rates are stifling economic growth. And you also know that until we put an end to deficit spending, our economy may never fully recover from this recession.

I do not like the idea of tampering with the Constitution, Mr. Chairman, unfortunately, decades of profligate spending by the democratic majority give us no alternative.

A constitutional amendment to balance the budget is the only way to put deficit spending to rest. The Jenkins-Conable substitute is not a charade. It is not a smokescreen. It has been debated and tested for months. And of the two alternatives today, it alone is flexible enough to be enacted and firm enough to be effective. But as long as we go on arguing about a constitutional amendment, instead of actually passing one, we once again fail to live up to the expectations of the people of this country. We have more than just our conscience to answer to. We must answer to the people of this country who are expecting and demanding a balanced budget.

Will we prove our critics wrong and act decisively to pass an amendment that this Nation demands? Or will we wait for a constitutional convention to act for us. I urge my colleagues to vote in favor of this necessary amendment.●

● Mr. COUGHLIN. Mr. Chairman, I rise in support of House Joint Resolution 350, the proposed balanced budget and tax limitation constitutional amendment. As a cosponsor of this amendment, I believe it is necessary to restore fiscal responsibility from which Congress has strayed over the past several decades. The lack of fiscal restraint and increasingly large budget deficits over the years have been disastrous for our economy, resulting in double-digit inflation, prohibitively high interest rates, unemployment, and economic stagnation.

While it is easier and often politically popular in the short-run to spend more and more borrowed money, we cannot forever postpone taking the difficult steps to balance the Federal budget. There is little evidence to suggest that Congress will do so unless it is required by the Constitution.

It should be noted that the proposed amendment would not likely be ratified by the required number of States for at least several years when a balanced budget is a realistic possibility. Furthermore, while establishing a balanced budget as the norm, the proposed amendment would allow Congress the necessary flexibility to respond to unusual circumstances by permitting the balanced budget requirement to be set aside by a three-fifths vote of the whole number of both Houses of Congress. The amendment could be waived by Congress during wartime.

In addition, the proposed amendment is carefully constructed to protect the American taxpayer against efforts to cover budget deficits by routinely raising taxes. Revenues under the amendment could not increase faster than national income rose the previous year unless Congress specifically approved the additional receipts.

Mr. Chairman, House Joint Resolution 350 is not an instant solution to our economic problems nor is it a substitute for political courage and resolve. What the proposed amendment represents is a sound and reasonable response to chronic Government overspending, one that makes the balance of Federal receipts and expenditures standard policy to be overruled only when extraordinary considerations of national importance warrant.

On this the first day of a new Federal fiscal year, I urge this body to undertake a new commitment to fiscal responsibility by approving the balanced budget and tax limitation constitutional amendment.●

● Mr. FOGLIETTA. Mr. Chairman, I rise to oppose House Joint Resolution 350, the balanced budget amendment to the U.S. Constitution. I want to say at the outset that I support balancing the Federal budget. In fact, last year I voted in favor of alternative budget proposals which would have balanced the budget in 1982. This year I supported three alternatives which would have produced lower deficits than the Reagan budget which this body adopted.

I am opposed to the balanced budget amendment for many of the same reasons so persuasively presented by my distinguished colleagues. As a matter of principal, I feel that the Constitution should be respected. It should not be amended lightly to provide the appearance of action on an issue Congress has proved incapable or resolving through the appropriate constitutional processes. I agree that the amendment could totally disrupt the separation of powers which is one of the strengths of our system of government by making the courts the final arbiters of the budget process. I can also see how the amendment could lead to paralysis of Government, undermine our national security, and deprive Congress of the fiscal tools to modulate economic downturns.

In reaching decisions on important issues I often invoke the following maxim: Look at the worst case, and if you are prepared to accept the consequences, then, go ahead. I find this analysis particularly appropriate here, since we are considering a constitutional amendment which would govern our process in the worst, as well as the best years.

Let us imagine, for the moment, a year of economic decline in which anticipated receipts under the current tax laws are insufficient to support the costs of maintaining Government functions at the minimal level which the administration and a majority of Congress consider essential. In short, a year like this year. Let us suppose that the budget balancing mechanisms—increasing revenue or cutting expenditures—have been ruled out. Increasing taxes would worsen the economic downturn. Social programs have been cut to the bone, and there is no consensus for defense reductions significant enough to achieve the needed savings. This is the situation which the amendment anticipates and provides for by permitting a waiver of the balanced budget requirement by a three-fifths vote of both Houses of Congress.

We have already seen in this Congress how expensive it can be to build the consensus necessary to pass a budget by a simple majority vote. The practice of adding funds for favored programs or public works which benefit a Member's district to secure a needed vote is a major problem contributing to deficit spending. The three-fifths requirement would only serve to increase the number of Members of Congress and Senators whose concurrence would be necessary to pass a budget. There is nothing in the amendment which imposes any limit upon the size of the deficit, once the waiver is acted upon. Consequently, the amendment could produce "Christmas tree" budgets the likes of which this Nation has never seen.

The three-fifths requirement will make it more difficult for Congress to adopt a budget with deficit spending. But I feel that it will also tend to exaggerate the amount of deficit spending in years in which the waiver is invoked. Shall we vote to violate the principal of majority rule to achieve this likely, though unintended result? I think the risk is too great, and the price too high, to justify the symbolic gesture the amendment would represent.●

● Mr. GREEN. Mr. Chairman, today I will vote against both measures offered in the House to amend the Constitution to require a balanced budget. While I support the concept of a balanced budget and believe that Federal spending needs to be restrained, neither the amendment offered by Mr. CONABLE nor the amendment offered by Mr. ALEXANDER addresses the concerns I have in regard to amending the

Constitution to require a balanced budget.

The Conable amendment leaves the fate of the Nation in an emergency to a minority of the Members of Congress. Congress would be able to breech a balanced budget only if 60 percent of the Members agreed. This need for a "super" majority is ironic, as a simple majority is required to declare war. The "super" majority requirement alters the constitutional principle of majority rule and creates the potential of tyranny by a minority. Congress could decide to go to war or respond to an emergency and not be able to raise the funds to do so. I think this would send a message with serious implications to our potential enemies and allies. Our resolve could be called into question. I do not believe we should place our country in such a tenuous position, even though I agree we need to limit Government growth. Not only could a minority deny Congress the ability to exempt itself from a balanced budget in time of emergency, it could, if it so chose, to extract concessions from the majority totally unrelated to the emergency at hand as a price for its support. The goal of House Joint Resolution 350 is commendable. However, I am troubled by its provisions and cannot support it.

Mr. ALEXANDER'S constitutional amendment simply requires the President to submit a balanced budget and gives Congress the right to reject such a balanced budget by a simple majority and adopt its own version. Essentially, this is the situation as it exists now. The President can submit a balanced budget any year he chooses and Congress can reject it. I see no reason to adopt such an amendment to the Constitution. It simply reaffirms that which already exists and does not address the problems that exist with our budget process.

Mr. Chairman, I thank you for the opportunity to express my views on these two amendments to the Constitution. While I will vote against both these amendments, I want to urge my colleagues to continue to work cooperatively on approaches to our budgetary problems that will reduce the deficit and slow Government spending. I think the American people want this to happen. I also think that they want such changes to be fair. If domestic spending is to decrease, we cannot expand our military budget at a record rate at the same time. We must incorporate these considerations, as well as those which I raised earlier in my statement regarding the ability to respond to an emergency, if we are to solve our budgetary problems successfully.●

● Mr. GILMAN. Mr. Chairman, I rise to express my opposition to House Joint Resolution 350, legislation providing a constitutional amendment to balance the budget. This was an extremely difficult vote for many of us to make because, along with a number of my colleagues, I agree with the intent of this legislation—to have this Government live within its means as closely as possible for the health of our economy and society. However, it is the manner in which we would attempt to accomplish the goal of fiscal restraint and discipline that causes me to cast my vote in opposition. The Constitution of this United States has been the basis of our democracy for over 200 years. I am wary of placing an inflexible economic formula in this great document at a time when the future economic picture is so uncertain. We are facing huge deficits at the present time and into next year. We must bring them down as rapidly as possible. We have been working on trimming Federal spending, and yet some programs we have cut to the bare bones already. The prospect of having to suddenly apply this formula in the future when we are unsure about the deficit could result in severe budget cuts and increased taxes to stay within the formula or a waiver of the balanced budget requirement.

We must assure the American public that we in the Congress share the goal of getting our economy going again and getting the millions of unemployed back to work. We must not shirk our responsbiility in reducing the Federal deficit so that we can have a direct impact on lowering those interest rates and lowering taxes. We have very difficult decisions to make in controlling many areas of Government spending, and I believe that the vote on this amendment today will demonstrate that we will make certain that this is done in a fair way. Today's vote also demonstrates that the Congress will continue our jurisdiction and our power set out in the Constitution over raising and spending revenues. To relinquish this to other branches of the Government would be a violation of the basic principle that this Government is of the people, by the people and for the people because we as the elected representatives are the people's voice in taxation and spending matters.

I understand the impatience of many Americans burdened with increasing taxes to fund an increasing Federal deficit and how that frustration has translated into the balanced budget amendment as a last-ditch effort to stop this deficit financing once and for all. To our hard-working Americans I say today that this vote does not indicate that the Members of Congress will be at the beck and call of particular interest groups for increased funding, but rather that we will take the support shown for the constitutional amendment as a further mandate to reduce the deficit for the good of the whole country now. We will all benefit from the thorough debate of this issue that we have had on the floor of the House today. We have come through difficult times in our Nation's past and we will do so now. But we must bear in mind that the Congress must have the flexibility within which to act in representing the various problems facing our constituents. We have the mandate, and we will reduce the deficit without harming the well-being and the quality of life of all of our citizens. If I believed that the balanced budget amendment could have guaranteed a balanced budget without severe economic and social consequences, I would have embraced it. The Constitition is meant for guarantees and to be firmly complied with. We must be firm in our commitment to bring about an economic recovery through our efforts here; about that we are not flexible. We have the discipline to do it, and I am confident that we will do it.●

● Mr. STUMP. Mr. Chairman, I rise in support of the amendment. The people of the Third Congressional District of Arizona elected me to this body with the understanding that I would work toward cutting Federal spending, reducing the national debt, and balancing the budget.

However, Congress has continually demonstrated its inability to cut spending and seriously work toward balancing the budget. The current politics, personalities, and philosophies of the Members of Congress apparently make this task unachievable through existing procedures.

That is why I believe some strict institutional limits are necessary to restrain Federal spending and taxing.

This amendment provides a reasonable amount of constitutional restraint while also allowing the flexibility needed to deal with extreme situations. Without it, I only foresee increased spending, larger deficits, and no progress at all on the national debt.●

● Mr. GRAY. Mr. Chairman, I rise in opposition to House Joint Resolution 350, an amendment to the U.S. Constitution to balance the budget.

Mr. Chairman, I believe most Members of this body strongly support the need to balance the Federal budget—and to exercise fiscal restraint and responsibility in the spending of the taxpayers' money.

However, Mr. Chairman, it is my firm belief that the proposed constitutional amendment is not the way to achieve the responsible fiscal restraint we all seek. In short, I believe that this proposal is defective—deceptive—and detrimental to the future of the United States.

Mr. Chairman, the proposed amendment is defective in a number of areas. First, any growth in Federal expenditures and receipts would be limited and tied to the growth in "national

income" of the previous year. However, as our current administration has so amply exemplified, measurements such as "national income" are subject to radical change and are imprecise. Thus, the validity of any budget resolution passed this Congress under the auspices of this constitutional amendment would be minimal at best.

Second, the amendment contains no specific language which would allow for the adjustment of the mandatory and entitlement accounts in the budget. And, as evidenced this year, Federal budgetary expenditures are quite sensitive to changes in economic conditions. As an example, the net effect on the Federal budget resulting from a single percentage point rise in unemployment is upward of $30 billion. Because of these mandatory payments, unless the Congress, by a three-fifths vote, choose to increase revenues—which would be unlikely—other discretionary programs, including defense I might add, would have to be cut significantly to make room for these additional money.

Third, the proposed constitutional amendment is defective because it severely limits one of the two options available to the Congress to actually balance the budget, namely that of raising taxes.

In reality, Mr. Chairman, this amendment is nothing more than a diversionary tactic—and totally deceptive to the American public. It permits many Members of Congress, who coincidentally supported the President's record setting deficit for fiscal year 1983, a politically expedient vote to take home this month. And yet at the same time, defers the severe consequences of its passage for future Congresses, future Presidents, and future taxpayers. It allows Members of this body to support an ideally popular cause, without having to admit that one of the root causes of our current situation rests in this administration's excessive defense spending and tax decreases. Notwithstanding, there already exists four statutes—on the books—which require a balanced budget. I ask you, where were the Members of this body who signed the discharge petition, when we voted on and unfortunately passed the President's budget.

Finally, Mr. Chairman, it is my belief that the Constitution of this land should only include provisions that will withstand the test of time. This country has already learned a costly lession from putting temporal issues in the Constitution: the 18th (prohibition) and 21st (repeal of prohibition) should make this clear. The Constitution is not the place to implement economic policy. If it had, I would dare say that the Founding Fathers would not have given the Congress the authority to borrow and incur debt to meet national needs. To limit the flexibility embodied in the Constitution, with a permanent fiscal policy—sets a dangerous precedent—one which I feel will ultimately be detrimental to the future of the United States.

Mr. Chairman, for these and other reasons that time will not allow me to explain, I reiterate my opposition to the amendment and urge my colleagues to vote against this proposal.●

● Mr. OTTINGER. Mr. Chairman, I rise today to urge my colleagues to reject any amendment to the Constitution requiring Congress to pass a balanced budget. Unquestionably, Congress should curb wasteful Government spending and the resulting deficits. In a statement in the CONGRESSIONAL RECORD of April 1, 1982, I have specified $130 billion of expenditure cuts, including tax expenditures, that should be made. The balanced budget amendment, however, would put the Government in a straitjacket that could well spell economic disaster in times of recession such as we have today.

It is ironic that the greatest deficit spender in our history, Ronald Reagan, would call for such a proposal. A recent article in the New Republic puts such a proposal into the proper perspective.

> Congress and the President are playing the role of the confessed boozer who can't keep away from that demon deficit and claims to be turning over a new leaf. It's as if W. C. Fields were to announce that from now on, in order to lick his drinking problem, he would wear a bag over his head at cocktail time. It wouldn't stop the drinking, of course, and it would probably look silly besides. . . . Despite all the evidence to the contrary, fiscal winos like Ronald Reagan and Orrin Hatch stand there, red nosed, insisting that the bag is just the cure they need.

According to a report prepared for Senator MOYNIHAN by the Wharton Economic Forecasting Associates, if the balanced budget had taken effect after Ronald Reagan was sworn into office, along with the rest of his ill-conceived economic programs—and given the President's proclaimed "untouchable" outlays for defense, veterans, social security, and medicare—on which he has already welched, proposing cuts of $84 billion in social security and enacting $13.7 billion of cuts in medicare and $164 million in veteran benefits—

> There wouldn't be enough money left over to pay unemployment compensation to the estimated 15 percent of the work force that would be jobless. Federal courts and the White House would have to close down, as well as the Postal Service, law enforcement agencies, energy, transportation, education, and housing programs.

Most important, if the balanced budget amendment were ratified by the States before October 1983, its provisions would become effective for fiscal year 1985. This would mean spending cuts and tax increases, based on current CBO estimates, that together would add up to between $163 and $178 billion, or, as much as the Government now spends on all discretionary programs like education, jobs, health care, and so forth.

We have seen under the ill-conceived fiscal policies of the Reagan administration what a severe reduction in employment and income can do. The effect on the economy of another drastic shift in taxing and spending in 1985 would be even more severe. The initial reduction in incomes of taxpayers, entitlement recipients, and firms with Government contracts would set off an unprecedented chain of declining purchases, reductions in industrial output, and widespread unemployment. Such action would forgo any hope of economic recovery for years to come.

It seems totally hypocritical that the President, who is largely responsible for the outrageous deficit which confronts us today, would call for an amendment to balance the budget. It appears that Mr. Reagan is making an effort to draw attention away from the chronic economic chaos he has perpetuated and would have us all believe that all our budget problems can be cured in one grand wave of this balanced budget wand.

The fact is that we will never have a balanced budget without prosperity. Every 1 percent of unemployment adds $30 billion to the deficit. We have only had a balanced budget when the economy was going full tilt—when full employment had all workers paying taxes and corporations making profits.

In the long run, bound by the constraints of a balanced budget amendment, Congress would lose flexibility in setting fiscal policy. While that would be tolerable for moderate swings in the economy, it could create tremendous problems in times of economic slump. For example, if an unanticipated recession reduced tax revenues and drove up unemployment payments, and thereby caused an outlay overrun, the amendment would require Congress to make additional offsetting budget cuts. Such cuts would serve only to deepen an ongoing recession. In such instances, the amendment designed to rid us of our economic hardships, would serve only to worsen economic conditions.

Furthermore, implementation of the amendment would require significant revisions in the budget process. Because of the difficulty in interpreting and implementing the amendment, it will augment the bureaucracy and further promote economic instability. I thought that is what the President was striving to prevent.

I urge all my colleagues to reject this and any other dangerous amendment to the Constitution requiring a

balanced budget. The Constitution is the wrong place to experiment with untested economic theories—theories that I feel can only lead us down the road to disaster.●

● Mr. PATTERSON. Mr. Chairman, I rise in support of a constitutional amendment to balance the budget. I am frustrated by the inability of the Congress and the President to restore balance to our Federal budget, and have come to the conclusion that it is only through the impostion of this constitutional requirement that we can begin to bring about the budget control our economy so urgently needs and our Nation's citizens deserve.

I would like to urge my colleagues to vote in favor of the Alexander amendment which states that the President must propose and the Congress must enact budgets in which outlays are no greater than total receipts. The Alexander amendment is the kind of clear, simple, and straightforward statement of an enduring fundamental principle that is appropriate for inclusion in the U.S. Constitution.

Unlike the Conable amendment (H.J. Res. 350), which President Reagan supports, the Alexander amendment does not attempt to mandate specific congressional procedures, economic formulas, or other details which should not be made a permanent part of our Nation's charter document. Instead, it leaves these matters to implementing legislation which can be altered to keep pace with changing circumstances.

Furthermore, the Alexander amendment includes the two components I believe are essential for this amendment. First, it imposes budget restrictions on both branches of Government responsible for formulating the Nation's budget. Second, it provides the flexibility necessary if the Congress and the President are to be able to respond to unforeseen national emergencies as well as meet our Federal Government's commitment to defense and social insurance.

Conversely, the Conable amendment (H.J. Res. 350) is perilously flawed. First of all, the Conable amendment does not require the President to prepare and send to the Congress a balanced budget. Yet the amendment requires the Congress to adopt a balanced budget. This is a significant flaw in that the amendment ignores the fact that Federal budgets are always prepared by the President who is the Chief Executive in charge of all Government administration. An often forgotten fact is that only twice since 1947 has the Congress appropriated more money than the President requested; in every other case, the Congress cut back the budget as proposed by the President.

Second, the Conable amendment does not provide the necessary flexibility for our Federal Government to meet its commitment to social insurance and national defense. For example, there is no safeguard to protect social security. This program should not be included in the balanced budget calculations since social security is an independently funded income security system. Yet, under the Conable amendment, "all" outlays, including social security, would be included in the determination of budget balance.

Additionally, our Nation's defense could be imperiled by the Conable amendment in that there is a double bias against defense spending. One bias is that the only way to incur a deficit for defense by majority vote is in the event of a formal declaration of war by Congress. But such declarations are extreme and rare, and in the case of contemporary threats and emergencies affecting our national security interests, are inappropriate. So, in the absence of a declaration of war, efforts to respond to national security emergencies will have to be funded by a tax increase—which is prohibited by this amendment—or by budget cuts. This is where the second bias occurs, the first target for any such cuts will likely be the controllable outlays, and most of these controllables are defense outlays.

Third, any budget is a compilation of estimates of future expenditures and revenues. Any President, or the Congress, could misrepresent the estimates. For example, when the President requested his fiscal year 1982 budget to the Congress, he projected a budget deficit of $45 billion. Now we know that the deficit will exceed $110 billion. And this is the case even though the President was successful in obtaining all of the major economic initiatives he proposed.

A fourth flaw with the Conable amendment is that it includes language fundamentally inappropriate for the Constitution. Specifically, it restricts spending and revenue to a rigid formula that attempts to measure growth in U.S. national income. Such a measurement is inherently imprecise and subject to rapid change and should not be placed in our Nation's Constitution which has endured 200 years of history and hopefully will guide us through another 200 years. Furthermore, this inappropriate language could have the unintended effect of preventing tax reform. The amendment's restrictions on revenue raising could easily preclude Congress from repealing unfair loopholes and other provisions—such as the outrageous tax leasing provisions trimmed back in this year's tax bill—because such reform would constitute raising of revenues.

The President's strong support for House Joint Resolution 350 is merely a smokescreen tactic to distract public attention from the dismal failure of his administration's supply-side economics. The President's so-called program for economic recovery instead of moving us closer to a balanced budget would, in his one 4-year term, nearly double the size of the total debt accumulated in our Nation's 206-year history. The economic consequences of this program have been and continue to be severe. Corporate profits have fallen 34 percent. Business bankruptcies are at their highest rate since 1932. Housing construction starts are more than 55 percent below the level in 1978. Long-term interest rates have skyrocketed and they remain very high and will continue to act as a deterrent to investment in housing and business plant and equipment. Unemployment is 10 percent nationwide, the highest since 1941.

In closing, I would like to again urge my colleagues to support the Alexander amendment. The fundamental enduring principle that our Government live within its means must be incorporated into our Nation's Constitution. The Alexander amendment is clear and workable language which would assure that this goal of a balanced budget is actually achieved.●

● Mr. UDALL. Mr. Chairman, I am opposed to House Joint Resolution 350, the constitutioinal amendment that is before us today. I oppose it for several reasons.

First, I do not believe this amendment will achieve its stated objective of balancing the Federal budget. Sooner or later, the discipline that it seeks to impose on Congress will break down. There are any number of ways in which its mandate can be ignored. The amendment itself provides for an override of the balanced budget requirement by a three-fifths vote. Beyond that there are various means by which actual outlays can be hidden and not counted for purpose of determining whether the budget is in balance. Congress already has pushed many items of expenditure off budget in an effort to improve the appearance of the Federal balance sheet. But most importantly, there is no established mechanism for enforcing a balanced budget, if expenditures for programs like social security should unexpectedly rise or if revenues should fall short of expectations.

Second, I believe that the Constitution has three basic functions. Allocating powers between the three branches of government; establishing the machinery of government; and protecting the most fundamental rights, such as life, liberty, and property, free speech, fair trials, and equal justice. House Joint Resolution 350 does not serve any of those fundamental purposes.

Third, I believe as Oliver Wendell Holes once said, "A Constitution is not intended to embody a particular economic theory." I have long felt that

defifict spending—particularly in the economic climate of the past few decades—has been harmful. I felt that way during the Johnson administration. That is why I urged early on that President Johnson impose a tax surcharge to pay for the costs of the Vietnam war. I continue to feel that way; that is why I opposed the President's tax bill last year. But as much as I abhor deficit spending, I do not think we should bind future generations to a balanced budget requirement, even if it could be enforced.

Nor do I believe that constitutions should contain such arcane language as "the rate of increase in national income." The Constitution is intended to be statement of principles, not a technical manual.

Finally, I am concerned that House Joint Resolution 350 raises some unanswerable constitutional questions. What happens if the balanced budget mandate is ignored? Former Watergate prosecutor Archibald Cox warns that it could "thrust the Supreme Court of the United States, the lower Federal courts and even the State courts into the heart of fiscal policy, appropriations, and expenditures." Constitutional and fiscal chaos could result.

Beyond these objections to the amendment, let me make some other observations.

Even if someday ratified, the amendment that is before us today will do nothing about our present circumstances. At the very earliest, it would not be effective until fiscal year 1985. More likely, it would not go into effect until 1987 or beyond.

Given our present economic troubles, it is difficult not to think of this proposal as a political smokescreen. When the President campaigned for office in 1980, he promised the American people a balanced budget for the fiscal year that begins today. Instead, he has given us a record setting deficit estimated at $155 billion and a constitutional amendment that would not require a balaced budget for years to come.

If a balanced budget amendment is to be adopted, it should at the very least impose upon the President an obligation to submit a balanced budget. This amendment House Joint Resolution 350, fails to impose that obligation. If a balanced budget mandate is required, let it be a general charge to Congress and the President, one that would reserve unto them the flexibility to deal with emergencies without resort to constitutional mischief.

House Joint Resolution 350 is not an answer to our economnic difficulties. As an editorial in the Arizona Republic recently editorialized, it is a "phoney amendment * * * politicians should stop playing games with an amandment that obviously is meaningless. They should stop pretending they are doing somwthing about balancing the budget, and get down to work at reducing the horrendous deficits. A constitutional amendment will not balance the budget. A conscientious effort expenditures will."●

● Mr. WOLF. Mr. Chairman, I rise in support of House Joint Resolution 350, the balanced budget amendment to the U.S. Constitution. As an original cosponsor of this legislation and as a signer of the discharge petition to allow this measure to be considered by the full House of Representatives, I believe that this is a measure whose time has come. We must act to arrest Federal spending and end excessive demands on Federal credit caused by growing deficits.

This amendment would limit Govenment spending by requiring that the Federal budget be balanced each and ever year, uless three-fifths of Congress voted to deficit spend or in times of war. It also would eliminate taxation by tying the rate of growth of Federal to the rate of growth of the national economy.

In 1980 and prior to that, I said, emphatically, that I was opposed to the balancd budget amendment. At that time, I said Congress should be able to work within the budget process to achieve a balanced budget. After seerving in Congress, however, and now having a firsthand understanding of that process, I have grave reservations that a majority can be assembled to deal with the fiscal problems we face, and have come to the conclusion that more structure, more discipline is needed in the budget process. I wish that it was necessary to force this discipline upon the Congress, which should be prepared to act rsponsibly and make the tough decisions to bring the Federal budget into balance. But until this amendment, Members will be forced to stand up and be counted on the questions of reducing spending, finding more sources of revenue and more equitable tax laws. Our current system lacks such pressure and diecipline.

I believe in our consideration of this amendment it is also important to note that 31 State legislatures have gone on record in support of this amendment, coming to the same conclusion about the consequences of dificit spending. These States have adopted resolution convention on the balanced budget amendment. Convention proponent as need only three more States to convene a convention and when the State legislatures meet early next year, it is entirely conceivable that number will be reached. As this drive nears success, I believe it is crucial that the Congress submit to the States a proposed amendment crafted in this branch of government, thus obviating the need for a constitutional convention which could prove to be a chaotic situation open to consideration of a number of changes proposed to the Constitution.

Reducing Federal spending is no easy task. We all know the special interest pressures of the present budget process. We can no longer ignore the enormity of the problem of deficit spending and the record of failure in past decades in trying to limit spending growth. The American taxpayer pays for Government which lives beyond its means through higher inflation, higher interest rates, higher unemployment, and higher taxes for future generations.

I urge my colleagues today to go on record, to send a clear signal to the American people that this Congress has the courage to meet its responsibility to balance the tax-spending and tax-paying interests of this Nation.●

● Mr. FLORIO. Mr. Chairman, as the House of Representatives debates the administration's idea for a balanced budget constitutional amendment, it is important that we and all Americans understand the likely result of the proposal.

Supporters of the amendment believe that it is a reasonable response to the public's legitimate demand for restraint in Government spending and an end to Federal deficits. In the Congress I have frequently joined my colleagues in voting for legislation to produce budget surpluses, and place our Government back on a sound financial footing. My support for these balanced budget plans and other measures to reduce spending deficits, is based on judgments that they would help put Americans back to work, provide a fairer tax system, while retaining our commitments to the elderly and disadvantaged.

I find it ironic that this administration, which seeks to leave its successor with a balanced budget constitutional amendment, has 2 years in a row strongly opposed congressional legislation to balance the budget. Instead the administration persuaded the Congress, over my opposition, to enact a program which will add $700 billion to the national debt by 1984. By cutting taxes three times faster than spending, the administration has created record deficits and interest rates, destroying all incentives for economic expansion, and prolonging our national recession. The administration is now trying to disguise the failure of their economic program by seeking a constitutional barrier to future deficit spending.

If the balanced budget constitutional amendment gains speedy approval in the Congress and among the States, what effect would it have if enforced in 1985? Under present projections, the House Budget Office reports that it would require at least $215 billion of spending cuts to pass a balanced budget in 1985.

These cuts would have to come from either social security and national defense, which account for two-thirds of the budget, or from virtually eliminating most other functions of the Federal Government.

For example, in 1985 social security, national defense, and a rudimentary Federal Government will cost about $675 billion under current policies. If these programs were not reduced, the required $215 billion in cuts to balance the budget would have to come from the $262 billion that is left in the budget for all other areas. This means an 82-percent reduction in most Government programs, including law enforcement, housing, education, highways, aid to the handicapped, job training, research and development, small business aid, care for the poor, and disaster assistance.

If no programs were protected, an across-the-board cut of 23 percent in each Government program would be required to balance the budget. This would reduce national defense by $70 billion, social security and medicaid by $60 billion, $6 billion reduction in both unemployment compensation and veterans' programs, and sizable cuts in everything else.

I do not believe that my constituents, and our Nation, support these alternatives.

I am concerned that the administration's support for a balanced budget constitutional amendment is a thinly veiled threat to dismantle the social security system as we know it. Federal discretionary programs, which make up most of Government's structure, have already taken the majority of the enacted cuts, with $75 billion cut in the last 2 years. Furthermore, the administration is opposing all attempts to reduce its $1.6 trillion, 5-year defense buildup. If the administration will not support needed cuts in defense, and most other Government programs have been substantially reduced, social security is the only program large enough where cuts could approach satisfying a constitutional amendment to balance the budget.

Constantly the administration tells the American people that it will not cut social security. But it was only 1 year ago when the administration proposed cutting early retiree's benefits by 40 percent, disability benefits by 30 percent, and everybody else's pensions by 20 percent. This past spring the administration endorsed legislation to immediately reduce social security benefits by $40 billion. Fortunately, the Congress has succeeded in blocking these radical attacks on social security.

The passage of a balanced budget constitutional amendment, however, would create greater leverage to enact drastic social security benefit cuts and push millions of elderly into poverty. I urge my colleagues to consider this issue closely.●

● Mr. STARK. Mr. Chairman, we have been asked to vote on a balanced budget constitutional amendment. I do not think there is a person here that would be against balancing the budget, but that desire has been turned into a political move designed to smokescreen the fact that the President's economic program is a total disaster.

Many true conservatives oppose this constitutional amendment. George Will calls it a sham, a confession of political incompetence and a trivialization of the Constitution. It is all of those and more—and most of all it is an amendment which is so full of loopholes that it will not work.

It is particularly ironic to me that the same President whose 4 years of deficits will exceed the total deficits of the 1960's and 1970's is the one up here urging this body to adopt a constitutional amendment to balance the budget. President Reagan submitted a budget to us, which passed, that the CBO estimates will have a deficit of over $155 billion. The Reagan budget deficits are estimated at between $140 and $180 billion over the next 3 years. The facts speak for themselves:

NATIONAL DEBT ACCUMULATED UNDER POSTWAR PRESIDENTS

[Dollars in billions]

President and fiscal years	Debt at end of term		Amount accumulated during term	Percent of total 1985 debt
	Amount	Percent of GNP		
World War II and before, through 1946	$269	130.3	$269	15.9
Truman, 1947–53	266	73.9	[1] −3	[1] −.2
Eisenhower, 1954–61	293	57.5	27	1.6
Kennedy, 1962–64	317	51.2	24	1.4
Johnson, 1965–69	367	40.3	50	3.0
Nixon, 1970–75	544	36.8	177	10.5
Ford, 1976–77	709	38.0	165	9.8
Carter, 1978–81	1,004	35.1	295	17.4
Reagan,[2] 1982–85	1,696	42.3	692	40.8

[1] This includes only the postwar portion of President Truman's term, beginning in fiscal year 1947.
[2] Figures for President Reagan represent the latest CBO projections.

AVERAGE BUDGET DEFICITS AND SURPLUSES SINCE WORLD WAR II

[Dollars in billions]

President and fiscal year	Not adjusted for inflation	Adjusted for inflation [1]	Percent on GNP
Truman, 1947–53	+$1.6	+$6.3	+0.8
Eisenhower, 1954–61	−2.0	−5.7	−.4
Kennedy, 1962–64	−5.9	−16.1	−1.0
Johnson, 1965–69	−7.2	−17.4	−.9
Nixon, 1970–75	−19.0	−33.8	−1.5
Ford, 1976–77	−55.7	−79.9	−3.2
Carter, 1978–81	−48.5	−54.8	−2.0
Reagan,[2] 1982–85	−143.0	−122.0	−4.1
Republican average:			
Including Reagan administration	−40.6	−44.8	−1.8
Excluding Reagan administration	−15.1	−25.5	−1.2
Democratic average	−12.4	−16.3	D−.5

[1] Expressed in 1981 dollars.
[2] Deficit figures for the Reagan administration represent the most recent CBO projections.

Note.—The fiscal years shown for each administration do not correspond exactly to the calendar years during which each administration was in office. This is because fiscal years begin during the previous calendar year (for example, fiscal year 1947 began in July 1946), and fiscal years have been assigned in this table to the President who was as in office when the budget was prepared and adopted and when the fiscal year began, rather than to the President who was in office when the fiscal year ended.

I support an alternative balanced-budget proposal, authored by my friend Congressman GEORGE MILLER. Termed the "pay-as-you-go" proposal, the CBO estimates this alternative would create a surplus of $27 billion by 1985. That is real budget balancing, not political maneuvering.

I would like to add that I have been supporting budgets which would have narrowed these staggering deficits faster. Time after time, the budget alternatives supported by most Democrats—and which failed to be enacted—would have given us less red-income spending. They would have brought interest rates down faster—they would have ended this depression sooner. Again, the facts, as prepared by the nonpartisan Congressional Budget Office, speak for themselves:

DEFICITS/SURPLUSES UNDER ALTERNATIVE BUDGETS

[In billions of dollars]

	Fiscal year—			3-year total
	1983	1984	1985	
Democratic alternatives:				
House Budget Committee (Jones) I	−110.2	−80.2	−42.0	−232.4
House Budget Committee (Jones) II	−113.9	−85.6	−49.0	−248.5
Representative Miller	−109.4	−57.4	+27.5	−139.3
Representative Obey	−108.9	−50.6	−1.3	−160.8
Congressional Black Caucus	−92.8	−60.1	+18.7	−134.2
Bipartisan alternative:				
Representatives Aspin and Pritchard	−104.7	−79.8	−43.4	−227.9
Republican alternatives:				
House Republicans (Latta) I	−109.9	−85.1	−57.2	−252.2
House Republicans (Latta) II	−109.8	−87.6	−61.8	−259.2
Senate Republicans (Domenici)	−114.2	−91.1	−64.2	−269.5
Republican budget—as passed	−116.4	−104.6	−92.7	−313.7
Republican budget—Reestimated	−155.0	−152.0	−152.0	−459.0

Note.—All figures (except for the "Republican budget—reestimated") represent CBO estimates made at the time the various budget proposals were considered by Congress. They do not reflect the most recent CBO projections, which indicate that deficits under the "Republican budget—as passed" will be much higher than initially projected due to recent economic developments. These most recent projections appear in the table as "Republican budget—reestimated."

Let us quit talking about constitutional amendments and simply do what has to be done—reduce deficits, so we can get interest rates down and keep them down, so that Americans can get back to work.●

Mr. RODINO. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, all time has expired.

Pursuant to the rule, the joint resolution is considered as having read for amendment under the 5-minute rule. No amendments are in order except the following amendments, which shall not be subject to amendment and shall be considered in the following order:

(1) An amendment in the nature of a substitute printed in the CONGRESSIONAL RECORD of September 30, 1982, by, and if offered by, Representative ALEXANDER;

(2) An amendment in the nature of a substitute consisting of the text of House Joint Resolution 350 as introduced if offered by Representative

CONABLE, and said amendment shall be in order even if the amendment designated number (1) above has been adopted.

The text of the joint resolution (H.J. Res. 350) is as follows:

H.J. RES. 350

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution if ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratification:

"ARTICLE —

"SECTION 1. Prior to each fiscal year, the Congress shall adopt a statement of receipts and outlays for that year in which total outlays are no greater than total receipts. The Congress may amend such statement provided revised outlays are no greater than revised receipts. Whenever three-fifths of the whole number of both Houses shall deem it necessary, Congress in such statement may provide for a specific excess of outlays over receipts by a vote directed solely to that subject. The Congress and the President shall ensure that actual outlays do not exceed the outlays set forth in such statement.

"SECTION 2. Total receipts for any fiscal year set forth in the statement adopted pursuant to this article shall not increase by a rate greater than the rate of increase in national income in the last calendar year ending before such fiscal year, unless a majority of the whole number of both Houses of Congress shall have passed a bill directed solely to approving specific additional receipts and such bill has become law.

"SECTION 3. The Congress may waive the provisions of this article for any fiscal year in which a declaration of war is in effect.

"SECTION 4. The Congress may not require that the States engage in additional activities without compensation equal to the additional costs.

"SECTION 5. Total receipts shall include all receipts of the United States except those derived from borrowing and total outlays shall include all outlays of the United States except those for repayment of debt principal.

"SECTION 6. This article shall take effect for the second fiscal year beginning after its ratification.".

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. ALEXANDER

Mr. ALEXANDER. Mr. Chairman, I offer an amendment in the nature of a substitutue.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. ALEXANDER: Strike out all after the resolving clause and insert in lieu thereof:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intends and purposes as part of the Constitution if ratified by the legislatures of three-fourths of the several States within seven years after its submission to the States for ratifications.

ARTICLE

SECTION 1. The President shall, no later than the fifteen days after the Congress convenes, submit to the Congress a proposed statement of receipts and outlays for the next fiscal year in which total outlays are no greater than total receipts.

SECTION 2. Prior to each fiscal year the Congress shall adopt a statement of receipts and outlays for that year in which total outlays are no greater than total receipts, except that the Congress may, by declaration of National Emergency, adopt a statement of receipts and outlays in which total outlays are greater than total receipts.

SECTION 3. The Congress shall implement this Article by appropriate legislation.

SECTION 4. This Article shall not be deemed to provide any person with any legal right or cause of action not otherwise provided by this Constitution or the laws of the United States.

SECTION 5. This article does not provide any powers to the President to enforce its provisions other than any powers which may be established by law.

SECTION 6. This article shall take effect for the second fiscal year beginning after its ratification.

The CHAIRMAN. Pursuant to the provisions of House Resolution 640, the gentleman from Arkansas (Mr. ALEXANDER) will be recognized for 30 minutes, and a Member opposed will be recognized for 30 minutes.

Is the gentleman from New York (Mr. CONABLE) opposed to the amendment?

Mr. CONABLE. Mr. Chairman, I am opposed to the amendment.

The CHAIRMAN. The gentleman qualifies.

The gentleman from New York (Mr. CONABLE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Arkansas (Mr. ALEXANDER).

□ 1400

Mr. ALEXANDER. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, we are here today because the American people have demanded a debate on a constitutional amendment to balance the budget. In fact, about 35 State legislatures have petitioned the Congress of the United States to propose a balanced budget amendment. Accordingly, I am offering a proposed amendment to the Constitution to provide for a balanced budget. The issue is critically important to the economic well-being of our Nation, which is entrusted to us by the Constitution.

The Constitution vests in the House and the Senate authority to levy and collect taxes and to provide for the general welfare, and so it is not only timely but appropriate for us to address ourselves to the balanced budget amendment.

The amendment which we propose is simple and direct. It, in keeping with the tenor and substance of both the Constitution and the first 26 amendments, announces a principle, and design for the Government to be implemented by appropriate legislation.

It does not, and it should not, unduly bind or restrict either the President or the legislature in carrying out its mandate.

If one thing is clear in the history and jurisprudence of our Nation, it is that the Constitution, as the grand design for Government, speaks in spirit, as well as by letter and embodies the fundamental concepts of the democratic process, not necessarily the excruciating detail of its execution.

This is left, as it should be, to the minions upon whom the framers placed great responsibility—the Congress and the President.

This brings me to an outline of the proposed amendment. It provides that the President shall, no later than 15 days after the Congress convenes, submit to Congress a proposed statement of receipts and outlays for the next fiscal year in which total outlays are not greater than total receipts.

The amendment makes the President a full partner in this process, as he should be, and must be, for the Constitution and existing law require the President to transmit the budget to the Congress, to submit information to the Congress on the state of the Union, and to recommend measures in furtherance of the national welfare which he deems necessary and expedient.

So it is crucial that the President play an integral and coequal part in the budget-making process.

However, while the President has a responsibility to formulate a balanced budget, the Constitution provides that the Congress levy taxes and appropriate funds. The power to enforce that budget must rest with the Congress, not the Executive.

In this respect my amendment differs fundamentally from the Jenkins-Conable amendment. In section 1 of Jenkins-Conable, it is stated that "Congress and the President shall insure that actual outlays do not exceed the outlays set forth in such statement", referring to the statement of receipts and outlays.

In section 5 of my amendment, it states: "This Article does not provide any powers to the President to enforce its provisions other than any powers which may be established by law."

Second, Mr. Chairman, my amendment requires Congress to adopt a balanced budget, except when Congress declares a national emergency. Here we have necessarily departed from the rigid and inflexible design of the Jenkins-Conable amendment, which recognizes only a declaration of war as an exception.

This, I believe, is bad policy. We cannot anticipate all the contingencies, whether they be war, national disasters, like a massive crop failure, droughts, floods, and other extreme emergencies, including a depressed economy and high unemployment.

Third, the amendment provides the Congress with authority to implement the amendment by legislation. This is consistent with all previous efforts to amend the U.S. Constitution.

As Hamilton stated in the famous Federalist Papers, No. 85, the last essay that he wrote on the Constitution: "Experience must guide their labor; time must bring it to perfection, and the feeling of inconveniences must correct the mistakes which they inevitably fall into their first trials and experiments."

Likewise, we must insure that we bring experience to our labors should the balanced budget amendment require fine-tuning and adjustment in the event that it does not work as it is envisioned to work.

Fourth, the amendment makes clear that it provides no legal right or cause of action not otherwise provided in the Constitution or laws of the United States. This is essential, given the expanding modern concepts of standing and justiciability if we are to reserve the power conferred by the amendment to the elective branches, the President and the Congress, and not inadvertently transfer this process to the courts.

My balanced budget amendment guarantees to our people the protection from a Federal budget imposed upon them by nonelected, lifetime-appointed Federal judges. The other proposals before us today do not so protect our people from Federal budget tyranny of the Federal courts.

Finally, the amendment makes clear that no powers are conferred upon the President by the amendment except those which the Congress may establish by law.

It seems to me that the basic failure of the Jenkins-Conable amendment lies in its complexity and its detail, and this stands in the way of its ultimate success.

Indeed, its failure can be measured by the length of the explanation contained in the Senate report, which goes on for fully 17 pages merely to define the key terms of the amendment.

My amendment is broad, not vague, and clearly no broader than scores of other mandates written into the Constitution, whether it be the mandate to insure "due process of law" or to see that the "laws shall be faithfully executed" to provide for the "common defense" or to pass laws "necessary and proper" to implement our policies. The Constitution speaks in broad terms, and my amendment is consistent with this tradition—a tradition which is the very strength of the fundamental law of our land.

In addition, we have omitted a requirement that the Congress, when it is forced by compelling national emergency to deviate from the balanced budget, do so by a supermajority. We must, as legislators and like our forefathers who drafted the Constitution, be practical and realize the clear and certain danger of failing to obtain a three-fifths vote.

If past is prolog, Mr. Chairman, we know that in the House, in only 14 of the last 55 instances in which Congress was forced to raise the debt ceiling, have we attained a supermajority of two-thirds. In times of severe recession, with rising unemployment, the Congress and the President must be able to respond to the needs of the Nation. We must not cripple the Nation by binding the institutions of the people with procedural redtape.

Finally, unlike Jenkins-Conable, which tries to freeze into the Constitution one untried economic theory, we want a workable amendment which, if ratified by the States, will not force upon the American people another riverboat gamble.

Mr. Chairman, I offer this balanced budget amendment because the people of this Nation have demanded it—and because the resolution passed by the other body is so inflexible as to be unachievable and inconsistent with the spirit and the content of the Constitution which has served our people so well for nearly two centuries.

Any balanced budget amendment to the Constitution must be a positive and constructive response to the demand our people have made for such an amendment—an amendment that does not rob our people through their freely and democratically elected Congress, of the ability to deal with our Nation's economic problems.

The other body, with the resolution it has passed has said to our people that 11 million unemployed Americans are not a national problem. It has said that unemployment is not a national problem because the other body requires a supermajority in order for our people, through the Congress they elect, to make exceptions in times of national emergency—in times of national crisis.

The balanced budget amendment that I propose does not require a supermajority for our people, working with their Congress, to deal with national emergencies.

The other body, through its resolution, has said that the depression that is tearing at the guts of our farming industry is not a national problem—that it is another problem to be dumped on the backs of the State and local governments.

One-third of my farmers are busted. That is a national problem. The Members of the other body may not know that the economic disaster in the farming community is a national problem, but I do. And, I am convinced the majority of this House does, also.

I have a long memory. It is certainly long enough for me to know that neither the State nor the local governments came to the aid of our farmers in the Hoover Great Depression or in any of the farm crisis years that have occurred since that economic catastrophe a half century ago. That job was left to the Federal Government. The resolution of the other body could make it impossible for our farmers' Government to help our farmers survive.

By passing the resolution it did, the other body has said to the small business operators the economic collapse of tens of thousands of small businesses is not a national problem. The other body has said that this is yet another problem to be dumped in the laps of the State and local governments.

But, like the unemployed, like our farmers, our small business people know well that it has not been the State governments, it has not been the local governments—it has been the Federal Government that has provided the assistance that is vital to their ability to stave off bankruptcy or forced liquidation.

The resolution of the other body could make it impossible for our small businesses to get the Federal help they have needed, now need, and may need in the future, to survive. The balanced budget amendment that I propose would not rob our small business people of that chance for survival.

In formulating a balanced budget amendment to the Constitution, our responsibility as guardians of the constitutional rights of our people to demand that all provisions of the Constitution protect the moral, ethical, legal right of our people to have the flexibility to deal with national problems—with national emergencies.

The balanced budget amendment that I propose today guarantees that our people continue to have the constitutional right to deal with national emergencies in an orderly and timely fashion. The resolution adopted by the other body does not do that.

The balanced budget amendment to the Constitution that I propose guarantees to the American people the right to demand that the President propose and the Congress adopt a balanced Federal budget. Neither the resolution passed by the other body, nor the other proposal before us today guarantees that right to our people.

As I have already said, my balanced budget amendment guarantees our people protection from a Federal budget imposed on them by nonelected, appointed-for-life, Federal judges. The other proposals before us today do not so protect our people from Federal budget tyranny of the Federal courts.

My balanced budget amendment proposal guarantees the American people protection from Federal budget iron rule exercised by one person. The

other proposals before us would rob our people of the sure protection against the iron budget hand of one person, a protection that has been the sure right of our people for nearly two centuries.

I offer my balanced budget amendment proposal because the majority of our people say they want a balanced budget amendment. Despite the fact that our people have increased their personal, private debt by more than 1,500 percent they say they want to live within their personal income. And, they tell us they want the Federal Government to live within its income.

I offer my balanced budget amendment because the majority of our State legislatures have voted support for a balanced budget amendment. Our States say they want the Federal Government to operate within a balanced budget. The State governments say they want a balanced budget amendment despite the fact that more than 20 percent of the money State and local governments spend comes from the Federal budget. The State governments hold this position despite the fact that State and local governments have increased their debt by more than 1,200 percent.

I propose my balanced budget amendment because many of our corporate business and industrial leaders say to the Congress and the American people that the Federal Government should operate on a balanced budget. These corporate industry and business leaders say the Federal Government budget must be balanced despite the fact that they have increased corporate business and industry debt by more than 1,400 percent.

I offer my balanced budget amendment proposal because our President has persuaded our people that the Federal Government must operate on a balanced budget. President Reagan has persuaded our people that this is the course we must take despite the fact that he has told the American people and the Congress that his own Federal budget proposals will give the Nation the four highest Federal deficits in the history of our Nation or any nation.

There are those who would have our people believe Federal budget deficits are the invention of the past 20, or 40, or 50 years. But, the historian—the economist—the Federal official—who wants to play fair and honest with our people will make the record speak for itself.

And, the record says our Federal budget began in deficit two centuries ago and have been in deficit far more years than Federal budgets have been in balance. Not by the more than $100 billion deficits of President Reagan—true. Not by the historic record deficit set by President Ford—true. Not even by the peacetime deficit record set by President Nixon. But, the Federal budget has run in the red more often over the past two centuries than it has in the black.

Now, our people tell us they want a balanced budget provision in the Constitution that has been our fundamental law for nearly two centuries. My balanced budget amendment would put into the Constitution the provision our people tell us they want.

My balanced budget amendment is consistent with our Constitution as fundamental law. It establishes in the Constitution the concept of a balanced budget just as the Bill of Rights establishes the Constitution the basic American concepts of freedom of speech and freedom of religion. And, like the Bill of Rights, my balanced budget amendment guarantees to present and future generations of our people the right to control—every step of the way—the present and future laws that may relate to the making of a balanced budget. The other proposals before us today do not so protect the rights of our people.

My balanced budget amendment does not—as the other proposals before us could—hand over to the Federal courts the power to tell our people what the Federal budget will be.

Nor does my balanced budget amendment hand over to the President—as the other proposals before us could—the power to cut payments under social security—or veterans programs—or farmer price support programs without hearing the views of our people or their Congress.

We, as the elected Representatives of our people, are the guardians of the Constitution. We must not abandon our responsibilities to our workers, to our farmers, to our small business operators, to our senior citizens, to any of our citizens. My balanced budget amendment proposal is the only one before us that guarantees that by adopting it we do not abandon our people—that we do not rob them of their rights—that we conduct ourselves morally, legally, ethically, and honorably as guardians of our Constitution.

□ 1410

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from South Carolina (Mr. HARTNETT).

Mr. HAGEDORN. Mr. Chairman, will the gentleman yield?

Mr. HARTNETT. I yield to the gentleman from Minnesota.

Mr. HAGEDORN. Mr. Chairman, I rise in support of House Joint Resolution 350, the Conable-Jenkins amendment. I feel this amendment is crucial to stop the exorbitant spending by this body of Congress. If we continue to spend at the levels we have been recklessly doling out, we are going to double our national debt in less than 10 years.

We simply cannot merrily lead this country down the path to economic ruin and let the next generation worry about it. The prospect of paying off a trillion dollar debt scares most of us silly—what about double that figure?

With all due respect to my colleague, Mr. ALEXANDER, the proposed alternative does nothing to prevent this body its past indulgences. A majority vote has approved outrageous deficits in years past and it certainly will continue to do so. A national emergency could mean hundreds of different circumstances and we cannot afford to bend to the whims of hundreds of different needs. That is precisely why we are where we are today.

I cannot support a balanced budget amendment which places no limitation on revenue increases. I was sent to Congress to lower Government spending not raise taxes. I sincerely believe that would be the first step toward a balanced budget under the Alexander amendment. God knows the 31 States which have called for a constitutional amendment to balance the budget, certainly are not clamoring for higher taxes.

Is there really much that is new to say about this debate? How many times this year have we discussed the inability of this Congress to control the deficit, the lack of discipline we have in denying our special interest groups. There has been much hoopla on the drastic cuts of the past year. In effect, the cuts have been few and far between. We spent more in 1982 than we did in 1981. True, it was difficult not to increase these programs, and it will be difficult not to increase them in years to come.

But this amendment will certainly help make that decision easier. We will have no choice. I believe this body desperately needs these limitations. The American people believe we need these limitations.

Let us not pass another piece of legislation with no substance. This has been a balanced budget only once since 1960. I believe that statistic speaks for itself. We need this amendment.

Mr. HARTNETT. Mr. Chairman, many of you along with millions of your constituents have seen on television the popular advertisement where some prominent personality displays this little green card and says, "You know me. If not, I carry this wherever I go, my credit card, and you know me by my card."

Those of us in Congress, in a different sense, have been given another credit card by the people from the district we represent. It is this little plastic card, our voting card.

In a greater sense this is how we are known. In a greater sense still, this is a credit card. But this credit card has unlimited spending. This credit card

allows us to run up bills that not only will have to be borne by us throughout our lifetimes but by our children, their children, and their children's children's children if we continue to spend the way we are spending.

So each of you have been given a credit card by your constituents. It is called your voting card. That allows you to not only spend your own resources but the resources of countless future generations of your fellow Americans.

We have already saddled those countless generations of future Americans with a burden so large that they in their lifetimes will hardly be able to pay the interest.

Just as we prudently and wisely use this credit card because we are responsible for its bills, we should prudently and wisely use this voting credit card. But since many of us in this Congress do not exercise prudence in using this credit card it has become necessary for the American people to say to us, "Ladies and gentleman of the Congress, we insist on spending limitations on that credit card that we have issued you as our Representative. We intend to do that by means of a constitutional amendment prohibiting you to spend in excess of what you take in."

The gentleman from Arkansas is a great leader in this House and he is looked upon by many of his constituents and many of his party for leadership. But he knows, my friends, that this red herring which he has dragged before us today is nothing more than a sham. It is a sham and an imposter and would do nothing to place those spending restraints on this credit card.

Ladies and gentleman of the House, I urge you to lay aside partisan politics because these people now who are proposing this spending limitation constitutional amendment are the same ones that have brought us to the point where we have to, in fact, respond to our constituents by passing a constitutional amendment to restrict the spending of this august body.

I urge you to vote down the Alexander substitute.

Mr. ALEXANDER. Mr. Chairman, I yield 5 minutes to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Chairman, as most of you know, I have spoken out strongly against House Joint Resolution 350 for several reasons.

The language, economic theories and definitions are decidedly unworthy of the document which is the basic foundation of our system of law.

Second, the new, seemingly unlimited powers granted to Federal courts and the President could made revolutionary changes in the checks and balances of our Federal system. Constitutional scholars who have testified on this amendment say that it will give broad new powers to the Federal courts to determine Federal spending policy. Further they state that the President could have new line item veto powers, something which in their wisdom the framers of our Constitution refused to grant. And so, the effect of this amendment would be to make the people's branch—the Congress—subservient to, not equal, to the judicial branch, to judges who are appointed, not elected, and who are appointed for life. I do not think such a fundamental change in our Government is either wise or warranted.

Frankly, I would have much preferred to enact a statutory amendment which could have taken effect immediately not 7 or 8 years down the road. A statutory approach would have required both the President and Congress to submit balanced budgets next year in 1983 not in 1987 or 1989 or later. In fact, as former President Ford said when he came out against the constitutional amendment to balance the budget, a major flaw is that it would not take effect for several years and the temptation in the meantime will be to spend wildly in a way that could absolutely ruin our economy.

President Reagan has now stated in his budget submissions that he could not balance the budget during his term in office. But the great value of a statutory amendment, particularly if we had a statutory amendment with teeth in it and not the kind that is on the books now, it would have forced all of us, the President and Congress alike, to focus our attention on the need to reduce the growth in spending now and not at some distant time in the future.

Apparently, however, most Members wanted a chance to vote on a constitutional amendment as an alternative. Given that circumstance, the Alexander proposal is without question the preferable approach.

In the first place, the language is written as if it had been considered by one of the framers of the Constitution—not by some theory spouting economist. In other words, it is constitutional language, not a bunch of vague economic theories and rigid regulations.

Second, the Alexander proposal clearly states that this article does not expand the present powers of the Federal courts or of the President. In other words, the traditional constitutional balance of powers remains firmly intact.

Finally the Alexander amendment recognizes that national emergencies can be both military and economic and does not require that a state of war be declared before Congress and the President can legitimately have a deficit.

So if we cannot vote on a statute today and, if a constitutional amendment is required, very clearly the Alexander proposal is the preferable approach in order to keep the integrity of the Constitution intact.

But let me repeat what I have said many times during this Congress, especially during the budget debates of the past 2 years, and that is that no law, no constitutional amendment, no pious speech can substitute for raw courage and intellectual honesty by the individual Member of Congress. That was what was missing again and again during the 97th Congress when so many gave blind faith to an economic theory whose numbers for balancing the budget simply did not add up. What those votes created during this 4-year period was 41 percent of the total national debt created in the history of this country. Let me repeat, the economic decisions made in this Congress and projected over the 1981-85 period created $693 billion of new Federal debt, 41 percent of the entire Federal debt created in the history of the country. Perhaps this constitutional amendment is an attempt to atone for those fiscal sins of the past 2 years.

Whatever, the purpose, I implore my colleagues not to be panicked by election pressures so much that you pass something that would cheapen the basic foundation of our Nation—our Constitution. I urge you to support the Alexander balanced budget proposal and reject the Conable-Jenkins approach.

□ 1420

Mr. GINGRICH. The Alexander substitute is the liberal leadership's politics-as-usual, film-flam as usual, pull-the-wool-over-the-people's-eyes substitute.

This substitute, in fact, will be studied by political scientists as an example of the kinds of jokes politicians play on the people.

The 218 Members did not sign a discharge petition in order to play practical jokes. And actually the Alexander substitute is a liberal impractical joke. The liberal leadership first tried to bottle up the Conable-Jenkins balanced budget amendment. Now the people have spoken, and 218 Members signed the discharge petition to bring out the balanced budget amendment.

Having failed to bottle up a serious constitutional amendment that would balance the budget, the liberal leadership is now trying to mislead and deceive people by offering a snake oil substitute that would have no impact on balancing the budget.

The fact is simple. We do need raw courage in this body. We obviously do not have enough of it. The very gentlemen who have been asking us to vote for the Alexander substitute are among the leaders in not having the courage to balance the budget. And consistently this afternoon those people who vote for the Alexander

substitute and those people who vote against Conable-Jenkins by a high margin will be precisely the people who have consistently voted for large deficits, for big spending and for inflation.

Some will speak of the sanctity of the Constitution. But the simple fact is that the Founding Fathers called the Constitutional Convention because they were frightened by Shay's Rebellion and they were frightened by inflation, and they were frightened by the willingness of some State governments to print paper money and destroy the faith of the people.

I suspect virtually every member of the original Constitutional Convention would applaud an effort to amend that document to provide for stable government, for stable money, for stable prices. The Conable-Jenkins amendment is in fact precisely in the tradition of Madison, of Jay, of Hamilton and of Washington in fighting for a conservative government, conservative in the sense of not spending money you do not have, conservative in the sense of not frivolously paying off political debts at your children's expense by piling more and more debts.

And no one should make the mistake of thinking that there is an easy out by voting for the Alexander substitute. It ranks between frivolous and dangerously misleading among the things that we have offered this year. It will be clearly seen by the Nation for what it is, a shallow attempt at the last minute to avoid a real vote on a real amendment, an effort to hide from the fact that we have not been able to control ourselves.

Mr. ALEXANDER. Mr. Chairman, I yield 4 minutes to the gentleman from Texas (Mr. FROST).

Mr. FROST. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Arkansas (Mr. ALEXANDER). Amendments to the Constitution should be adopted only in unusual circumstances and then in a carefully crafted manner consistent with the spirit of our Constitution.

The amendment offered by Mr. ALEXANDER addresses the legitimate concern of a large number of the people of the United States—the desire to limit Federal spending to Federal revenues in all but extreme situations. I support the Alexander amendment rather than the Jenkins-Conable approach because of its simplicity, its directness and the responsible manner in which it addresses this very real problem.

The Alexander amendment requires the President to submit a balanced budget and Congress to adopt a balanced budget in all years except those when Congress declares a national emergency. It does not confer on the President disputed powers such as a line item veto or impoundment and it permits the Congress to implement the amendment by appropriate legislation.

The Jenkins-Conable amendment, on the other hand, seeks to write into the Constitution requirements inconsistent with the spirit of the Constitution which could hamstring Congress rather than solving the economic problems of the Nation. Specifically, the Jenkins-Conable amendment imposes a super majority of 60 percent to suspend its requirements; imposes a super majority of all Members of both Houses, rather than a simple majority of those present and voting, to raise taxes; provides the President with line-item veto and impoundment authority; and gives a preferred position to new State grants-in-aid program, placing them in line ahead of social security and national defense.

Let us go to the heart of the matter. The Jenkins-Conable amendment stands first and foremost for the proposition that majority rule is evil. It permits a minority of the Congress to stand in the way of a declaration of national emergency and it permits a minority of the Congress to prevent us from raising taxes. This is directly contrary to the intent of our Founding Fathers who enshrined majority rule in our Constitution in all but the most unusual situations.

A distrust of majority rule is a very serious matter. It means that those who support the Jenkins-Conable approach simply do not believe in the integrity of their colleagues in Congress. I say integrity because I believe that my colleagues will honor the balanced budget proviso once it is written into the Constitution and will not lightly disregard it. It grieves me that some of my colleagues so distrust the Members of this House that they seek to undermine majority rule.

It is a sad day when we must consider writing a supermajority into the Constitution because we do not trust Congress to execute its duties faithfully. We take an oath to uphold the Constitution of the United States and I for one do not believe that a majority of this House will lightly disregard that oath.

James Madison in No. 58 of the Federalist Papers spoke eloquently of this very point when he said:

> It has been said that more than a majority ought to have been required for a quorum; and in particular cases, if not in all, more than a majority of a quorum for a decision. . . . In all cases where justice or the general good might require new laws to be passed, or active measures to be pursued, the fundamental principle of free government would be reversed. It would be no longer the majority that would rule: the power would be transferred to the minority.

Alexander Hamilton made a similar point in No. 75 of the Federalist Papers in discussing treaty ratification:

> If two thirds of the whole number of members had been required it would, in many cases, from the nonattendance of a party, amount in practice to a necessity of unanimity. And the history of every political establishment in which this principle has prevailed is a history of impotence, perplexity, and disorder. Proofs of this position might be adduced from the examples of the Roman Tribuneship, the Polish Diet, and the States-General of the Netherlands.

The Alexander amendment accomplishes the goal that many of us seek and does so in such a way that is wholly consistent with the Constitution and traditions of our country. I urge its adoption and urge my colleagues to reject the antidemocratic approach embodied in the Jenkins-Conable amendment.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. Mr. Chairman, I have already spoken once here in opposition to the balanced budget amendments. I am for a balanced budget, but I just happen to think that this approach of amending the Constitution will not work and that there is a better way to do it, which I have spoken of earlier.

But I must say this: At least the Conable approach seems to be a serious attempt to amend the Constitution through a balanced budget amendment; and I know, from all of the conversations I have had over the years, that those who are advocating the passage of that amendment are well intentioned in what they are trying to do. We disagree, but I know they are well intentioned.

The approach that is before us now, I think it is clear, is nothing more than politics. On the face of it, you can see that it restates the themes we have heard so much. The first thing it requires is for the President to submit a balanced budget. This President was hit with a recession which would have made that virtually impossible under the spending and revenue trends that we have. Everyone knows that.

Next it opens the window a little further for the exceptions to the mandate. The Conable approach on "declaration of war" is extended to "national emergencies," which, of course, would just make more work for the judges if this substitute were to pass.

I remember a good point that was made in the discussion in the other body, when they were wanting to substitute a statutory scheme for the balanced-budget amendment scheme. The people over there were saying that the balanced-budget amendment was just a figleaf for those who have some guilt about the great deficits that are being run.

But it seems to me that this approach, like the statutory scheme, is just a smaller figleaf for those who do not want to wear the larger one. I think the question before us really, as I have said before, is a question of po-

89-059 O-86-17 (Pt. 20)

litical will. If we are ever going to balance the budget and get those lines to converge so that we will have a reduction in deficits, we are going to have to have the political will to do it. That is central to the whole question.

□ 1430

I think on this last day of the Congress that those Members here who either advocate passage of the amendments or who oppose the amendment like myself ought to demonstrate to the people that we do have political will and that we can speak our piece and cast our votes without hiding and ducking and running. That would be the kind of action that would give confidence to the people.

So on this final day it occurs to me that if you are really for a balanced-budget amendment, then say so. Join those who are well intentioned. Join those who are really trying to advance that cause.

On the other hand, if you are like myself, if you are opposed to the approach of an amendment to the Constitution, then say so, and do not take the lesser of evils as just window dressing or a charade to fool the people and get by this political issue.

Mr. CONABLE. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Illinois (Mrs. MARTIN).

Mrs. MARTIN of Illinois. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the phrase "balanced budget" has provided wonderful political rhetoric. But today the House of Representatives finally has the long denied opportunity to truly work the people's will and act upon this rhetoric. Do the people of this country want a continuation of high taxation, high interest rates, high unemployment—or do they want a fiscally responsible Government? I believe the people expect the Federal Government to function as they do—within its means.

It has been argued we do not need a constitutional amendment, that the Congress can stay within its means if it so chooses. Indeed that would be ideal but in light of Congress track record on deficit spending, I do not believe that argument to be credible. My short experience in Congress has proven that Congress has a built-in bias to spend.

House Joint Resolution 350, the constitutional amendment to balance the budget, provides the necessary discipline to insure Congress abides by such a mandate. Unlike the Democratic alternative offered today, it is a carefully drafted, well-thought-out amendment. Unlike the Democratic alternative offered today, it has "teeth" to assure a balanced budget. Unlike the Democratic alternative offered today, it has more than 200 supporters. It is the balanced budget amendment of the people.

I strongly urge my colleagues to put aside the free flowing political rhetoric and think where our spending habits are leading us. Can we afford $150 billion deficits? Can we afford mortgaging our tomorrows? Can we afford putting parochial interests ahead of our national economic interests?

It is time to ask ourselves, as Representatives of the people, these questions. The American people deserve answers.

The choice is simple—work the people's will or continue business as usual.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Georgia (Mr. JENKINS), my colleague in this effort.

Mr. JENKINS. Mr. Chairman, I am always highly impressed with the ability of my colleagues in the Congress on important issues. Today in this debate I think that every argument that could ever be thought of to evade the issue has been used. And many times with a great deal of plausibility.

I must say that the arguments that are used simply avoid whether or not we really want to address the serious issue that we are attempting to address.

My colleague from Arkansas has his substitute that will be offered, and I must say that if you are against balancing the budget, if you are against fiscal restraint, in my opinion this would be an approach that you could support, because it will do absolutely nothing.

If you want to pass this and still have whatever deficits you want, you simply include the statement that we have a "national emergency." You can do that in the budget resolution, you can do it in anything you want to, because it simply says a statement from the Congress, and you have violated the very purpose of a balance-the-budget amendment.

So really, the simple decision for this body to make is this: If we do not sincerely believe that the Constitution ought to be tampered with by any amendment, certainly you do not want to vote for the Alexander approach or the Jenkins-Conable approach. But if you are attempting to vote for the Alexander approach, to try to show that you believe that the budget ought to be balanced, and that you are simply preferring that one over the other, the substance of the two amendments will certainly not bear out the results that you are attempting to arrive at.

Now, there have been a great deal of arguments made from both sides of the spectrum on this as far as what the Jenkins-Conable bill will do as far as balancing the budget.

Let me say this. In a recession, when the receipts go down under the Jenkins-Conable bill, there is no mandate that there be a balanced budget. When the receipts go down because of a recession, after the initial statement has been issued, there is no mandate that any further action be taken.

We recognize the need for flexibility in any amendment.

Certainly the most simple amendment would simply say outlays shall always equal income. But all of you will say that that is too harsh, too inflexible, because there will be times when we will probably have to have a deficit because of severe recessions or war or whatever.

So we have attempted in this amendment to be flexible enough to take care of the realities that we do face in recessions, trying to encourage the restraint of additional increases in outlays in good years and at the same time attempting to always recognize that an amendment must be broad enough to serve future generations.

I urge my colleagues to vote against Alexander and for the Jenkins-Conable.

Mr. CONABLE. Mr Chairman, I yield 3 minutes to the distinguished gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, I rise in opposition, as I am sure it is no surprise, to the Alexander amendment. I do support the Conable-Jenkins amendment to the Constitution.

As one who has offered and attempted many times on this floor (some 13 times) to get the Members of this House to spend no more than the Federal Treasury takes in, I am very familiar with efforts to confuse Members about a legislative balanced budget. It should be clear to all that many here today who are advocating Mr. ALEXANDER'S amendment, are trying to seek shelter in this leaky boat of my good colleague from Arkansas. I call it a leaky boat amendment, because there are just all kinds of holes in it, and I am sure he knows it.

Members should be aware that this was drafted some time in the last couple of days. In a hurried manner and it is just mimeograph sheet that we have. In contrast the Conable-Jenkins constitutional amendment has been before the Judiciary for some time; it has been debated there; there have been extensive hearings on the Conable-Jenkins constitutional amendment.

Now, I would like to comment briefly on a major weakness that I see in the Alexander proposal.

My colleague is shoveling all the responsibility over to the President of the United States. He says, "You come up with a balanced budget; we ain't got the time to do it; you do it." And then what do we do with it when we get it? Nothing.

This constitutional amendment recommended by my colleague would keep us exactly where we are now—"no place." Congress would have little or no responsibility to balance the budget or just simply live within our means.

The first section of my colleague's amendment puts all the responsibility on the President and says, "We are going to go fishing; we do not care what you recommend," There is absolutely no responsibility on Congress to do anything about what the President might recommend in the way or a balanced budget.

Of course, we already know what this Congress had done, as a majority, in recommendations when President Reagan has suggested reducing outrageous spending. We fumbled the ball badly, substantially. We have not brought spending down.

Mr. MARTIN of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from North Carolina.

Mr. MARTIN of North Carolina. I thank the gentleman for yielding.

Do I understand my colleague from California to be saying that if the Alexander amendment is adopted as a substitute, and the President complied by proposing a balanced budget, the Congress could ignore the President's proposal?

Mr. ROUSSELOT. Totally ignore it.

Mr. MARTIN of North Carolina. Amend it?

Mr. ROUSSELOT. Anything they want to do with it.

Mr. MARTIN of North Carolina. Continue to tax and tax and spend and spend.

Mr. ROUSSELOT. They will tax and tax, and spend and spend.

Mr. MARTIN of North Carolina. And bleat and bleat?

Mr. ROUSSELOT. Yes. Well, I think my colleague from North Carolina has expressed it pretty well. This is the leaky boat amendment that is now before us, and they will bleat and bleat, just like sheep.

Mr. ALEXANDER. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. SIMON).

Mr. SIMON. Mr. Chairman, we have two questions. One, do we need a constitutional amendment? And if so, which is preferable? The second question is.

Since my first days in Congress I have sponsored and cosponsored a constitutional amendment of one variety or another. I have done it because I feel fiscal self-discipline is lacking, and an increasing percentage of our tax dollar is going for interest rates than goods and services. Whether you are a conservative, liberal, or what you are, that does not make sense.

The first budget I voted on, worked on, was fiscal year 1976. We spent 9.5 percent of our budget on interest. The fiscal year which ended yesterday, 13.7 percent. Fiscal year 1984, CBO says interest will be 15.6 percent. Or an increase from 1976 to 1984 of 64.2 percent in the interest function.

There is no other function in the budget, including even defense, that is at anywhere near that kind of an increase in the percentage of the budget that it takes.

And I say to my colleagues on this side of the aisle, those of us who believe in social programs are seeing that revenue base eroded by interest payments, making much-needed social programs less likely. We have to face up to that.

□ 1440

I would add, if we had had the Alexander amendment in place, President Reagan could not have come in with the kind of tax cut he did in 1981, nor the kind of defense spending that he requested. We need the restraints of a constitutional amendment.

The second question is which one?

I took the trouble this morning to read the Constitution. I would urge some of those who talk glibly and applaud easily who may not have read it just recently to read it and compare the two documents with the Constitution.

From a constitutional language point of view, the much finer document is the Alexander document. Clearly.

We must remember we are writing a constitution, not a statute. The Conable-Jenkins amendment does not recognize that, for it contains the details of a statute rather than the principles of a constitution.

Mr. CONABLE. Mr. Speaker, I yield such time as he may consume to the gentleman from Idaho (Mr. CRAIG).

Mr. CRAIG. Mr. Chairman, a constitutional amendment to balance the budget, is it needed? George Washington presided over Federal spending of $14,031 per day during each day of his Presidency. Abraham Lincoln spent an average of $2.4 million per day during his wartime Presidency. Among 20th-century Presidents, Theodore Roosevelt spent $1.7 million; Franklin Roosevelt spent $82.7 million; John Kennedy spent $210.5 million; and Jimmy Carter spent $1.3 billion.

It took 186 years to raise the annual Federal spending to a level of $100 billion. It then took only 9 more years to double that figure to $200 billion. Four years later Federal spending reached $300 billion, and in just 2 more years it reached the $400 billion mark. Federal outlays exceeded $500 billion in fiscal year 1980, $600 billion in fiscal year 1981, and are projected to exceed $700 billion in fiscal year 1982.

If this is not enough to convince the Members of Congress that a balanced budget is needed, then maybe the realization that Washington now spends $22,000 every second of the day will convince those Members who do not favor a balanced-budget amendment. The very fact that the amount of Federal spending per average household increased 46 percent during the 4 years of the Carter administration—from $5,026 in fiscal year 1976 to $7,329 in fiscal 1980 is alarming and not acceptable to the American taxpayer.

Without a spending limitation, Members of Congress can accommodate one spending interest and gain political capital without reducing other spending programs and facing political disadvantages. The political costs of excessive spending are deferred, resulting in high inflation, huge deficits, and higher taxes, while the political benefits of the spending are immediately appreciated by those affected by the program and the Congessmen who support it. A similar process and economic growth automatically generate more revenue without the need for a potentially unpopular tax increase.

Taxpayers are the losers under the present system. Unlike the pressure groups, the taxpayers are woefully unorganized and have varying interests. When programs are examined on an individual basis, the cost to each taxpayer is barely noticeable, but when the costs of all the programs are added, the impact is severe. The requirements of balancing the budget and limiting the growth in spending will give the taxpayers an equal opportunity to influence spending discussions through the ballot box.

Under the balanced-budget amendment, Congressmen will be forced to remain aware of public opinion because the votes for deficit spending and tax increases will be voted directly on those issues. This should result in an examination of priorities when programs are considered. The spending limitation will force Congress to make choices, which should lead to more efficient government.

The American people are demanding that Congress balance the budget. Today, we have the opportunity to carry out the will of the people and this is one Congressman who will be voting to support the people of this country.

It is clear that the American budget process is seriously deficient. It is also apparent that the public is concerned about Federal spending and is willing to use the constitutional means to change the system. In a September 1981 Gallup poll, 67 percent of those surveyed favored a constitutional amendment to balance the budget and restrict spending; only 19 percent were opposed. This support cut across traditional political lines. The ultimate question, then, is not whether a constitutional amendment should be adopt-

ed, but whether this is the best one possible.

House Joint Resolution 350 possesses economic and political virtues vital to the health of the American system. The elimination or sharp reduction in deficit spending and the limitation on spending will reduce inflationary monetary policies and allocate more financial resources to the private sector. The provisions that would force open votes in the Congress on deficit spending and tax increases will significantly reduce the budget process bias toward spending by increasing individual accountability. The amendment, moreover, provides enough flexibility to allow for the smooth running of Government, as well as political disincentives to prevent violation.

Excessive Federal spending and deficits have become so ingrained in Government today that a constitutional amendment is necessary to limit this spending. The opponents of the balanced-budget amendment argue that it will hamstring the ability of Government to function efficiently. What will hamstring the ability of Government to expand is the balanced-budget amendment and I will argue, that this will help the Government to operate more efficiently not less.

The American taxpayer deserves to be heard and the Federal Government needs imposed discipline. The balanced-budget amendment, House Joint Resolution 350 should be passed and those who are really for a strong America, for jobs, and reducing a runaway Federal budget will vote for House Joint Resolution 350.

Mr. CONABLE. Mr. Chairman, I yield 5 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Chairman, we have had a lot of discussion here about majority rule and about fear of this constitutional amendment offered by the gentleman from New York (Mr. CONABLE) and the gentleman from Georgia (Mr. JENKINS) binding the Congress, limiting the will of the majority.

We just had a gentleman talk about reading the Constitution today.

The first point I would like to make is that the Constitution was written for one and only one purpose in terms of amendments and the Bill of Rights and that was to limit the will of the majority. What the Bill of Rights says is that we do not let 51 percent of the Congress or the people limit freedom of speech or religion. We do not let the majority oppress certain rights that are guaranteed in the Constitution.

What we are saying is we want to protect the rights of the people to an economy in which they can make their plans, in which they can balance their budgets, in which they can have their families grow up and prosper. That is what the amendment is about.

We have heard references all day to prohibition and how unwise that was, but I make the point that prohibition was an attempt to deviate from the constitutional pattern by limiting the freedom of people. The Constitution was written to limit the freedom of Government and this amendment fits perfectly within that pattern, because it limits the freedom of Government to engage in the process of destroying this economy year after year by spending more than we take in and by imposing the cruelest tax of all, an inflation tax, which falls most heavily on the shoulders of the old, the poor, and the sick.

The Alexander amendment was written by people who oppose a balanced budget, people who have fought this effort from the beginning because they know that a requirement to balance the budget, which is in fact binding, will mean that we will have to set priorities, that we will have to tell political constituencies no, and it will destroy the bulk vote in America and that is where the source of opposition comes from. It comes from those who know that in a binding constraint, the programs that cannot stand the test of efficiency and competition will be denied.

The Alexander amendment is absolutely meaningless. It will allow us to declare a national emergency and waive this amendment, just as we do on virtually every appropriation when we waive the requirements of the budget.

This amendment is a sham and a fraud, with two objectives: First, to try to derail a legitimate effort which has been ongoing for 4 years to bring an amendment which has been well thought out and well debated and which will deal with the problem to give the American people the vote they want.

Second, it has been written to allow those who claim to be conservative back home, who claim they are for a balanced budget back home, to cast a vote here today so they can go back home and try to confuse the people again in an election year.

There is no doubt about the fact that the objective of offering this amendment has a second purpose. That purpose is to try to adopt this amendment so that those who have cosponsored the only amendment being voted on today that has any meaning whatsoever can get off the hook and say that they were for a legitimate balanced budget amendment, but now this one was adopted and they decided that it would do the job better.

I ask my conservative friends on the Democratic side of the aisle not to contribute to this fraud, not to cast a vote that will simply allow a legitimate effort to be derailed.

As a final point, I would like to say this. For 4 years the vast majority of the Members of this body have worked hard to get a vote on a balanced budget amendment. Let us not make that a sham here today by bringing to the floor this amendment and dignifying it by having it adopted by a majority vote.

I urge my colleagues not to take an action which will derail an effort which the American people support. That, I think, is the issue. That is why we need to say no on the Alexander substitute and why we need to say yes on the Conable-Jenkins amendment.

Mr. ALEXANDER. Mr. Chairman, I yield 1 minute to the gentleman from New Jersey (Mr. RODINO).

Mr. RODINO. Mr. Chairman, I thank the gentleman for yielding.

I rise, Mr. Chairman, in opposition to the Alexander amendment.

As I said earlier in my statement in opposition to House Joint Resolution 350, what we are attempting to do here, as has been argued all along by conservatives and liberals, is to exercise discipline. It is to exercise that kind of discipline which has been said has been lacking and this has resulted in the kind of deficit spending we have.

The gentleman from Arkansas has made a valiant effort trying to preserve at least some of those constitutional obligations that Congress is charged with, but nonetheless he misses the mark. We learned during our deliberations and our studies by checking with the legislative reference service of the Library of Congress that it would take almost 12 pages to try to write these kinds of safeguards and protections and guarantees into a constitutional amendment.

I would urge my colleagues who are interested in preserving the Constitution to reject this attempt as well.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Illinois (Mr. MCCLORY).

Mr. MCCLORY. Mr. Chairman, I thank the gentleman for yielding. I think I can say quite forthrightly that the genesis of the Alexander substitute was in the 1 day or partial day of markup in the subcommittee of the Judiciary Committee when we undertook to try to mark up a proposed constitutional amendment.

The principal body of the Alexander amendment consists of amendments that were offered to the Conable-Jenkins amendment by those who were opposed to the constitutional approach to this subject, so that what you have in the body of the substitute that is being proposed here is the expression of the opponents. These opponents want to kill the opportunity that we can and should have to vote on a constitutional amendment that could for the first time enable the

Americans to ratify a constitutional amendment to compel the Congress to exercise its responsibilities to manage the fiscal business of the Government responsibly.

Mr. ALEXANDER. Mr. Chairman, I yield 1 minute to the gentleman from Mississippi (Mr. BOWEN).

Mr. BOWEN. Mr. Chairman, some of the those who have spoken earlier are opposed to any kind of a balanced budget amendment. That is not true in my case. For the last 4 years I have cosponsored the balance the budget amendment here, and I am, in fact, a cosponsor of House Joint Resolution 350. That amendment is, of course, an imperfect vehicle, and it does have a number of flaws. It has been my hope that it would be perfected, and I am delighted that my good friend from across the Mississippi River in Arkansas (Mr. ALEXANDER) has offered a much better constitutional amendment to balance the budget.

□ 1450

It is better for a lot of reasons, including making the President share part of the responsibility, rather than simply passing the buck to the Congress.

It also requires that a national emergency be determined before we can depart from the balanced-budget concept, and it preserves intact the legislation that we passed in 1974 to protect us against impoundments by the executive branch. Finally it does not bestow upon the President the item veto, which some legal experts feel can be assumed under House Joint Resolution 350.

Back in the Confederate States of America, there was an item veto in its Constitution, but I do not think we should enshrine that in the U.S. Constitution.

It is my hope that we can pass a balanced budget amendment here today, and I believe the Alexander amendment is clearly the better of the two. I urge support for that amendment, Mr. Chairman.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Indiana (Mr. COATS).

Mr. COATS. I thank the gentleman for yielding to me.

Mr. Chairman, there are those here today who argue that we do not need a constitutional amendment to balance the budget because we should trust the integrity of our colleagues to exert fiscal discipline in this body. Others say the only real way to deal with the problem is to elect people with philosophical purity or the political will to exercise fiscal discipline.

Both of these arguments ignore reality. We are human beings here. The temptations to yield to special interests and to bend principles to political expedients overtake us all.

What we are saying here today is not "Republicans who support this amendment, save us from the Democrats," or "Democrats who support this amendment, save us from the Republicans." What we are saying here today is "Save us from ourselves, save us from those special interests that say 'Give me, give me, give' and from those political forces in our districts that say 'Give us this project and we will send you back to Congress.' "

Save us from ourselves by giving us something to support constitutionally.

Mr. ALEXANDER. Mr. Chairman, I yield 1 minute to the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. Mr. Chairman, I have long supported sending to the State legislatures an amendment to allow them the opportunity to ratify or not to ratify a constitutional amendment to balance the budget.

Today we have two such amendments to send to the State legislatures, and my preference is the Alexander amendment. Why? For two reasons.

First, our Constitution is our sacred document that has governed our Nation longer than any document for any country. It has survived because the wording of the U.S. Constitution provides the needed flexibility to allow the statutory law to support such amendments to the Constitution. In my opinion the Alexander amendment comes closer to providing that language.

Second, in a survey of my constituents over 75 percent felt the President should summit to Congress each year a balanced budget. The Alexander amendment provides such wording and the Jenkins-Conable wording does not.

This President has provided the Congress with a budget that has doubled the deficits in just 2 years to a history record-breaking high.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. SHAW).

Mr. SHAW. I thank the gentleman for yielding to me.

Mr. Chairman, I stand in strong opposition to the Alexander amendment, which is nothing but a fake substitute. It is not even a good counterfeit copy of what we are talking about today. What the American people want is a true balanced budget amendment.

Let us look for a minute at the rhetoric of the speakers who have come to the well today. Those who are most opposed to the balanced budget, the true balanced budget amendment, are those who have created the problem and have shown the true need for a real balanced budget amendment to the Constitution of the United States.

I have noted that those coming to the well, the leadership on the majority side of this House, have started their remarks by being critical of the tremendous amount of deficits that we have run up in recent years, and then turn around and defy logic and come out against the balanced budget amendment.

How can one do that? Support of the Alexander substitute is opposition to the true balanced budget amendment. The American people know that, you know that, we all know that.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Maine (Mr. EMERY).

Mr. EMERY. Mr. Chairman, I rise in strong support of the constitutional amendment to balance the budget.

This could be one of the most important weapons in our economic arsenal and, in fact, it could be the lever that helps get our economy back on track.

All of us know that huge budget deficits cause inflation, unemployment, and high interest rates, and these things have destroyed our economy in recent months. Many of our problems come about from lack of congressional discipline, right here, when we failed year after year to control our tendencies to spend and spend, tax and tax.

Mr. Chairman, I believe in this constitutional amendment because I believe it can help us to find the discipline that we have not been able to muster.

I am in strong support of this constitutional amendment, and oppose the Alexander amendment.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from South Carolina (Mr. NAPIER).

Mr. NAPIER. Mr. Chairman, I rise in opposition to the Alexander substitute and in favor of the bipartisan Jenkins-Conable resolution of which I am an original cosponsor.

Simply stated, the substitute has no teeth and is not binding—it is full of loopholes. The substitute is a political shenanigan.

The Jenkins-Conable resolution is setting forth for the country rules that every small businessman and family knows—you simply cannot continue to spend more than you take in year after year and expect anything other than the economic condition we find ourselves in today.

We need the Jenkins-Conable approach. Unless we adopt such an approach, the House will never have the political aria to do the job that must be done to bring runaway spending and Federal growth under control.

Mr. CONABLE. Mr. Chairman, I now yield 3 minutes to the distinguished gentleman from Mississippi, the Republican whip (Mr. LOTT).

Mr. LOTT. I want to thank the gentleman for yielding to me.

Mr. Chairman, I saw a quote not long ago which I think is most applicable here today. It is a quote from Thomas Jefferson. He said:

Hear no more of the faith of men but bind them down with the chains of the Constitution.

The Federal budget has not been balanced but once since 1960. It is time we do something about it.

Yes, amending the Constitution is indeed very serious business and I approach it with hesitation. But it would not be necessary if we had the will and the gumption to do the job here on our own.

It is clear to me we are not going to balance the budget until the chains of the Constitution are placed upon us. It comes down to this: We have been paying a lot of lipservice around here about, "Oh, yes; yes, we are for a balanced budget, some day, somewhere out there." But the time is now to show the American people whether we are for it or "agin" it.

Mr. Chairman, I watched the other day with a lot of interest as the Rules Committee waited to see when we would meet and on what. I had assumed that the debate was on "What will the rule be?" But I found it was not really the rule; what was at stake there was "Hey, what are we going to do? What are we going to make in order? Is it going to be a bill, a couple of bills, a constitutional amendment? Which one, Jones or some other one? Will it be Frost?"

It was none of the above. It was the Alexander substitute. And what does it do? Not a whole heck of a lot. All the amendment says is that the President shall submit and the Congress shall adopt a statement that our receipts and expenditures are in balance.

Mr. Chairman, much of what has been said already here today against any constitutional amendment certainly does apply to the Alexander amendment, but not to the Conable amendment. I agree with those who have urged us not to trivialize the Constitution by amending it for light or transient causes or in a frivolous manner. I certainly agree with Chief Justice Marshall that the Constitution is "intended to endure for ages to come." The framers of that Constitution hoped that document would insure that our Republic would endure for ages to come. In so doing they made provision for that document to be amended if two-thirds of both Houses propose an amendment and three-fourths of the State legislatures.

As Chief Justice Marshall said in another of his famous opinions: "The people made the Constitution, and the people can unmake it. It is the creature of their own will, and lives only by their will." We should keep this clearly in mind as we make our decisions here today. Nearly two-thirds of the States have already petitioned for a constitutional convention for the specific purpose of drafting a meaningful constitutional amendment to require a balanced budget. Public opinion polls show the American people overwhelmingly support such an amendment.

Mr. Chairman, public opinion polls have consistently shown strong support for a balanced budget constitutional amendment. Polls dating back to the 1930's have invariably revealed an American public in favor of placing permanent limits on the ability of Congress to spend in excess of available revenues. Moreover, a May 1982 poll by Market Opinion Research, Detroit, Mich., found that 79 percent of voters, in all income, educational, and geographic categories surveyed, gave an affirmative response to the question, "Do you generally favor or oppose an amendment that would require Congress to plan a balanced budget each year?"

This is consistent with an ongoing sampling of some recent polls on this issue:

SUPPORT FOR CONSTITUTIONAL AMENDMENT

[In percent]

Poll	Favor	Oppose	No opinion
Gallup 1980 (informed) [1]	75	16	9
Gallup 1980 [1]	67	13	20
Roper 1979 [5]	65	22	13
Gallup 1979 [2]	78	12	10
Gallup 1978 [2]	81	11	8
New York Times/CBS [3]	73	16	11
AP/NBC [4]	70	18	12

[1] Gallup (1980)—"A proposed amendment to the Constitution would require Congress to approve a balanced Federal budget each year. Government spending would have to be limited to no more than expected revenues unless a ⅗ majority of Congress voted to spend more than expected revenue. Would you favor or oppose this amendment to the Constitution? (Informed poll was taken of those who have heard or read about proposals.)

[2] Gallup (1978–79)—"Would you favor or oppose a constitutional amendment that would require Congress to balance the Federal budget each year—that is keep taxes and expenditures in balance?"

[3] New York Times/CBS—"Would you favor or oppose a constitutional amendment requiring a balanced national budget except in times of emergency?"

[4] AP/NBC—"Would you favor or oppose a constitutional amendment which would require the Federal Government to balance the budget?"

[5] "Considering both the possible advantages and possible drawbacks, would you like to see a constitutional convention called to consider an amendment to limit Federal spending, or wouldn't you be in favor of such a convention?"

The New York Times/CBS poll concluded that the "proposed budget-balanced amendment had a remarkably uniform level of support across the country and demographically." This seems to be true of all such polls. Over 70 percent of those identifying themselves as Democrats, Republicans, conservatives, and liberals favored the amendment.

The 1979 Gallup poll also found that 84 percent of all respondents favored and only 5 percent opposed a constitutional amendment on this issue if provisions were made for emergency circumstances.

There is a philosophical as well as an economic impetus behind the support for the amendment. A poll commissioned by the National Tax Limitation Committee last summer discovered a strong current of financial morality in the American people. People feel that it is right to live within one's means and wrong to spend beyond one's means. But, people said, it is a natural consequence of human nature to spend more than one should when there is no requirement to match spending with income.

The most recent May 1982 poll by Market Opinion Research found that 73 percent of those surveyed answered affirmatively to the question, "Would you be more or less likely to vote for a candidate for Congress if you learned that he or she supported a constitutional amendment requiring Congress to plan a balanced budget each year?

The conclusion, Mr. Chairman, is obvious to the American people and to supporters of House Joint Resolution 350. Resolutions, statutes, assurances, promises, vows and pledges, no matter how well-intentioned and sincere, will not suffice. We need a constitutional amendment to guarantee permanent limits on Federal taxing and spending.

How can we, the people's representatives, be blind or deaf to such popular sentiment to require a meaningful balanced budget amendment to the Constitution which is supposed to be the creature of their will?

Mr. Chairman, as much as I respect the gentleman from Arkansas (Mr. ALEXANDER) as a gentleman and a very astute politician, I think he has underestimated the sophistication of the American people in proposing his alternative balanced budget amendment. At a time when the American people are asking the Congress to bite the bullet of fiscal discipline and responsibility with a meaningful constitutional amendment, he is attempting to spoon-feed them with partisan, political pablum and expects them to swallow it as some great gourmet delight.

If anything would trivialize the Constitution in a frivolous manner it is the Alexander amendment which does absolutely nothing to help insure a balanced budget. All that amendment says is that the President shall submit and the Congress shall adopt a statement that our receipts and expenditures are in balance. Anytime the budget falls into imbalance, a majority of Congress need simply declare, "Oh, it must have been a 'national emergency,'" Well, I would agree that deficit spending is a national emergency, but simply calling it that does nothing to put us back in the black. What enforcement provisions are in the Alexander amendment to insure a balanced budget? None. Oh, there is a section that says Congress "shall implement this Article by appropriate legislation," but all that means is that we can enact a law that says the President shall submit a balanced budget and Congress shall adopt a statement before each fiscal year that we want one. It does absolutely nothing to require us to remedy things when that statement of balance proves false later in the fiscal year.

Mr. Chairman, a meaningful and enforceable balanced budget amendment

as proposed by the gentleman from New York (Mr. CONABLE) is anything but trivial. It recognizes that the very future of our Republic and its economic system is at stake, and that we have not had the will under existing processes to restore that system to soundness. How can anyone claim that such a goal and the discipline required through an enforceable constitutional amendment is trivial? Are the health and growth of our economy trivial? Are the assurances of jobs and prosperity and a decent standard of living for future generations of Americans trivial? I think not. Are the more perfect union, domestic tranquility, blessings of liberty, and general welfare envisioned for our Republic in the preamble of the Constitution trivial? I think not.

Mr. Chairman, the Alexander amendment is trivial because it does nothing to insure its stated goal of a balanced budget. The Conable amendment is not trivial because it has teeth, it is enforceable, and it is deserving, indeed essential, to be enshrined as part of our Constitution.

Do you want a balanced budget here or not? That is what is at stake. Do not ever forget it. If you want one, if you want a balanced budget amendment, do not play games; if you want to submarine this issue into the deep, dark hole of a conference, never to be heard of again, then go ahead and vote for the Alexander substitute. But there will be no hiding. Everybody will know in the next month how we voted on this one.

□ 1500

Mr. ALEXANDER. Mr. Chairman, I yield 1 minute to the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Chairman, I rise in strong opposition to both amendments.

The full tax, budget, and economic implications of this amendment on Congress and, in particular, the Committee on Ways and Means, are unknown; but I want to underscore the aspects that I consider the most objectionable.

According to the Congressional Budget Office, there is a projected total deficit of $170 billion for 1985—the first year the amendment might be in effect. This estimate already assumes policies in the first budget resolution, like Federal pay increases below inflation, and no increase in nondefense discretionary spending.

Thus, we will be confronted with several painful options. If we were forced to erase a deficit of $170 billion in 1 year, our options become as economically absurd as they are socially immoral.

We could increase taxes by $170 billion. To achieve this level, we would have to raise individual income tax rates by 50 percent, or corporate income taxes by 370 percent, or payroll taxes by 63 percent.

Or, we could go after tax loopholes and tax expenditures. We could barely reach our $170-billion goal by the sum of the following: the elimination of the mortgage interest deduction, the charity deduction, the oil depletion allocance, the favorable treatment of capital gains, and accelerated depreciation on equipment other than leased property; taxation of all social security benefits; the complete inclusion of employer contributions to medical and pension plans; and no reduced corporate tax rates for the first $100,000 of income for small business.

However, before the authorizing committees or the appropriating committees would know how much revenue to count on, the tax increase would have to be signed into law. We could not simply pass a budget resolution which planned on certain tax increases. This puts the tax-writing committees on the spot, or in the driver's seat, with respect to the budget process.

Under the proposal, these tax increases must be agreed to by a majority of the whole number of both Houses. Someone who is absent is effectively a "no" vote.

The other options to confront the projected $170-billion deficit in 1985 would be to reduce spending dramatically or convince 60 percent of the whole number of both Houses to allow an "unbalanced" budget.

The Committee on Ways and Means has jurisdiction over approximately one-third of the budget, not including interest. To reach the goal in 1 year by across-the-board reductions would imply a $50-billion cut in social security and medicare. Let me remind you that the cuts we made in social security and medicare programs over 3 years in both the Reconciliation Acts of 1981 and 1982 were about $17 billion.

To achieve a $50-billion savings over the next 3 years, we would have to completely eliminate the COLA for 1983, 1984, and 1985, and place a 15- to 20-percent copayment on the elderly for all days spent in a hospital. Obviously, the effect of such an action on the elderly of this country would be devastating.

The impact of such dramatic domestic cuts would send us back into a recession. The initial reduction in incomes of taxpayers or social security recipients or a firm selling goods and services to the Government would set off a chain of declining purchases, reductions in output, and increasing unemployment.

The effect of the section "that Congress may not require that the States engage in additional activities without compensation equal to the additional costs" are equally onerous.

Conservatives in Congress have diligently forced States to engage in additional activities to weed out waste and fraud in programs such as food stamps, AFDC, and medicaid. If States are not successful in carrying out those activities, they are assessed a penalty. I do not know whether or not this example is affected by the clause. What I do know is that all such questions—and there are many—would have to be decided by the courts.

Passage of the amendement would prevent enactment of legislation such as:

Improvements in our income maintenance programs. Mandating that States pay a minimum AFDC payment, as eight former Secretaries of HEW recently recommended, would be, for example, be unconstitutional unless the Federal Government pays 100 percent of the cost. This implies that States who had already implemented such a provision would lose Federal dollars relative to States with low benefit payments.

Section 1 of the proposed constitutional amendment states that the Congress and the President shall insure that actual outlays do not exceed the outlays set forth in the annual balanced budget statement. There is some question whether this constitutional mandate would override other legal restrictions on impoundments or rescissions.

It is difficult to believe that the authors of this proposal intend to give an aggressive President new authority to impound congressionally appropriated funds. Remember the result of such impoundments before the 1974 Budget and Impoundment Act was passed.

The discretionary authority granted to the President in this amendment may well be much too broad. If the President feels the Congress is not fulfilling its obligation to insure that outlays do not exceed those adopted in the annual statement, this provision would at the least provide a basis for time-consuming delays. The courts would need time to determine whether actions such as impoundments, rescissions, or other denials of congressionally approved expenditures are allowed without any statutory restrictions because of this language in the Constitution. In a recession year, actual outlays will exceed planned outlays. Does this mean that cost-of-living adjustments on social security can be ignored? What authority would the President be given to override congressional intent?

The President should share responsibility for developing a balanced budget. However, we must avoid upsetting the balance of power between the legislative and executive branches.

There are many problems in interpreting the language of these amendments and would inevitably draw the judicial branch into shaping economic policy.

Section 2 of the proposed amendment requires that total receipts, as set forth in the statement of receipts and outlays for the fiscal year, "shall not increase by a rate greater than the rate of increase in national income in the last calendar year ending before such fiscal year, unless a majority of the whole number of both Houses of Congress shall have passed a bill directed solely to approving specific additional receipts and such bill has become law." There are several important implications of this language that need to be considered by the Members.

First, the language of section 2 requires tax legislation to be enacted before consideration of a budget resolution if receipts are to increase more rapidly than the prior year's increase in national income—which is quite natural. Such action would have to be taken before the Congress as a whole can express itself on the desired level of receipts and outlays. In forcing tax-writing committees to move, they largely determine the direction of the budget process.

Receipts are extemely sensitive to business conditions. During a period of recovery from a recession, receipts grow more rapidly than national income. This more rapid growth is essential to achieve budget balance—yet it is a phenomenon quite separate from the impact of inflation on receipts. During periods of rapid real growth business profits recover, unemployment is reduced, and the income of workers tends to increase with longer hours and more overtime pay. Receipts are bound to grow more rapidly than national income in the prior year. Whether the budget were in balance and passed by a simple majority, or whether a super majority of three-fifths agree to an unbalanced budget, the language of section 2 would require the Congress to pass and the President to sign a bill "directed solely to approving additional receipts." But in the situation I have described, where additional receipts are the result of the then current tax system being applied against higher real incomes, the Congress would be required to pass legislation. Would we repeal some tax provisions and enact new, offsetting ones? Would we have to reenact existing provisions in order to meet a constitutional mandate?

This situation will occur in the recovery phase of every business cycle. Again let me point out that this has nothing to do with inflation and bracket creep though bracket creep appears to be the impetus for the language of section 2. But, let me remind Members that the bracket creep problem has been solved by the indexing of the individual income tax system enacted as part of the Economic Recovery Tax Act of 1981. Indexing will go into effect in 1985. This provision of the 1981 act was not modified in any way by the recently enacted tax bill.

Second, I want to point out the vagueness of the term, "receipts," as used in the proposed amendment. If the amendment is adopted, opportunities for definitional game playing would be provided to future Congresses. The concept of receipts which is used so freely in our discussions of fiscal and budgetary policy, is the product of accounting conventions that are not immutable, and have evolved over time. These accounting conventions are likely to continue to evolve. Should the term, "receipts," become part of the constitutional language, the accounting conventions take on air of importance that, in the extreme, may mean the minority rule.

Receipts as we use the term today, do not include all deposits of money into the Treasury. Proceeds from borrowing are not the only excluded items. The term "receipts," for example, rightly excludes tax refunds and money deposited with the Treasury which are held for the account of others, such as State income taxes withheld from Federal employees. In particular, certain proprietary receipts received from the public, such as user fees and proceeds from stockpile and land sales or from offshore oil leases, are treated as negative outlays rather than receipts. A majority—convinced that an unbalanced budget was in the best interests of the country but thwarted by a minority of 40 percent—might be tempted to redefine certain payments as negative outlays rather than receipts.

A budget could be proposed that called for substantial increases in those items in order to achieve a balance. But under the proposed contitutional amendment no vote for the increase in negative outlays would be required because those items were no longer defined as receipts. If, for purposes of the constitutional amendment, receipts are to be defined some different way, then we need to know it in advance. To avoid the case just described, the items currently treated as negative outlays might be included in the definition.

If those were the rules, then the executive branch, which controls such items as offshore oil leases, asset sales, and the like, could, by planning increases in these items, bring the requirement of section 2 into play. Receipts so defined would increase faster than prior year national income and the Congress would be forced to pass a bill specifically to increase receipts. This would presumably result even if the expectations of the executive branch are not in fact realized.

Third, section 2 calls for a comparison of the rate of growth of receipts with the rate of growth of national income, another one of those concepts that is not immutable but is the product of accounting conventions. Here there is a double problem. Not only is the conceptual framework of our national income accounts changed from time to time, but measures of national income are continually revised. We are most familiar with this when quarterly estimates of real GNP growth are revised several times. Our system of national income accounting has served us well over the years. But when changes in these accounting conventions and revisions of estimates make the difference between majority and minority rule, as they could under the terms of the proposed amendment, I fear that national income accounting will become a political football.

The Senate in their version of the proposed constitutional amendment seems to have recognized the problem presented by section 2 of House Judicial Resolution 350 by changing the term "rate of increase in national income in the last calendar year ending before such fiscal year" to "the rate of increase in national income in the year or years ending not less than 6 months nor more than 12 months before such fiscal year." Under this language, presumably any set of years could be selected to make the required measurement. Our national income accounts go back to 1929. The possible rates of increase under the Senate language include 7.6 percent, the average annual rate for 1951 to 1981, to 11.6 percent for 1980–81. Which measure is selected will be crucial. How is a choice to be made?

Fourth, constitutional restraint on receipts and outlays are likely to lead the Congress to expand credit programs and tax expenditures. Important parts of Federal credit programs are not reflected in the budget. Loan guarantees are an example. Progress has been made in controlling the so-called credit budget. Credit programs may be adopted by a congressional majority that are less efficient and more damaging to the private economy than direct spending programs in order to circumvent a minority roadblock in the budget process.

When receipts are expected to increase faster than prior year national income, the framers of the balanced budget amendment wish to have taxes cut rather than permit outlays to increase as a fraction of national income. But if a congressional majority is convinced that additional Federal activity is desirable, the temptation will be to turn to tax expenditures. Instead of cutting tax rates, the Congress may choose to introduce new credits, deductions or other provisions designed to address some particular social or economic problem. Tax expenditures are often less efficient methods of accomplishing desired goals. Moreover, expanded use of tax expenditures involves the tax-writing

committees in areas more properly in the jurisdiction of other committees.

I urge the House to reject both amendments.

Mr. ALEXANDER. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. FAZIO).

Mr. FAZIO. Mr. Chairman, there are many of us here who have served at the State or local level, and have worked with the strictures of the requirement for a balanced budget. I know many of us feel that it is appropriate that this Congress do the same thing. As we compare the two alternatives today, it is important for those of us with local and State backgrounds to look at the differences between them. There are two very significant failings in the Conable-Jenkins proposal.

First of all, what State government absolves the executive branch of the responsibility of proposing a budget submission? What executive is absolved from the process of having to present a balanced budget to his legislative body? It is obvious that we have a responsibility to keep that budget in balance, to set priorities, and determine the details of the appropriations process, but we do not and cannot absolve the executive.

Mr. Chairman, the debate over the constitutional amendment to require a balanced budget also obscures the fact that the budget of the United States mixes expenditures for Government salaries and goods that are purchased for immediate use with capital spending on long-term investments such as bridges, research, and education.

In most of the major industrial countries, budgetary expenditures are divided into current and capital items. Japan, Germany, France, Great Britain, Sweden, and Denmark have all used some type of capital budgeting for many years. Canada has followed the practice of a capital budget since its confederation in 1867. In 45 States and many municipalities we also distinguish between current and capital expenditures.

Capital budgets are the rule for major corporations. When corporations purchase a piece of capital equipment, only a portion of the cost of a new machine or building is charged against current earnings each year. If corporations did not follow the practice of depreciating their equipment over time, many of them would be operating in deficit and virtually all would show a sharp drop in earnings.

If AT&T followed Government accounting practices, its 1981 profits before taxes would have been cut from $19 billion to $9 billion.

In the case of IMB, before tax profits would have been reduced from $9 billion to $2 billion.

The idea of a capital budget is not new. In fiscal year 1948, the budget submitted to the Congress distinguished between capital spending on infrastructure and operating expenditures. The Hoover Commission proposed the adoption of a capital budget in 1949. The Committee for Economic Development made a similar proposal in 1959.

Mr. Chairman, I am not saying that overall spending totals or Federal deficits are unimportant. They are. What I am saying is that different kinds of spending have quite different implications for the U.S. economy. Investing in roads, bridges, education, and basic research will lead to long-run stable growth. A banker does not tell you never to borrow—lending after all is his business. But he does ask you what you are going to do with the money. That is the question we should ask of the Federal budget—not whether it is mindlessly and mechanically in balance each and every year.

The Alexander proposal provides a framework from which we can derive a statutory approach consistent with balanced budget provisions across our country. It is flexible and in keeping with historic practice. It meets the public demand and we should put partisan rhetoric aside and adopt it.

[From the Washington Post, June 28, 1982]

TOWARD A CAPITAL BUDGET

The editorial "Budget Questions: Reform" [June 14] dismisses the idea of a capital budget as a "scheme" that addresses procedure rather than substance. The Post could hardly be further off the mark.

Substance is the very essence of capital budgeting. A capital budget would bring together in one place—for the first time, believe it or not—an inventory of the government's investment in buildings, roads, bridges, tunnels, dams, water and transit systems, parks and other physical facilities. It would give us at last a clear picture of our national assets, how much they cost to build and maintain, and what sources of revenue they draw upon.

Critics of government spending often charge that no business or family could operate the way the federal government does, laying out more money than it takes in. But as Norton Simon chairman David J. Mahoney noted in The Post ["We're Cheating Ourselves," op-ed, June 13], no business budgets its capital investments in the same way as current expenses (salaries, supplies, etc.), as the federal government does. Rather, they distribute the cost of such projects over their full expected life.

Nor do successful businesses or families neglect the cost of maintaining their investments after they have been made. One of the significant shortcomings of federal policy-making, and of the current congressional budget process in particular, is its failure to assess the long-term construction and maintenance needs of the nation's vast public infrastructure.

Over the remainder of this decade, the United States must spend $2.5-$3 trillion to maintain existing levels of service on public facilities. Yet, at present expenditure levels, less than a third of these needs will be met.

Capital budgeting would allow the Congress to examine more closely the real costs of new projects, in terms of construction and maintenance, economic impact and efficiency and financing—such as how much interest expense should be attributed to a project when the government runs a deficit. This might reduce the amount of pork that gets stuffed into the federal barrel each year and direct resources instead to construction of essential projects and repair and rehabilitation of existing facilities.

Late last year, 20 members of Congress, ranging from Speaker Tip O'Neill to supply-sider Jack Kemp, wrote to President Reagan asking that he direct the Office of Management and Budget to explore the capital budget idea.

Recently, I joined in introducing H.R. 6591, which would require a special analysis of capital investments to be submitted with the fiscal 1984 budget, and a full capital budget to be prepared for fiscal 1985. Sen. Christopher Dodd of Connecticut has introduced similar legislation.

Adoption of a capital budget would make the budget process far more accountable and comprehensible than it is now—an objective we all share.

ROBERT W. EDGAR,
U.S. Representative of Pennsylvania.
WASHINGTON.

[From the Washington Post, Sept. 26, 1982]

THE PAINLESS BALANCED BUDGET

(By Norman J. Ornstein)

It's time that we stopped all the foolish talk about how difficult it would be to balance the federal budget.

If we should ever adopt a constitutional amendment to that end, the deed could be done without any noticeable pain—except perhaps to those who believe that editing the Founding Fathers would produce some wrenching fiscal changes.

The fact is that a quite legitimate and painless way not only to balance the budget but to create a multibillion-dollar surplus has been sitting under President Reagan's nose. All he has to do is flip through the authoritative works of David Stockman's Office of Management and Budget to an entry, for fiscal 1983, called "Special Analysis D."

"Special Analysis D" conveniently divides the federal budget into two categories, one for "current" outlays—otherwise known as day-to-day operating expenses—and another for "capital" programs with longer-term payoffs, such as those for highways or research and development.

The president will see immediately that by removing Stockman's "capital" budget of $155.3 billion, he can transform this year's estimated deficit of about $140 billion into a surplus of about $15 billion. Presto, Washington's first black ink in ages.

The notion of a separate capital budget is by no means unusual. The president should be exceedingly familiar with it, since he had one as governor of California. Indeed, as many as 45 states—including most of those that have called for a constitutional convention on the federal balanced-budget idea—keep their ledgers looking good this way.

In nearly all these states, capital spending is excluded from the regular budget. Capital programs are viewed not as expenses but as investments, and they are funded separately, largely through bonds or other borrowing devices. Without this accounting device, most states that have pointed piously to their own budgetary black ink would have been knee-deep in deficits for years.

Doing this at the national level as well might strike some as phony accounting designed to camouflage deficits, not reduce them, there certainly is some merit to this claim (as accountants for New York City in

past decades would be the first to suggest). But the capital budget idea also has substantive merit.

There is a difference between money spent to yield future benefits and money laid out for current expenses. By making the distinction explicit, we could not only instantly balance the budget—we could also focus the federal spending debate more properly on the relative need and rationale for spending in various areas.

For example, with bridges, highways, subways and dams decaying and cracking beneath our feet, massive federal spending to rebuild these structures will be required in the coming decades. Indiscriminate rhetoric about slashing federal spending does the public a great disservice, since it is clear that some areas will require—and quite properly—more, not less, federal capital.

Similarly, a balanced-budget drive that decimates federal research and development outlays could easily have the perverse effect of stunting our future technological growth, reducing or removing a major American advantage worldwide and shrinking our economic growth.

But let's leave all this weighty substance aside and focus on the psychological effect. A separate capital budget would remove from our shoulders the tremendous weight of staggering deficits now and through the rest of the 1980s. It would free us from worry about how Congress could possibly cope with a constitutional commandment to balance the budget. We would simply redefine the meaning of budget. The capital budget is worth it for those reasons alone.

As for details, any two people might quibble over precisely which federal programs belong on the investment side of the ledger. But why not just take David Stockman's view on this?

OMB defines capital, or "investment-type," programs as those which "yield benefits in future years through the acquisition of physical or financial assets, or through expenditures for less tangible long-term benefits such as education. They include: the construction, rehabilitation and acquisition of physical assets: education, training and vocational rehabilitation; research and development; international development and financial investments such as loans."

Buying the Stockman formula we can in one fell swoop create that $15-billion surplus, remove the need for a constitutional amendment, painlessly balance the budget if an amendment should be adopted and end the balanced-budget clamor of Wall Street and the hinterland. I would sleep a lot more peacefully knowing that we had solved this nettlesome problem once and for all.

[From Across the Board, May 1982]

THE FEDERAL BUDGET SHOULD BE REBUILT FROM THE GROUND UP

(By Albert T. Sommers)

Among all the measures of economic conditions that bear on the deplorable state of business in early 1982, the present and prospective deficits in the Federal budget are far and away the most widely discussed, and the most generally blamed. The rising trajectory of Federal financing requirements is said to have driven up interest rates, threatened the thrift institutions with total destruction, interrupted planning for urgently needed investment in plant and equipment, drastically lowered the rate of housing construction, multiplied bankruptcies among smaller companies, and precipitated near panic on Wall Street. The prolonged period of extremely high interest rates, attributable in considerable degree to the prospective borrowing requirements of the Federal government, has contributed to a general recession that is costing hundreds of billions of dollars in lost output. All this, only a year after Congress passed and the President signed an immense tax-reduction bill that reduces Federal receipts by about $700 billion over the next several years. The tax reduction was supposed to be associated with a balanced budget by fiscal 1984; but the deficit is now at an annual rate in excess of $100 billion, and rising. A balanced budget by 1984, or for that matter in any foreseeable future, has disappeared beyond the horizon.

Budget experience in the past several years has been spectacularly irrational. Forecasts, still dutifully assembled each year, as required by law, have become a subject for grim humor. Federal budgeting itself, unencumbered by any real agreement on what it all means, is being made in an analytical vacuum. Opinions about the proper direction of the budget, absent logical restraint, drift randomly, attracted only by political pulls; it is an unfunny paradox of 1982 that a conservative Administration is defending massive deficits, while liberals urge measures to reduce the deficits. At a time of sharp recession, almost all parties agree that it is necessary to reduce spending and raise taxes—the precise flip side of the Keynesian consensus that prevailed in the United States only a half-dozen years ago; but there are no widely accepted guides to where the spending reductions should be made, or what a tolerable deficit would be.

The Federal budget is simply out of control; worse, there is no longer any consensus on what budget outcomes really mean, and what kind of outcomes can rationally be sought in a modern democratic society characterized inevitably by large government responsibilities. The budget projections calculated by altogether responsible sources clearly require action.

But what kind of action? The conflicting responses to this question reflect conceptual doubts about what Federal budget outcomes really mean, and a seriously flawed accounting system from which budgetary conclusions must be drawn. The time-honored conventional view leads us to strive for a literally balanced aggregate Federal budget as the only "fiscally responsible" outcome; but it virtually guarantees that the goal will be missed by a mile, even while we underspend on precisely the things we need government to buy for us. The budget projections say that budgetary restraint is now unequivocally necessary. But if restraint requires a further round of spending reductions, it is desperately important for us to rationalize the criteria by which we appraise the course of Federal spending, and to improve the accounting structure by which the government plans and records its own operations.

The conceptual structure of Federal accounting is woefully inadequate in many respects, but most seriously in its failure to distinguish a capital account from its ongoing operations. Under present accounting practice, the Federal government makes no distinction between one expenditure and another. Unlike a business, it treats its capital outlays as ordinary expense, including their purchase in its operating statement, setting up no depreciation reserve for their replacement, and calculating no net worth as the security against the government's debt. While special analyses in the budget identify some spending as of a capital nature, the analyses are retrospective, and have no apparent influence on the planning of government outlay. A purchase of long-term assets adds to the deficit; a sale of assets reduces the deficit. If the same accounting practices were pursued by businessmen, the fastest growing and potentially most successful businesses—those that are investing more than their depreciation charges—would show a deficit or markedly lower profits, while declining businesses that are investing less than their depreciation charges would show higher profits.

For AT&T, for instance, conversion to government accounting would have reduced 1981 profits before taxes from $19 billion to $9 billion; for IBM, the reduction would have been from $9 billion to $2 billion. Both companies would have had to cut their capital outlay by about 50 percent to achieve their 1981 reported profits before taxes. Most small, fast-growing, high-technology companies would report totally illusory deficits year after year. In such an accounting structure, a company that sells a subsidiary, even at far below its book value, would show a tidy profit on the transaction. The Federal deficit is conceptually equivalent to the change in its outstanding debt. By this measure, AT&T has run a sizable deficit in every recent year.

To order its priorities and stabilize its finances, the Federal Government needs a captial budget; that is, it should separate expenditures into current operating costs financed by current income, and capital outlays financed by debt issuance when necessary. Discussions of capital budgeting for the Federal government have always been heated, because the proposal seems to imply a loss of control over spending, and a legitimization of continuing deficits. The risk is real; adoption of a capital budget would admittedly alter the constraints over government spending, in that it would compromise the simple, moralistic argument that government should "live within its means" and would stop the growth of its outstanding debt.

But the presumed virtues of a balanced aggregate Federal budget and zero growth in Federal debt rest on highly imperfect analogies to private-sector institutions—the corporation, and the family. And even these institutions are not expected to be (nor are they) virtuous in the rigid and inflexible way we seek to impose on government. (Until very recent years, business debt and personal debt have risen far faster than Federal debt.) There is a powerful commonsense case for capital budgeting; it should not be rejected for reasons of misapplied moralisms. Nor should it be rejected because prospective deficits are intolerable; those prospects reflect the dwindling relevance of a dying budget orthodoxy.

Capital budgeting would recognize the unalterable fact that modern governments, like modern corporations, confront substantial investment needs. Capital budgeting would not encourage a larger aggregate public deficit than we in fact experience. Its immediate consequence would be to strengthen legislative attitudes to withstand political demands for still further growth of current transfer payments, which are absorbing a larger share of Federal outlay, even in the Reagan budgets. Because it would direct attention to the long-run development and efficient use of the U.S. asset base, it should achieve more success with inflation than the dedication (always unfulfilled in fact) to an aggregate budget balance.

Capital budgeting would thus respond to the two largest economic problems confronting the United States in the 1980s—how to restore a high rate of private and public fixed investment, and how to control inflation. If we are serious about solving these problems, and we should be, we would do well to free the Federal government from the futile aphoristic economics by which it is now constrained, so that it can participate in the effort.

To reap the benefits of capital budgeting, however, a wholly new view of the role of the Federal government in the economic system, and a wholly new set of accounting principles, will be required. The fact that the Federal accounting system includes no capital budget has an obvious bearing on the size of the officially measured "budget deficit," and the consequences that flow from its interpretation. For an understanding of the forward step that capital budgeting offers, it is necessary to examine—objectively, nonmoralistically, nonideologically—the fundamental principle on which conventional budgetary policy still rests: namely, that a total balance of total revenue and total expenditure is the only "fiscally responsible" budgetary outcome.

While long-term budget projections under Democratic and Republican Administrations alike always look toward a future balance, the actual budget has been in deficit in 24 of the last 30 years, and in every year since 1970; in the last seven years the deficit has averaged about $50 billion annually. It is revealing that virtually every developed Western economy has had the same budgetary experience. In fact, the U.S. deficit this year, expressed as a percentage of national output, is likely to be among the smallest of the OECD countries. In 1979, both the total public-sector deficit (including state and local governments) and the Federal government deficit, expressed as a percentage of GNP, were at half the level of West Germany's. In Japan, the relative deficit was three times ours, and the deficit of the total public sector more than five times ours, as calculated by the Bank for International Settlement.[1]

In the U.S., as in virtually all Western economies that have shared in our political and cultural experience, a conventionally balanced Federal budget no longer appears to be consistent with high employment, and may be impossible to sustain at any level of employment, unless substantial government responsibilities acquired over the past two decades are largely abandoned.

There are at least two basic reasons for this developing experience. In the first place, transfer payments now dominate Federal budgets; and transfers are not nearly so stimulative to private activity, and hence to the broadening of the tax base, as real government purchases from the private sector. Such real purchases—for bridges, roads, ports, mass transit—produce a stream of jobs and incomes, and hence tax revenues, the transfers, which feed directly into consumption, have much smaller and only indirect effects on jobs and the tax base. In the days when government was much smaller and Federal outlays contained a high percentage of direct purchases, it was difficult to run a Federal deficit for any length of time. (The immense deficits of World War II were the result of deliberate suppression of the tax base and of consumption by wage, price, credit and production controls.) At present, in the U.S. as well as throughout the West, it is almost impossible to avoid one. Restraining transfers, and expanding real outlays, would contribute to a reduction of the deficit; capital budgeting would help in that effort.

Second, the dedication to a balanced aggregate budget fails to comprehend the long postwar development of debt formation. In the early postwar decades, private debt was rising rapidly in the United States. Historically, total public and private debt rose along with total GNP and the energy provided by the recovery of private debt helped to maintain the system near high employment with no help from public debt formation.

In the decade ending in 1957, the budget was actually in surplus more than half the time (the deficit years were mainly those of the Korean War; wage and price controls again). But the debt-carrying capacity of the private sector has been leveling off for more than a decade, and the withdrawal of energy has induced the growth of public debt—probably inevitably, but also as a consequence of deliberate efforts to keep the system near full employment. In the 1970s most Western economies arrived at a great postwar conjuncture; the simultaneous presence of large government, and a mature debt burden in the private sector.

In the last 10 years, efforts to stop arbitrarily the growth of public debt have periodically weakened the system, and augmented recessions. All of the last three recessions occurred in the presence of a brief near-balance in the aggregate Federal budget; the ensuing recessions drove down private activity and hence tax receipts, and hence led to an augmented deficit in succeeding periods. Wild swings in the aggregate budget position, from close to neutral to deep recession-induced deficit, have been characteristic of the system's performance ever since the late 1960s, and have imparted to it a destructive instability in demand, and in interest rates, that impairs the private sector's ability to plan long-term investment. There is absolutely no evidence that the political dedication to an aggregate balance in the Federal budget, under present accounting, has had any effect at all on the average budget deficit over the past decade. And under present accounting, there is very little likelihood that any Administration will balance the total budget, for any significant period, in the foreseeable future.

Not only is a general budgetary balance most unlikely—it should not even be sought by the Federal government, any more than by successful corporations serving a growing market. It is the wrong target, and the error is greviously costly. The burden is borne heavily by U.S. business, which has had to do its long-range planning in an unpredictable and unstable financial environment, periodically featuring prohibitive capital costs, and in the presence of deteriorating public facilities.

In the absence of an accepted distinction between Federal expenditures with long-run importance and ordinary operating outlays, the futile effort to balance the budget disastrously misdirects the attention of both spending and tax policy. Given the fact that many of the ordinary outlays, including transfers, are mandated by existing legislation, the effort to curtail expenditures in the direction of a budget balance is inevitably deflected toward precisely the public capital programs that are urgently needed as infrastructure for the private sector's investment (not to mention the private sector's quality of life). Lacking an accounting protection for capital outlay, the Federal effort to control deficits is producing a disguised and unintended liquidation of the public infrastructure, a continuous accumulation of deferred maintenance that is grossly apparent everywhere in our public sector—including, of course, in our defense establishment.

Public capital formation has now subsided to about its lowest share of total output at any point in the postwar years. School construction has slowed—appropriately enough, with the decline in the school-age population. But the misdirected pressures to economize account for a 10-year liquidation of much of the U.S. defense system. Even if schools and defense are excluded from capital outlay, the remaining nondefense public-capital formation has taken less and less of our GNP. Outlays for highway construction fell after the completion of the interstate system several years ago, understandably; now the system is deteriorating again.

The remaining programs—mass transit, general institutional construction, urban rehabilitation, bridges, parks, water and sewage systems, ports—have suffered. In current dollars (not adjusted for inflation), the investment-type programs identified in recent budgets have been growing at a 1.5 percent annual rate; the growth in current operations has been at a 14 percent annual rate. A Commerce Department study indicates that through much of the 1970s, Federal spending on "public works" fell short of depreciation, even with the depreciation calculated, with an understatement, on an original-cost basis. For state and local investment outlays, the rate of net investment has also declined, despite the same understatement of depreciation and despite growth in grants-in-aid.

Now that the Federal grants are falling, further decline in such investments is inevitable. Calculated on a replacement-cost basis, these figures would reveal a gross liquidation of the stock of public capital, probably much faster than the equally regrettable liquidation of private capital to which businessmen properly invite attention. Caught between rising transfer payments on the one hand, and efforts to seek both tax reduction and a conventionally balanced budget on the other hand, American public facilities financed by both Federal and local governments are threatened with continuing, progressive disintegration.

The failure to recognize a capital component in Federal spending, and to account meaningfully for the accumulation of public assets (financial, as well as real) over time, also contributes to a naive conception of the Federal debt, and its significance for Federal financial policy. In the household sector, we are accustomed to relating outstanding debt to the level of personal income; in the business sector the level of debt is normally related to other relevant measures, such as current and prospective earnings, and net worth. Only for the public sector do we bemoan an increase in debt measured absolutely as financial obligation. No part of the system—not the business sector, nor the consumer sector, nor the government sector—balances its budget by Federal accounting procedures; all of the sectors experience a continuing rise in outstanding debt.

Such a naive way of reviewing the Federal debt, without benefit of any investment perspective, gives rise to excessive alarm (given the present deficit projections, some alarm is certainly warranted) over the level of the

[1] In seven major industrial countries budget deficits now average 4 percent of GNP.

debt, and even simplistic exhortations to "pay it off." In fact, the relationship of Federal debt to the GNP from which the Federal government generates its revenues has been generally declining throughout the postwar years (whereas it has been rising, although from a much lower base, in both Japan and West Germany; their lower bases are attributable to the repudiation of their public debt by the new governments installed by the Allies at the end of World War II). The government's sovereign power to command its income out of the GNP is limited, of course, by the effects of taxation on incentives in the private sector, where the government's revenue is generated, but in addition to this power, it has a balance sheet as well as an operating statement. To ignore the assets in its balance sheet is to distort the significance of its debt.

Capital budgeting would thus add an essential dimension of realism to Federal spending policy and tax policy. While it would vacate the fallacious and unachievable objective of an overall balance in the Federal budget and an end of all growth in Federal debt, it would by no means provide a warrant for abandon in either spending or debt. Indeed, it would require current financing of current costs, including depreciation—a balance or a surplus in the operating budget. It would provide the controls for effective restraint on all expenses of the government, including the transfers; it would say, loud and clear, that more current operating outlays (including transfers) mean more taxes. Such an operating statement, if available last spring, would have made it thoroughly evident that we could not afford the gross dismantling of our revenue base that was accomplished by the tax reduction, unless it were to be accompanied by an equally gross curtailment of current outlay.

One of the reasons that the transfer programs have grown so uncontrollably is that the option existed to offset their growth by reduction in public capital outlay; removing this opportunity through separate accounting for capital outlay would restrain the transfers; and the higher level of private job creation in publicly financed investment would reduce the requirements for transfers. A capital budget would alert the public as a whole to the dangers of aggregate underinvestment, undersaving and overconsumption. It would provide the information basis for practical spending and taxing decisions, and for programmed reinvestment in the system in good times as well as bad. It would free us from the classic cyclical entrapment of public investment (it is not needed as a stimulus in good times, and in bad times the stimulus provided by it will come too late). Public capital investment is necessary; it is not just a cyclical toy.

The debt formation that would proceed in the capital account is not, as is often argued, a regrettable absorption of real savings that should be made available to the private sector. This argument ignores the fact that modern governments have substantial investment requirements of their own (including defense investment), of a significance no different from the significance that attaches to uses of capital in the private sector. Government, as well as business, requires a call on national savings; it is the debt financing of the expenses of government, not of its investment, that is a misuse of savings capital.

A revision of Federal accounting to incorporate capital budgeting would require considerable study, looking toward the construction of satisfactory accounting definitions and concepts. Both the Treasury and Comptroller General's office, as well as other public and private bodies with an interest in Federal accounting, have some work in progress for the improvement of the system, including the development of capital outlay, depreciation and net-worth definitions. The definition of "investment" is critical to the effort: a continuously expanding definition would admittedly pose the threat of unmanageable deficits. But this is not an incremental risk: our experience today makes it perfectly clear that the present system is regrettably efficient in the production of unmanageable deficits.

Apart from the capitalization and depreciation of physical assets, capital budgeting would offer opportunities for rationalizing government activities in financial markets. The bewildering and disorderly array of Federal subsidies, secondary-mortgage market activities, developmental capital programs and loan guarantees, interest-rate subsidies, capital availabilities to small business and to depressed areas, even, perhaps, Federal programs for the improvement of human capital—all growing areas of government interest—might be organized and controlled and restrained together. Some of the so-called "tax expenditures" (the selective foregoing of revenue, commonly to encourage investment: for example, the investment tax credit) might be redefined, and those with a measurable prospect of stimulating future growth in the private economy and the tax base might conceivably be capitalized as investment. What appear to be useful opportunities for capital partnership between the public and private sectors would be encouraged by the provision of an orderly accounting structure.

In this and other respect, capital budgeting would foster cooperation between business and government in the renewal of our private and public capital stock. Handled with vigor and restraint, it would do all of these things without adding a dollar to the total deficit, while at the same time imposing necessary limits on the consumption-directed spending of government. It would provide clearer and more stable fiscal information for the use of the Federal Reserve in setting monetary policy. And it would assist in rebuilding the government's reputation, now badly damaged, as an essential contributor to the nation's future growth. All in all, there would be a large reward for relinquishing the antiquated moralisms by which we now define fiscal responsibility.

Mr. ALEXANDER. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr Chairman, I rise in support of the substitute amendment proposed by the gentleman from Arkansas (Mr. ALEXANDER).

I have deep concern about the proposition of requiring a balanced budget under the Constitution. I do not believe the Constitution is the proper vehicle for implementing economic policy. It is not designed to be flexible and responsive to volatile conditions like the economy. It has been and should continue to be a statement of fundamental principles on which our Nation is based and on which our Government can operate.

The substitute before us at this time, in my view, offers a far more appropriate constitutional provision. Briefly, Mr. Chairman, let me summarize the advantages the Alexander substitute offers over the proposed Jenkins-Conable constitutional amendment.

Mr. Chairman, there has been a lot of talk today about will, political will, and how to put together a set of rules that would give us the will to do things that I think most of us agree we need to do. I think if we look at economic history, we find that it is kind of hard to write rules that actually work. Often, we talk about mandatory wage and price controls. Sounds good. Often it is seen as magic to solve the problems, but when they are put in place, they often do not work and they have to be changed and they have to be modified and they have to be shaped so that they will work.

There are lots of other instances where we sought a set of rules that would get human nature to act the way we wanted it to act. That is what we are talking about today. What we are saying in the Jenkins-Conable amendment is that that set of rules is magic, it will work; no doubt about it, there is no way it can go wrong. I do not think that is the way we want to deal with the Constitution.

For 195 years in this country the Congress did not even have a set of budget rules. Now we have them. They are beginning to work. I suggest to the Members that they are working very well. They can be improved, they should be improved. There is a long way to go, but let us not today try to say that we know exactly how they should work.

I think the Alexander amendment is a preferable approach.

First and foremost, the amendment offers flexibility. It is strong, but a simple statement of principle that the budget should be balanced every year unless extraordinary circumstances dictate otherwise. It leaves open the opportunity for the Congress to determine how that broadly accepted principle will be implemented. It will not lock us into any specific fiscal policies that might be inappropriate if there is a depression or uncontrolled inflation or other economic disruptions, due to events beyond our control like an oil boycott.

Second, the Alexander amendment would not write specific legislation through the Constitution. This fundamental document is not a set of regulations. It is not the Federal Register. Previous amendments have refined the basic rights and principles established by the original work of our Founding Fathers, but they have not attempted to define how those doctrines will be implemented. For example, the 16th amendment instituted the Federal income tax. It did not, however, identify what types of income would be taxed or at what

rate. That concept has been implemented by separate legislation. The Alexander amendment not only leaves open to Congress the opportunity to enact such legislation, it requires statutory action to implement and enforce the balanced budget. We have had a number of important proposals in the last few months along this line—Obey-Jones. Under Jenkins-Conable, too much is specified, but in a confusing manner. It will inevitably lead to the courts determining economic assumptions and writing the Federal budget, a seemingly ludicrous but thoroughly unavoidable situation.

Third, the substitute preserves and reinforces the separation of powers established by the original framers of the Constitution, by calling on the Congress to implement the amendment. It does not leave the executive branch with extraordinary, and previously unconstitutional, powers to control the Government's purse strings. We will permit no line-item veto or impoundment by the President. We will assure continued congressional determination of fiscal policy.

Finally, the Alexander amendment will bring the President into the effort to achieve our goal of a balanced budget, by requiring him to submit such a proposal to the Congress each year. To critics of the substitute who claim it has no teeth, I would say it provides for stronger and far-more-appropriate enforcement than Jenkins-Conable. It clearly states how a balanced budget will be achieved—by statute. It does not include a few vague and confusing provisions, some of which cloud the separation of powers while others tie the Government's hands in assuring a balanced budget. The Alexander substitute paves the way for a strong and effective budget process and it declares simply and very effectively the important guiding principle that budgets should be balanced more often than not.

For those who believe that requiring a three-fifths majority is necessary to prevent deficit spending, the statutory implementation required by the Alexander amendment can easily include such a provision.

Mr. Chairman, the bottom line here is that we are entering uncharted waters and we are experimenting with the Constitution—the very foundation of our federal system. We are still experimenting with a budget process that is only 5 years old and changes every year.

I think Professor of Economics Hendrik Houthakker summed it up best before the House Judiciary Committee in August of this year when he said:

> I agree that the Federal Government spends too much and thereby contributes to inflation. If nevertheless I come out against the (Jenkins-Conable) amendment, it is because I foresee that the amendment will not accomplish its stated purposes, that the false hopes it raises will soon be followed by disappointment and possible repeal, and that in the meantime the budgetary process will become even more complicated. My profound belief in the Constitution as the foundation of our democratic way of life leads me to question the wisdom of using it for experiments whose final outcome is so uncertain.

The Jenkins-Conable amendment is an unwise experiment, the Alexander amendment is a far preferable alternative.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. LEWIS).

Mr. LEWIS. Mr. Chairman, I rise in support of the only reasonable balanced budget proposal before us and in opposition to the Alexander proposal.

Mr. Chairman, I rise in support of the only meaningful amendment to balance the budget before us and to oppose the Alexander substitute.

Mr. Chairman, we are gathered today to decide whether or not the House of Representatives will send to the people of the various States a proposition to place within our Constitution the requirement of a balanced budget—a requirement that our national family live within our means.

Because I hold in reverence the divine inspiration that is our Constitution, it was only after serious contemplation and grave reservation that I have come to the conclusion that we should propose this amendment and send to the people this question: "Should we or should we not amend our Constitution to require the Congress to live within a balanced budget?"

The collective genius of our Founding Fathers was not without flaw—not without need for subsequent finishing touch. How quickly after its adoption did the people respond to the first 10 amendments—the Bill of Rights? Who among us would suggest that the Bill of Rights had contributed anything other than strength to the original document. The question of women's sufferage brought about revolutionary change. Who among us would suggest that amendment has not strengthened our representative democratic system?

Mr. Chairman, let me suggest that our Founding Fathers must be turning over in their collective graves in amazement of the point to which we have arrived today. Never my colleagues—never in their wildest dreams would they have imagined that one day the Congress would find itself at the end of a spending binge that would find our Republic in debt in excess of $1 trillion.

No, Mr. Chairman, never in their wildest dreams. The Constitution which originally fashioned our Republic—clearly recognized that the people cannot each travel from the far reaches of our land to sit in the forum themselves. Thus, it established a process whereby Representatives are selected to sit in that forum—to participate in the debate, and finally to cast their votes to reflect the best interest of their individual constituents as well as the Nation.

The Founding Fathers were most reserved about the prospect of expanding central Government. They recognized that Government growth would require taxes and that to tax was to take people's property. Never in their wildest dreams would they have imagined that the Congress would come to the point where they were taking not only high percentages of the productive value of today's citizens—but placing in debt the property and productive potential of their children and grandchildren as well.

Mr. Chairman, I suggest it is absolutely reasonable to let the people decide whether or not in the future there shall be required by the Constitution an extra majority of the Congress before it can budget beyond our means. There shall be required a 60-percent vote before the Congress would extend or expand programs that inevitably lead to more taxes—taxes that literally take away the property and the productive potential of future generations.

During the years I have served in the Congress I have felt both frustration and bewilderment as those who control the House pay lip service to fiscal responsibility—yet continue their pattern of exploding Government programs—expanding the numbers of our citizens totally dependent upon Government—thus obtaining their votes and securing political control. It is a process known as "Tax and spend—spend and elect"—a process designed to cynically procure and extend pure power.

The Alexander substitute to the balanced budget amendment is the produce of those who would continue that con game. It is the hastily grafted design of those whose policies have brought us to this point of budgetary crisis. The Alexander substitute is the ultimate filmflam. It would allow those who pay lip service to fiscal responsibility to once again get off the hook in time for election and then come back next year and continue down the road of fiscal insanity.

Mr. CONABLE. Mr. Chairman, I yield myself my remaining time.

The CHAIRMAN. The gentleman from New York is recognized for 3 minutes.

Mr. CONABLE. Mr. Chairman, I wish to announce to the Members that if the Alexander amendment is defeated it is my intention under the rule not to offer the Conable-Jenkins amendment, but to go immediately to final passage of House Joint Resolu-

tion 350 in order to save the Members time and because I think a two-thirds vote can settle the matter without further debate.

Mr. Chairman, I have heard the words "fraud" and "cruel hoax" used about the Alexander amendment, and I do not agree with those characterizations. If that were the case, it would require that somebody be fooled by it, and I do not believe anybody is fooled.

This impulsive vehicle was put together last night, in all probability, some time between the White House barbecue and the Democratic gala, and in my opinion it is sufficiently transparent so that the moonbeams shine through it undiminished. It seems to me, then, that we can set it aside as an effort to forestall, to divert, and to obfuscate a serious effort at a constitutional amendment which would in fact improve the fiscal climate of this body, and reassure the American people.

Let me just offer a few words of contrast between the two. The Alexander amendment requires a simple equation of receipts and outlays without further protection. It could continue our current practice under the Budget Reform Act of entering into major debate about the assumptions and the estimates. In other words, it seems probable to me that were we to adopt the Alexander amendment, we would spend a great deal of time arguing about whether the country was going to have 5 or 10 percent real growth, or whether estimates are correct, rather than actually doing the things which would require us to take action to cut expenditures or to raise taxes.

The Conable-Jenkins amendment, on the other hand, is anchored to the past fiscal year and is based on the sound statistics of growth of national income during that period of time.

□ 1510

And so there is no uncertainty, no estimate, no assumption about it.

The Alexander amendment also involves the words "national emergency." Unless I miss my guess, we were in a national emergency from the beginning of the Korean war until very late in the Vietnamese war, and Mr. Chairman, that long period of time would have seen a "national emergency" waiver of the Alexander amendment. There is no such provision in the Conable-Jenkins amendment, and it is a safeguard that I think we need.

Mr. Chairman, I urge opposition to the Alexander amendment.

The CHAIRMAN. The time of the gentleman from New York (Mr. CONABLE) has expired.

The Chair recognizes the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consume to the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Chairman, I rise in support of the Alexander amendment.

Mr. Chairman, we do need more economy in government. We do need to stop the growth of the staggering debt we are loading onto future generations. We do need to heed Jefferson's warning that public debt leads to misery.

But when we amend the U.S. Constitution, we must do so with great caution.

If we really want to balance the Federal budget, then it doesn't take a constitutional amendment to do it. And if we are not really willing to balance the budget, then even a constitutional amendment isn't going to do a bit of good.

Back in the sixties, New York City was operating under a legal requirement that its budget be balanced. What happened? Accounting sophistry rose to a fine art.

Still, a constitutional amendment might do some good.

But it should be the right kind of amendment. We should not clutter up our Constitution with complicated economic formulas. There is a difference between our founding document, and the Federal Register.

The strength of that document lies in large measure in its simplicity. We should keep our Constitution as simple as possible.

We should also maintain the separation of powers which Jefferson considered a cornerstone of democratic government. We should not give constitutional license to Presidential impoundments of funds.

We should not invite the U.S. Supreme Court into the Federal budget process. And that is what would happen under at least one of the proposals before us today.

For these and other reasons I believe that the Jenkins-Conable version of a constitutional amendment is seriously flawed. It is too complicated. It would drag the Supreme Court into the Federal budget process. It grants broad new powers to the President, powers that alter the separation of powers in an adverse manner.

However, I do support the constitutional amendment proposed by Mr. ALEXANDER. It is simple and straightforward. It keeps the Supreme Court out of the budget process. It leaves the Congress some flexibility to deal with national emergencies. But it does constitutionally require a balanced budget, and I support that.

Mr. Speaker, this amendment will not solve all our Nation's economic problems. It will not.

I support this amendment because I think we need to establish more restraint in the Federal budget.

This is not just a matter of spending. It is also a matter of where and how we commit the resources of this Nation. The Alexander amendment will move us in the direction of fiscal responsibility without tearing up the fabric of the U.S. Constitution by enacting a careless amendment. The choice today is a careful amendment or a careless amendment. I choose the Alexander amendment—a careful, constitutional step forward toward a balanced budget.

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consume to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, I rise in opposition to the Conable amendment and in support of the Alexander amendment.

Mr. Chairman, I rise in opposition to House Joint Resolution 350, and applaud the efforts of the gentleman from Arkansas (Mr. ALEXANDER). I ask unanimous consent to revise and extend my remarks.

Mr. Chairman, the most effective way for Congress to balance the Federal budget is to put the 13 million unemployed Americans back to work. A full employment economy will balance the budget and rescue the social security system. A constitutional amendment will not.

It is an affront to the Constitution, to the tradition of the Founding Fathers, who so carefully crafted that remarkable document, for the House to take up this proposed constitutional amendment in the closing hours of this Congress; in the rush to adjourn; under pressure by the President, the Vice President and the rest of his administration, artificially creating an atmosphere of urgency where no urgency exists.

There is not adequate time in these closing hours before adjournment for us properly and thoughtfully to give the careful, deliberate consideration an amendment to the Constitution deserves. The only discussion in the debate so far today that approaches the depth, the wisdom and the obviously careful throught process of the Federalist Papers was the learned discourse by the gentleman from Missouri, the chairman of the Rules Committee (Mr. BOLLING). This body needs, and the country deserves, a great deal more deliberation than the 2 to 4 hours of general debate provided under the rule governing floor consideration of the amendment. Such limited time is hardly adequate to give thoughtful and responsible consideration to any proposal to modify the oldest written Constitution in the world.

It was suggested in remarks from the other side of the aisle that poll after poll shows that the American people favor a constitutional amendment to balance the budget. Aside from doubting the validity of those polls and questioning the extent of in-

formed judgment those polled have brought to bear on the issue, I think it would be sheer folly to amend the Constitution by wetting our finger and holding it to the wind. The men who wrote the Constitution did not intend that it should be easy to change that document and they surely did not intend that it should be changed to suit the shifting moods of public opinion.

The driving force behind the discharge petition to propel this amendment to the House floor just prior to election is political and was engineered in the White House. The timing is blatantly political—an attempt by the administration and the leadership on the other side of the aisle to divert the public's attention from the crushing burden of recession, the disastrous levels of unemployment, the 1-every-5-minute rate of business failures, the continuing downward spiral of capacity utilization in industry and the numerous other ills of our society brought on by the abject failure of the administration's economic program. The discharge petition and this amendment represent the ultimate politicizing of the constitution and manipulating of the amending process.

I am not suggesting that politics has no place in this House. It does, but only in the highest sense of the root of that word: "polis," matters relating to the well-being of the community of man. But partisan political manipulation of the Constitution and its amending process has no place in this House during these serious times.

Let us characterize this maneuver for what it so unmistakably is: a brazen attempt by the administration to embarrass Members in marginal districts who, in good conscience, cannot support this proposed amendment.

The Founding Fathers, in the articles of the Constitution, established a rigorous procedure for amending the U.S. Constitution. They did so because they wished to discourage hasty and capricious amendments. They had completed a monumental task in writing the Constitution. They recognized the threat that ill-considered or shortsighted attempts to amend the Constitution would pose.

Let us look at the history of constitutional amendments in the 20th century. The Constitution has been amended 11 times in the past 100 years. The majority of those amendments have dealt with the rights of citizenship or the electoral process.

The exceptions are the 18th amendment, which authorized prohibition, and the 21st amendment, which repealed the 18th amendment, and the 16th amendment, which established the power of Congress to levy the income tax.

The other amendments included in our Constitution this century have been:

The 17th amendment: Providing for the popular election of U.S. Senators, rather than election by the State legislators.

The 19th amendment: Providing for the right of women to vote.

The 20th amendment: Providing for changes in the date for commencement of Presidential terms.

The 22d amendment: Two-term limitation on Presidential terms.

The 23d amendment: Providing three electoral votes for the District of Columbia.

The 24th amendment: Abolition of the poll tax.

The 25th amendment: Providing for a Presidential succession.

The 26th amendment: Providing for voting at the age of 18.

The pattern that emerges from that historical record is one of amendments to strengthen or expand individual rights, important matters relating to the electoral process and to the mechanical operation of the executive branch.

This amendment, however, departs from that tradition by attempting to establish in the Constitution a statement of economic principle, which was never intended to be included in the Constitution by the Founding Fathers. It is more in the nature of legislation that should properly be enacted by the Congress and which, in fact, can be, and indeed is being, managed through the congressional budget process.

I am deeply troubled by another aspect of the proposed amendment. Constitutional experts who have analyzed House Joint Resolution 350 advise that it will have the effect of allowing the President a line-item veto on appropriations bills. Such authority would be a major reversal of the progress Congress has made in the last 10 years of reestablishing parity with the executive branch in budget matters.

Prior to enactment in 1974 of the Budget and Impoundment Control Act, the executive branch had, for more than three decades, vastly expanded its power over the budget and the appropriations process. The pendulum of economic power in the Federal Government had swung heavily to the side of the President beginning with the days of the New Deal.

The Budget Act was an attempt to redress that imbalance; to restore the position of Congress as a coequal in the process of setting economic priorities and managing the Federal fiscal affairs. This proposed constitutional amendment would erase the progress we have made in the last decade by shifting enormous economic power back to the President and thereby removing such power from the people.

The Founding Fathers had a deep mistrust of the Executive and curbed his authority significantly in the Constitution. Our entire Revolution of Independence was fought against the principle of overwhelming, arbitrary executive power. This amendment reflects a major and unwise departure from that tradition—one that the Congress and the American people will regret should it be adopted. I urge the House to place the Constitution and the best interests of the American people above short-term political gain and reject House Joint Resolution 350.

We should also appreciate that this amendment will do nothing to alleviate the Nation's current economic woes nor will it eradicate the inescapable Reagan deficits predicted to total more than $500 billion in the four fiscal years including fiscal year 1982.

This constitutional amendment will not give us the reduced deficits that the American people are demanding now. This proposed amendment will do nothing to revise the provisions of the 1981 tax legislation which has brought us to the point of record deficits. This amendment will do nothing to provide responsible limits on the increases in defense spending proposed by the Reagan administration.

This amendment is a smoke screen to cover the failures of the administration's economic policy. Today will be a day of shame if this House approves the proposed constitutional amendment.

Two hundred years ago, the people of this country fought for political independence, for a philosophy of government based upon equality of men and women under the law. For 200 years, the American people have fought to maintain the ideals of that constitutional government. If we tamper with the Constitution, as is proposed today, we make a mockery of two centuries of American history.

I urge my colleagues to have the political courage and the intellectual honesty to say today that we will not defile the Constitution by approving this proposal.

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consumer to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Chairman, I rise in reluctant opposition to the Alexander amendment and in support of the Jenkins-Conable balanced budget amendment. Passage of the balanced budget constitutional amendment has been among my highest and most important legislative priorities.

On February 22, 1979, I introduced House Joint Resolution 218, a balanced budget constitutional amendment. At the beginning of the 97th Congress, I renewed my support for the balanced budget amendment by introducing House Joint Resolution 180 on February 19, 1981. During 1982, I continued to seek approval of the balanced budget constitutional amend-

ment by introducting House Joint Resolution 439 on March 16, 1982, and by sending a letter to President Reagan on May 6, 1982, in support of the passage of the balanced budget constitutional amendment.

Today, the House of Representatives can approve a reasonable balanced budget constitutional amendment. Federal fiscal restraint and responsibility can be restored. I encourage my colleagues to join with me today in voting for the Jenkins-Conable balanced budget constitutional amendment.

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consume to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, it has been quite interesting to sit here today and listen to some of my colleagues suggest that this is the most important vote they will ever cast.

On the contrary, in a place that does a lot of work with mirrors, this is one of the biggest charades any of you will ever be involved in.

We all know that there are times when Congress, rather than dealing squarely with a problem, resorts to creating an illusion of action.

The balanced budget amendment is an illusion of action. Those of you who voted for Reaganomics went on an irresponsible splurge. You shamelessly pushed wasteful defense budgets through here. You pushed a tax cut through that even many of it proponents now say went way overboard.

Now you supply-side soldiers, who should be laying down your arms and waving the white flag, have another idea. Let us pretend, you say, that we really didn't put the country in this mess after all.

Let us try and make the people think that we are really for a balanced budget. Let us try and keep them in the dark so they will not know that we set the economic house on fire last year.

Some of you actually think you can get away with this. You think the Reagan unemployed will not know. You think the Reagan bankrupt small businessmen will not notice.

This is such an outrageous attempt to cover up the damaging behavior of last year that the people will see through it.

Over the next 5 weeks, it is apparently the intention of the President to criticize the Democratic Party for "50 years of gross mismanagement." If this is going to be the tactic, I will urge my party to take the blame.

We should take the blame for creating the social security system.

We should take the blame for ending the Great Depression.

We should take the blame for winning the Second World War.

We should take the blame for medicare, medicaid, and the guaranteed student loan program.

We should take the blame for electing a President who dreamed that men would walk on the Moon; for a President who dreamed that here on Earth black men and women would be able to live in a more equal society.

In all candor, we are guilty in one respect: we have not used every ounce of energy available to oppose this prejudiced, fictional, and deeply flawed economic policy that the President and his party has thrust upon this country.

We Democrats share some of the responsibility for letting the fantasy get this far.

We fell down in our obligation to stop supply-side economics. We permitted the virtual elimination of the corporate income tax, which has produced a net decrease in business investment. We permitted senseless and mean-spirited budget cuts which have produced neither a surplus nor preserved the so-called safety net.

We encouraged a fiscal shellgame to reduce the deficit by shifting Federal burdens on the fiscally stooped shoulders of the States. And, we have done little to stop the wanton spending spree by the Pentagon which will make us less safe and bankrupt economically.

What is the record thus far? We face average budget deficits of $143 billion over the next 3 years. Budget cuts have devastated our most important health and feeding programs; 10.8 million Americans are unemployed. Poor people are reduced to waiting in lines for cheese. They want jobs, not cheese, and that is an issue which the President refuses to address.

Rather than changing course—a move that is long overdue—we are standing on the precipice. We are now asked to attack the one lasting national treasure, our Constitution. We are asked to enshrine forever this radical and biased economic philosophy that has crushed the dreams of so many, and enriched the bank accounts of a lucky few.

If this amendment goes through, it will be a fatal blow to what remains of our social service structure. James Baker admitted, on "Face the Nation" not too long ago, that the deficit would still be with us, even if all social service spending was eliminated.

Last December, the policymakers sang a different song. At the American Enterprise Institute, Murray Weidenbaum said, "It is untrue that deficits mean government cannot get its fiscal house in order." At the same gathering, William Niskanen said, "the simple relationship between deficit and inflation is as close to being empty as can be perceived."

But, with the election 5 weeks away, there is a new game-plan. For strictly political reasons, we are asked to climb into the fiscal straitjacket, lock ourselves into a future that can only mean massive budget cuts, and emasculate the Constitution for some transitory partisan benefit.

To the poor, the message is clear. Those who vote for the amendment are cutting you loose. They are asking the poor to wait for the rich to spend our way out of the recession; and, if you are lucky, the benefits of the program will fall to the floor like crumbs from the plate.

It is not going to happen. Enactment of this amendment will punish the vulnerable, break the backs of the States, and plunge our country back into the darkness of social inequality.

But it will do more. It will sentence our Nation to a future of unmet needs. That is terribly shortsighted.

With this amendment in place, how will we build the bridges, fix the roads, educate our children, guarantee the retirements of the elderly, or keep our air and water clean? It cannot be done.

I would urge my colleagues, particularly those on the Democratic side, do not do it. Show the political courage necessary to vote this amendment down. Do not despoil our Constitution. Do not burden the future generations with this final insult that represents the mischevious political legacy of Reaganomics.

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Chairman, I rise in strong opposition to House Joint Resolution 350. I will defer to others on the macroeconomic and constitutional issues—which in and of themselves reveal fatal flaws in this proposal. But I want to speak to the impact of the proposal on our Federal health programs and the people they serve.

Simply stated, House Joint Resolution 350 would decimate our Federal health programs.

If we were to balance the budget in the fiscal year that begins today by cutting all programs—including defense—across the board, Federal spending for health programs would be slashed by $14 billion.

If defense is not subject to such a cut—as many Members and our President advocate—then health programs would have to be cut by $19.5 billion.

Let us look at the specific programs.

Social security's medicare program would be cut by $10 to $14 billion in 1983 on top of the $2.9 billion cut we just enacted. You may all remember the budget debate on the first Michel-Latta budget earlier this year, when a groundswell of bipartisan opposition arose against the deep medicare cuts in that resolution.

Well, that budget would have cut medicare by $4.85 billion. Now we confront an amendment that would translate into a cut two—three times that high. So, if you support this amend-

ment, you are voting to cut social security's medicare program for the aged and disabled by $10-$14 billion.

Medicaid would be slashed by $2.6-$4.9 billion in fiscal year 1983 on top of the cuts of more than $1 billion we have already made in that program. That size cut slashes funds to every State in the Nation. Our States simply cannot afford these cuts, and health care for the poor would be harshly reduced or eliminated.

Discretionary health programs would be slashed by $1.4 to $1.9 billion. That means direct reductions in maternal and child health, disease prevention and control, and health research.

Just yesterday, we all discussed how much we wanted to increase NIH funding, with the only question being how much to increase—7 or 11 percent. Now, we face an amendment that would means a cut of 18-25 percent.

So let us be clear. A vote for Conable-Jenkins is a vote against the elderly; against the disabled; and against poor children.

If the Federal Government turns its back on these populations, who will take responsibility? The States and counties and cities? The marketplace?

A vote for Conable-Jenkins is a vote to dismantle the Federal programs that now meet essential health needs of these vulnerable populations, by cutting these programs by $14 to $20 billion this fiscal year alone.

A vote for Conable-Jenkins is a vote to slash social security's medicare program for the aged and disabled.

A vote for Conable-Jenkins is a vote to saddle the States with the medicaid costs of the Nation's poor.

Finally, a vote for Conable-Jenkins is a vote to abandon the Federal responsibilities for the Nation's public health.

The following tables illustrate the impact that this proposal would have on our health programs and on the States, if implemented today.

I urge my colleagues to vote against this proposal.

IMPACT OF BALANCED BUDGET ON HEALTH PROGRAMS

If the budget were balanced with proportional cuts in all Federal spending, Federal spending would have to be cut as follows:

[By fiscal years, in billions of dollars]

	1983	1985
Medicare cut	−9.9	−11.1
Medicaid cut	−3.6	−3.8
Public health cut	−1.4	−1.1
Total health spending cut	−14.1	−15.2

If defense spending were protected, as many advocate, Federal health spending would have to be cut further:

[By fiscal years, in billions of dollars]

	1983	1985
Medicare cut	−13.7	−16.1
Medicaid cut	−4.9	−5.5
Public health cut	−1.9	−1.6
Total health spending cut	−19.5	−22.0

IMPACT OF BALANCED BUDGET ON FEDERAL HEALTH PROGRAMS CUTS IN FEDERAL MEDICAID FUNDS TO STATES, FISCAL YEAR 1983

If the budget were balanced through proportional cuts in all programs, medicaid spending would be cut as follows in fiscal year 1983:

Federal medicaid funds would be cut by $3.6 billion if all programs, including defense, were cut proportionally.

Federal medicaid funds would be cut by $4.9 billion if defense spending were not cut and all other programs were cut proportionally.

The following table details the potential State-by-State impact of those cuts and shifts of costs to the States, assuming that the cuts were proportionally allocated among the States.

[In thousands of dollars]

	Cut in Federal medicaid funds to States assuming—	
	Defense cut proportionally	Defense spending not cut.
Alabama	48,813	66,440

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consume to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Chairman, I have lived through four American crises in my 48 years: I was born in the throes of the Great Depression; I grew up in the midst of World War II; I served in Connecticut professional life and politics during the agony of the Vietnam war; and I continued my public career through the bitter and divisive scandal of Watergate.

The United States has survived all four of these crises, and has become a better nation by learning from its mistakes. And as terrible as these periods of turmoil have been, America did not seek a revision of the Constitution in order to solve them.

In fact, the Government instead sought to redouble its efforts to enforce the long-standing principles already in the Constitution. To promote the general welfare and to pull the American economy out of an unprecedented slump, Congress during the depression adopted programs that became known as the New Deal. After Vietnam, it enacted the war powers legislation to curb unchecked Presidential power in conducting foreign policy. And in the wake of Watergate, we adopted new ethics in government and campaign reform laws.

Now we are in the midst of a serious economic crisis. Unemployment hovers around 10 percent, businesses are failing at a rate of about 650 per week, and inflation has moderated largely because of a temporary oil glut and a depression in the farming industry.

We have an administration that campaigned 2 short years ago on the promise of a balanced budget by 1984, and now predicts deficits well over $100 billion—a dubious national record—for the immediate past and current fiscal years as a result of its economic recovery program. Although too few of us here in this Chamber will admit it, the irony of record deficits from an administration that promised fiscal responsibility is not lost on anyone.

So today we are considering altering the Constitution to require a balanced Federal budget. Supporters say that a simple statutory change will not work, that we need the force of the Constitution to insure that Congress adopts—and to insure that the President submits—a balanced budget.

The amendment offers no real means of achieving a balanced budget. It requires a result, but it offers no way to reach it. It offers a Band-Aid when surgery is required.

Mr. Chairman, the economic crisis our Nation faces should not be further clouded by an amendment which promises a lot but offers very little. The key to solving our economic prob-

lems does not lie in adding to the Constitution an amendment that is really no more than a superficial way to gloss over our real problems. Rather, the key lies in putting some discipline into the system we already have. It lies in adopting a budget and revenue program that cuts the deficit. It lies in enacting a budget system like the pay as you go proposal offered by our colleague, GEORGE MILLER, which would balance the budget by 1985 by requireing that the unpopular choices of cutting other programs or raising revenues be made at the same time Congress approves any new spending. It lies in looking at real budget reform proposals that some of us have been working on.

It is politically convenient, Mr. Chairman, to support this toothless amendment. But is it good for our country? I think anyone who reads the contents of the amendment would realize that it is an empty document, a "paper tiger." It would take too long to approve, ratify and implement when we need action on the economy now. Even assuming this amendment were passed, and ratified by the required 38 State governments by, say, 1 year from today, the amendment would not take effect until October 1, 1985, because section 6 of the amendment states that it "shall take effect for the second fiscal year beginning after its ratification." Is that the kind of economic program we need to solve the problems we face here and now? Clearly, the answer is that it is not.

Let us not kid the American people with this charade. Let us work for a specific budget which eliminates the deficits that plague us. Let us adopt a concrete, responsible program that shows fiscal restraint. Let us ignore the siren of the simple solution and, instead of accepting this gimmick, get to work on the tough choices we must make.

All that glitters is not gold, Mr. Chairman. I urge my colleagues to reject what may be politically expedient but is really no answer to our problems.

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consume to the gentleman from Indiana (Mr. SHARP).

Mr. SHARP. Mr. Chairman, I regret the rules adopted this morning do not allow any opportunity to consider and make changes in House Joint Resolution 350. I believe a constitutional amendment deserves greater attention than we give it under these circumstances, especially an amendment intended to bring greater fiscal responsibility to the Congress.

The rush to consideration means we have only one alternative to the Conable-Jenkins proposal. That alternative was quickly put together last night, hardly a way to deal seriously with our Constitution.

Fortunately more serious thought has been given to House Joint Resolution 350; but regrettably the resolution contains grave shortcomings.

It is clear that the amendment will overhaul the traditional system of checks and balances; but it is unclear the full extent of the changes. Consequently we will have major new disputes over the powers of the courts and the President with the likelihood that unelected judges will be called upon to make major policy decisions on taxation and expenditures.

It is clear that the requirement for 60-percent majorities in both Houses of Congress can lead to paralysis of our Government at times when action is needed to protect our national security and our economic security.

It is, however, not at all clear that the amendment will lead to greater fiscal responsibility, let alone a balanced budget. Critics have listed numerous ways that Congresses and Presidents can evade the intended restraints on deficit spending. Indeed, the 60-percent requirement can lead on occasion to the perverse result that spending will be higher, rather than lower.

It is these and other deficits that have lead distinguished conservative commentators such as George Will to describe the amendment as a hoax and distinguished conservative economists like Rudolp Penner to call it nonsense.

This amendment is a false promise.

Each of us took an oath to uphold the Constitution. Not to cheapen it. Not to play politics with it. Out of respect for our constitutional heritage, out of respect for the people we represent, we must reject House Joint Resolution 350 today.

Mr. ALEXANDER. Mr. Chairman, I yield such time as he may consume to the gentleman from Connecticut (Mr. GEJDENSON).

Mr. GEJDENSON. Mr. Chairman,

I rise in opposition to the measure that is before us, and I do so with my support for this balanced budget concept as a matter of record. I intend to vote against House Joint Resolution 350 because, however valid its objectives may be, a constitutional amendment is not a wise and workable way to reduce Federal spending.

Given the great variations that characterize this Nation, it is indeed rare that every Member of Congress can agree on an issue. I feel I can safely say, however, that none of my colleagues would dispute the need to hold down the level of Federal spending and close the gap between outlays and revenues. The situation we face is one of huge projected deficits—deficits of an unprecedented magnitude—during the years ahead. If we do not act to change this forecast, we will extend the longevity of high interest rates and diminish the likelihood of economic recovery. Democrats and Republicans from both Houses of Congress concur that we cannot go further down this path.

House Joint Resolution 350, the constitutional amendment for a balanced budget, has a clear and simple rationale: If we amend the U.S. Constitution so that Congress is required to adopt a balanced Federal budget each year, we will, in effect outlaw deficits. As attractive as cure-all measures seem, however, they seldom provide realistic answers to economic problems.

It is easy to see why proponents of this legislation have turned to the Constitution for a solution. Throughout our history as a nation, we have looked to the Constitution in the midst of even the most difficult controversies and decisions. Some of our most significant advances in individual rights, civil liberties, and representational government have been realized through constitutional amendment. When our Founding Fathers established the country, they constructed the Constitution as a broad framework for keeping our society, and our government, on the right course. The U.S. Constitution balances the powers of Government among the three branches and between the Nation and the States. It balances public concerns with the rights of the individual.

We honor and support the Constitution, however, because it is confined to the most enduring fundamentals. It upholds the essence on which we are all agreed. It has been amended only 26 times in two centuries. An amendment that reflects current economic policy is irrelevant to this basic tradition and does not belong enshrined in the Constitution. As Abraham Lincoln warned us, the power to change the Constitution is an awesome one, and "no slight occasion should tempt us to touch it."

Now, I am not trying to say that record high deficits comprise a "slight occasion." What I am saying is that House Joint Resolution 350 outlines a budgetary policy that may be wise under a different set of circumstances but that is wholly unsound when proposed as a permanent amendment to the Constitution. The amendment proposed by this legislation does not serve the timeless, fundamental purposes. In fact, the amendment itself provides that the policy it declares may be ignored whenever three-fifths of Congress choose to waive it.

The Constitution is meant to keep us on course as a nation, not to give us detailed directions on how to get us where we are going. Specific policy is for statutes to set, and for the electorate to shape with their ballots in November.

My voting record in Congress shows my commitment to working within the budget and appropriations process for the kind of fiscal restraint needed to

achieve soundness. The 1982 Tax Act—a measure that closed off many of the unintended benefits that can be reaped under the Tax Code—is a fair and appropriate step. In addition, I support efforts to amend the Congressional Budget Act with instructions and requirements for keeping expenditures within the limits of revenues.

The Constitution is the supreme law of the land. Firm political resolve, not a constitutional amendment, is what is needed to set a responsible course of action. I urge my colleagues' rejection of the pending legislation, and call for their partnership in the correct efforts.

● Mr. O'NEILL. Mr. Chairman, when we assume office as Members of this body we take an oath of allegiance. That oath of allegiance is not to a man, not to a flag, not to a religion, no, not even to a country.

That oath is to a document.

That document is the Constitution of the United States.

We swear that we will "support and uphold the Constitution of the United States."

That Constitution is in the words of Woodrow Wilson "the vehicle of life" of this country. It is written and specific. It separates legislative, executive, and judicial power.

It establishes a federal system.

It guarantees individual rights.

It insures the freedom of all Americans by limiting and balancing the power of each branch of government.

It gives to the Congress and the States the right to amend. It gives to the Judiciary the task to interpret and it compels the President to take an oath to "preserve, protect, and defend it."

Because of it we are a "government of laws not men." And because of it we are now and have been for nearly 200 years a nation of liberty and equality.

Because of it, what we decide to do today with this amendment is a very serious matter. Alexander Hamilton referred to it as "a solemn and authoritative act."

The Constitution requires extraordinary majorities in this House for only the most important actions we consider. Overriding a presidential veto, expulsion, and amending the Constitution itself.

The Founding Fathers clearly chose to check the power of Congress in these matters. History has shown that these checks were wise and prudent.

Necessity is the issue that we face today.

Proponents of this amendment maintain it is necessary to amend the Constitution of the United States and shift spending power from the Congress to the President and to the Supreme Court.

If enacted the courts will have a right to review our appropriation and spending process.

If enacted the President will be given authority he is currently denied under article I, section 7 to thwart the will of Congress through impoundment or a line item veto.

A year ago a new President promised that if his plan was enacted we would have a balanced budget by 1984. He promised that lower taxes would increase revenues. It has not happened.

Because of the failure of that plan to live up to its promises we are voting on an amendment to the Constitution.

President Wilson wrote that "the President is at liberty, both in law and conscience to be as big a man as he can."

This President, any President, can be a big enough man to balance a budget.

This President more often than not got his way with Congress.

It is not the Constitution's fault that there are budget deficits. Eliminating deficits is a political not constitutional decision.

And the fact is if the political will is not there a constitutional amendment will not be a suitable substitute.

We all know we face a budget crises now and we need a solution now. This amendment will not have effect for at least 4 years.

I do not dispute that there is political advantage to be gained by seeking this amendment and that political costs may be suffered by opposing it.

I do not dispute that huge budget deficits and record unemployment have this Nation in the worst economic crisis since the Great Depression.

But I do dispute that this amendment will end the crisis.

On the contrary it is bound to add to it by making us choose between gutting national defense and gutting social security, between gutting medicare and gutting aid to education.

Fifty years after its ratification President Andrew Jackson said that "our Constitution is no longer a doubtful experiment."

Today nearly 200 years after its ratification we can proudly state that it is the greatest framework for democracy ever devised.

Let us keep it that way.

I ask that you vote against this resolution because it is unwise, unworkable, and most of all unnecessary.●

Mr. ALEXANDER. Mr. Chairman, I yield 3 minutes to the gentleman from Washington (Mr. FOLEY) to close debate.

Mr. FOLEY. Mr. Chairman, it is generally to be assumed that the Members who support the Conable-Jenkins amendment are acting in good faith. Few people have questioned their motives, which most people think are well intentioned, if wrong.

When it comes to the gentleman from Arkansas (Mr. ALEXANDER), however, opponents of his amendment, in order to advance their own vehicle, would have us believe that it is offered as a diversion and is without serious intent. Rather than showing him the same courtesy and consideration given the other side, opponents have been very glib, easy and quick in assessing his motives, a dangerous practice at any time, but particularly so when dealing with the intentions of their colleagues in the House.

In his remarks the gentleman from Illinois (Mr. SIMON), indicated that in considering the extremely critical issues at hand he first read the Constitution and then the two documents before us now, the Alexander amendment and the Jenkins-Conable amendment. Given the profound consequences of what we are being asked to decide, I think this is excellent advice. If Members were to follow the example of the gentleman from Illinois, I believe they would find that the amendment the gentleman from New York (Mr. CONABLE) and the gentleman from Georgia (Mr. JENKINS) have offered is far from the traditional language and spirit of the Constitution. Instead, it is part budget act, part House procedure and reorganization, part constitutional amendment, and part economic theory.

The Alexander amendment, in contrast, is very much in the tradition of our Constitution and of our forefathers who recognized that this sacred organic document cannot assume, understand, and reveal all the conditions and circumstances which might arise. Throughout our long, proud history and countless amendments to the Constitution, we have wisely tried to avoid being too specific or so omniscient that we write narrow, nagging, procedural rules into our basic constitutional document. It is in keeping with the proven wisdom of that tradition that the Alexander amendment sets forth the principle that the budget, outlays and revenues should be in balance; that it provides the terms and conditions under which this should be done; and that it relies on legislation to insure proper implementation.

While this approach has served our Nation well over the more than 200 years of its existence, the suggestion that we can trust neither the wisdom of our forefathers, the judgment of the electorate, or congressional will with respect to implementation of this particular constitutional amendment can only be viewed as a serious and direct attack on the fundamental principle of majority rule.

At the same time, proponents of Conable-Jenkins would strangely absolve the President from virtually all responsibility for helping to achieve a balanced budget and assign him no apparent role in this process. Given what I know to be the political and economic philosophy of the amendment's sup-

porters and the President's endorsement of it, I find it especially ironic that the present occupant of the highest office in the land would have been precluded from offering his economic program under the terms of their constitutional amendment, had it been in effect. This suggests something about the amendment, the program itself, or perhaps both.

Mr. Chairman, I hope that all Members will consider the alternatives and support the Alexander amendment.

The CHAIRMAN. The time of the gentleman from Washington (Mr. FOLEY) has expired.

Under the rule, all time has expired.

The question is on the amendment in the nature of a substitute offered by the gentleman from Arkansas (Mr. ALEXANDER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ALEXANDER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 77, noes 346, not voting 9, as follows:

NOT VOTING—9

Badham	Daniel, Dan	Goldwater
Blanchard	Edwards (OK)	Guarini
Chappell	Forsythe	McCloskey

□ 1530

Messrs. WOLF, LUNDINE, MARRIOTT, OBERSTAR, AUCOIN, WYLIE, LATTA, OTTINGER, BIAGGI, YOUNG of Alaska, and ENGLISH changed their votes from "aye" to "no."

So the amendment in the nature of a substitute was rejected.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. RODINO. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. RODINO. Mr. Chairman, in view of the fact that the Alexander amendment has been voted down, what is the status now of the joint resolution, House Joint Resolution 350?

The CHAIRMAN. The Chair will state that under the rule the gentleman from New York (Mr. CONABLE) has the opportunity to offer his amendment.

Mr. RODINO. I have a further parliamentary inquiry, Mr. Chairman. In the event that the gentleman from New York (Mr. CONABLE) declines to take his time, what will be the status of those who were in opposition and who had intended to speak in opposition to House Joint Resolution 350?

The CHAIRMAN. No further amendment is in order, and the Committee will rise if the gentleman from New York (Mr. CONABLE) does not offer his amendment.

Mr. RODINO. Mr. Chairman, would it then be in order to make a unanimous consent request?

The CHAIRMAN. The answer is, yes, but it must be by unanimous consent.

Mr. RODINO. Mr. Chairman, I then ask unanimous consent that in the event the gentleman from New York (Mr. CONABLE), the author of House Joint Resolution 350, declines to take his time, the majority leader and the Speaker, who had requested time of the chairman of the Committee on the Judiciary, be allowed 10 minutes, and that the other side be allowed 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

Mr. CAMPBELL. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Does the gentleman from New York (Mr. CONABLE) wish to offer an amendment?

Mr. CONABLE. Mr. Chairman, I elect not to offer my amendment.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. BOLAND, Chairman of the Committee of the Whole House on the

State of the Union, reported that that Committee, having had under consideration the joint resolution (H.J. Res. 350) proposing an amendment to the Constitution altering Federal budget procedures, pursuant to House Resolution 604, he reported the joint resolution back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT

Mr. CONTE. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the joint resolution?

Mr. CONTE. I am opposed to the joint resolution, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. CONTE moves to recommit the joint resolution, House Joint Resolution 350, to the Committee on the Judiciary.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the joint resolution.

Mr. FOLEY. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Under the Constitution, a two-thirds vote is required for passage.

The vote was taken by electronic device, and there were—yeas 236, nays 187, not voting 9, as follows:

[Roll No. 387]

NOT VOTING—9

Badham	Daniel, Dan	Goldwater
Blanchard	Edwards (OK)	Guarini
Chappell	Forsythe	McCloskey

□ 1550

The Clerk announced the following pair:

On this vote:

Mr. Chappell and Mr. Badham for, with Guarini against.

So (two-thirds not having voted in favor thereof) the joint resolution was not passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid upon the table.

The SPEAKER. Pursuant to the provisions of House Resolution 604, House Resolution 450 is laid on the table.

GENERAL LEAVE

Mr. RODINO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered, and I ask unanimous consent that the Speaker's remarks which were to be included during the course of the address be included in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Does the gentleman from California (Mr. ROUSSELOT) object?

Apparently the Chair hears no objection.

There was no objection.

PERSONAL EXPLANATION

Mr. GUARINI. Mr. Speaker, I was unavoidably detained in New Jersey so that I was unable to vote on House Joint Resolution 350. Had I been present, I would have voted against the Alexander amendment in the nature of a substitute and against House Joint Resolution 350 on final passage.

CONFERENCE REPORT ON S. 1018, COASTAL BARRIER RESOURCES ACT

Mr. JONES of North Carolina submitted the following conference report and statement on the Senate bill (S. 1018) to protect and conserve fish and

wildlife resources, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 97-928)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1018) to protect and conserve fish and wildlife resources, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SEC. 1. SHORT TITLE.

This Act may be cited as the "Coastal Barrier Resources Act".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) coastal barriers along the Atlantic and Gulf coasts of the United States and the adjacent wetlands, marshes, estuaries, inlets and nearshore waters provide—

(A) habitats for migratory birds and other wildlife; and

(B) habitats which are essential spawning, nursery, nesting, and feeding areas for commercially and recreationally important species of finfish and shellfish, as well as other aquatic organisms such as sea turtles;

(2) coastal barriers contain resources of extraordinary scenic, scientific, recreational, natural, historic, archeological, cultural, and economic importance; which are being irretrievably damaged and lost due to development on, among, and adjacent to, such barriers;

(3) coastal barriers serve as natural storm protective buffers and are generally unsuitable for development because they are vulnerable to hurricane and other storm damage and because natural shoreline recession and the movement of unstable sediments undermine manmade structures;

(4) certain actions and programs of the Federal Government have subsidized and permitted development on coastal barriers and the result has been the loss of barrier resources, threats to human life, health, and property, and the expenditure of millions of tax dollars each year; and

(5) a program of coordinated action by Federal, State, and local governments is critical to the more appropriate use and conservation of coastal barriers.

(b) PURPOSE.—The Congress declares that it is the purpose of this Act to minimize the loss of human life, wasteful expenditure of Federal revenues, and the damage to fish, wildlife, and other natural resources associated with the coastal barriers along the Atlantic and Gulf coasts by restricting future Federal expenditures and financial assistance which have the effect of encouraging development of coastal barriers, by establishing a Coastal Barrier Resources System, and by considering the means and measures by which the long-term conservation of these fish, wildlife, and other natural resources may be achieved.

SEC. 3. DEFINITIONS.

For purposes of this Act—

(1) The term "undeveloped coastal barrier" means—

(A) a depositional geologic feature (such as a bay barrier, tombolo, barrier spit, or barrier islands that—

(i) consists of unconsolidated sedimentary materials,

(ii) is subject to wave, tidal, and wind energies, and

(iii) protects landward aquatic habitats from direct wave attack; and

(B) all associated aquatic habitats, including the adjacent wetlands, marshes, estuaries, inlets, and nearshore waters;

but only if such feature and associated habitats (i) contain few man-made structures and these structures, and man's activities on such feature and within such habitats, do not significantly impede geomorphic and ecological processes, and (ii) are not included within the boundaries of an area established under Federal, State, or local law, or held by a qualified organization as defined in section 170(h)(3) of the Internal Revenue Code of 1954, primarily for wildlife refuge, sanctuary, recreational, or natural resource conservation purposes.

(2) The term "Committees" refers to the Committee on Merchant Marine and Fisheries of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(3) The term "financial assistance" means any form of loan, grant, guaranty, insurance, payment, rebate, subsidy, or any other form of direct or indirect Federal assistance other than—

(A) general revenue-sharing grants made under section 102 of the State and Local Fiscal Assistance Amendments of 1972 (31 U.S.C. 1221);

(B) deposit or account insurance for customers of banks, savings and loan associations, credit unions, or similar institutions;

(C) the purchase of mortgages or loans by the Government National Mortgage Association, the Federal National Mortgage Association, or the Federal Home Loan Mortgage Corporation;

(D) assistance for environmental studies, planning, and assessments that are required incident to the issuance of permits or other authorizations under Federal law; and

(E) assistance pursuant to programs entirely unrelated to development, such as any Federal or federally assisted public assistance program or any Federal old-age survivors or disability insurance program.

Effective October 1, 1983, such term includes flood insurance described in section 1321 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4028).

(4) The term "Secretary" means the Secretary of the Interior.

(5) The term "System unit" means any undeveloped coastal barrier, or combination of closely related undeveloped coastal barriers, included within the Coastal Barrier Resources System established by section 4.

SEC. 4. THE COASTAL BARRIER RESOURCES SYSTEM.

(a) ESTABLISHMENT.—(1) There is established the Coastal Barrier Resources System which shall consist of those undeveloped coastal barriers located on the Atlantic and Gulf coasts of the United States that are identified and generally depicted on the maps that are entitled "Coastal Barrier Resources System", numbered A01 through T12, and dated September 30, 1982.

(2) Any person or persons or other entity owning or controlling land on an undeveloped coastal barrier, associated landform or any portion thereof not within the Coastal Barrier Resources System established under paragraph (1) may, within one year after the date of enactment of this Act, elect to have such land included within the Coastal Barrier Resources System. This election shall be made in compliance with regulations established for this purpose by the Secretary not later than one hundred and eighty days after the date of enactment of this Act; and, once made and filed in accordance with the laws regulating the sale or other transfer of land or other real property of the State in which such land is located, shall have the same force and effect as if such land had originally been included within the Coastal Barrier Resources System.

(b)(1) As soon as practicable after the enactment of this Act, the maps referred to in paragraph (1) of subsection (a) shall be filed with the Committees by the Secretary, and each such map shall have the same force and effect as if included in this Act, except that correction of clerical and typographical errors in each such map may be made. Each such map shall be on file and available for public inspection in the Office of the Director of the United States Fish and Wildlife Service, Department of the Interior, and in other appropriate offices of the Service.

(2) As soon as practicable after the date of the enactment of this Act, the Secretary shall provide copies of the maps referred to in paragraph (1) of subsection (a) to the chief executive officer of (A) each State and county or equivalent jurisdiction in which a system unit is located, (B) each State coastal zone management agency in those States which have a coastal zone management plan approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) and in which a system unit is located, and (C) each appropriate Federal agency.

(c) Boundary Modifications.—(1) Within 180 days after the date of enactment of this Act, the Secretary may make such minor and technical modifications to the boundaries of system units as depicted on the maps referred to in paragraph (1) of subsection (a) as are consistent with the purposes of this Act and necessary to clarify the boundaries of said system units; except that, for system units within States which have, on the date of enactment, a coastal zone management plan approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455)—

(A) each appropriate State coastal zone management agency may, within 90 days after the date of enactment of this Act, submit to the Secretary proposals for such minor and technical modifications; and

(B) the Secretary may, within 180 days after the date of enactment of this Act, make such minor and technical modifications to the boundaries of such system units.

(2) The Secretary shall, not less than 30 days prior to the effective date of any such boundary modifications made under the authority of paragraph (1), submit written notice of such modification to (A) each of the Committees and (B) each of the appropriate officers referred to in paragraph (2) of subsection (b).

(3) The Secretary shall conduct, at least once every five years, a review of the maps referred to in paragraph (1) of subsection (a) and make, in consultation with the appropriate officers referred to in paragraph (2) of subsection (b), such minor and technical modifications to the boundaries of system units as are necessary solely to reflect changes that have occurred in the size or location of any system units as a result of natural forces.

(4) If, in the case of any minor and technical modification to the boundaries of system units made under the authority of this subsection, an appropriate chief executive officer of a State, county or equivalent jurisdiction, or State coastal zone management

agency to which notice was given in accordance with this subsection files comments disagreeing with all or part of the modification and the Secretary makes a modification which is in conflict with such comments, or if the Secretary fails to adopt a modification pursuant to a proposal submitted by an appropriate State coastal zone management agency under paragraph (1)(A), the Secretary shall submit to the chief executive officer a written justification for his failure to make modifications consistent with such comments or proposals.

SEC. 5. LIMITATIONS ON FEDERAL EXPENDITURES AFFECTING THE SYSTEM.

(a) Except as provided in section 6, no new expenditures or new financial assistance may be made available under authority of any Federal law for any purpose within the Coastal Barrier Resources System, including, but not limited to—

(1) the construction or purchase of any structure, appurtenance, facility, or related infrastructure;

(2) the construction or purchase of any road, airport, boat landing facility, or other facility on, or bridge or causeway to, any System unit; and

(3) the carrying out of any project to prevent the erosion of, or to otherwise stabilize, any inlet, shoreline, or inshore area, except that such assistance and expenditures may be made available on units designated pursuant to section 4 on maps numbered S01 through S08 for purposes other than encouraging development and, in all units, in cases where an emergency threatens life, land, and property immediately adjacent to that unit.

(b) An expenditure or financial assistance made available under authority of Federal law shall, for purposes of this Act, be a new expenditure or new financial assistance if—

(1) in any case with respect to which specific appropriations are required, no money for construction or purchase purposes was appropriated before the date of the enactment of this Act; or

(2) no legally binding commitment for the expenditure or financial assistance was made before such date of enactment.

SEC. 6. EXCEPTIONS.

(a) Notwithstanding section 5, the appropriate Federal officer, after consultation with the Secretary, may make Federal expenditures of financial assistance available within the Coastal Barrier Resources System for—

(1) any use or facility necessary for the exploration, extraction, or transportation of energy resources which can be carried out only on, in, or adjacent to coastal water areas because the use or facility requires access to the coastal water body;

(2) the maintenance of existing channel improvements and related structures, such as jetties, and including the disposal of dredge materials related to such improvements;

(3) the maintenance, replacement, reconstruction, or repair, but not the expansion, of publicly-owned or publicly-operated roads, structures, or facilities that are essential links in a larger network or system;

(4) military activities essential to national security;

(5) the construction, operation, maintenance, and rehabilitation of Coast Guard facilities and access thereto; and

(6) any of the following actions or projects, but only if the making available of expenditures or assistance therefor is consistent with the purposes of this Act:

(A) Projects for the study, management, protection and enhancement of fish and wildlife resources and habitats, including, but not limited to, acquisition of fish and wildlife habitats and related lands, stabilization projects for fish and wildlife habitats, and recreational projects.

(B) The establishment, operation, and maintenance of air and water navigation aids and devices, and for access thereto.

(C) Projects under the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 460-4 through 11) and the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.).

(D) Scientific research, including but not limited to aeronautical, atmospheric, space, geologic, marine, fish and wildlife and other research, development, and applications.

(E) Assistance for emergency actions essential to the saving of lives and the protection of property and the public health and safety, if such actions are performed pursuant to section 305 and 306 of the Disaster Relief Act of 1974 (42 U.S.C. 5145 and 5146) and section 1362 of the National Flood Insurance Act of 1968 (42 U.S.C. 4103) and are limited to actions that are necessary to alleviate the emergency.

(F) The maintenance, replacement, reconstruction, or repair, but not the expansion, of publicly owned or publicly operated roads, structures, or facilities.

(G) Nonstructural projects for shoreline stabilization that are designed to mimic, enhance, or restore natural stabilization systems.

(b) For purposes of subsection (a)(2), a channel improvement or a related structure shall be treated as an existing improvement or an existing related structure only if all, or a portion, of the moneys for such improvement or structure was appropriated before the date of the enactment of this Act.

SEC. 7. CERTIFICATION OF COMPLIANCE.

The Director of the Office of Management and Budget shall, on behalf of each Federal agency concerned, make written certification that each such agency has complied with the provisions of this Act during each fiscal year beginning after September 30, 1982. Such certification shall be submitted on an annual basis to the House of Representatives and the Senate pursuant to the schedule required under the Congressional Budget and Impoundment Control Act of 1974.

SEC. 8. PRIORITY OF LAWS.

Nothing contained in this Act shall be construed as indicating an intent on the part of the Congress to change the existing relationship of other Federal laws to the law of a State, or political subdivision of a State, or to relieve any person of any obligation imposed by any law of any State, or political subdivision of a State. No provision of this Act shall be construed to invalidate any provision of State or local law unless there is a direct conflict between such provision and the law of the State, or political subdivision of the State, so that the two cannot be reconciled or consistently stand together. This Act shall in no way be interpreted to interfere with a State's right to protect, rehabilitate, preserve, and restore lands within its established boundary.

SEC. 9. SEPARABILITY.

If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of the Act and the application of such provision to other persons not similarly situated or to other circumstances shall not be affected thereby.

SEC. 10. REPORTS TO CONGRESS.

(a) IN GENERAL.—Before the close of the 3-year period beginning on the date of the enactment of this Act, the Secretary shall prepare and submit to the Committees a report regarding the System.

(b) CONSULTATION IN PREPARING REPORT.—The Secretary shall prepare the report required under subsection (a) in consultation with the Governors of the States in which system units are located and with the coastal zone management agencies of the States in which System units are located and after providing opportunity for, and considering, public comment.

(c) REPORT CONTENT.—The report required under subsection (a) shall contain—

(1) recommendations for the conservation of the fish, wildlife, and other natural resources of the System based on an evaluation and comparison of all management alternatives, and combinations thereof, such as State and local actions (including management plans approved under the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.)), Federal actions (including acquisition for administration as part of the National Wildlife Refuge System), and initiatives by private organizations and individuals;

(2) recommendations for additions, to, or deletions from, the Coastal Barrier Resources System, and for modifications to the boundaries of System units;

(3) a summary of the comments received from the Governors of the States, State coastal zone management agencies, other government officials, and the public regarding the System; and

(4) an analysis of the effect, if any, that general revenue sharing grants made under section 102 of the State and Local Fiscal Assistance Amendments of 1979 (21 U.S.C. 1221) have had on undeveloped coastal barriers.

SEC. 11. AMENDMENTS REGARDING FLOOD INSURANCE.

(a) Section 1321 of the National Flood Insurance Act of 1968 (42 U.S.C. 4028) is amended to read as follows:

"UNDEVELOPED COASTAL BARRIERS

"SEC. 1321. No new flood insurance coverage may be provided under this title on or after October 1, 1983, for any new construction or substantial improvements of structures located on any coastal barrier within the Coastal Barrier Resources System established by section 4 of the Coastal Barrier Resources Act. A federally insured financial institution may make loans secured by structures which are not eligible for flood insurance by reason of this section.".

(b) Section 341(d)(2) of the Omnibus Budget and Reconciliation Act of 1981 (Public Law 97-35) is repealed.

SEC. 12. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated to the Department of the Interior $1,000,000 for the period beginning October 1, 1982, and ending September 30, 1985, for purposes of carrying out sections 4 and 10.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1018) to protect and conserve fish and wildlife resources, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SECTION-BY-SECTION ANALYSIS

Section 1. Title

The short title of this bill is the "Coastal Barrier Resources Act."

Section 2. Findings and Purpose

Section 2 of the Conference substitute contains the findings and purpose of the Act. Section 2(a) adopts the "Findings" provision appearing in the House amendment. Section 2(b) of the Conference substitute combines provisions appearing in both the Senate bill and the House amendment. The provision declares that it is the purpose of the Act to minimize the loss of human life, wasteful expenditure of Federal revenues, and damage to fish, wildlife, and other natural resources associated with coastal barriers along the Atlantic and Gulf coasts. This will be accomplished by restricting Federal expenditures and financial assistance which have the effect of encouraging development of coastal barriers and by considering the means and measures by which the long-term conservation of these fish, wildlife and other natural resources may be achieved.

Section 3. Definitions

Section 3 of the Conference report adopts provisions appearing in both the Senate bill and the House amendment. The House amendment exempted general or special revenue sharing grants made to the states from the definition of "financial assistance". The Conferees agreed to delete the language regarding special revenue sharing grants and make the exemption applicable only to general revenue sharing grants made under Section 102 of the State and Local Fiscal Assistance Amendments of 1972 (31 U.S.C. 1221). Although general revenue sharing funds may be spent on undeveloped coastal barriers, the Conferees are concerned about the possible impact it may have in those areas. Therefore, the Conferees instructed the Department of the Interior to examine, in its report to Congress pursuant to Section 10 of S. 1018, the effects, if any, of general revenue sharing on the Coastal Barrier Resources System.

Both the Senate and the House reports stated that the term "financial assistance" was not intended to restrict funds on undeveloped coastal barriers for programs entirely unrelated to development such as the Social Security Program, the Food Stamp Program, the Medicaid and Medicare Programs or other social programs. The Conferees agreed to amend the definition of financial assistance to further clarify this intent.

The definition of "financial assistance" specifically incorporates flood insurance issued under the National Flood Insurance Act of 1968. However, in keeping with the language of Section 1321 of that Act, the flood insurance prohibition under the Conference report will not become effective until October 1, 1983. After that date, any new construction or substantial improvement of a structure located on an undeveloped coastal barrier identified in Section 4 of the Act, will be ineligible for Federal flood insurance.

Section 4. The Coastal Barrier Resources System

Section 4(a) establishes the Coastal Barrier Resources System consisting of those undeveloped coastal barriers depicted on the maps entitled "Coastal Barrier Resources System" numbered A01 through T12. There were differences between the Senate and the House maps. The Conferees agreed to resolve the differences between the Senate and the House maps in the following manner:

Texas

Sea Rim—T01—Senate map.
High Island—T02—Senate map.
Bolivar Peninsula—T03—Senate map.
Follets Island—T04—Senate map.
River Complex—T05—Senate map.
Sargent Beach—T06—Senate map.
Matagorda Peninsula—T07 (2 maps)—Senate maps.
San Jose Island Complex—T08 (2 maps)—Senate maps.
North Padre Island—T10—Senate map.
South Padre Island—T11—House map.
Boca Chica—T12—Senate map.

Louisiana

Sabine—S11—House map.

Mississippi

Belle Fountaine Point Unit—R01A—House map.
Cat Island—R03—Senate map.

Alabama

Mobile Point Unit—Q01—Senate map.

Florida

Guana River—P04—Senate map.
Usinas Beach—P04A—House map.
Coconut Point—P09A—Senate map.
Blue Hole Unit—P10A—House map.
Hutchison Island—P11—House map.
Keewaydin Island—P16—House map.
Lover Key—P17—House map.
Sanibel Island—P18—House map.
Casey Key Complex—P22—Senate map.
Mandalay Point Unit—P24A—House map.
Four Mile Village—P31A—House map.
Moreno Point—P32—Senate map.

Georgia

St. Catherine's Island—N02—Unit deleted.
Little Cumberland Island Unit—N05—House map.

South Carolina

Pawleys Inlet—M03—Senate map.
Captain Sam's Inlet—M08—House map.

North Carolina

Hatteras Island—L03—Conference map.
Wrightsville Beach—L08—House map.

Virginia

No differences.

Delaware

Broadkill Beach Complex—H00—Conference map.

New Jersey

Stone Harbor Point—G01—Unit deleted.
Cape May Complex—G02—Unit deleted.

New York

Old Field Beach—F05—Senate map.
Southhampton Unit—F12—Senate map.

Connecticut

No differences.

Rhode Island

Little Compton Ponds—D01—Senate map.
Card Ponds—D03—Senate map.
Green Hill Beach—D04—Senate map.
East Beach—D05—Senate map.
Quonochontaug Beach—D06—Senate map.

Massachusetts

West Head Beach—C01C—House map.
Rexham—C03A—House map.
Lewis Bay Unit—C13A—House map.
Buzzards Bay—C19A (3 maps)—Interior map and House maps.
Squibnocket Complex—C29 (2 maps)—Interior map and House map.
West Sconticut—C31A (2 maps)—Interior map and Senate map.
Cedar Cove Unit—C34A—House map.

Maine

Sprague Neck Bar—A02—Unit deleted.
Grassy Point—A02A—Unit deleted.
Rogue Bluffs Beach—A03A—Unit deleted.
Head Beach—A05B—House map.
Starboard Unit—A10—House map.
Popplestone Beach/Roque Island—A11—House map.
Bailey's Mistake—A12—House map.
Jenks Landing/Waldo Point—A13—House map.

Section 4(c) of the Act outlines the process by which the Secretary may make minor boundary modifications. The Conferees agreed to accept an amendment offered and agreed to on the Senate Floor which gives a very limited role to the State coastal zone management agencies in making minor boundary modifications. Under the provisions of the Senate bill, State coastal zone management agencies may submit proposals for such modifications. The Conferees agreed to modify this provision by shortening the 180-day period for these comments to 90 days. If the Secretary fails to adopt such proposals, he must give the agency a written justification for his failure to make modifications consistent with such proposals. This language does not change the intent of the original provisions of the Senate bill or the House amendments. Section 4(c) of S. 1018 and H.R. 3252 instructed the Secretary to consider making minor and technical boundary modifications to the Coastal Barrier Resources System unit maps which are *"consistent* with the purposes of the Act *and necessary* to clarify the boundaries of said system units . . ." (emphasis added). This dual standard is maintained despite the provision giving a limited role to the State coastal zone management agencies—boundary modifications must be minor and technical changes consistent with the Act and limited to those necessary to

clarify boundaries. It is not the intent of the Conferees or the Congress to permit the Secretary of the Interior to rework the Coastal Barrier Resources System to add areas that have been deleted from the maps during the deliberations concerning this legislation or to delete areas that Congress has included.

With respect to additions, deletions or major modifications to the System, the Conferees note the possible need for substantive changes to the Coastal Barrier Resources System. This is addressed in a separate section of this legislation. Section 10 of the bill requires the Secretary to prepare a report within three years of enactment concerning "recommendations for additions to, or deletions from, the Coastal Barrier Resources System. . .". These recommendations will then be considered by the appropriate Congressional Committees and, if appropriate, an amendment to the legislation may be acted upon by the Congress.

There is one exception to this approach. The Conferees agreed to an amendment added to the Senate bill during initial Floor consideration. Section 4(a)(2) allows for additions to the Coastal Barrier Resources System at the request of those who own appropriate areas. As explained when introduced, this provision is a straight-forward attempt to deal with a difficult situation. Quite simply, it permits landowners to join the system even though they may not technically qualify. This provision is not designed to serve as a vehicle to stop an otherwise eligible Federal project through the purposeful inclusion of an area not specifically included by the Congress within the Coastal Barrier Resources System.

Section 5. Limitations on Federal Expenditures Affecting The System

Section 5 specifies the limitations on new Federal financial expenditures or assistance. The Conferees agreed to provisions appearing in both the Senate bill and the House amendment and modified a provision of the House amendment concerning stabilization and erosion control projects in Louisiana. As modified, section 5(a)(3) provides a limited exception to the prohibition of expenditures for stabilization projects. Expenditures for such projects are permissible within the units designated pursuant to Section 4 on maps numbered SO1 through SO8 if such projects are for purposes other than encouraging development and, within all units, in cases where an emergency threatens life, land, and property immediately adjacent to the unit in question.

The limitations contained in Section 5 apply to areas within the Coastal Barrier Resources System as well as certain other facilities that may extend into a System unit, such as a bridge or a causeway. There need not be a showing that the expenditure would stimulate development. Except as provided in the Section 5(a)(3) exception, the fact that a particular project may be designed to benefit a non-coastal barrier is not significant.

Section 6. Exceptions

Section 6 of the Conference report outlines the specific exceptions to the general prohibition on new Federal expenditures or financial assistance.

Under Section 6(a) of the Senate bill the appropriate Federal officer would be authorized to make those specific Federal expenditures after providing written notification to the Secretary. The Conferees agreed to accept the House provision which requires the appropriate Federal officer to consult with the Secretary before making any Federal expenditures or financial assistance available under the provisions of Section 6.

Section 6(a)(1) provides an exception for energy projects in or adjacent to coastal areas. Both the Senate bill and the House amendment contained similar provisions and the Conferees agreed to adopt the House language. Federal assistance or expenditures may be made available for "any use or facility necessary for the exploration, extraction, or transportation of energy resources which can be carried out only on, in, or adjacent to coastal water areas because the use or facility requires access to the coastal water body."

Section 6(a)(3) of the Conference report contains a provision included in the House amendment which provides an exception for the maintenance, replacement, reconstruction, or repair of publicly owned or publicly operated roads, structures or facilities that are essential links in a larger network or system.

Section 6(a)(4) exempts military activities essential to national security from the general prohibition of Federal expenditures or financial assistance under Section 5. The Conferees agreed that the determination as to whether military activities are essential to national security must be made in accordance with existing law and procedure.

The Conference report adopts the exception for Coast Guard facilities which was included in the House amendment and requested by the Coast Guard. Section 6(a)(5) allows expenditures or financial assistance for the construction, maintenance, operation and rehabilitation of Coast Guard facilities.

The Senate bill contained an exemption for certain programs and projects for fish and wildlife conservation so long as such projects were consistent with the purposes of the Act. The House amendment contained a similar provision but such projects did not have to be consistent with the purposes of the Act. The Conferees agreed to accept the House language. However, under the language in Section 6(a)(7)(A), such projects must be consistent with the purposes of the Act.

The House amendment contained an exception for projects under the Coastal Zone Management Act—a provision not included in the Senate bill. The Conferees agree to adopt the House provision which is incorporated in Section 6(a)(6)(C) of the Conference report.

The House amendment provided an exception for assistance for emergency actions essential to the saving of lives and the public health and safety. The Senate bill contained a similar provision but limited the exception to those actions necessary to alleviate the immediate emergency. The Conference report adopts a modified provision in Section 6(a)(6)(E) which permits assistance for emergency actions if such actions are performed pursuant to sections 305 and 306 of the Disaster Relief Act of 1974 and section 1362 of the National Flood Insurance Act of 1968 and are limited to actions that are necessary to alleviate the emergency. Section 305 of the Disaster Relief Act authorizes the President, in a declared emergency, to provide any or all of the assistance available under the Act as the President deems appropriate.

Section 7. Certification of Compliance

Section 7 adopts provisions appearing in both the Senate bill and the House amendment.

Section 8. Priority of Laws

Section 8 of the Conference report adopts a provision of the Senate bill. This section assures that this Act will not interfere with the current delicate balance between other Federal laws operating with regard to coastal barrier areas and State and local laws. Additionally, this section protects local interests by providing that this Act is not intended to preempt State or local laws unless there is a direct conflict.

Section 9. Separability

Section 9 of the Conference report adopts a provision of the Senate bill not contained in the House amendment. This section is a standard separability provision. It provides that each provision and application of this law will be judged on its own merits.

Section 10. Reports to Congress

This section adopts a provision that appeared in both the Senate bill and the House amendment. The Conferees agreed to adopt the Senate language and to add a requirement that the Secretary's report include an analysis of the effect, if any, that general revenue sharing grants have had on undeveloped coastal barriers.

The Secretary's report will also include recommendations for additions to or deletions from the Coastal Barrier Resources System. While the conferees do not intend that areas developed after the date of the Act should be recommended for deletion for development reasons, they recognized that in a few areas further study may reveal possible errors. In particular, the conferees are aware that there is a dispute regarding the geological composition of Coconut Point, Florida. There is also a dispute regarding the development status of approximately 114 acres of the Wilfurt Woods property on the west end of the Island of Sanibel, Florida. These 114 acres are part of a planned unit development which has been approved in a settlement agreement between the owners of the property and the Sanibel-Captiva Conservation Foundation. Finally, there is a question regarding the conservation status of an area included in the Casey Key, Florida, map. The conferees intend that the Department of the Interior study these areas and report to the appropriate committees as soon as practicable to insure that any errors may be addressed legislatively. The Conferees intend that any reports transmitted by the Secretary under this section, as well as any maps and notifications of boundary modifications under Section 4, shall also be submitted to the Committee on Public Works and Transportation of the House of Representatives.

Section 11. Amendment Regarding Flood Insurance

Section 11(a) adopts the House language amending Section 1321 of the National Flood Insurance Act of 1968. Section 11(b) adopts the Senate language amending Section 341(d)(2) of the Omnibus Budget and Reconciliation Act of 1981.

MAKING IN ORDER AT ANY TIME HEREAFTER CONSIDERATION OF CONFERENCE REPORT ON S. 1018, COASTAL BARRIER RESOURCES ACT

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that it may be in order at any time hereafter to consider the conference report on the Senate bill (S. 1018) to protect and conserve fish and wildlife resources, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

CONFERENCE REPORT ON S. 734, EXPORT TRADING COMPANY ACT OF 1981

Mr. RODINO submitted the following conference report and statement on the Senate bill (S. 734) to encourage exports by facilitating the information and operation of export trading companies, export trade associations, and the expansion of export trade services generally:

CONFERENCE REPORT (H. REPT. NO. 97-924)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

TITLE I—GENERAL PROVISIONS

SHORT TITLE

SEC. 101. This title may be cited as the "Export Trading Company Act of 1982".

FINDINGS; DECLARATION OF PURPOSE

SEC. 102. (a) The Congress finds that—

(1) United States exports are responsible for creating and maintaining one out of every nine manufacturing jobs in the United States and for generating one out of every seven dollars of total United States goods produced;

(2) the rapidly growing service-related industries are vital to the well-being of the United States economy inasmuch as they create jobs for seven out of every ten Americans, provide 65 percent of the Nation's gross national product, and offer the greatest potential for significantly increased industrial trade involving finished products;

(3) trade deficits contribute to the decline of the dollar on international currency markets and have an inflationary impact on the United States economy;

(4) tens of thousands of small- and medium-sized United States businesses produce exportable goods or services but do not engage in exporting;

(5) although the United States is the world's leading agricultural exporting nation, many farm products are not marketed as widely and effectively abroad as they could be through export trading companies;

(6) export trade services in the United States are fragmented into a multitude of separate functions, and companies attempting to offer export trade services lack financial leverage to reach a significant number of potential United States exporters;

(7) the United States needs well-developed export trade intermediaries which can achieve economies of scale and acquire expertise enabling them to export goods and services profitably, at low per unit cost to producers;

(8) the development of export trading companies in the United States has been hampered by business attitudes and by Government regulations;

(9) those activities of State and local governmental authorities which initiate, facilitate, or expand exports of goods and services can be an important source for expansion of total United States exports, as well as for experimentation in the development of innovative export programs keyed to local, State, and regional economic needs;

(10) if United States trading companies are to be successful in promoting United States exports and in competing with foreign trading companies, they should be able to draw on the resources, expertise, and knowledge of the United States banking system, both in the United States and abroad; and

(11) the Department of Commerce is responsible for the development and promotion of United States exports, and especially for facilitating the export of finished products by United States manufacturers.

(b) It is the purpose of this Act to increase United States exports of products and services by encouraging more efficient provision of export trade services to United States producers and suppliers, in particular by establishing an office within the Department of Commerce to promote the formation of export trade associations and export trading companies, by permitting bank holding companies, bankers' banks, and Edge Act corporations and agreement corporations that are subsidiaries of bank holding companies to invest in export trading companies, by reducing restrictions on trade financing provided by financial institutions, and by modifying the application of the antitrust laws to certain export trade.

DEFINITIONS

SEC. 103. (a) For purposes of this title—

(1) the term "export trade" means trade or commerce in goods or services produced in the United States which are exported, or in the course of being exported, from the United States to any other country;

(2) the term "services" includes, but is not limited to, accounting, amusement, architectural, automatic data processing, business, communications, construction franchising and licensing, consulting, engineering, financial, insurance, legal, management, repair, tourism, training, and transportation services;

(3) the term "export trade services" includes, but is not limited to, consulting, international market research, advertising, marketing, insurance, product research and design, legal assistance, transportation, including trade documentation and freight forwarding, communication and processing of foreign orders to and for exporters and foreign purchasers, warehousing, foreign exchange, financing, and taking title to goods, when provided in order to facilitate the export of goods or services produced in the United States;

(4) the term "export trading company" means a person, partnership, association, or similar organization, whether operated for profit or as a nonprofit organization, which does business under the laws of the United States or any State and which is organized and operated principally for purposes of—

(A) exporting goods or services produced in the United States; or

(B) facilitating the exportation of goods or services produced in the United States by unaffiliated persons by providing one or more export trade services;

(5) the term "State" means any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands;

(6) the term "United States" means the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands; and

(7) the term "antitrust laws" means the antitrust laws as defined in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)), section 5 of the Federal Trade Commission Act (15 U.S.C. 45) to the extent that section 5 applies to unfair methods of competition, and any State antitrust or unfair competition law.

(b) The Secretary of Commerce may by regulation further define any term defined in subsection (a), in order to carry out this title.

OFFICE OF EXPORT TRADE IN DEPARTMENT OF COMMERCE

SEC. 104. The Secretary of Commerce shall establish within the Department of Commerce an office to promote and encourage to the greatest extent feasible the formation of export trade associations and export trading companies. Such office shall provide information and advice to interested persons and shall provide a referral service to facilitate contact between producers of exportable goods and services and firms offering export trade services.

TITLE II—BANK EXPORT SERVICES

SHORT TITLE

SEC. 201. This title may be cited as the "Bank Export Services Act".

SEC. 202. The Congress hereby declares that it is the purpose of this title to provide for meaningful and effective participation by bank holding companies bankers' banks, and Edge Act corporations, in the financing and development of export trading companies in the United States. In furtherance of such purpose, the Congress intends that, in implementing its authority under section 4(c)(14) of the Bank Holding Company Act of 1956, the Board of Governors of the Feder-

al Reserve System should pursue regulatory policies that—

(1) provide for the establishment of export trading companies with powers sufficiently broad to enable them to compete with similar foreign-owned institutions in the United States and abroad;

(2) afford to United States commerce, industry and agriculture especially small and medium-size firms, a means of exporting at all times;

(3) foster the participation by regional and smaller banks in the development of export trading companies; and

(4) facilitate the formation of joint venture export trading companies between bank holding companies and nonbank firms that provide for the efficient combination of complementary trade and financing services designed to create export trading companies that can handle all of an exporting company's needs.

INVESTMENTS IN EXPORT TRADING COMPANIES

SEC. 203. Section 4(c) of the Bank Holding Company Act of 1956 (12 U.S.C. 1843(c)) is amended—

(1) in paragraph (12)(B), by striking out "or" at the end thereof;

(2) in paragraph (13), by striking out the period at the end thereof and inserting in lieu thereof "; or"; and

(3) by inserting after paragraph (13) the following:

"(14) shares of any company which is an export trading company whose acquisition (including each acquisition of shares) or formation by a bank holding company has not been disapproved by the Board pursuant to this paragraph, except that such investments, whether direct or indirect, in such shares shall not exceed 5 per centum of the bank holding company's consolidated capital and surplus.

"(A)(i) No bank holding company shall invest in an export trading company under this paragraph unless the Board has been given sixty days' prior written notice of such proposed investment and within such period has not issued a notice disapproving the proposed investment or extending for up to another thirty days the period during which such disapproval may be issued.

"(ii) The period for disapproval may be extended for such additional thrity-day period only if the Board determines that a bank holding company proposing to invest in an export trading company has not furnished all the information required to be submitted or that in the Board's judgment any material information submitted is substantially inaccurate.

"(iii) The notice required to be filed by a bank holding company shall contain such relevant information as the Board shall require by regulation or by specific request in connection with any particular notice.

"(iv) The Board may disapprove any proposed investment only if—

"(I) such disapproval is necessary to prevent unsafe or unsound banking practices, undue concentration of resources, decreased or unfair competition, or conflicts of interest;

"(II) the Board finds that such investment would affect the financial or managerial resources of a bank holding company to an extent which is likely to have a materially adverse effect on the safety and soundness of any subsidiary bank of such bank holding company, or

"(III) the bank holding company fails to furnish the information required under clause (iii).

"(v) Within three days after a decision to disapprove an investment, the Board shall notify the bank holding company in writing of the disapproval and shall provide a written statement of the basis for the disapproval.

"(vi) A proposed investment may be made prior to the expiration of the disapproval period if the Board issues written notice of its intent not to disapprove the investment.

"(B)(i) The total amount of extensions of credit by a bank holding company which invests in an export trading company, when combined with all such extensions of credit by all the subsidiaries of such bank holding company, to an export trading company shall not exceed at any one time 10 per centum of the bank holding company's consolidated capital and surplus. For purposes of the preceding sentence, an extension of credit shall not be deemed to include any amount invested by a bank holding company in the shares of an export trading company.

"(ii) No provision of any other Federal law in effect on October 1, 1982, relating specifically to collateral requirements shall apply with respect to any such extension of credit.

"(iii) No bank holding company or subsidiary of such company which invests in an export trading company may extend credit to such export trading company or to customers of such export trading company on terms more favorable than those afforded similar borrowers in similar circumstances, and such extension of credit shall not involve more than the normal risk of repayment or present other unfavorable features.

"(C) For purposes of this paragraph, an export trading company—

"(i) may engage in or hold shares of a company engaged in the business of underwriting, selling, or distributing securities in the United States only to the extent that any bank holding company which invests in such export trading company may do so under applicable Federal and State banking laws and regulations; and

"(ii) may not engage in agricultural production activities or in manufacturing, except for such incidental product modification including repackaging, reassembling or extracting byproducts, as is necessary to enable United States goods or services to conform with requirements of a foreign country and to facilitate their sale in foreign countries.

"(D) A bank holding company which invests in an export trading company may be required, by the Board, to terminate its investment or may be made subject to such limitations or conditions as may be imposed by the Board, if the Board determines that the export trading company has taken positions in commodities or commodity contracts, in securities, or in foreign exchange, other than as may be necessary in the course of the export trading company's business operations.

"(E) Notwithstanding any other provision of law, an Edge Act corporation, organized under section 25(a) of the Federal Reserve Act (12 U.S.C. 611–631), which is a subsidiary of a bank holding company, or an agreement corporation, operating subject to section 25 of the Federal Reserve Act (12 U.S.C. 601–604(a)), which is a subsidiary of a bank holding company, may invest directly and indirectly in the aggregate up to 5 per centum of its consolidated capital and surplus (25 per centum in the case of a corporation not engaged in banking) in the voting stock of other evidences of ownership in one or more export trading companies.

"(F) For purposes of this paragraph—

"(i) the term 'export trading company' means a company which does business under the laws of the United States or any State, which is exclusively engaged in activities related to international trade, and which is organized and operated principally for purposes of exporting goods or services produced in the United States or for purposes of facilitating the exportation of goods or services produced in the United States by unaffiliated persons by providing one or more export trade services.

"(ii) the term 'export trade services' includes, but is not limited to, consulting, international market research, advertising, marketing, insurance (other than acting as principal, agent or broker in the sale of insurance on risks resident or located, or activities performed, in the United States, except for insurance covering the transportation of cargo from any point of origin in the United States to a point of final destination outside the United States), product research and design, legal assistance, transportation, including trade documentation and freight forwarding, communication and processing of foreign orders to and for exporters and foreign purchasers, warehousing, foreign exchange, financing, and taking title to goods, when provided in order to facilitate the export of goods or services produced in the United States;

"(iii) the term 'bank holding company' shall include a bank which (I) is organized solely to do business with other banks and their officers, directors, or employees; (II) is owned primarily by the banks with which it does business; and (III) does not do business with the general public. No such other bank, owning stock in a bank described in this clause that invests in an export trading company, shall extend credit to an export trading company in an amount exceeding at any one time 10 per centum of such other bank's capital and surplus; and

"(iv) the term 'extension of credit' shall have the same meaning given such term in the fourth paragraph of section 23A of the Federal Reserve Act.".

SEC. 205. On or before two years after the date of the enactment of this Act, the Federal Reserve Board shall report to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives the Board's recommendations with respect to the implementation of this section, the Board's recommendations with respect to the implementation of this section, the Board's recommendations on any changes in United States law to facilitate the financing of United States exports, especially by small, medium-size, and minority business concerns, and the Board's recommendations on the effects of ownership of United States banks by foreign banking organizations affiliated with trading companies doing business in the United States.

GUARANTEES FOR EXPORT ACCOUNTS RECEIVABLE AND INVENTORY

SEC. 206. The Export-Import Bank of the United States is authorized and directed to establish a program to provide guarantees for loans extended by financial institutions or other public or private creditors to export trading companies as defined in section 4(c)(14)(F)(i) of the Bank Holding Company Act of 1956, or to other exporters, when such loans are secured by export accounts receivable or inventories of exportable goods, and when in the judgment of the Board of Directors—

(1) the private credit market is not providing adequate financing to enable otherwise creditworthy export trading companies or exporters to consummate export transactions; and

(2) such guarantees would facilitate expansion of exports which would not otherwise occur.

The Board of Directors shall attempt to insure that a major share of any loan guarantees ultimately serves to promote exports from small, medium-size, and minority businesses or agricultural concerns. Guarantees provided under the authority of this section shall be subject to limitations contained in annual appropriations Acts.

BANKERS' ACCEPTANCES

SEC. 207. The seventh paragraph of section 13 of the Federal Reserve Act (12 U.S.C. 372) is amended to read as follows:

"(7)(A) Any member bank and any Federal or State branch or agency of a foreign bank subject to reserve requirements under section 7 of the International Banking Act of 1978 (hereinafter in this paragraph referred to as 'institutions'), may accept drafts or bills of exchange drawn upon it having not more than six months' sight to run, exclusive of days of grace—

"(i) which grow out of transactions involving the importation or exportation of goods;

"(ii) which grow out of transactions involving the domestic shipment of goods; or

"(iii) which are secured at the time of acceptance by a warehouse receipt or other such document conveying or securing title covering readily marketable staples.

"(B) Except as provided in subparagraph (C), no institution shall accept such bills, or be obligated for a participation share in such bills, in an amount equal at any time in the aggregate to more than 150 per centum of its paid up and unimpaired capital stock and surplus or, in the case of a United States branch or agency of a foreign bank, its dollar equivalent as determined by the Board under subparagraph (H).

"(C) The Board, under such conditions as it may prescribe, may authorize, by regulation or order, any institution to accept such bills, or be obligated for a participation share in such bills, in an amount not exceeding at any time in the aggregate 200 per centum of its paid up and unimpaired capital stock and surplus or, in the case of a United States branch or agency of a foreign bank, its dollar equivalent as determined by the Board under subparagraph (H).

"(D) Notwithstanding subparagraphs (B) and (C), with respect to any institution, the aggregate acceptances, including obligations for a participation share in such acceptances, growing out of domestic transactions shall not exceed 50 per centum of the aggregate of all acceptances, including obligations for a participation share in such acceptances, authorized for such institution under this paragraph.

"(E) No institution shall accept bills, or be obligated for a participation share in such bills, whether in a foreign or domestic transaction, for any one person, partnership, corporation, association or other entity in an amount equal at any time in the aggregate to more than 10 per centum of its paid up and unimpaired capital stock and surplus, or, in the case of a United States branch or agency of a foreign bank, its dollar equivalent as determined by the Board under subparagraph (H), unless the institution is secured either by attached documents or by some other actual security growing out of the same transaction as the acceptance.

"(F) With respect to an institution which issues an acceptance, the limitations contained in this paragraph shall not apply to that portion of an acceptance which is issued by such institution and which is covered by a participation agreement sold to another institution.

"(G) In order to carry out the purposes of this paragraph, the Board may define any of the terms used in this paragraph, and, with respect to institutions which do not have capital or capital stock, the Board shall define an equivalent measure to which the limitations contained in this paragraph shall apply.

"(H) Any limitation or restriction in this paragraph based on paid-up and unimpaired capital stock and surplus of an institution shall be deemed to refer, with respect to a United States branch or agency of a foreign bank, to the dollar equivalent of the paid-up capital stock and surplus of the foreign bank, as determined by the Board, and if the foreign bank has more than one United States branch or agency, the business transacted by all such branches and agencies shall be aggregated in determining compliance with the limitation or restriction.".

TITLE III—EXPORT TRADE CERTIFICATES OF REVIEW

EXPORT TRADE PROMOTION DUTIES OF SECRETARY OF COMMERCE

SEC. 301. To promote and encourage export trade, the Secretary may issue certificates of review and advise and assist any person with respect to applying for certificates of review.

APPLICATION FOR ISSUANCE OF CERTIFICATE OF REVIEW

SEC. 302. (a) To apply for a certificate of review, a person shall submit to the Secretary a written application which—

(1) specifies conduct limited to export trade, and

(2) is in a form and contains any information, including information pertaining to the overall market in which the applicant operates, required by rule or regulation promulgated under section 310.

(b)(1) Within 10 days after an application submitted under subsection (a) is received by the Secretary, the Secretary shall publish in the Federal Register a notice that announces that an application for a certificate of review has been submitted, identifies each person submitting the application, and describes the conduct for which the application is submitted.

(2) Not later than 7 days after an application submitted under subsection (a) is received by the Secretary, the Secretary shall transmit to the Attorney General—

(A) a copy of the application,

(B) any information submitted to the Secretary in connection with the application, and

(C) any other relevant information (as determined by the Secretary) in the possession of the Secretary, including information regarding the market share of the applicant in the line of commerce to which the conduct specified in the application relates.

ISSUANCE OF CERTIFICATE

SEC. 303. (a) A certificate of review shall be issued to any applicant that establishes that its specified export trade, export trade activities, and methods of operation will—

(1) result in neither a substantial lessening of competition or restraint of trade within the United States nor a substantial restraint of the export trade of any competitor of the applicant,

(2) not unreasonably enhance, stabilize, or depress prices within the United States of the goods, wares, merchandise, or services of the class exported by the applicant,

(3) not constitute unfair methods of competition against competitors engaged in the export of goods, wares, merchandise, or services of the class exported by the applicant, and

(4) not include any act that may reasonably be expected to result in the sale for consumption or resale within the United States of the goods, wares, merchandise, or services exported by the applicant.

(b) Within 90 days after the Secretary receives an application for a certificate of review, the Secretary shall determine whether the applicant's export trade, export trade activities, and methods of operation meet the standards of subsection (a). If the Secretary, with the concurrence of the Attorney General, determines that such standards are met, the Secretary shall issue to the applicant a certificate of review. The certificate of review shall specify—

(1) the export trade, export trade activities, and methods of operation to which the certificate applies,

(2) the person to whom the certificate of review is issued, and

(3) any terms and conditions the Secretary or the Attorney General deems necessary to assure compliance with the standards of subsection (a).

(c) If the applicant indicates a special need for prompt disposition, the Secretary and the Attorney General may expedite action on the application, except that no certificate of review may be issued within 30 days of publication of notice in the Federal Register under section 302(b)(1).

(d)(1) If the Secretary denies in whole or in part an application for a certificate, he shall notify the applicant of his determination and the reasons for it.

(2) An applicant may, within 30 days of receipt of notification that the application has been denied in whole or in part, request the Secretary to reconsider the determination. The Secretary, with the concurrence of the Attorney General, shall notify the applicant of the determination upon reconsideration within 30 days of receipt of the request.

(e) If the Secretary denies an application for the issuance of a certificate of review and thereafter receives from the applicant a request for the return of documents submitted by the applicant in connection with the application for the certificate, the Secretary and the Attorney General shall return to the applicant, not later than 30 days after receipt of the request, the documents and all copies of the documents available to the Secretary and the Attorney General, except to the extent that the information contained in a document has been made available to the public.

(f) A certificate shall be void ab initio with respect to any export trade, export trade activities, or methods of operation for which a certificate was procured by fraud.

REPORTING REQUIREMENT; AMENDMENT OF CERTIFICATE; REVOCATION OF CERTIFICATE

SEC. 304. (a)(1) Any applicant who receives a certificate of review—

(A) shall promptly report to the Secretary any change relevant to the matters specified in the certificate, and

(B) may submit to the Secretary an application to amend the certificate to reflect the effect of the change on the conduct specified in the certificate.

(2) An application for an amendment to a certificate of review shall be treated as an application for the issuance of a certificate. The effective date of an amendment shall be the date on which the application for the amendment is submitted to the Secretary.

(b)(1) If the Secretary or the Attorney General has reason to believe that the export trade, export trade activities, or methods of operation of a person holding a certificate of review no longer comply with the standards of section 303(a), the Secretary shall request such information from such person as the Secretary or the Attorney General deems necessary to resolve the matter of compliance. Failure to comply with such request shall be grounds for revocation of the certificate under paragraph (2).

(2) If the Secretary or the Attorney General determines that the export trade, export trade activities, or methods of operation of a person holding a certificate no longer comply with the standards of section 303(a), or that such person has failed to comply with a request made under paragraph (1), the Secretary shall give written notice of the determination to such person. The notice shall include a statement of the circumstances underlying, and the reasons in support of, the determination. In the 60-day period beginning 30 days after the notice is given, the Secretary shall revoke the certificate or modify it as the Secretary or the Attorney General deems necessary to cause the certificate to apply only to the export trade, export trade activities, or methods of operation which are in compliance with the standards of section 303(a).

(3) For purposes of carrying out this subsection, the Attorney General, and the Assistant Attorney General in charge of the antitrust division of the Department of Justice, may conduct investigations in the same manner as the Attorney General and the Assistant Attorney General conduct investigations under section 3 of the Antitrust Civil Process Act, except that no civil investigative demand may be issued to a person to whom a certificate of review is issued if such person is the target of such investigation.

JUDICIAL REVIEW; ADMISSIBILITY

SEC. 305. (a) If the Secretary grants or denies, in whole or in part, an application for a certificate of review or for an amendment to a certificate, or revokes or modifies a certificate pursuant to section 304(b), any person aggrieved by such determination may, within 30 days of the determination, bring an action in any appropriate district court of the United States to set aside the determination on the ground that such determination is erroneous.

(b) Except as provided in subsection (a), no action by the Secretary or the Attorney General pursuant to this title shall be subject to judicial review.

(c) If the Secretary denies, in whole or in part, an application for a certificate of review or for an amendment to a certificate, or revokes or amends a certificate, neither the negative determination nor the statement of reasons therefor shall be admissible in evidence, in any administrative or judicial proceeding, in support of any claim under the antitrust laws.

PROTECTION CONFERRED BY CERTIFICATE OF REVIEW

SEC. 306. (a) Except as provided in subsection (b), no criminal or civil action may be brought under the antitrust laws against a person to whom a certificate of review is issued which is based on conduct which is specified in, and complies with the terms of, a certificate issued under section 303 which certificate was in effect when the conduct occurred.

(b)(1) Any person who has been injured as a result of conduct engaged in under a certificate of review may bring a civil action for injunctive relief, actual damages, the loss of interest on actual damages, and the cost of suit (including a reasonable attorney's fee) for the failure to comply with the standards of section 303(a). Any action commenced under this title shall proceed as if it were an action commenced under section 4 or section 16 of the Clayton Act, except that the standards of section 303(a) of this title and the remedies provided in this paragraph shall be the exclusive standards and remedies applicable to such action.

(2) Any action brought under paragraph (1) shall be filed within two years of the date the plaintiff has notice of the failure to comply with the standards of section 303(a) but in any event within four years after the cause the action accrues.

(3) In any action brought under paragraph (1), there shall be a presumption that conduct which is specified in and complies with a certificate of review does comply with the standards of section 303(a).

(4) In any action brought under paragraph (1), if the court finds that the conduct does comply with the standards of section 303(a), the court shall award to the person against whom the claim is brought the cost of suit attributable to defending against the claim (including a reasonable attorney's fee).

(5) The Attorney General may file suit pursuant to section 15 of the Clayton Act (15 U.S.C. 25) to enjoin conduct threatening clear and irreparable harm to the national interest.

GUIDELINES

SEC. 307. (a) To promote greater certainty regarding the application of the antitrust laws to export trade, the Secretary, with the concurrence of the Attorney General, may issue guidelines—

(1) describing specific types of conduct with respect to which the Secretary, with the concurrence of the Attorney General, has made or would make, determinations under sections 303 and 304, and

(2) summarizing the factual and legal bases in support of the determinations.

(b) Section 553 of title 5, United States Code, shall not apply to the issuance of guidelines under subsection (a).

ANNUAL REPORTS

SEC. 308. Every person to whom a certificate of review is issued shall submit to the Secretary an annual report, in such form and at such time as the Secretary may require, that updates where necessary the information required by section 302(a).

DISCLOSURE OF INFORMATION

SEC. 309. (a) Information submitted by any person in connection with the issuance, amendment, or revocation of a certificate of review shall be exempt from disclosure under section 552 of title 5, United States Code.

(b)(1) Except as provided in paragraph (2), no officer or employee of the United States shall disclose commercial or financial information submitted in connection with the issuance, amendment, or revocation of a certificate of review if the information is privileged or confidential and if disclosure of the information would cause harm to the person who submitted the information.

(2) Paragraph (1) shall not apply with respect to information disclosed—

(A) upon a request made by the Congress or any committee of the Congress,

(B) in a judicial or administrative proceeding, subject to appropriate protective orders,

(C) with the consent of the person who submitted the information,

(D) in the course of making a determination with respect to the issuance, amendment, or revocation of a certificate of review, if the Secretary deems disclosure of the information to be necessary in connection with making the determination,

(E) in accordance with any requirement imposed by a statute of the United States, or

(F) in accordance with any rule or regulation promulgated under section 310 permitting the disclosure of the information to an agency of the United States or of a State on the condition that the agency will disclose the information only under the circumstances specified in subparagraphs (A) through (E).

RULES AND REGULATIONS

SEC. 310. The Secretary, with the concurrence of the Attorney General, shall promulgate such rules and regulations as are necessary to carry out the purposes of this Act.

DEFINITIONS

SEC. 311. As used in this title—

(1) the term "export trade" means trade or commerce in goods, wares, merchandise, or services exported, or in the course of being exported, from the United States or any territory thereof to any foreign nation,

(2) the term "service" means intangible economic output, including, but not limited to—

(A) business, repair, and amusement services,

(B) management, legal, engineering, architectural, and other professional services, and

(C) financial, insurance, transportation, informational and any other data-based services, and communication services,

(3) the term "export trade activities" means activities or agreements in the course of export trade,

(4) the term "methods of operation" means any method by which a person conducts or proposes to conduct export trade,

(5) the term "person" means an individual who is a resident of the United States; a partnership that is created under and exists pursuant to the laws of any State or of the United States; a State or local government entity; a corporation, whether organized as a profit or nonprofit corporation, that is created under and exists pursuant to the laws of any State or of the United States; or any association or combination, by contract or other arrangement, between or among such persons,

(6) the term "antitrust laws" means the antitrust laws, as such term is defined in the first section of the Clayton Act (15 U.S.C. 12), and section 5 of the Federal Trade Commission Act (15 U.S.C 45) (to the extent that section 5 prohibits unfair methods of competition), and any State antitrust or unfair competition law,

(7) the term "Secretary" means the Secretary of Commerce or his designee, and

(8) the term "Attorney General" means the Attorney General of the United States or his designee.

EFFECTIVE DATES

SEC. 312. (a) Except as provided in subsection (b), this title shall take effect on the date of the enactment of this Act.

(b) Section 302 and section 303 shall take effect 90 days after the effective date of the rules and regulations first promulgated under section 310.

TITLE IV—FOREIGN TRADE ANTITRUST IMPROVEMENTS

SHORT TITLE

SEC. 401. This title may be cited as the "Foreign Trade Antitrust Improvements Act of 1982".

AMENDMENT TO SHERMAN ACT

SEC. 402. The Sherman Act (15 U.S.C. 1 et seq.) is amended by inserting after section 6 the following new section:

"SEC. 7. This Act shall not apply to conduct involving trade or commerce (other than import trade or import commerce) with foreign nations unless—

"(1) such conduct has a direct, substantial, and reasonably foreseeable effect—

"(A) on trade or commerce which is not trade or commerce with foreign nations, or on import trade or import commerce with foreign nations; or

"(B) on export trade or export commerce with foreign nations, of a person engaged in such trade or commerce in the United States; and

"(2) such effect gives rise to a claim under the provisions of this Act, other than this section.

If this Act applies to such conduct only because of the operation of paragraph (1)(B), then this Act shall apply to such conduct only for injury to export business in the United States.".

AMENDMENT TO FEDERAL TRADE COMMISSION ACT

SEC. 403. Section 5(a) of the Federal Trade Commission Act (15 U.S.C. 45(a)) is amended by adding at the end thereof the following new paragraph:

"(3) This subsection shall not apply to unfair methods of competition involving commerce with foreign nations (other than import commerce) unless—

"(A) such methods of competition have a direct, substantial, and reasonably foreseeable effect—

"(i) on commerce which is not commerce with foreign nations, or on import commerce with foreign nations; or

"(ii) on export commerce with foreign nations, of a person engaged in such commerce in the United States; and

"(B) such effect gives rise to a claim under the provisions of this subsection, other than this paragraph.

If this subsection applies to such methods of competition only because of the operation of subparagraph (A)(ii), this subsection shall apply to such conduct only for injury to export business in the United States.".

And the House agree to the same.

That the House recede from its amendment to the title of the Senate bill.

For title I of the House amendment and modifications committed to conference:

CLEMENT J. ZABLOCKI,
JONATHAN BINGHAM,
DENNIS E. ECKART,
DON BONKER,
HOWARD WOLPE,
WM. BROOMFIELD,
ROBERT J. LAGOMARSINO,
ARLEN ERDAHL,

DON RIEGLE,
BILL PROXMIRE,
CHRISTOPHER J. DODD,
ALAN DIXON,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment to the text of the bill struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

TITLE I

SHORT TITLE

The committee of conference agreed to the House provision: "The Export Trading Company Act of 1982".

FINDINGS

The House amendment contains Congressional findings with respect to the impact of exports on U.S. jobs, the role of service-related industries in U.S. exports, the effects of trade deficits on the value of the dollar, and the responsibilities of the Department of Commerce in export promotion, which are not contained in the Senate bill.

The Senate bill contains findings with respect to the role of the United States as an exporter of agricultural products, and the need for exporters to achieve greater economies of scale, which are not in the House amendment. Other Senate and House findings are similar or identical.

The committee of conference agreed to a combination of the House and Senate provisions, all the findings in the House amendment and an amended version of the Senate finding with respect to agricultural exports.

PURPOSE

The statement of the bill's purpose in the House amendment includes references to the creation of an export trading company promotion office in the Department of Commerce, investment by certain banks in export trading companies, and modification of antitrust laws with respect to export trade, references which are not contained in the Senate bill.

The committee of conference agreed to the House provision with an amendment adding reference to the Edge Act and Agreement corporations as being eligible to invest in trading companies if those corporations are subsidiaries of bank holding companies.

DEFINITIONS

A. The committee of conference agreed and reaffirmed that the definitions contained in title I of the bill apply only to the provisions of title I, and not to the other titles of the bill. To the extent possible, however, the definitions recommended by the committee of conference in title I conform with the definitions recommended in other titles.

The Senate bill defines "goods produced in the United States" as those containing no more then 50% (by value) imported components or materials.

The House amendment contains no such definition.

The committee of conference deletes this definition.

Specific consideration was given to the status, under this and other definitions in the bill, of fish harvested by U.S. flag vessels within the United States fish conservation zone and sold at sea or in a foreign port without having otherwise been landed or processed in the United States. The committee of conference agreed that fish so harvested and sold should be regarded as goods produced in the United States, and their sales as constituting export trade within the meaning of this title and other titles of the bill.

B. The definition of "services produced in the United States" in the Senate bill and the definition of "services" in the House amendment are similar, except that the Senate bill includes some services not mentioned in the House provision, and contains the additional requirement that at least 50% of the value of such services be attributable to the United States.

The committee of conference agreed to the House provision with an amendment to include additional specific services contained in the Senate bill.

C. The definition of "export trade services" in the Senate bill includes "product research and design", which is not specified in the House amendment.

The committee of conference agreed to the Senate provision.

D. The definition of "export trading company" in the Senate bill includes nonprofit organizations, which is not contained in the House amendment. The definition in the House amendment requires export trading companies to be operated principally for the export of U.S. goods, *or* for facilitating such exports by unaffiliated persons, while the Senate bill requires both.

The committee of conference agreed to a compromise of the Senate and House provisions which includes nonprofit organizations, but permits export trading companies to perform only one of the two functions contained in both the House and Senate provisions.

E. The House amendment includes definitions of "export trade association" and "State."

The Senate bill has no such provision.

The committee of conference adopted the Senate position.

E. The Senate bill includes a definition of "Secretary", as meaning the Secretary of Commerce.

The House amendment contains no such definition.

The committee of conference agreed with the House position.

F. A definition of "company" contained in the Senate bill, but not in the House amendment, is incorporated in the definition of "export trading company" adopted by the committee of conference.

The conference substitute includes a definition of "anti-trust laws" contained in title III of the Senate bill, but not contained in the House bill, with an amendment deleting reference to section 6 of the Federal Trade Commission Act.

ISSUANCE OF REGULATIONS

The Senate bill authorizes the Secretary of Commerce by regulation to further define terms contained in title I.

The House amendment contains no such authorization.

The committee of conference agreed to the Senate provision.

OFFICE OF EXPORT TRADE

The House amendment directs the Secretary of Commerce to establish an office in that Department to promote and assist export trade associations and export trading companies.

The Senate bill similarly directs the Secretary to promote export trading companies, but does not require the establishment of a Commerce Department office for that purpose.

The committee of conference agreed to the House provision.

TITLE II—BANK EXPORT SERVICES ACT

The Senate receded to the House insofar as the basic statutory framework within which bank-affiliated export trading companies (ETCs) will operate. By placing the ETC within the bank holding company structure rather than within the bank, as the Senate bill provided, the conferees believe that adequate safeguards will continue to exist to minimize potential risk to the bank or banks within the holding company structure and that adequate separation will exist between a bank's involvement in export trade activities and its deposit taking function. The decision to accept the bank holding company structure carried with it to a large extent the utilization of existing regulatory provisions in effect in connection with existing bank holding application practices and procedures except where modified to insure an adequate but yet a minimal regulatory presence. The House, consequently, receded to the Senate to ensure a streamlined application process with respect to basic definitional matters such as what an ETC is and what activities it can engage in, and on a number of ancillary matters such as the authorization for Export-Import Bank loan guarantees. In addition, definitive guidance is provided to the Federal Reserve Board on how to implement this new statute in a way that will insure the rapid growth of ECTs consistent with the purposes of this Act without unnecessary regulation.

REGULATORY FRAMEWORK

S. 734, as a free standing statute, would have permitted a wide variety of banking institutions to invest in ETCs. Inasmuch as these institutions are regulated by a number of different governmental agencies, S. 734 required a number of general regulatory provisions. H.R. 6016, reported by the House Committee on Banking, Finance and Urban Affairs, on the other hand, elected to restrict banking institution investment in ETCs to bank holding companies and bankers' banks, and therefore constructed its version of this legislation as an amendment to the Bank Holding Company Act of 1956 (treating bankers' banks as holding companies for purposes of this Act). As a result, the various constraints on bank holding company activities already in the Bank Holding Company Act would also automatically apply to invest in ETCs, and it was not necessary to repeat them in the House version of the legislation. Similarly, the restriction on investment to bank holding companies allowed the House to dispense with much of the regulatory complexity of the Senate bill.

In conference, the managers on the part of the Senate, recognizing the House's preference for channeling risks of this kind through holding companies rather than through banks directly, agreed to recede to the House on most basic structural issues, with certain modifications.

As a result, the provisions of the House amendment relating to the amount of bank holding company capital and surplus which can be invested in or loaned to an ETC, the 60-day disapproval procedure on the part of the Federal Reserve Board for such proposed investments, including the notification provision, and the exemption from Section 23A of the Federal Reserve Act are all incorporated in the conference agreement. Similarly, the Senate provisions relating to judicial review, rulemaking authority, state banking laws, and protection of the safety and soundness of the bank, are all deleted, largely because they are covered by various sections of the Bank Holding Company Act which will now apply to investment in ETCs by virtue of the conferees' decision to accept the House approach of placing ETC within that Act. The Senate also receded to the House and agreed to eliminate the restriction on an ETC having the same name as its bank organization parent.

There were, however, several areas where the conferees made significant modifications in the approach of the House amendment.

GUIDANCE TO THE FEDERAL RESERVE BOARD

Most important in that regard is the decision of the conferees to provide additional guidance to the Federal Reserve Board in administering this Act through the addition of a new Section 202 at the beginning of Title II. This section declares it to be the purpose of Title II to provide for meaningful and effective participation by bank holding companies in the financing and development of export trading companies, and that, specifically, the Board should pursue regulatory policies that:

(1) provide for the establishment of export trading companies with powers sufficiently broad to enable them to compete with similar foreign-owned institutions in the United States and abroad.

(2) afford to United States commerce, industry and agriculture, especially small and medium-size firms, a means of exporting at all times;

(3) foster the participation by regional and smaller banks in the development of export trading companies, and

(4) facilitate the formation of joint venture export trading companies between bank holding companies and nonbank firms that provide for the efficient combination of complementary trade and financing services designed to create export trading companies that can handle all of an exporting company's needs."

These objectives, along with the purpose set forth in Title I of the Act, if properly pursued by the Federal Reserve Board, will guarantee the development of effective, "full-service" trading companies with bank holding company involvement that will effectively and aggressively market American products and will not be disadvantaged or limited in competing with foreign-owned export trading companies or with ETCs owned by nonbank firms.

The new section 4(c)(14)(A)(iv) of the Bank Holding Company Act created by the conference substitute provides for disapproval of proposed investments in an export trading company only if the Board determines:

(1) such disapproval is necessary to prevent unsafe or unsound banking practices, undue concentration of resources, decreased or unfair competition, or conflicts of interest;

(2) the Board finds that such investment would affect the financial or managerial resources of a bank holding company to an extent which is likely to have a materially adverse effect on the safety and soundness of any subsidiary bank of such bank holding company; or

(3) the bank holding company fails to furnish the information required by Board regulations.

The second criterion above is a modification proposed by the Senate conferees and accepted by the House. The original language of the House amendment referred only to the "financial or managerial resources of the companies involved." However, the legislative history of that amendment suggested a narrower intent, i.e., "risk to the bank".

In order to reach the intent of the amendment more closely, the conferees agreed on revised wording to clarify the expectation that the Board will focus on risk to the bank, as opposed to other affiliates, and on the specific impact the proposed investment will have on the bank.

DEFINITION OF EXPORT TRADING COMPANY

It is clearly the purpose of both the House and Senate to stimulate the establishment of export trading companies to improve U.S. export capabilities with corresponding favorable effects on American balance of trade, economic growth and employment. The major public benefit sought by enactment of export trading company legislation is jobs for Americans through the promotion of exports.

The necessity of export expansion has never been more obvious. The House amendment to S. 734 would require that a bank-affiliated export trading company be operated "exclusively" for purposes of exporting goods and services produced in the United States and would have permitted importing that was incidental to export activities—that is an import agreement that enhanced export activities would be acceptable. The use of the term "exclusively" was designed to ensure the export promotion

and job creation character of the legislation.

The House, however, receded to the Senate by adopting the Senate's use of the term "principally" in defining the purposes of a bank-affiliated export trading company. This is no way implies a reduced commitment to the bill's purpose: U.S. export promotion. On the contrary, while it is understood that ETCs will periodically have to engage in importing, barter, third party trade, and related activities, the managers intend that such activity be conducted only to further the purposes of the Act. The managers do not expect the preponderance of ETC activity to involve importing.

ETC affiliation with banks represents a breach of the traditional separation of banking and commerce and has necessitated provision for a minimal but adequate regulatory presence. It is the intent of the managers that the regulatory authority, in addition to facilitating bank-related investments in ETCs, examine, supervise, and regulate ETCs in such a way as to assure that bank-affiliated ETCs operate in a manner consistent with the Congressional intent: that ETCs promote, increase, and maximize U.S. exports.

PRODUCT MODIFICATION

The conferees retained the prohibitions on manufacturing and agricultural production that were included in both the Senate bill and the House amendment. The export trading company is intended to be a service-providing organization and not the producer of the products it is exporting. The Senate, however, receded to the House amendment permitting the ETC to undertake incidental product modification, including repackaging, reassembling or extracting byproducts, as is necessary to enable U.S. goods or services to conform with foreign country requirements or to facilitate their sale in foreign countries. The ETC would also be permitted to provide any service deemed necessary to protect it from the additional risk incurred by such product modification.

JOINT VENTURES

The conferees intend that this title not affect the ability of individuals and organizations to form ETCs. State and local government entities, including port authorities, industrial development corporations, and other non-profit organizations, could be an important source of overall export expansion and of the development of innovative export programs keyed to local, state, and regional needs. In addition, other organizations, for example, agricultural cooperatives, have similar experience and needs. This title in no way affects the ability of such organizations to continue these efforts including their ability to organize, own, participate in or support ETCs. This title addresses only the question of whether banking organizations should be authorized to invest in ETCs and, if so, the restrictions which would be placed on ETCs sponsored by such banking organizations.

The conferees that this title does not preclude a banking organization that is authorized to invest in an ETC from engaging in a joint venture, partnership or other cooperative arrangement with other authorized banking organizations or other nonbanking firms to organize an ETC. Such cooperative arrangements are in fact to be encouraged. There are numerous firms and organizations which may want to form an ETC but feel that they lack either investment capital or expertise. A banking organization may well be able to provide such assistance through a joint venture or partnership arrangement with these other firms. The ETC so supported, however, would be subject to the restrictions contained in this legislation inasmuch as a banking organization is investing in that ETC.

PERMITTED SERVICES

Both the Senate bill and the House amendment contained a list of services which a bank-affiliated export trading company is permitted to provide. Those lists were identical except for three elements: (1) the Senate bill used the phrase "including, but not limited to" to make clear the list is a non-exclusive one; (2) the House amendment contained an explicit reference to "taking title"; and (3) the Senate bill's list included "insurance".

The House by receding to the Senate on the first issue, insured that the list of permitted services is a non-exclusive one. With regard to the second issue, "taking of title", the Senate receded to the House. The Senate bill would have implicitly permitted such an activity. To eliminate any possible ambiguity, the explicit authority contained in the House version was adopted.

Regarding "insurance", the House receded to the Senate with an amendment. The conferees determined it to be appropriate to permit bank holding companies to provide insurance on risks resident or located, or activities performed, outside of the United States. Since a large proportion of cargos moving overseas originate at a point that is located away from the port of shipment, it has become customary for insurance carriers providing insurance for such cargos to endorse their policies to cover cargos for export from the point of their origin in final transit to their destination, including ordinary delay and storage. Such ocean cargo "warehouse to warehouse" coverages provide insurance protection for all risks related to the land, air, or water transportation of the cargo in the United States as well as during the overseas transportation. In addition to permitting export trading companies to provide insurance on risks outside of the United States, therefore, the conferees determined that it would facilitate the provision of export trade services for export trading companies to provide ocean cargo "warehouse to warehouse" insurance as well, and accordingly amended the definition of insurance activities permitted in support of export trade services, reflecting the conferees' decision.

The conferees also considered the possibility of expanding the range of institutions eligible to invest in ETCs to include Edge Act Corporations. This proposal was included in the Senate bill because the expertise and experience of Edge Act Corporations in international trade matters made it logical to encourage their involvement in ETCs. On the other hand, the conferees were also concerned about the added potential risk to a bank if an ETC were formed by an Edge Act Corporation that was a subsidiary of a bank. It was the strong view of the House that the best protection for the bank and its depositors was to channel all trading company activity through the bankers' bank and bank holding company structures. Accordingly, the conferees agreed that Edge Act Corporations that are subsidiaries of bankholding companies are eligible to invest in ETCs. The inclusion of bankers' banks as eligible investors—a provision of both the Senate bill and the House amendment, will also facilitate the involvement of smaller banks in ETCs.

The conferees also discussed whether the mechanism for Board approval of a proposed investment should apply only to investments that would give the holding company control of the ETC, as in the Senate bill, or whether the standard in the Bank Holding Company Act requiring Board consideration of any investment constituting over 5 percent of an export trading company should apply.

In this case, the conferees, recognizing the newness of this concept, opted for the stricter House approach contained in the Bank Holding Company Act. In doing so, however, the conferees stressed their intent that the Board, as soon as possible, both decentralize this review process to the level of the Federal Reserve District Banks and consider providing guidelines for smaller investments (those that would result in a controlling interest for the holding company) that would minimize the review process and reduce the regulatory burden on the Board.

SECTION 23A

The Senate receded to the House on the exemption of bank-affiliated export trading companies from the provisions of Section 23A of the Federal Reserve Act. During the start-up phase in an effort to encourage maximum bank participation in export trading company activities, the conferees believe that the overall limitation of ten percent of the consolidated capital and surplus of the bank holding company, on extensions of credit to an affiliated export trading company, would adequately protect affiliated banks from excessive risks, and that the exemption from the collateral requirement of existing law is necessary in view of the type of assets most ETC's would have. The conferees, however, intend to review the decision in connection with an imminent major revision of 23A either as part of a possible conference on legislation separately passed by the Senate or at such time as revisions to 23A receive final consideration by the Congress.

REPORTS

Section 205 of the substitute contains the Senate bill's provision calling for a report by the Federal Reserve two years after the enactment of this Act on the implementation of the banking provisions, recommendations for further changes in U.S. law to facilitate the financing of U.S. exports, and recommendations on the effects of ownership of U.S. banks by foreign banking organizations affiliated with trading companies doing business in the United States.

EXPORT-IMPORT BANK

The House receded with an amendment to the Senate on the latter's provision establishing a program of Export-Import Bank guarantees for loans extended by financial institutions or other creditors to ETCs or other exporters, where such loans are secured by export accounts receivable or inventories of exportable goods. The House amendment to the Senate provision clarifies the eligibility of public creditors (port authorities, agencies of state and local governments, and governmental instrumentalities) as well as private creditors for Export-Import bank guarantees.

BANKERS' ACCEPTANCES

The conferees want to emphasize strongly that the adoption of this long overdue liberalization of the present limits on bankers' acceptance in on way is intended to impinge upon or restrict the inherent powers of the Federal Reserve Board to issue appropriate regulations to prevent circumvention of the

new liberalized limits through the imprudent use of participation agreements. The conferees have been advised of an ongoing analysis by the Federal Financial Institutions Examination Council on the proper treatment of participation of bankers' acceptances, preparatory to the development of a proposed united policy approach by each Federal regulatory agency. The conferees encourage this action to the extent it is consistent with and in furtherance of the language, history, and purposes of this legislation or demonstrable safety and soundness concerns. In this regard, the conferees require that the Council report to the respective Committees of jurisdiction within 18 months after the date of enactment, the results of its analysis, a summary of any individual regulatory agency action viewed as needed, and any legislative recommendations relating to safety and soundness considerations. In the meantime, however, the conferees stress that no action should be taken, either by regulation or other requirement to preclude the use of bankers' acceptances through the use of participations, as contemplated by this legislation, by the widest number of American banks.

TITLE III—EXPORT TRADE CERTIFICATES OF REVIEW

The House and Senate Conferees agreed upon a substitute amendment for Title III of S. 734 which incorporates elements from both S. 734 and the House Amendment to S. 734.

Section 301 is a statement that the purpose of this Title is to promote U.S. export trade by affording U.S. business an export trade certificate of review process.

Section 302 provides the procedures a person must follow to apply for a certificate of review. To obtain a certificate of review, any individual, firm, partnership, association, public or private corporation, or other legal entity, including a public or private body, submits a written application to the Secretary of Commerce. The Secretary of Commerce shall forward applications and other specified information to the Attorney General within 7 days of receipt. All applications must be in a form and contain all information required by regulation.

Within 10 days of receiving the application, the Secretary of Commerce shall publish in the Federal Register a notice identifying the applicant and describing the conduct for which certification is sought.

Section 303(a) provides that a certificate shall be issued to a person who establishes that its proposed conduct will (1) result in neither a substantial lessening of competition or substantial restraint of trade within the United States nor constitute a substantial restraint of the export trade of any competitor of the applicant; (2) not unreasonably enhance, stabilize, or depress prices within the United States; (3) not constitute unfair methods of competition against competitors engaged in the export trade of goods or services exported by the applicant; and (4) not reasonably be expected to result in the consumption or resale in the United States of goods or services exported by the applicant. The Conferees intend that the standards set forth in this subsection encompass the full range of the antitrust laws.

Section 303(b) provides that within 90 days, the Secretary must determine whether the applicant's export trade, export trade activities, and methods of operation meet the standards of Section 303(a). The Secretary shall not issue the certificate without the concurrence of the Attorney General that the standards of Section 303 are met. The certificate must specify the export trade, export trade activities, and methods of operation certified, the person to whom the certificate is issued, and any terms and conditions deemed necessary by the Secretary or the Attorney General to assure compliance with the standards of subsection (a).

Section 303(c) provides for expedited certification where necessary; however, no certificate may issue before 30 days from the date of publication of the Federal Register notice, whether or not the application is expedited.

Section 303(d)(1) provides that the Secretary shall notify the applicant of an adverse determination and the reasons therefore.

Section 303(d) permits an applicant to request reconsideration of the Secretary's decision. The Secretary, with the concurrence of the Attorney General, shall respond within 30 days.

Section 303(e) provides for the return of documents submitted in connection with an application upon written request of an applicant whose certificate of review has been denied.

Section 303(f) provides that any aspect of a certificate procured by fraud is void ab initio.

Section 304(a) provides that the holder of any certificate of review is obligated to report to the Secretary changes relevant to the matters contained in the certificate and may seek an amendment to the certificate to reflect any necessary change. An application for amendment is to be treated as an application for the issuance of a certificate.

Section 304(b)(1) provides that the Secretary shall, at his own initiative or at the request of the Attorney General, seek information from a certificate-holder to resolve any uncertainty concerning compliance. Failure to comply with such a request is grounds for modification or revocation of the certificate pursuant to subsection (b)(a).

Section 304(b)(2) provides that the Secretary of Commerce, at his own initiative or at the request of the Attorney General, may seek revocation of the certificate.

Section 304(b)(3) is intended to assure that the Attorney General investigate persons other than the certificate-holder through use of the civil investigative demand as set forth in the Antitrust Civil Process Act as amended (15 U.S.C. 1311 et seq.) regarding activities which may not be in compliance with the standards in section 303(a). If, upon an investigation, the Attorney General determines that the export trade activities or methods of operation of the certificate-holder no longer comply with section 303(a) standards, he shall advise the Secretary who then must initiate a revocation or modification proceeding under subsection (b)(2).

Section 305(a) provides that a review of a grant or denial of an application for a certificate or an amendment thereto or revocation or modification thereof of any person aggrieved by such determination if such suit is brought within 30 days of the determination. Normally, the administrative record shall be adequate so that it will not be necessary to supplement it with additional evidence.

The Senate bill required, prior to revocation or modification of a certificate, a hearing as appropriate under the circumstances. The House bill did not require a hearing. In following the House approach, the Conferees understood that, should the Secretary nevertheless establish a hearing procedure, S. 734 would not require use of the procedures of the Administrative Procedures Act.

Section 305(b) provides that no action by the Secretary or Attorney General under this title, except for an action under Subsection 305(a), is subject to judicial review.

Section 305(c) makes explicit that any denial by the Secretary, in whole or in part, of a proposal for issuance of a certificate, or amendment thereto, or any determination by the Secretary to revoke the application, or reasons therefor, is not admissible in evidence in any administrative or judicial proceeding in support of a claim under the antitrust laws as defined in this title.

Subsection 306(a) protects a certificate-holder from criminal and civil antitrust actions, under both federal and state laws, whenever the conduct that forms the basis of the action is specified in, and complies with, the terms of the certificate. Conduct which falls outside the scope of, or violates the terms of, the certificate is ultra vires and would not be protected. Such conduct would remain fully subject to criminal sanctions as well as both private and governmental civil enforcement suits under the antitrust laws.

The Conferees agreed that the protections conferred by a certificate extend to all members of a certified entity provided that each member is listed on the certificate.

Section 306(b)(1) permits persons injured by the conduct of a certificate-holder to bring suit for injunctive relief and single damages for a violation of the standards set forth in Section 303(a). Pursuant to section 306(b)(2), any such suit must be brought within two years of the date the plaintiff has notice of the violation. Section 306(b)(3) accords a presumption of legality to persons operating within the terms of conduct specified in a certificate. Subsection (b)(4) permits a certificate holder to recover the cost of defending the suit (including reasonable attorneys fees) if the claimant fails to establish that the standards of section 303(a) have been violated.

Section 306(b)(1) provides that all procedures applicable to antitrust litigation, including laws and rules to expedite a proceeding or to prevent dilatory tactics, apply to actions brought under this title. The standards under section 303(a), the remedies under this subsection, as well as the provisions concerning the statute of limitations, a presumption of validity, and the awarding of costs to the certificate holder, including attorneys fees, remain the exclusive provision governing actions under this Act. Moreover, section 16 of the Clayton Act, so far as it pertains to injunctive actions for threatened (as opposed to actual) injury or to violations of the antitrust laws such as sections 2, 3, 7, and 8 of the Clayton Act, are inapplicable to actions authorized by section 306 of this Act.

Section 306(b)(5) permits the Attorney General, notwithstanding the limitations in section 306(a)(1), to bring suit pursuant to Section 15 of the Clayton Act (15 U.S.C. 25) to enjoin conduct threatening clear and irreparable harm to the national interest.

Both the House and Senate versions contemplated the promulgation of guidelines to assist applicants, potential applicants, and the public in understanding the issuing authority's interpretation of the certification criteria. The Conferees agreed upon section 307, which is similar to the House version, except that the Secretary issues the guidelines. Under section 307, the Secretary, with the concurrence of the Attorney General, may publish guidelines that describe conduct with respect to which determinations have been made or might be made,

with a summary of the factual and legal bases underlying the determinations. The guidelines may be based upon real or hypothetical cases. Because the purpose of this section is to disseminate information, the Secretary is not required to use rulemaking procedures, although he may if he so chooses.

The Conferees agreed upon section 308, which tracks the Senate version of a similar provision. Under section 307, every person to whom a certificate has been issued shall submit to the Secretary an annual report, in such form and at such time that he may require, that updates, where necessary, the information required by section 302(a).

The Conferees agreed upon section 309, which tracks version in the House. Under subsection 30.9(a), all information submitted by a person in connection with the issuance, amendment, or revocation of a certificate of review is exempt from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. § 552. In addition, under subsection (b)(1), no officer or employee of the United States shall disclose commerical or financial information submitted in connection with the issuance, amendment or revocation of a certificate of review if the information is privileged or confidential and if disclosure of the information would cause harm to the person who submitted the information. This limitation is subsect to six exceptions, contained in subparagraph 309(b)(2). The first exception in subsection 309(b)(2)(A), covers requests of Congress or a committee of Congress. This provision would not authorize release to an individual Member of Congress, but would authorize release to a Chair acting for the Committee or Subcommittee. The Conferees understand that Committees will exercise appropriate care to protect confidential information. The second exception, subparagraph 309(b)(2)(B), permits disclosure in a judicial or administrative proceeding subject to an appropriate protective order; the third exception, subparagraph 309(b)(2)(C), permits disclosure with the consent of the submitting party; the fourth exception, suparagraph 309(b)(2)(D), permits necessary disclosures in making determinations on applications; the fifth exception, subparagraph 309(b)(2)(E), permits disclosure in accordance with statute; and the final exception, subparagraph 309(b)(2)(F), permits disclosure to agencies of the United States and the States if the receiving agency will agree to the limitation contained in subparagraph (A) through (E).

Both the House and Senate versions contemplated the issuance of implementing rules. The Conferees agreed on section 310, which directs the Secretary, with the concurrence of the Attorney General, to promulgate rules and regulations necessary to carry out the purposes of the Act.

Both the Senate and the House versions defined important terms. The Conferees agreed to include, in section 311, a definition section which adopts elements from both versions as well as certain additional definitions necessary to ensure proper interpretation of Title III.

The Conferees agreed upon section 312, which is similar to the effective date provision in the House version. Under subsection 312(a), all provisions except sections 302 and 303 take effect immediately upon enactment of the legislation. Under subsection 312(b), sections 302 and 303 the application and issuance provisions, take effect 90 days after the rules are promulgated under section 310.

TITLE IV—FOREIGN TRADE ANTITRUST IMPROVEMENTS

The House and Senate Conferees agreed upon a new Title IV which supplements the antitrust certification provisions (Title III).

The new title incorporates two sections from H.R. 5235, passed by the House on August 3, 1982. These sections modify the Sherman Act and Section 5 of the Federal Trade Commission Act to require a "direct, substantial, and reasonable foreseeable" effect on commerce in the United States, or on the export commerce of a U.S. resident, as a jurisdictional threshold for enforcement actions.

For title I of the House amendment and modifications committed to conference:

CLEMENT J. ZABLOCKI,
JONATHAN BINGHAM,
DENNIS E. ECKART,
DON BONKER,
HOWARD WOLPE,
WM. BROOMFIELD,
ROBERT J. LAGOMARSINO,
ARLEN ERDAHL,
BENJAMIN A. GILMAN,
MILLICENT FENWICK,

For title II of the House amendment and modifications committed to conference:

FERNAND ST GERMAIN,
FRANK ANNUNZIO,
JOE MINISH,
JOHN J. LAFALCE,
DOUG BARNARD, JR.
J. W. STANTON,
CHALMERS P. WYLIE,
STEWART B. MCKINNEY,
JIM LEACH,

For title III of the House amendment and modifications committed to conference:

PETER W. RODINO,
BILL HUGHES,
ROBERT MCCLORY,
M. CALDWELL BUTLER,
Managers on the Part of the House.

JAKE GARN,
JOHN HEINZ,
WILLIAM ARMSTRONG,
JOHN H. CHAFEE,
JOHN C. DANFORTH,
DON RIEGLE,
BILL PROXMIRE,
CHRISTOPHER J. DODD,
ALAN DIXON,
Managers on the Part of the Senate.

□ 1600

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. Mr. Speaker, I take this time for the purpose of inquiring of either the Chair or the distinguished majority leader the balance of the program, at least as currently scheduled.

I am happy to yield to my friend from Texas, the distinguished majority leader.

Mr. WRIGHT. I thank the gentleman for yielding.

In response to the distinguished minority leader, it is the purpose of the Chair at this time to take unanimous-consent requests which have been cleared on both sides and on which there is no controversy.

As we understand it, there are some four that fit in that category.

Immediately following those unanimous-consent requests, it is the purpose of the Chair to recognize the gentleman from Mississippi (Mr. WHITTEN), the chairman of the Committee on Appropriations, in order that he may bring up the conference report on the continuing appropriations.

Then other available conference reports will follow. There may be some conference reports that would be ready for our consideration.

Mr. MICHEL. Mr. Speaker, I thank the distinguished majority leader.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2330) entitled "An act to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House with amendments to bills of the Senate of the following titles:

S. 2273. An act to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes;

S. 2420. An act to protect victims of crime; and

S. 2577. An act to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1983, and for other purposes.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1018) entitled "An act to protect and conserve fish and wildlife resources, and for other purposes," agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. STAFFORD, Mr. CHAFEE, Mr. GORTON, Mr. RANDOLPH, and Mr. MOYNIHAN to be the conferees on the part of the Senate.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 1371. An act to amend section 12 of the Contract Disputes Act of 1978;

H.R. 3467. An act to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes;

H.R. 6204. An act to provide for appointment and authority of the Supreme Court Police, and for other purposes; and

H.R. 6946. An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 6946) entitled "An act to amend title 18 of the United States Code to provide penalties for certain false identification related crimes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. THURMOND, Mr. LAXALT, Mr. HATCH, Mr. SIMPSON, Mr. HUMPHREY, Mr. BIDEN, Mr. DECONCINI, and Mr. HEFLIN to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 2574. An act to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes;

S. 2671. An act to provide for the establishment of a Commission on the Bicentennial of the Constitution;

S. 3002. An act to increase the authorization of appropriations for the Allen J. Ellender fellowship program, and for other purposes;

S.J. Res. 228. Joint resolution to provide for the designation of the week beginning on October 24, 1982, as "National Tourette Syndrome Awareness Week";

S.J. Res. 236. Joint resolution to designate the week of October 24 through 28, 1982, as "National Water Resources Week";

S.J. Res. 237. Joint resolution designating November 14, 1982, as "National Retired Teachers Day";

S.J. Res. 260. Joint resolution to designate the period commencing January 1, 1983, and ending December 31, as the Tricentennial Anniversary Year of German Settlement in America";

S.J. Res. 261. Joint resolution to designate "National Housing Week"; and

S.J. Res. 262. Joint resolution to designate the month of November 1982 as "National Christmas Seal Month."

The message also announced that the Secretary of the Senate be directed to return to the House of Representatives, pursuant to House Resolution 605, the bill (S. 1210) entitled "An act amending the Environmental Quality Improvement Act of 1970," together with all accompanying papers.

PREFERENTIAL TREATMENT IN ADMISSION OF CERTAIN CHILDREN OF U.S. CITIZENS

Mr. MAZZOLI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1698) to amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of U.S. citizens, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

Mr. FISH. Mr. Speaker, reserving the right to object, and I do so only with great joy that we are here at this point, to ask the chairman of the Subcommittee on Immigration, Refugees, and International Law of the Committee on Judiciary if he would explain S. 1698.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield to me?

Mr. FISH. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Speaker, let me say to my friend from New York, the ranking member on our subcommittee, that what the gentleman from Kentucky is going to do in a few more legislative steps is to bring to the attention of the House the so-called Amerasian bill in order that, before we leave for the pre-election recess, we will have passed and made a matter of law a method by which these young children in Southeast Asia, fathered by U.S. citizens, will be able to come to this country.

Mr. FISH. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the Senate bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 204 of the Immigration and Nationality Act (8 U.S.C. 1154) is amended by inserting at the end thereof the following new subsection:

"(h)(1) Any alien claiming to be an alien described in paragraph (2) of this subsection (or any person on behalf of such an alien) may file a petition with the Attorney General for classification under section 201(b), 203(a)(1), or 203(a)(4), as appropriate. After an investigation of the facts of each case the Attorney General shall, if he has reason to believe that the alien is an alien described in paragraph 2 of this subsection, approve the petition and forward one copy to the Department of State.

"(2) The Attorney General may approve petitions under paragraph (1) of this subsection if he has received an acceptable guarantee of financial support as described in paragraph (4) of this subsection and if he has reason to believe that—

"(a) the alien was born in Korea, Vietnam, Laos, Kampuchea, or Thailand after 1950; and

"(B) the alien was fathered by a United States citizen.

"(3) In considering petitions filed under paragraph (1), the Attorney General shall—

"(A) consult with appropriate governmental officials and officials of private voluntary organizations in the country of the alien's birth in order to make the determination described in subparagraphs (A) and (B) of paragraph 2; and

"(B) consider the physical appearance of the alien and any evidence provided by the petitioner, including birth and baptismal certificates, local civil records, photographs of, and letters or proof of financial support from, a putative father who is a citizen of the United States, and the testimony of witnesses, to the extent it is relevant or probative.

"(4)(A) A guarantee of financial support for an alien described in paragraph (2) must—

"(i) be signed in the presence of an immigration officer or consular officer by an individual (hereinafter in this paragraph referred to as the 'sponsor') who is twenty-one years of age or older and is a citizen of the United States or alien lawfully admitted for permanent residence, and

"(ii) provide that the sponsor agrees to furnish, during the five-year period beginning on the date of the alien's acquiring the status of an alien lawfully admitted for permanent residence, or beginning on the date of the alien's acquiring the status of an alien lawfully admitted for permanent residence and ending on the date on which the alien becomes twenty-one years of age, whichever period is longer, such financial support as is necessary to maintain the family in the United States of which the alien is a member at a level equal to at least 125 per centum of the current official poverty line (as established by the Director of the Office of Management and Budget, under section 673(2) of the Omnibus Budget Reconciliation Act of 1981 and as revised by the Secretary of Health and Human Services under section 652 of such Act) for a family of the same size as the size of the alien's family.

"(B) A guarantee of financial support described in subparagraph (A) may be enforced with respect to an alien against his sponsor in a civil suit brought by the Attorney General in the United States district court for the district in which the sponsor resides, except that a sponsor of his estate shall not be liable under such a guarantee if the sponsor dies or is adjudicated a bankrupt under title II, United States Code.".

AMENDMENTS OFFERED BY MR. MAZZOLI

Mr. MAZZOLI. Mr. Speaker, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. MAZZOLI:

Page 2, lines 9 and 10, strike out "(h)(1)" and "(2) of this subsection" and insert in lieu thereof "(g)(1)" and "(2)(A)", respectively.

Page 2, beginning on line 14, strike out "if" and all that follows up to the comma on line 16 and insert in lieu thereof "if the conditions described in paragraph (2) are met".

Pate 2, line 17, strike out "Department" and insert in lieu thereof "Secretary".

Page 2, amend lines 18 through 25 to read as follows:

"(2) The Attorney General may approve a petition for an alien under paragraph (1) if—

"(A) he has reason to believe that the alien (i) was born in Korea, Vietnam, Laos, Kampuchea, or Thailand after 1950 and before the date of the enactment of this subsection, and (ii) was fathered by a United States citizen;

"(B) he has received an acceptable guarantee of legal custody and financial responsiblity described in paragraph (4); and

"(C) in the case of an alien under 18 years of age, (i) the alien's placement with a sponsor in the United States has been arranged by an appropriate public, private, or State child welfare agency licensed in the United States and actively involved in the intercountry placement of children and (ii) the alien's mother or guardian has in writing irrevocably released the alien for emigration.

Page 3, amend lines 6 and 7 to read as follows: "determinations described in subpara-

graphs (A) and (C)(ii) of paragraph (2); and".

Page 3, line 15, and page 4, line 16, strike out "financial support" and insert in lieu thereof "legal custody and financial responsibility".

Page 3, line 20, insert ", is of good moral character," after "older".

Page 3, line 23, insert after "agrees" the following: "(I) in the case of an alien under 18 years of age, to assume legal custody for the alien after the alien's departure to the United States and until the alien becomes 18 years of age, in accordance with the laws of the State where the alien and the sponsor will reside, and (II)".

Page 4, line 1, insert "during the period" after "or".

Page 4, lines 20 and 22, strike out "of his estate" and "title II" and insert in lieu thereof "or his estate" and "title 11", respectively.

Mr. MAZZOLI (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. MAZZOLI. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from New Jersey (Mr. RODINO) the chairman of the Committee on the Judiciary.

Mr. RODINO. Mr. Speaker, I rise in support of the request being made by the gentleman from Kentucky (Mr. MAZZOLI). I know that the gentleman from New York (Mr. FISH) who has cosponsored the bill, along with the gentleman from Connecticut (Mr. MCKINNEY) believe this is a worthwhile endeavor and I am sure it will have the support of the whole House.

Mr. Speaker, I am pleased that we are able to consider this matter in this rather extraordinary fashion.

The Committee on the Judiciary just this week favorably reported a similar measure to the House as a part of a comprehensive immigration reform bill (H.R. 6514).

Some of the provisions contained in the committee version of this legislation are now contained in the amendment which has been proposed by the gentleman from Kentucky (Mr. MAZZOLI), the chairman of the Judiciary Subcommittee on Immigration, Refugees, and International Law.

Enactment of this legislation is certainly long overdue and it responds in an effective and practical manner to a most difficult humanitarian problem. In my judgment, it recognizes a moral responsibility that we have to these children who have been fathered by Americans abroad.

The purpose of this amendment is to insure the safety and well-being of these children after they immigrate to the United States. There is certainly a consensus that every possible step should be taken to insure that the sponsorship process is legitimate. The committee amendment accomplished this by requiring the involvement of State child welfare agencies as well as other public and private agencies who are familiar with the process of intercountry adoption and the intercountry placement of unaccompanied minors, orphans, and other similarly situated children.

The potential for exploitation must be addressed and the amendement embodies some of the precautions that have been taken in recent years with regard to the intercountry adoption of children and the process of admitting refugees who are unaccompanied minors from various countries of first asylum in Southeast Asia.

As noted in a recent Washington Post editorial the committee's action with respect to the Amerasian legislation "preserves the spirit of the bill and eliminates some possible problems."

Because of the unique nature of this legislation, it is the committee's intent that the Attorney General should closely monitor the implementation of this legislation and report to the Judiciary Committee on a regular basis concerning the sponsorship process and the progress that is made under this legislation. In fact, the Attorney General is directed to file specific reports to the Committee on the Judiciary on this matter, as well as on the impact that the legislation has had on existing family relations abroad, particulary in view of my concern that some family separation and dislocation will result from this bill. The committee also expects that the Attorney General issue regulations to specifically implement these safeguards and it is anticipated that close consultation with the Judiciary Committee is an essential requirement in that process.

Once again, the protective provisions contained in the amendment are essential in insuring that these children will be properly treated after arrival here and I certainly concur in the following recommendations made by the Children's Committee on Amerasian Children and Youth of the American Council of Voluntary Agencies for Foreign Service, Inc.:

> The placement of Amerasian chidren and young adults in the United States should be carried out by well qualified child welfare agencies. Different alternatives such as family reunification, adoption, foster care or group placement should be considered according to individual cases.

It is also pointed out by that same committee that Amerasian children will indeed have special needs based on the severe social and economical hardships that they have experienced over the years because of their mixed heritage.

It is evident that these individuals, once admitted to the United States, will require special counseling and other social services leading to their assimilation into American society. It is the committee's hope that adequate resources will be made available to insure that these social services are properly and effectively delivered to these Amerasian children.

In summary, this is indeed extremely meritorious legislation and I urge my colleagues support of this bill and the amendment that is now under consideration.

Mr. FISH. Mr. Chairman, will the chairman of the subcommittee yield to me?

Mr. MAZZOLI. I yield to my friend, the gentleman from New York, Mr. FISH, the ranking minority member of the subcommittee.

Mr. FISH. Mr. Speaker, I am pleased to speak in support of House passage of S. 1698, legislation that will permit children born in certain Asian countries and fathered by Americans to come at long last to the United States.

The gentlemen from Connecticut (Mr. MCKINNEY) deserves great credit for his untiring efforts in this body to champion the cause of these forgotten sons and daughters of Americans. He has served as the conscence of the Congress on a matter of great humanitarian concern and has brought the plight of these children to the forefront of public attention.

The Immigration Reform and Control Act of 1982, which has been reported favorably by the House Committee on the Judiciary, also includes relief for persons often referred to as Amerasians. The recent passage by the Senate of S. 1698, however, gives us a vehicle to address this problem in the current session. Amerasians have waited many years to come home to the land of their fathers. Further delay would be unconscionable.

A humane people cannot consign their sons and daughters to live lives as outcasts in other lands. The heartrending accounts of the struggles of these children to hold onto some measure of dignity—vividly described in testimony before the House Immigration Subcommittee—convince me beyond doubt of the need for this legislation.

The United States will be a better country as a result of what we are about to do today.

Mr. MAZZOLI. Madam Speaker, I yield to my friend, the gentleman from Connecticut (Mr. MCKINNEY).

Mr. MCKINNEY. I thank the chairman of the subcommittee.

Madam Speaker, it is with great pleasure that I join with my colleagues in passing S. 1698, the Senate companion to H.R. 808, the Amerasian Immigration Act. As the legislation now states, it will allow individuals born to U.S. citizens and Asian mothers in Korea, Vietnam, Laos, Thailand, and Cambodia (Kampuchea) to immigrate to the United States under their proper preference—as sons and daugh-

ters of U.S. citizens. The passage of the legislation will finally allow these individuals the opportunity to live a life where they are not forever condemned as outcasts.

The long and arduous legislative effort over the past 4 years could not have been successfully carried through without the assistance of the many citizen groups, private voluntary agencies, interested individuals and those in Congress who persisted throughout the legislative malaise. These include Father Alfred Keane and Friends of Children who first brought the plight of the Amerasians to my attention, Jodie and Dick Darragh of Americans for International Aid who coordinated and kept the public interest going strong, Senator JEREMIAH DENTON and Senator CARL LEVIN who introduced and carried the Amerasian legislation through the Senate and finally to the 274 cosponsors of my legislation in the House who garnered the support to finally bring the bill up for House consideration. To all these people I give my deep thanks.

Mr. MAZZOLI. Madam Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. MCCLORY).

Mr. McCLORY. I thank the gentleman from Kentucky for yielding to me.

Madam Speaker, this is important remedial legislation designed to assist certain neglected sons and daughters of U.S. citizens. The hearing record before the Subcommittee on Immigration, Refugees, and International Law on H.R. 808, a similar bill introduced by the gentleman from Connecticut (Mr. MCKINNEY), amply documents the necessity of providing opportunities for Amerasians to come to the United States.

Relief for Amerasians is part of the comprehensive immigration bill that has been reported favorably by the Committee on the Judiciary. I had hoped that the Immigration Reform and Control Act of 1982 would be brought before us and passed during this session. It is not going to happen before we adjourn today, but I am happy that this bill relating to Amerasians will be acted upon favorably at this time.

I join with my colleagues in commending the gentleman from Connecticut (Mr. MCKINNEY) for his extraordinary work in building a broad bipartisan consensus in this body for the action we are about to take today.

Mr. MAZZOLI. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, the bill before the House today, S. 1698, a bill to provide immigration benefits to Amerasian children represents all that is good and humane about our country.

This is truly a landmark piece of legislation.

The Amerasian children, those half-Asian, half-American children fathered by Americans while serving our country in Asia, have suffered greatly because of their mixed heritage. In Vietnam, they are known as the "dust children," often living in the streets without any food or shelter.

The legislation we are considering will allow these Amerasians to come to the United States where they can live rich and fulfilling lives. Many of them will be reunited with fathers they have not seen in many years. Others will be adopted or sponsored by generous Americans who want to help these young people lead happy lives.

The discrimination these Amerasians suffer has been documented in hearings before the Subcommittee on Immigration, Refugees, and International Law. Recently, Gen. John Vesey, Chairman of the Joint Chiefs of Staff came to my office to put in his own personal views on behalf of the Amerasian children who he has seen during his tours of duty in Southeast Asia.

I will be offering an amendment to the bill which makes various technical corrections in the Senate passed version. It also tightens the sponsorship system for these Amerasians so that we can be sure that they can be placed with proper sponsors when they come to our country.

This legislation has widespread support across our land. I am proud of all those American people who have taken the time to write or telephone on behalf of this important legislation. I also want to pay tribute to my colleagues STEWART MCKINNEY and BARNEY FRANK and to Senators JEREMIAH DENTON and CARL LEVIN who have worked so diligently on this bill.

I also want to thank Chairman PETER W. RODINO, JR., Congressman HAMILTON FISH, my Senate counterpart Chairman Senator AL SIMPSON, and the Speaker of this House, all of whom have worked to pass this important bill.

This legislation is strongly supported by the administration. Religious organizations and voluntary agencies across the country support it.

This is a good and important bill, and I urge its adoption with the amendments that I will offer.

Madam Speaker, at this point I yield such time as he may consume to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. I want to thank the gentleman from Kentucky (Mr. MAZZOLI) and commend him, and particularly the gentleman from Connecticut (Mr. MCKINNEY).

Madam Speaker, I am very pleased to have the chance at last to speak on floor of this House in favor of the bill to bring our Amerasian children home. I believe it is a matter of simple justice for us in the United States to welcome those children who were fathered by American servicemen in various Asian countries. It has been well documented that these children suffer severe discrimination in the countries of their birth, for no reason other than their mixed parentage. It would be unworthy of a great nation like the United States to refuse to rescue these young people from lives of torment and abuse. Obviously, there are limits to what any nation can absorb in terms of foreign immigration. But we are talking here about a relatively small number of people. And more important, we are talking about not only young people but vulnerable young people who were brought into this world as a result of American military people who were stationed overseas.

I first learned of this measure when my colleague from Massachusetts (Mr. DONNELLY) asked me to see Father John Keane, of Milton, Mass., in Mr. DONNELLY's district. I listened with great interest and growing concern to Father Keane's information about the plight of these young people, with whom he had become very familiar in this work in South Korea on their behalf. From that point on, as a member of the Subcommittee on Immigration, I made passage of this legislation a high priority.

I want, in particular, to express my appreciation to the gentleman from Connecticut, Mr. MCKINNEY, for the tenacity and skill he has shown in bringing this issue to the attention of our colleagues, and in bringing it to final passage. I have been pleased to work with him on this important cause. The American economy will not be affected by the small number of people to be admitted under this bill; nor will the job market for Americans. What will be affected are the lives of these young people. We have today taken an action that will open the doors of America to people who have been mistreated by no fault of their own.

I am proud to be a Member of the House that accomplishes this purpose.

Mr. MAZZOLI. Madam Speaker, at this time I yield such time as he may consume to the gentleman from Michigan (Mr. SAWYER), a member of the committee.

Mr. SAWYER. Madam Speaker, I thank the gentleman from Kentucky.

I just want to congratulate the gentleman's subcommittee for this bill. I think it is long overdue. It acknowledges, and I acknowledge, the work of the gentleman from Connecticut (Mr. MCKINNEY) who has made this kind of his project, and the gentleman from Kentucky for seeing it through.

I think it does equity where equity should have been done. I think this is a very, very fine piece of legislation

and I congratulate all Members who have worked on it.

Mr. MAZZOLI. Madam Speaker, I yield very briefly to my friend, the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. I thank the gentleman for yielding to me.

Madam Speaker, we are very fortunate to live in this country, so fortunate, I am afraid, that we do not always comprehend the extent to which our political and social system differ from those in other countries.

It is simply a fact that, in many countries in which the U.S. military has had a significant presence those societies place a premium on racial purity. Racial purity, Mr. Speaker, with all the consequences of prejudice, discrimination, and cruel exclusionary practices that implies.

The children fathered by our overseas personnel in such nations are regarded as nonpeople, denied the opportunity to go to school or hold jobs, denied even the right to a last name, because last names are given by the father. If these children were worthy, the reasoning goes, their fathers would claim them.

But we, the land of their fathers, have refused to claim them.

It is not suprising, then, that in such desperation these young people turn to lives of crime and prostitution; no other avenues are open to them.

Madam Speaker, this bill would not increase the numbers of people entering the United States each year as immigrants; it would not increase the number of people on welfare; it would not cost the taxpayers anything. It would simply remove an unreasonable impediment in our existing law.

Madam Speaker, I believe that if my colleagues were fully aware of how little this bill requires of the U.S. Treasury, and how profoundly it would alter for the better the lives of these children, not one of my colleagues would vote in opposition of it, and I urge all of my colleagues to vote for this long overdue bill.

Mr. MAZZOLI. Madam Speaker, I yield at this time to the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Madam Speaker, I would like to commend the committee and our colleague, Mr. MCKINNEY, on this legislation. I am very pleased to be a coauthor of this bill—it is in the finest tradition of our American values.

The House has faced a clear moral challenge for our Nation. The immigration of Amerasian children is a problem which has lingered too long without resolution. These children, who were fathered by American soldiers in the Korean and Vietnam wars, often are confronted with hostile conditions in their native lands. They have the right to emigrate to our country. Today we have given them that right.

Mr. MAZZOLI. Madam Speaker, I yield such time as he may consume to the gentleman from California (Mr. MINETA).

Mr. MINETA. Madam Speaker, I thank the gentleman for yielding. I commend the chairman of the subcommittee for this legislation, and the gentleman from Connecticut (Mr. MCKINNEY) for their perseverance in this matter.

Madam Speaker, I rise today in earnest support of the Amerasian Immigration Act.

The argument for this bill is simple and straightforward. It rests on the basic principles of compassion, justice and responsibility.

Madam Speaker, as we all know, this legislation deals with the heartbreaking problem of the children American servicemen left behind in Southeast Asia.

These children have committed no crime. These children have done no wrong. Yet they are in a sad and unhappy state.

This legislation before us today takes a major step toward resolving that unhappy situation. The legislation is modest, well reasoned, and long overdue.

This is a nation of fairness, a nation that knows right from wrong. In recognition of this problem, and in acceptance of our responsibilities, I am confident we in this Congress will pass this legislation today. We can do no less.

Madam Speaker, in passing this legislation today we should note with pride the hard work Mr. MCKINNEY of Connecticut has devoted to this effort for several years now. Without him, we would not be taking this action today. Mr. MAZZOLI, the chairman of the Subcommittee on Immigration, Refugees, and International Law has also earned our gratitude for moving this legislation along.

● Mr. DASCHLE. Madam Speaker, I rise in strong support of the Amerasian bill. This legislation. which gives first preference under our immigration law to Amerasian children, is long overdue. I cosponsored this bill in both the 96th and 97th Congress and have been pleased to see the growth of interest in these sons and daughters of American citizens. Congressman MCKINNEY is to be particularly commended for his tireless efforts to publicize this issue and to bring this legislation to the House floor.

The war in Southeast Asia has done much long-lasting damage, both at home and abroad, and it is heartening to see us finally take this obvious action to right some of the wrong that has been perpetrated upon these children. From letters I have received, people I have spoke with, and from what I have seen and read in the media, there appears to be very strong support for granting Amerasian children their rights. I look forward to these children being received with open arms and understanding hearts by their parents and others in this country.●

● Mr. GILMAN. Madam Speaker, I rise in support of S. 1698, which will give preferential admission to the United States to the children of U.S. citizens and Asian mothers. I congratulate Senator SIMPSON for his work in getting this bill through the Senate and the gentleman from Connecticut (Mr. MCKINNEY) for his determination in making certain that we as a nation meet our responsibility to these children. These children have been denied the dignity and rights of true citizenship in their countries of birth—Korea, Vietnam, Laos, Thailand, and Cambodia. In these lands these children have roamed the streets and been treated as worthless in the eyes of those responsible for the administration of justice, education, and other basic rights of citizenship.

It is a sincere privilege to welcome these children to their true homeland by passing this legislation, which will give them No. 1 category status under our immigration laws for admission to this country. To these children we say, your fatherland embraces you, and to those who have worked so diligently in seeing that this legislation becomes a reality I say, well done. Today we as a nation live up to the high standards we are reminded of every time we fly into New York over the mighty lady of the harbor—only this time we are asking for our tired and poor who yearn to be free.●

● Mr. DONNELLY. Madam Speaker, in Korea and Indochina, there may be as many as 80,000 children of Asian women, fathered by American servicemen. This legislation before us today recognized that they are not only the children of American soldiers, they are the children of America. As a nation, we sent their fathers to Asia in our country's service, and we share the responsibility for these youngsters.

Tragically, many of these children are outcasts. The Vietnamese term for them translates to "the dust of life." In Korea, they are denigrated as "halfbreeds." Today, we can act to end that tragedy for thousands of these sons and daughters of America.

I congratulate the gentleman from Connecticut (Mr. MCKINNEY) for his persistent efforts to see this legislation through the Congress. The chairman of the Judiciary Committee, Mr. RODINO, the chairman of the Immigration Subcommittee, Mr. MAZZOLI, and the Speaker also deserve credit for their assistance in bringing this important bill before us.

It is in no way to diminish the credit those gentlemen deserve to say the tireless devotion of Father Alfred V. Keane to the cause of the Amerasian children is largely responsible for our action here today. Father Keane is a Maryknoll missionary from Milton, Mass., who has worked for a quarter of a century with the children of Korea.

Father Keane has kept the issue of the Amerasian children before us and before the public. It is his unflagging faith that ours is, indeed, one nation under God, with liberty and justice for all, that has touched the conscience of this institution and brought us to acknowledge our responsibility.●

The SPEAKER pro tempore (Ms. FERRARO). The question is on the amendments offered by the gentleman from Kentucky (Mr. MAZZOLI).

The amendments were agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MAZZOLI. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

TRAINING OPPORTUNITIES FOR EMPLOYEES UNDER OFFICE OF ARCHITECT OF THE CAPITOL AND THE BOTANIC GARDEN

Mr. FORD of Michigan. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5145) to amend title 5, United States Code, to provide training opportunities for employees under the Office of the Architect of the Capitol and the Botanic Garden, and for other purposes with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 3, after line 3, insert:

SEC. 3. (a) Sections 8332(c)(1)(A), 8332(j)(2)(A), and 8334(j)(1) of title 5, United States Code, as amended by title III of the Omnibus Budget Reconciliation Act of 1982, are each amended by striking out "month" and inserting in lieu thereof "period".

(b) Section 8332 (c)(1)(B) of such title 5 (as so amended) is amended to read as follows:

"(B) the service of an individual who first becomes an employee or Member on or after October 1, 1982, shall include credit for—

"(i) each period of military service performed before January 1, 1957, and

"(ii) each period of military service performed after December 31, 1956, and before the separation on which the entitlement to annuity under this subchapter is based, only if a deposit (with interest, if any) is made with respect to that period, as provided in section 8335(j) of this title.".

(c) Section 8334(e)(3) of such title 5 (as so amended) is amended by striking out "calendar" the second and third times such term appears and inserting in lieu thereof "fiscal".

(d) Section 8334(h) of such title 5 (as so amended) is amended by striking out "and (d)" and inserting in lieu thereof ", (d), and (j)".

(e)(1) Section 8334(j)(1) of such title 5 (as so amended) is amended by striking out "within 90 days after the effective date of this subsection", and by striking out all that follows "December 1956" and inserting in lieu thereof a period and the following: "The amount of such payments shall be based on such evidence of basic pay for military service as the employee or Member may provide, or if the Office determines sufficient evidence has not been so provided to adequately determine basic pay for military service, such payment shall be based upon estimates of such basic pay provided to the Office under paragraph (4).".

(2) Section 306(g) of the Omnibus Budget Reconciliation Act of 1982 is amended by striking out the period and inserting the following: "; except that any employee or Member who retired after the date of the enactment of this Act and before October 1, 1983, or is entitled to an annuity under chapter 83 of title 5, United States Code, based on a separation from service occurring during such period, or a survivor of such individual, may make a payment under section 8334(j)(1) of title 5, United States Code. Regulations required to be issued under section 8334(j)(1) of title 5, United States Code, shall be issued by the Office of Personnel Management within 90 days after such effective date.".

(f) Section 8342(a)(1)(B) of such title 5 (as so amended) is amended by striking out "such position" and inserting in lieu thereof "such a position".

(g) Section 8348(a)(1)(B) of such title 5 is amended by inserting after "title" the following: "and in withholding taxes pursuant to section 3405 of title 26".

(h)(1) Section 301(d)(1) of the Omnibus Budget Reconciliation Act of 1982 is amended by inserting after "such position" the following: ", in accordance with regulations issued by the Office of Personnel Management," and by inserting after the first sentence the following: "For purposes of the preceding sentence, the amount of any increase in any individual's retired or retainer pay which takes effect during any fiscal year shall be determined on the basis of the additional amount such individual receives after the application of the preceding provisions of this section and section 5532(b) and (c) of title 5, United States Code.".

(2) Section 301(d)(4) of such Act is amended by striking out "reduction in" and inserting in lieu thereof "deduction from".

(3) Section 301(d) of such Act is amended by adding at the end thereof the following new paragraph:

"(5) The Secretary of Commerce, the Secretary of Defense, the Secretary of Health and Human Services, or the Secretary of Transportation, as appropriate, shall furnish such information to employing agencies, the Secretary of the Senate, and the Clerk of the House of Representatives as may be necessary for the administration of this subsection."

(i) Section 302(c) of such Act is amended in paragraph (1) by striking out ", and shall apply with respect to individuals retiring on or after such date" and in paragraph (3) by inserting after "who" the following: "is separated from employment as a technician on or after October 1, 1982. Such subsection (h) shall also apply to any technician".

(j)(1) Section 303(d)(1) of such Act is amended by striking out "made" and inserting in lieu thereof "for which application is received by either the employing agency or the Office of Personnel Management" and by adding at the end thereof the following: "Notwithstanding the preceding two sentences, the amendments made by subsection (a) shall apply in the case of any deposit for military service under section 8334(j) of title 5, United States Code (as added by section 306(d) of this Act), regardless of whether such military service was performed before or after October 1, 1982.".

(2) Section 8344(a) of such title 5 is amended in the second sentence by inserting after "pay" the following: "unless the individual elects to have such deductions withheld under subparagraph (A)", in subparagraph (A), by inserting before "his annuity" the following: "deductions for the Fund may be withheld from his pay (if the employee so elects), and", and, in the eighth sentence, by inserting after "Fund" the following: "(to the extent deposits or deductions have not otherwise been made)".

(k)(1) Section 307(a) of such Act is amended by inserting after "this Act" the following: "or who is entitled to an annuity based on a separation from service occurring on or before such date of enactment".

(2) Section 307(b) of such Act is amended by striking out "insurance benefits under section 202(a)" and inserting in lieu thereof "or survivors' insurance benefits under section 202" and by inserting after "such old-age" the following: "or survivors' ".

(3) Section 307(d)(1) of such Act is amended by striking out "insurance benefits under section 202(a)" and inserting in lieu thereof "or survivors' insurance benefits under section 202".

(l) Section 310(b)(1) of such Act is amended by inserting "pay periods beginning in" before "fiscal years" and by striking out "under the General Schedule" and inserting in lieu thereof "as defined in section 5504(b) of title 5, United States Code".

(m) Section 351 of such Act is amended—

(1) by striking out subsection (c) and redesignating subsections (d) and (e) as subsections (c) and (d),

(2) in subsection (c), as so redesignated—

(A) by striking out "The" and inserting in lieu thereof "(1) Except as provided in paragraph (2), the", and

(B) by adding at the end thereof the following new paragraph:

"(2) The amendments made by this section shall not apply to any employee who is serving a tour of duty at a post of duty in Alaska or Hawaii on the date of the enactment of this Act during—

"(A) such tour of duty, and

"(B) any other consecutive tour of duty following such tour of duty.", and

(3) by striking out "subsections (c) and (d)" in subsection (d), as so redesignated, and inserting in lieu thereof "subsection (c)".

(n) The amendments made by this section shall take effect as of the date of the enactment of the Omnibus Budget Reconciliation Act of 1982.

Page 3, after line 3, insert:

SEC. 4. (a) The Office of Personnel Management shall determine the amount by which the Government contribution under section 8906(b) of title 5, United States Code, for the 1983 contract year is less than the Government contribution which would have been determined under such section 8906(b) for such contract year if the Government contribution had been calculated by using the two employee organization plans which in 1981 satisfied the standard set forth in section 8906(a)(3) of such title.

(b) The Government shall pay the amount of the difference determined under subsection (a) to the contingency reserves of all health benefits plans for contract year 1983 in proportion to the estimated number of individuals enrolled in such plans during 1983. Such payments shall be paid by the appropriate agencies (including the Postal Service and the Postal Rate Commission) from the appropriations referred to in section 8906(f) and (g) of title 5, United States code, in the same manner as if such payments were Government contributions, and in amounts determined appropriate by the Office of Personnel Management.

Page 3, after line 3, insert:

SEC. 5. (a) Subparagraph (B) of section 3595(b)(3) of title 5, United States Code, is amended by inserting "(i)" after "entitled" and by inserting after "that position" the following: "or (ii) be detailed by the Office to any vacant Senior Executive Service position for which the Office deems the employee to be qualified in any agency for a period not to exceed 60 days, and be placed in such position by the Office after the period of such detail, unless the head of the agency determines that the carreer appointee is not qualified for such position.".

(b) Paragraph (3) of section 3595(c) of such title is amended to read as follows:

"(3) in the event the career appointee is not placed under subsection (b)(3) of this section—

"(A) whether the Office of Personnel Management took all reasonable steps to achieve such placement, and

"(B) the decision of an agency under subsection (b)(3)(B) of this section that the career appointee is not qualified to be placed in a position.".

(c)(1) Except as provided in paragraph (2), the amendment made by this section shall take effect on the date of the enactment of this Act.

(2) The amendments made by this section shall apply to an individual who is a career appointee on or after September 30, 1982, except that any individual who is a career appointee on September 30, 1982, and who is described in section 3595(b)(3) of title 5, United States Code, may not be removed before December 15, 1982 due to a reduction in force unless the removal is under section 3595 (b)(4)(A) of such title on the grounds the individual declined a reasonable placement offer.

Mr. FORD of Michigan (during the reading). Madam Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. FORD of Michigan. Madam Speaker, the first Senate amendment consists of a series of technical amendments to title III of the Omnibus Budget Reconciliation Act of 1982. Most of these amendments were suggested by the Office of Personnel Management and are necessary to clarify the applicability of certain provisions, correct certain effective date provisions, and facilitate the administration of certain provisions. No policy changes are reflected in any of these amendments.

The second Senate amendment instructs the Office of Personnel Management to allocate a portion of the amount appropriated to the Federal employees health benefits program for fiscal year 1983 to the contingency reserves of all health benefit plans. This amendment does not authorize the appropriation of any additional amount to the health program. The amendment merely provides additional protection for the various health plans in the event of financial difficulty.

The final Senate amendment strengthens the Senior Executive Service's reduction-in-force provisions which were enacted last year. The amendment provides the Office of Personnel Management with an additional tool to locate new positions for senior executives who are scheduled to be separated from Government service.

● Mrs. SCHROEDER. Mr. Speaker, I rise in support of the bill and the Senate amendment. The bill merely extends legal authorization to the Architect of the Capitol to provide training to the employees he oversees.

The Senate added a number of amendments. One provided additional protections for career members of the Senior Executive Service who face loss of their positions through a reduction in function or money. In the Omnibus Reconciliation Act of 1981, we added procedures to insure that the Government does not rashly discard these people who are, after all, one of the Government's most precious assets. The administration opposed this section because it wanted to have complete freedom to fire whichever career civil servants it wanted.

Through incompetent management at the Office of Personnel Management, the administration has subverted this provision of law. It has failed to place any significant number of the displaced senior executives.

The Senate decided to tighten up the provisions on senior executives to give the Office of Personnel Management less opportunity to gut the law. I support their effort.

I believe it would be useful to insert in the RECORD a letter I wrote last week to Office of Personnel Management Director Donald J. Devine on this issue:

COMMITTEE ON POST OFFICE
AND CIVIL SERVICE,
SUBCOMMITTEE ON CIVIL SERVICE,
Washington, D.C., September 21, 1982.

Hon. DONALD J. DEVINE,
Director, Office of Personnel Management,
Washington, D.C.

DEAR DR. DEVINE: You have sent four letters in the last two weeks to the Committee on Post Office and Civil Service certifying your inability to place career members of the Senior Executive Service in new positions, following their being declared surplus by their own agencies. According to these letters, 17 career executives will be separated from the Federal service. Because the Office of Personnel Management has done a sadly inadequate job in placing these executives, I ask that you withdraw your certification, maintain these individuals on the rolls, and try again to seek suitable placement for these individuals.

As you know, section 1704 of the Omnibus Budget Reconciliation Act (P.L. 97-35) established procedures for the placement of career members of the Senior Executive Service who were declared surplus by their own agencies. On December 30, 1981, you wrote the Committee certifying your inability to place seven executives from the Community Services Administration. On March 9, 1982, I wrote you expressing my concerns about the adequacy of your placement efforts. On April 14, you responded that, while your efforts may have been largely unsuccessful, they were not inadequate under the law.

On May 25, 1982, you certified OPM's inability to place two executives from the Federal Mediation and Conciliation Service. In that instance, six were declared surplus by the agency, four requested placement assistance, and two got placed (albeit one was reassigned by FMCS). On September 9, you certified your inability to place one executive from the Appalachian Regional Commission. On September 14, you certified your inability to place one executive from the U.S. Metric Board. Finally, on September 17, you certified your inability to place 14 executives from the Department of Energy, and pointed out that another four had declined placement assistance, while three were placed.

The figures alone demonstrate a placement record which can only be described as pathetic. Further, the information you supply to the Committee is wholly inadequate to assess the reasonableness of the placement efforts. For example, you say that you selectively freeze vacancies, but no where on the computer sheets for each individual does it state what positions were frozen on behalf of the individual. There is no indication as to how many SES positions have been filled during the 120-day period since the agency sent notice to the employee. There is no indication of why individuals were declared technically unqualified for positions.

As disturbing is the fact that OPM seems to do nothing to monitor the legitimacy with which the employing agency has implemented the law. In the case of the Department of Energy, the Committee has received numerous allegations of failure to follow the law or regulations. OPM should not certify that these individuals can be removed until it is certain that the agency involved has fully followed the law.

When Congress passed the Omnibus Budget Reconciliation law, it fully stated its intent to preserve to the government one of its most precious resources, its senior career

service. The weak efforts of the Office of Personnel Management coupled with questionable activities of agencies separating members of the Senior Executive Service, has made a mockery of congresssional intent. I request that you hold up the separations of all career senior executives until you have fully complied with the law.

With kind regards,

Sincerely,

PATRICIA SCHROEDER,
Chairwoman.●

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Michigan?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the Senate amendments to H.R. 5145 just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

PERMISSION FOR COMMITTEE ON POST OFFICE AND CIVIL SERVICE TO HAVE UNTIL MONDAY, OCTOBER 4, 1982, TO FILE REPORT ON H.R. 7044

Mr. FORD of Michigan. Madam Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service may have until 5 p.m., Monday, October 4, 1982, to file a report on the bill H.R. 7044.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

□ 1610

Mr. WALKER. Madam Speaker, reserving the right to object, I do so to ask the gentleman what bill this report refers to.

Mr. FORD of Michigan. It is referred to as the mail fraud bill. It is to enlarge the enforcement powers of the Postal Service in mail suits, scams particularly.

It comes originally from the Pepper committee; that has been passed on the Senate side, and it passed our committee I think with only one dissenting vote.

Mr. WALKER. Further reserving the right to object, Madam Speaker, has it been cleared with the minority, this late filing?

Mr. FORD of Michigan. I am sure it has; yes. The staff director is right there.

Mr. WALKER. We have no information on this side at this point that it has been cleared over here. That is my problem, further reserving the right to object.

Mr. FORD of Michigan. If we cannot file the report on the bill, we will not be able to take it up until we come back in November. If the gentleman wants to hold up the mail fraud bill, we will do it.

Mr. WALKER. Further reserving the right to object, it is not the gentleman's intention to hold up anything. It is the gentleman's intention to be assured of what the House is doing at the last moment.

Madam Speaker, it is my understanding that the staff says that it has been cleared.

I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

DRUG DEPENDENT FEDERAL OFFENDERS ACT AMENDMENT OF 1981

Mr. HUGHES. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3963) to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated, with the Senate amendment thereto, and disagree to the Senate amendment.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO HAVE UNTIL MIDNIGHT, OCTOBER 7, 1982, TO FILE REPORT ON H.R. 1856, AUTHORIZING ADMINISTRATOR OF GENERAL SERVICES TO DONATE CERTAIN FEDERAL PERSONAL PROPERTY

Mr. BRINKLEY. Madam Speaker, I ask unanimous consent that the Committee on Armed Services have until midnight, October 7, 1982, to file a report on the bill (H.R. 1856) to authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL TUESDAY, OCTOBER 5, 1982, TO REPORT ON H.R. 7130, NATIONAL ENGINEERING AND SCIENCE MANPOWER ACT OF 1982

Mr. WALGREN. Madam Speaker, I ask unanimous consent that the Committee on Science and Technology may have until midnight Tuesday, October 5, 1982, to file a late report on the bill, H.R. 7130, the National Engineering and Science Manpower Act of 1982.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

AUTHORIZING APPROPRIATIONS FOR CERTAIN INSULAR AREAS OF THE UNITED STATES

Mr. PHILLIP BURTON. Madam Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5139) to authorize appropriations for certain insular areas of the United States, and for other purposes, with Senate amendments to the House amendment to the Senate amendment thereto, and concur in the Senate amendments to the House amendment to the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendments to the House amendment to the Senate amendment as follows:

Page 1, line 5, of the House engrossed amendment, strike out "487" and insert "387".

Page 9, after line 14, of the House engrossed amendment,

(e) Nothing in this section shall be construed as requiring the Governor of the Northern Mariana Islands to submit any statement or report to the High Commissioner of the Trust Territory of the Pacific Islands.

Page 9, line 15, of the House engrossed amendment, strike out "204. (a)" and insert "204.".

Page 9, line 18, of the House engrossed amendment, after "Code" and insert "with respect to claims which accrued no more than two years prior to the effective date of this Act".

Page 9, of the House engrossed amendment, strike out lines 19 and 20.

Page 12, of the House engrossed amendment, strike out all after line 6 over to and including line 8 on page 13.

Page 13, line 9, of the House engrossed amendment, strike out "306" and insert "305".

Page 13, line 12, of the House engrossed amendment, strike out "307" and insert "306".

Page 13, line 17, of the House engrossed amendment, strike out "308" and insert "307".

Page 14, line 16, of the House engrossed amendment, strike out "309" and insert "308".

Page 14, of the House engrossed amendment, strike out lines 17 and 18.

Page 14, line 19, of the House engrossed amendment, strike out "(b)" and insert "(a)".

Page 15, line 3, of the House engrossed amendment, strike out "(c)" and insert "(b)".

Page 15, of the House engrossed amendment, strike out lines 6 and 7.

Page 15, line 8, of the House engrossed amendment, strike out "(e)" and insert "(c)".

Page 15, line 10, of the House engrossed amendment, strike out "(f)" and insert "(d)".

Page 15, line 12, of the House engrossed amendment, strike out "(g)" and insert "(e)".

Page 15, line 17, of the House engrossed amendment, strike out "(h)" and insert "(f)".

Page 15, of the House engrossed amendment, strike out lines 19 and 20.

Page 15, line 21, of the House engrossed amendment, strike out "(j)" and insert "(g)".

Page 15, line 23, of the House engrossed amendment, strike out "310" and insert "309".

Page 21, of the House engrossed amendment, strike out all after line 8 over to and including line 2 on page 22 and insert:

"(c) Notwithstanding any other provision of law, sums allotted to the Commonwealth of Puerto Rico under section 205 of this Act for fiscal year 1981 shall remain available for obligation for the fiscal year for which authorized and for the period of the next succeeding twenty-four months. Such sums and any unobligated funds available to Puerto Rico from allotments for fiscal years ending prior to October 1, 1981, shall be available for obligation by the Administrator of the Environmental Protection Agency only to fund the following systems: Aguadilla, Arecibo, Mayaguez, Carolina, and Camuy Hatillo. These funds may be used by the Commonwealth of Puerto Rico to fund the non-Federal share of the costs of such projects. To the extent that these funds are used to pay the non-Federal share, the Commonwealth of Puerto Rico shall repay to the Environmental Protection Agency such amounts on terms and conditions developed and approved by the Administrator in consultation with the Governor of the Commonwealth of Puerto Rico. Agreement on such terms and conditions, including the payment of interest to be determined by the Secretary of the Treasury, shall be reached prior to the use of these funds for the Commonwealth's non-Federal share. No Federal funds awarded under this provision shall be used to replace local governments funds previously expended on these projects."

Mr. PHILLIP BURTON (during the reading). Madam Speaker, I ask unanimous consent that the Senate amendments to the House amendment to the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. LAGOMARSINO. Madam Speaker, reserving the right to object, will the gentleman briefly explain the Senate amendments?

Mr. PHILLIP BURTON. Madam Speaker, I rise at the request of the distinguished chairman of the Subcommittee on Insular Affairs, Representative TONY WON PAT.

Representative WON PAT has masterfully guided this omnibus insular areas assistance bill to this point. But since he had to return to his home island of Guam a few days ago, our colleague has asked me to substitute for him.

H.R. 5139, as it is before us, is a wise and fair compromise with the administration. It was produced by Delegate WON PAT's subcommittee after extensive hearings and other work.

These efforts included consultation with the insular areas themselves, the Executive and our counterparts on the other side of the Capitol, who are responsible for the amendments I suggest we concur in today.

In addition to Chairman WON PAT, several other Members of this House are responsible for this measure. They should be recognized.

Delegate DE LUGO was a principal contributor of much of this bill.

Delegate SUNIA of American Samoa provided us with sensitive policy counsel.

Resident Commissioner CORRADA conducted the complex negotiations which resulted in the critical amendment before us relating to Puerto Rico.

The distinguished ranking minority member of the subcommittee, Mr. LAGOMARSINO, was extraordinarily dedicated to the many matters addressed by this bill over the many months that we have worked on it.

And our esteemed colleague from California, Mr. CLAUSEN, as well as our capable colleague from Nebraska, Mr. BEREUTER, also played a pivotal role in the development of this legislation.

Approval of the amendments suggested by the Senate would culminate legislative action on this measure, the basis of which initially passed this House last December 11.

The Senate passed our bill's original provisions May 10, with the exception of one that was no longer needed. It also added other worthwhile provisions.

September 9, this House then incorporated all aspects of the Senate amendment—save one—into a substitute. It added as well the product of other work by the subcommittee.

I am greatly disappointed that the strenuous objections of the administration compelled us to delete that one provision. It would have properly reimbursed Guam and the Virgin Islands for some of the unintentional, but devastating, losses in local revenues they are suffering due to the administration's income tax rate reductions, enacted last year.

However, we reluctantly agreed to drop this reasonable compensation in the spirit of cooperation with the administration.

Our sincere determination to craft insular areas assistance legislation acceptable to the administration is also the motivation for the principal Senate amendments to our substitute.

The amendment to section 101 corrects a typographical error in the original Senate amendment.

The amendments to sections 203, 204, and 309 were requested by the Justice and Interior Departments. They are technical in nature.

Section 305 was dropped at the request of the Senate Committee on the Environment and Public Works. It would have permitted the exemption of rum refining in the Virgin Islands from Water Pollution Control Act effluent discharge requirements in specified circumstances. The provision is needed to continue operations by the territory's big rum producer which (directly and through rebated rum excise taxes) is a major contributor to its treasury.

The amendment to section 501 was requested by the Environmental Protection Agency. It is a substitute with a similar intent to that of our original provision. The amendment permits the loan of any unexpended fiscal year 1981 grants to Puerto Rico for waste water treatment plant construction, for use in subsequent fiscal years. This is needed to prevent a loss of these grants and continue the construction program now, when budgetary shortfalls are making it impossible for Puerto Rico to contribute its matching share of the project cost.

If these amendments are adopted, H.R. 5139 would contain provisions as follows:

TITLE I—GUAM

Section 101 provides for initiative and referendum for the recall of Guam elected officials.

Section 102 authorizes $6.052 million for essential capital improvements on Guam. It would fund the full cost of the Apra harbor commercial dock and related work and build pipelines needed to bring water to the south.

Section 103 redefines the $10 million 1977 Guam health facilities authorization to permit needed improvements to the Guam Memorial Hospital and provide a health clinic for the northern part of the island, now remote from health care facilities.

Section 104 transfers the audit authority and staff of the comptroller for Guam to Interior's inspector general. It also requires the local government to prepare an annual comprehensive financial report and to report on actions taken pursuant to Federal audit recommendations.

TITLE II—TRUST TERRITORY OF THE PACIFIC ISLANDS

Section 201 transfers Trust Territory government property to the local Micronesian governments 90 days after trusteeship termination, rather than October 1, 1982, as currently provided by statute.

Section 202 provides exemption from Federal taxation for the Bikini-Enewetak nuclear testing victim trust funds.

Because the establishment of these funds neglected to exempt their proceeds from Federal taxation, it has not been possible to invest them to produce the optimum assistance for the beneficiaries.

Section 203 transfers the audit authority and staff of the comptroller for the Northern Mariana Islands and the Trust Territory to Interior's inspector general. It also requires the local governments to prepare an annual comprehensive financial report and to report on actions taken pursuant to Federal audit recommendations.

Section 204 clarifies the applicability of the Federal Tort Claims Act to claims arising in the Northern Mariana Islands with retroactivity limitations suggested by the Department of Justice. It was originally recommended by the Northern Mariana Islands Federal Laws Commission.

Section 205 requires the Park Service to inventory and study the natural, historical, cultural, and recreational resources of the Trust Territories, if requested by the local governments. The findings would be submitted to the Congress within 2 years of enactment.

TITLE III—VIRGIN ISLANDS

Section 301 authorizes $150,000 to plan the proposed Caribbean Center at the College of the Virgin Islands endorsed in the President's Caribbean Basin Initiative. We hope that funding will be provided expeditiously from technical assistance moneys already appropriated to the Office of Territorial and International Affairs.

Section 302 directs the Customs and Postal Services to assist the Virgin Islands in the collection of its import excise taxes, so long as such assistance is desired.

Section 303 authorizes $10 million for Virgin Islands water and power improvements. The deficiencies in that infrastructure now impede economic self-sufficiency and impair the quality of life to a degree that should be unthinkable in modern-day America. This would fund the first phase of a 4-year program.

Section 304 authorizes $3 million to build two juvenile pretrial detention centers in the Virgin Islands. Because of a lack of facilities, youths suspected of committing a majority of the territory's serious crimes must now often be released to the streets when apprehended.

Section 305 repeals obsolete provisions of the Revised Organic Act of the Virgin Islands. They relate to a study of the applicability of Federal laws and the printing of the Virgin Islands Code, which have already been accomplished.

Section 306 substitutes "legislative" for "legislative assembly" in the continuing provisions of the 1936 Organic Act of the Virgin Islands, as warranted by the change in the legislative branch of the territorial government made by the Revised Organic Act.

Section 307 repeals the provisions of the 1936 Organic Act of the Virgin Islands which have become obsolete or have been zeplaced by subsequent legislation.

Section 308 repeals earlier provisions of law pertaining to the Virgin Islands which have become obsolete or have been replaced by subsequent legislation.

Section 309 transfers the audit authority and staff of the comptroller for the Virgin Islands to Interior's inspector general. It also requires the local government to prepare an annual comprehensive financial report and to report on actions taken pursuant to Federal audit recommendations.

TITLE IV—AMERICAN SAMOA

Section 401 equalizes the clerk-hire allowance of the Delegate from American Samoa to that of other Members of this House.

Section 402 transfers the audit authority and staff of the comptroller for American Samoa to Interior's inspector general. It also requires the local government to prepare an annual comprehensive financial report and to report on actions taken pursuant to Federal audit recommendations.

TITLE V—PUERTO RICO

Section 501 permits the loan of any unexpended fiscal year 1981 grants to Puerto Rico for waste water treatment plant construction for use through fiscal year 1983. It is needed to prevent a loss of these funds due to the current inability of the local government to provide the required local match. It will protect the substantial Federal investment in the ongoing construction program under the Water Pollution Control Act.

TITLE VI—MISCELLANEOUS

Section 601 eliminates the necessity of the Secretary of Interior's approval of the deficit elimination plans provided for in Public Law 96-597. It would, therefore, enable their two governments to seek the authorized budget management assistance, including appropriation of the deficit elimination grants.

Mr. Speaker, the Constitution assigns the Congress special responsibility for the Nation's territories. The Federal Government rightly over the years has assumed additional obligations toward the peoples of the insular areas.

This history mandates that we address needs which, in the case of the States, can be handled at other levels of government. The situation of the insular areas requires the sensitive application of national policy as well as the construction of territorial policy.

We primarily attend to the assignment through omnibus insular areas assistance legislation, such as this bill developed by Mr. WON PAT's subcommittee.

In doing so in this Congress, the constraints of the current budgetary situation have compelled us to limit our assistance to the modest provisions we take final action on today. They comprise the absolute minimum we feel must be provided, in addition to measures taken apart from this, the Americans and others of our insular areas.

As I have indicated previously, we offer this as a good faith compromise with the administration between the many other sorely needed forms of assistance we would like to provide and what we believe will be acceptable to the Executive. Its cost is substantially below that which initially passed the Senate. We have sought to remove all major objectionable provisions. I, therefore, urge my colleagues to join me in concurring in the Senate amendments to this House's bill. Further, I earnestly recommend that the President approve what would be the major insular areas legislation of the 97th Congress to date.

Mr. LAGOMARSINO. Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. PHILLIP BURTON. Madam Speaker, I ask unanimous consent that I may be permitted to revise and extend my own remarks, and that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 599, CONTINUING APPROPRIATIONS, 1983

Mr. WHITTEN. Madam Speaker, pursuant to the order of the House of yesterday, I call up the conference report on the joint resolution (H.J. Res. 599) making continuing appropriations for the fiscal year ending September 30, 1983, and for other purposes, and I ask unanimous consent that the statement of the managers be read in lieu of the conference report.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of Thursday, September 30, 1982.)

Mr. WHITTEN (during the reading). Madam Speaker, I ask unanimous consent to dispense with further reading of the statement.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. WHITTEN) will be recognized for 30 minutes, and the gentleman from Massachusetts (Mr. CONTE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

GENERAL LEAVE

Mr. WHITTEN. Madam Speaker, I ask unanimous consent that all Members may have 5 legislature days within which to revise and extend their remarks on the conference report on House Joint Resolution 599 and amendments in disagreement, and that I may include extraneous tabular matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Madam Speaker, I yield myself such time as I may require.

May I say to my colleagues that I hope we will avoid this type of proceeding in the coming year. As Members will recall, this is the second consecutive year that the Congress has been faced with the necessity to have a continuing resolution providing for nearly the entire Government. We have had problems at times because our friends on the other side of the Capitol were not able to get to consideration of appropriations bills. Then, we have had other problems such as delay in adopting a budget resolution for one reason or another.

Even though most of the Appropriations Subcommittees finished hearings in May and June of this year it was not possible for us to get the appropriations bills before the body until after passage of the budget resolution. Despite that fact, I think the committee has done a good job within the limited time that we have.

I call the Members' attention again to the fact that a continuing resolution is a hybrid. It is both legislation and an appropriation, and for that reason if we had not handled it as we have, we would have had many problems on our side and we would have had problems on the other side of the Capitol.

May I say that when we met in conference the Senate had adopted a total of 100 amendments to the House-passed bill. All 13 subcommittees were involved. Thirty-one of the Senate amendments changed dollar figures totaling a net increase over the House, which was some $33.2 billion. Fifty-four of the Senate amendments were language changes, and 15 of the Senate amendments were technical in nature.

I do want to say for the record that our friend, Senator HATFIELD, chairman of the committee on the Senate side, and his associates were most cooperative in the conference that we had. I think we have learned somewhat from experience, because it is about the second straight year we have been faced with this. This year, the senior members of the House committee met in advance and agreed we would try to hold the line because we realize not only that there is a need to hold the line, but we also had a need to stay within the budget resolution. In our conference yesterday, each subcommittee dealing with the subjects in which it was interested and had jurisdiction met separately, while we went ahead with those that were ready. I think we finished in about 4 hours, which is quite something under the conditions that existed.

I want to say that the bill we bring to you—while we cannot vouch for the outlays entirely because the rate of outlays is largely under the control of the executive branch—is well within the committee's section 302 allocation under the budget resolution.

FEATURES OF THE CONTINUING RESOLUTION

As I stated, this resolution is comfortable with the budget resolution. It generally follows the format of prior years. It expires December 17, 1982. Instead of December 15 as proposed by the House and December 22 as proposed by the Senate. The provisions of the continuing resolution automatically disengage when regular annual appropriations bills are enacted.

RATES UNDER THE CONTINUING RESOLUTION

Section 101(a) of the resolution provides for 5 bills at the rate of the House bill or the Senate bill, whichever is lower.

The five bills under this section are: Agriculture; Commerce-Justice-State-Judiciary; District of Columbia; Transportation and related agencies; and Treasury-Postal Service and general government.

Section 101(b) provides for the Labor-HHS-Education and related agencies and Interior and related agencies.

Section 101(c) provides for defense at an annual rate of operations not to exceed $228.7 billion, and contains several provisions which address various defense activities.

Section 101(c) provides for foreign assistance at the rate of last year's bill or the budget estimate, whichever is lower.

The legislative branch is provided for in section 101(e) as in the House reported bill for House items and as in the Senate reported bill for Senate items. The existing pay cap is extended through the termination date of the resolution. Other items are provided for the full fiscal year.

Section 101(f) provides such amounts as may be necessary for projects or activities provided for in the Military Construction Act, 1983 (H.R. 6968), at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference as filed in the House of Representatives on September 30, 1982, as if such act had been enacted into law.

Section 101(g) provides for the energy and water development appropriation bill at the current rate of operations.

The HUD-Independent Agencies Appropriation Act, 1983, was signed into law yesterday, September 30, 1982, and thus is not provided for in the resolution.

The resolution extends the 1982 provisions and limitations on abortion and school prayer.

□ 1620

Let me say again, in case some of the Members do not know, that the deadline or the end of this continuing resolution is December 17, 1982. I personally do not know when the House will reconvene or when it may adjourn sine die. I do not know that. But the general impression is that we will be back here, soon after Thanksgiving, and we will continue under this resolution to operate until December 17 unless of course a bill comes out from under it by being enacted into law.

So I say again that we feel we have done a good job and have had a hard test. I also repeat that it was made necessary to meet some deadlines in a timely way, which enabled us to bring the conference report to the House today.

So I just say to the Members that we are under the budget. We have a resolution which we hope the administration will find acceptable. It was a good conference. We have, I think, only one matter that is in true disagreement. That concerns the FAA air traffic controllers. We were able to reach agreement on the other 99 amendments.

So I hope that we can bring this to an end speedily. Let us provide for the orderly continuation of the Government for a temporary period. I am hopeful that when we return in November the Congress will be able to send many of the regular annual appropriations bills to the President so they will disengage from this resolution.

Madam Speaker, at this point in the RECORD I will insert a letter which I received today from the Comptroller General which addresses an action

taken by the Appropriations Committee in Public Law 97-92.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C. October 1, 1982.

Hon. JAMIE L. WHITTEN,
Chairman, Committee on Appropriations, House of Representatives.

DEAR MR. CHAIRMAN: This letter addresses the issue of whether section 140, Pub. L. 97-92, which places a restriction on pay increases to Federal judges and Justices of the Supreme Court, is permanent legislation.

Section 140 provides:

"Sec. 140. Notwithstanding any other provision of law or of this joint resolution, none of the funds appropriated by this joint resolution or by any other Act shall be obligated or expended to increase, after the date of enactment of this joint resolution, any salary of any Federal judge or Justice of the Supreme Court, except as may be specifically authorized by Act of Congress hereafter enacted: *Provided*, That nothing in this limitation shall be construed to reduce any salary which may be in effect at the time of enactment of this joint resolution nor shall this limitation be construed in any manner to reduce the salary of any Federal judge or of any Justice of the Supreme Court."

That provision was introduced for the stated purpose of precluding the annual cost-of-living increase which a Federal judge or Justice of the Supreme Court would otherwise receive on October 1 of any year in which a cost-of-living salary adjustment is made to the General Schedule under 5 U.S.C. 5305. CONGRESSIONAL RECORD, Senate S13373, November 13, 1981. Absent section 140, the adjustment for Federal judges and Justices of the Supreme Court is mandated by law. See, for example, 28 U.S.C. 5, id. 461 as to increases for Justices of the Supreme Court; 28 U.S.C. 44, id. 461 for circuit judges and 28 U.S.C. 135 id. 461 for district court judges.

We have held that a provision contained in an annual appropriation act may not be construed to be permanent legislation unless the language used therein or the nature of the provision renders it clear that such was the intent of the Congress. We believe that the language of section 140 when construed together with the nature of the provision results in a clear showing of a congressional intent to enact permanent legislation.

Standing alone, the language of section 140 "by any other act * * * after the date of enactment of this resolution" is not persuasive as to permanency. However, the additional phrase "except as may be specifically authorized by Act of Congress hereafter enacted" does lead us in that direction. Moreover, to view section 140 as not being permanent legislation would strip the section of any legal effect. Section 140 was included in a continuing resolution which was enacted on December 15, 1981, and which expired on September 30, 1982. The next applicable cost-of-living pay increase under existing law for judges would be effective October 1, 1982, after the expiration of the continuing resolution. Thus, if section 140 were not held to be permanent legislation, the section will have had no legal effect since it would have been enacted to prevent increases during a period when no increases were authorized to be made.

Accordingly, we conclude that section 140 is permanent legislation and precludes the use of appropriated funds to pay cost-of-living pay increases to Federal judges and Justices of the Supreme Court unless such increases are specifically authorized by the Congress.

Sincerely yours,

CHARLES A. BOWSHER,
Comptroller General of the United States.

Mr. BOLAND. Mr. Speaker, I am happy to report that last night the President signed H.R. 6956, the 1983 HUD-Independent Agencies Appropriation Act. That act is the first regular appropriations bill signed into law before the start of the fiscal year in 3 years—since the 1st session of the 96th Congress.

The 1983 HUD-Independent Agencies Appropriation Act was cleared for the White House on September 29. Because Senator GARN and I had been informed that the President would sign the bill as soon as he received it, reference to the HUD-Independent Agencies Act was dropped from this continuing resolution.

Mr. CONTE. Madam Speaker, I yield myself such time as I may require.

Madam Speaker, I support the conference report on House Joint Resolution 599, which continues appropriations for the 1983 fiscal year.

Your conferees disposed of 100 Senate amendments. The conference agreement covers 12 of the 13 appropriation bills for fiscal 1983, as well as several substantive issues which we all recognize should be handled in substantive legislation, but were given to us because the basic legislation has not been enacted.

Some of these issues are within the jurisdiction of the Committee on Ways and Means. I hope my colleagues on that committee will recognize that we did not initiate or seek these issues. They were thrust upon us.

Personally, I am not at all confortable dealing with issues such as steel import licenses, and the International Coffee Agreement. The members of the Committee of Jurisdiction are the experts on such questions.

But the facts of life are that when the legislative committees are not able, for whatever reason, to resolve highly controversial issues, Congress will find some other way, which is usually appropriation bills.

We are not shopping for problems, but we cannot avoid them once the House or the Senate amends one of our bills. The termination date of the resolution is December 17, which was a simple compromise, with no special significance, between the House date of December 15, and the Senate date of December 22.

The rates for individual bills are as follows: Five bills are covered under section 101(a): Agriculture, Commerce-Justice-State-Judiciary, D.C., Transportation, and Treasury.

The rate for project and activities which would be funded in those appropriation acts for 1983, and which were conducted in fiscal 1982, is the House or the Senate rate, whichever is lower, and under the more restrictive authority. A bill which has been reported to the House or the Senate is considered to have been passed by that House.

No new general provision shall take effect unless included in identical form in the House and Senate bills.

Where an item is included in only the House or the Senate bill, the rate is the rate provided by the one House, under the 1982 terms and conditions.

The legislative branch is continued under section 101(e) for the full year at the rate provided in the Senate reported bill, with several specific provisions.

The conference agreement includes a pay cap on upper level Federal employees, including Members of Congress.

Two bills, Labor-HHS and Interior, are continued under section 101(b), which covers activities provided for in the 1982 bill, under the 1982 conditions, at a rate to maintain current operating levels. Section 101(b) also contains language specifically including the off-budget activities of the strategic petroleum reserve.

The Department of Defense is covered under section 101(c), at a rate of $228.7 billion for projects and activities conducted in 1982, and provided for in the 1982 Defense Appropriations Act.

We include several limitations, including no new starts, no initial production of the MX, no long lead procurement or initial production of the second nuclear carrier, and the "buy-America" provision for the Defense Department which covers specialty metals, food, and textiles.

Foreign Assistance activities are covered under section 101(d), which continues activities funded in the 1982 Foreign Assistance Act at the rate provided in that act, or the budget estimate, whichever is lower, and under the more restrictive authority.

Aid to Israel is at the 1982 level.

Activities funded in the Energy and Water Development Act for 1982, which were conducted in 1982, are funded at the current rate. New starts are prohibited unless approved by the Committee on Appropriations, and DOE employment levels are not to be "significantly" reduced below the levels in effect on September 30, 1982.

Military Construction activities are continued at the rate and in the manner provided in the conference report as filed in the House.

Although I cannot cover all of the Senate amendments, I will try to highlight some of the most important special provisions.

We accept the Senate amendments regarding steel import licenses and imported steam, and extending the International Coffee Agreement.

We provide that 75 percent of mass transit funds shall be apportioned using 1980 census data, and 25 percent

will be based on 1970 census data. The Senate amendment would have required that all funds be apportioned using the 1980 figures.

Senate language which provides for payments to air traffic controllers is reported in disagreement, but I support the Senate language, and will support a motion to be offered later to accept the Senate language.

The conferees agreed to $85 million to be available, but not required to be spent, for the purchase of copper for the national stockpile.

The conferees agreed to restrictions on the Legal Services Corporation which would limit the presumptive right to refunding, place certain restrictions on lobbying, retain House language on the allocation of funding, and restrict the use of funds for aliens. The conference agreement also restricts the initiation of class action suits, and requires certain qualifications of recipients.

Mr. Speaker, these are the highlights of the conference agreement.

I did not agree with all of the conference agreements. But we are operating on borrowed time. The new fiscal year has started. The executive branch is cooperating by keeping the Government running so that we can act today.

Let us pass this conference report and go home.

COMMERCE, JUSTICE, STATE AND JUDICIARY

The conferees agreed to fund the programs of the Departments of Commerce, Justice and State, the Judiciary and related agencies at the lower of House or Senate reported bills for fiscal year 1983. The House had tied the rates to the House reported bill or the fiscal year 1982 levels, whichever are lower. The Senate bill was reported subsequent to House action on the continuing resolution.

The conferees agreed to earmark small business development centers at $14 million, as provided by the House. The Senate had reduced this earmark to $11 million.

Compromise amounts were reached for certain programs of the U.S. Information Agency, including $67.3 million for the Fulbright and international visitors program, $2.6 million for Humphrey fellowships, and $7.1 million for private sector programs.

The conferees provided the full Senate amount of $7.6 million for the U.S. Travel and Tourism Administration. The House bill included $5.033 million for this agency.

House conferees also agreed to the Senate addition of $13.5 billion for Landsat, which will allow this important resource to continue operations in fiscal year 1983. Due to a delay in certain authorizing legislation, the National Oceanic and Atmospheric Administration faced the prospect of assuming responsibility for the operation of Landsat without the necessary funds to do so.

The conference agreed to Senate language authorizing the use of $50 million from existing funds from U.N. peacekeeping activities for a new United Nations Transition Assistance Group (UNTAG) in Namibia, subject to Presidential determination that an agreement has been achieved among the parties to the dispute in that country. The authority for this money in the continuing resolution is necessary in case there is a resolution of the negotiations during the election recess. The total U.S. contribution to this non-U.S. force is estimated at $135 million, including $10 million for refugee assistance.

The conference agreement provides an annual rate of $241 million for the Legal Services Corporation, along with restrictive language regarding aliens, lobbying, presumptive right to refunding, minimum access, qualifications of recipients and class action suits.

FOREIGN OPERATIONS

The conferees agreed in most instances to the House funding levels for foreign assistance, providing a total of $9.8 billion. This is $1.3 billion below the Senate amount, $1.8 billion below fiscal year 1982 appropriations, and $1.7 billion below the President's fiscal year 1983 request. The international financial institutions are funded at Senate levels because of a separate provision adopted by the conference.

The Export-Import Bank is limited to $3.83 billion in direct lending and $8 billion in guarantees, compared to $4.4 billion and $9.22 billion, respectively, in the Senate bill and fiscal year 1982. The amounts in the continuing resolution are the same as the President's request for fiscal year 1983. Israel would receive the same amounts in the continuing resolution, and under the same conditions, as in fiscal year 1982; that is, $785 million in economic support funds as a grant and $1.4 billion in foreign military sales credits, $550 million of which is forgiven. The amount for economic support funds is the same as the President's request for fiscal year 1983, although the President would provide two-thirds of the money as a grant and one-third as a loan. The request for foreign military sales credits for fiscal year 1983 is $1.7 billion, $300 million higher than the amount provided in the continuing resolution, with $500 million forgiven, $50 million less than the amount forgiven in the continuing resolution.

UNICEF receives $26 million under the continuing resolution, $15.5 million below the Senate amount and below the fiscal year 1982 appropriation. The United Nations Development Program receives $106.8 million, $21.4 million below the Senate amount and the amount provided in fiscal year 1982.

Significant reductions below fiscal year 1983 budget requests and needs are made in such accounts as the economic support fund, American schools and hospitals abroad, the Peace Corps, military assistance, peacekeeping activities in the Sinai, the Export-Import Bank and the international financial institutions. No funding at all is provided for the International Fund for Agriculture Development, which is a mistake. It is obvious that these shortfalls will have to be addressed by Congress during the postelection session.

The conferees accepted language in the House bill extending a regional health delivery project in West and Central Africa for 3 years at an estimated cost of $2 million per year. This highly successful project, directed under AID contract by Boston University, had been threatened with termination, and this language will avoid that prospect.

LEGISLATIVE BRANCH

The conferees agreed to include for the entire fiscal year a compromise version of the legislative branch appropriations for fiscal 1983. All House items and all Senate items reported previously in H.R. 7073 and S. 2939 are included in the conference agreement, and dollar differences in several joint items were split.

The pay cap for Federal executive, judicial, and legislative officials, which was included in both the House and Senate bills, is retained by the conference for the duration of the continuing resolution.

A House provision limiting reimbursements for Senators' travel within their home States was dropped by the conference.

DEFENSE

The defense section provides a rate of $228.7 billion dollars, but with some specific restrictions. None of the funds may be used to initiate or resume projects or activities for which funds or authority were not available in fiscal 1982. There is a specific prohibition against starting production of the MX missile and the second nuclear-powered aircraft carrier. Long lead only can continue, as was approved last year, for one carrier. Defense is directed to consult with the Appropriations Committees of the House and Senate in every instance where there is any question on proceeding, and I can assure you we mean exactly that.

We fully expect to have a defense bill before the House shortly after we return from the election recess, and we can resolve these issues at that time. But for the continuing resolution, there are no new starts, no MX, and no carrier production, with full consultation with the committee on any questionable item. I am comfortable with the defense section.

ENERGY AND WATER

The continuing resolution provides that the rate of operations for energy and water programs will generally be at the current rate, modified to require prior approval of the Committee on Appropriations for the initiation or resumption of any project or activity for which appropriations, funds, or other authority were not available in fiscal year 1982.

The House receded to a Senate amendment that would prohibit the use of funds for the purpose of conducting studies relating to changing from the currently required "at cost" to a "market rate" method for pricing hydroelectric power by Federal public power authorities.

HUD INDEPENDENT AGENCIES

The conference agreement removes funding for the programs of the Department of Housing and Urban Development and Independent Agencies from under the continuing resolution since both the House and Senate have already adopted the conference report to H.R. 6956, making fiscal year 1983 appropriations for HUD/Independent Agencies.

The conference agreement does include language offered by the Senate to extend the construction start deadline for financial adjustment factor (FAF) eligible housing projects from October 1, 1982, to January 1, 1983. The conference agreement does not include language proposed by the Senate to postpone the effective date of tenant rent contributions regulations.

LABOR-HHS-EDUCATION

For the Departments of Labor, Health and Human Services, Education and Related Agencies, the conference report establishes funding levels under the continuing resolution at current operating levels and under current terms and conditions. This is the same provision as was passed by the House when it considered House Joint Resolution 599 for the first time. Current operating level is meant to include all supplemental appropriations and is meant to continue all current programs through the period of the continuing resolution.

The Senate added 19 amendments on its side, 7 of them increasing funding for particular programs by about $100 million. The two largest of these increases, $50 million for vocational education and $19 million for older Americans title V, were not appropriate for consideration in this short-term, continuing resolution, because they established funding levels for forward-funded programs that would not be obligated until next July. The conference report strikes these two amendments, without prejudice to their consideration in the regular 1983 labor-HHS-education bill.

Another four money amendments provided relatively small amounts to a number of important programs, and in the interest of reaching an agreement with the Senate and keeping the Government from shutting down, the House receded to the Senate. These increases were runaway youth, $7.5 million; family medicine, $7.2 million; childhood immunization, $4.4 million; nursing research, $1.6 million.

The last funding amendment provides $9 million to endow a center at Tuskegee University in honor of the Nation's first and only black four-star general in the U.S. Air Force. This was requested by the administration and is contained in the regular 1983 House bill.

The Senate added a number of language amendments as well.

Probably the amendment that has caused the most interest concerns the matter of prior year State social security claims. This is a complicated matter with a long history, but I want to make it clear that this amendment keeps the door open for the States that have obtained a court decision in their favor.

No money would be provided in fiscal year 1983 while the battle continues in the courts, but provided they obtain a favorable judgment, the States would be eligible for payments over a 3-year period starting in 1984.

The conference report contains a number of other language provisions as well, including extending the moratorium on nursing home regulations by 120 days; adopting the sense-of-the-Senate resolution in opposition to a medicare means test; continuing the allocation of community service block grant money under current terms and conditions; permitting the funding for jobs training to be obligated under the terms of the transition provision contained in the conference report of the jobs training bill.

All in all, the provision relating to the Departments of Labor, Health and Human Services, and Education keep the continuing resolution close to the original concept of continuing the programs as they are operating currently, which gives the opportunity and the incentive to consider funding these programs as part of the regular labor-HHS-Education bill during the lame duck session.

TRANSPORTATION

The continuing resolution provides that the rate of operations for transportation programs will generally be the lower of the House-passed or Senate reported bill. For items that are contained in one bill and not in the other, funding will be provided at the lower of the level provided in that bill or the fiscal year 1982 level.

One exception is the provision for the Department of Transportation's interstate transfer grants, for which the continuing resolution provides $518 million for highways and $365 million for transit projects.

The allocation of these funds is to be in accordance with the higher of the House or Senate report on the fiscal year 1983 transportation appropriations bill, which will permit the funding of the many important and much needed projects listed in the House report.

For urban and nonurban formula grants the Senate had proposed to apportion and allocate these funds using 1980 census data. Under the conference agreement, 75 percent of these funds would be apportioned using 1980 data, while 25 percent of the funds would continue to be apportioned on the basis of the 1970 census.

Mr. Speaker, the controversial question of the pay increase for air traffic controllers was reported back in true disagreement. The Senate amendment provided for an average 6.6 percent pay increase for working air traffic controllers—an increase that is well deserved and long overdue.

The House passed this measure in last November's continuing resolution, only to see it die with the President's veto.

At the appropriate time, there will be a motion made to recede and concur in the Senate amendment. I will have further remarks on this subject at that time, but at this point would urge my colleagues to agree to that motion and defeat an amendment that would mandate the rehiring of fired striking controllers.

The continuing Resolution provides that programs and activities of the Department of Interior and Related Agencies shall be continued at a rate to maintain current operating levels.

Six amendments in disagreement were considered by the conferees relating to the programs and activities of the Department of Interior and Related Agencies. The managers on the part of the House have agreed to the Senate provision providing the budget request for the strategic petroleum reserve so that there will be no disruption in our efforts to fill the reserve. The House also agreed to Senate language further conforming to the House-passed Wilderness Protection Act provisions contained in the House-passed continuing resolution to prohibit the use of funds for activities relating to leasing in wilderness and wilderness study areas. The conference agreement also provides $36.5 million for the construction of the south quadrangle project by the Smithsonian. The funds are made available subject to certification by the Chancellor on behalf of the Board of Regents of the Smithsonian that the required private matching funds are available.

The conferees also agreed to provide $190,000 for the expenses of the Native Hawaiians Study Commission, approved the transfer of $5.2 million in salaries and expense money to the

matching grants program within the National Endowment for the Humanities, and deleted Senate language which would have transferred all resources involving cadastral survey work in the national forest system from the Department of Interior to the Department of Agriculture.

Mr. WHITTEN. Madam Speaker, I yield such time as he may require to the gentleman from California (Mr. FAZIO) a member of the committee.

Mr. FAZIO. Madam Speaker, I rise in support of the conference report.

Madam Speaker, the conference report includes funding for the operations of the legislative branch for the 1983 fiscal year. The continuing resolution references the levels set in S. 2939, the fiscal year 1983 legislative branch appropriation reported to the Senate on September 22, 1982, together with certain exceptions. This conference agreement, Madam Speaker, represents a reasonable compromise between H.R. 7073, the Legislative Branch Appropriation Act reported to the House on September 9, 1982, and S. 2939.

At this point in the RECORD under permission which I have already obtained, I will insert a tabulation detailing the conference agreement on legislative branch items in comparative form:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY—LEGISLATIVE BRANCH: CONTINUING RESOLUTION, FISCAL YEAR 1983 (H.J. RES. 599)

	Fiscal year 1982, enacted	Fiscal year 1983, request	House	Senate	Conference
TITLE I—CONGRESSIONAL OPERATIONS					
SENATE					
Compensation and mileage of the Vice President and Senators and expense allowances of the Vice President, the leaders, and whips of the Senate:					
Compensation and mileage of the Vice President and Senators	6,932,000				
Mileage of the Vice President and Senators		60,000		60,000	60,000
Expense allowances of the Vice President, President pro tempore, majority and minority leaders and majority and minority whips:					
Vice President	10,000	10,000		10,000	10,000
President pro tempore of the Senate	10,000	10,000		10,000	10,000
Majority leader of the Senate	10,000	10,000		10,000	10,000
Minority leader of the Senate	10,000	10,000		10,000	10,000

Total, title II—Other agencies	456,149,000	494,665,000	462,857,000	461,914,000	462,457,000
Grand total, new budget (obligational) authority	1,365,272,433	1,410,760,000	1,084,868,663	1,335,334,663	1,335,697,663

There is one point I want to clarify, Madam Speaker. In enacting the change to title 44 contained in section 305 of S. 2939, a change which will probably save the international exchange program from closing down, the new language in section 1719 of title 44 specifies those documents that are exempt from the program because of national security, limited public interest or educational value, and related reasons. With respect to these exempt publications, the law speaks for itself, and there is no additional discretion implied in the law or in the accompanying House and Senate reports that outline the new legislation.

Madam Speaker, Senator MATTINGLY, my counterpart chairman in the other body, and I and the other members of the conference committee feel that this is the best compromise that can be reached. The legislative branch budget is $29,574,770 below the amount enacted for fiscal year 1982 and it is $75,062,337 under the amount requested for fiscal year 1983. In other words, we have produced a legislative branch budget that is 2 percent less than the 1982 level, while the entire Federal budget is projected to increase by almost 6 percent for the same period of time. Once again, the legislative branch is showing the way in these times that require fiscal restraint on the part of all levels of Government.

Every Member of this House and this Congress can be proud of this budget, Madam Speaker. The legislative branch budget shows that the Congress, in its own operations, has been more than a willing partner in the effort to bring fiscal policy in line with the need for prudent public expenditures.

□ 1630

Mr. CONTE. I yield 3 minutes to my good friend, the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. I rise, Madam Speaker, to voice some discomfort about the conference report which I cannot in good conscience support because I share the belief of two of our colleagues, members of the Appropriations Committee, that it incorporates an unconstitutional delegation of authority to the Appropriations Committee.

Last week when the House first considered House Joint Resolution 599 the gentleman from New York (Mr. GREEN) and the gentleman from Oklahoma (Mr. EDWARDS) both brought to the attention of the House a provision which is as outrageous as it is illegal and illegitimate.

That provision is the one which deems those general appropriation measures which have simply been reported from the Appropriations Committee to be considered as passed by the full House.

I share their view that that is an impermissible delegation of authority.

One of the results of this provision, however, is more troublesome. It would appear to effectuate a legislative rider contained in the appropriations bill on Treasury, Postal Service and Related Agencies, H.R. 7158, which was reported on September 22, 1982. That rider purports to restrict interference by OMB in the regulatory activities of the regulatory agencies.

I do not think it means anything and it has no legislative effect. But some of these conditions that are put in appropriation measures and are given false life by the continuing resolution need to be examined by this House, by this body, before they are given some sort of a semilegal status.

In the absence of any further legislative language to define what is meant by "interference" it is worth remembering that the courts presume that agencies are properly conducting their activities.

The report language accompanying this provision does not specify any examples of what is meant by "interference" and thus at most this provision imposes no further restrictions upon the activities of the Office of Management and Budget than otherwise existed.

Then their ability to carry out their statutory duties under the Paperwork Reduction Act of 1980 and under Executive Order 12291 having to do with regulatory oversight continue in effect and are not touched by this.

If there is any different interpretation that should be placed upon that I would invite anyone to do that in order for the RECORD to be made clear.

Mr. WHITTEN. Madam Speaker, I yield 4 minutes to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Madam Speaker, I rise in support of the House Joint Resolution 599 conference agreement. I would like to highlight several of the major items in this bill as they pertain to transportation.

First and foremost, the conference agreement stipulates that the rate of spending for most transportation items be limited to the rates specified in either the House-passed or Senate-reported transportation appropriations bills, whichever is lower.

The one major exception to this requirement is amendment No. 89 which appropriates $518,000,000 for Interstate transfer grants—highways, and $365,000,000 for Interstate transfer grants—transit. The amendment also specified how these funds are to be allocated. That distribution is as follows:

Interstate transfer—highways

Pennsylvania	$34,800,000
Washington, D.C	30,000,000
Hartford-New Britain	40,000,000
Oregon	60,000,000
Tucson	12,600,000
Northeast Illinois	150,000,000
Denver	25,000,000
New York State	18,000,000
Minneapolis	8,500,000
Twin Cities	11,000,000
New Jersey	40,000,000
Cleveland	25,000,000
Omaha	12,000,000
Memphis	18,400,000
Duluth-Superior	13,000,000
Baltimore	10,000,000
Indianapolis	5,700,000
Iowa	4,000,000
Total	518,000,000

Interstate transfer—transit

Boston	$105,000,000
New Jersey	30,000,000
Washington, D.C	45,000,000
Oregon	56,000,000
Sacramento	18,400,000
Northeast Illinois	56,000,000
Baltimore	37,000,000
Duluth	600,000
Hartford-New Britain	6,000,000
Indianapolis	11,000,000
Total	365,000,000

Other major transportation related provisions in the House Joint Resolution 599 conference agreement include a requirement to apportion and allocate one-quarter of all mass transit formula grants on the basis of the 1970 census, and a provision allowing the Secretary to spend fiscal year 1982 carryover airport development contract authority. This will permit the Secretary to make discretionary grants, equal to the amounts of apportioned authority which were not obligated during fiscal year 1982 but were carried forward to future years. The conferees intend that discretionary grants equal to apportioned authority not used during fiscal year 1982 be made in October 1982. These and other grants in fiscal years 1982 and 1983 will be subject to an obligation ceiling of $1.05 billion.

We also have brought back in disagreement the Senate's amendment to give air traffic controllers a pay increase. More will be said on this issue later.

I urge adoption of the conference agreement.

Mr. YATES. Madam Speaker, will the gentleman yield?

Mr. LEHMAN. I yield to the gentleman from Illinois.

Mr. YATES. Madam Speaker, first I would like to congratulate the gentleman from Florida (Mr. LEHMAN) on becoming the new chairman of the Appropriations Subcommittee for the Department of Transportation. He has done a superb job as a member of that committee for a number of years and his excellent handling of this bill bodes well for his tenure as chairman of that subcommittee as well.

Madam Speaker, I rise in support of House Joint Resolution 599.

I would like to engage the distinguished chairman of the Transportation Appropriations Subcommittee (Mr. LEHMAN) in a brief colloquy.

Am I correct in understanding section 101(a)(3) of this joint resolution to mean that, where an amount is appropriated in the bill of only one House, the applicable rate of expenditure for that item shall be the rate permitted by the action of the one House, or the current rate, whichever is lower?

And, therefore, the $15 million appropriated in the Transportation appropriations bill for Chicago commuter rail needs which is contained in the House bill under the heading "Commuter Rail Service," but is not contained in the Senate bill, should be made available upon enactment of this bill since $15 million is less than the $20 million provided for this purpose in fiscal year 1982?

Mr. LEHMAN. The gentleman is correct.

There should be absolutely no problem in interpreting the intent of section 101(a)(3) as it applies to the appropriations we made for commuter rail service. We expect the Department of Transportation to make available $60 million for commuter transition needs in the Northeast and $15 million for commuter rail subsidies for the Chicago RTA. Further, we expect the Department to allocate the $60 million for transition according to the distributions specified on page 61 of House Report No. 97-783.

Mr. MINETA. Madam Speaker, will the gentleman yield?

Mr. LEHMAN. I yield to my friend, the gentleman from California.

Mr. MINETA. I would like to commend the House conferees for the excellent job they have done.

But I do have a question on amendment No. 100, on which the House will offer a motion to recede and concur with the Senate amendment with an amendment.

Under that provision, fiscal year 1982 airport grant funds which might otherwise be lost, could be obligated in

the coming weeks. That is something that I fully support. But can the gentleman tell me, did the conferees agree, or would this House agree by adopting this provision, that all or part of these funds should be earmarked for any particular location, or are they to be distributed pursuant to the objective criteria in the authorizing statute adopted by this Congress just 1 month ago?

Mr. LEHMAN. We have agreed to no earmarking of any of these funds, and they should be distributed pursuant to existing statue.

Mr. CONTE. Madam Speaker, I yield myself 1 minute.

Mr. ROUSSELOT. Madam Speaker, will the gentleman yield?

Mr. CONTE. I yield to my friend from California.

Mr. ROUSSELOT. I appreciate my colleague yielding.

Was there not some defense spending in here someplace?

Mr. CONTE. Yes, there was. The House figure is $4.7 billion below the Senate figure. Our figure is $228 billion plus and the Senate figure was $233 billion plus.

So the House figure is about 5 billion below the Senate figure.

Mr. ROUSSELOT. $5 billion?

Mr. CONTE. $5 billion.

Mr. ROUSSELOT. That is a real savings.

Mr. CONTE. Yes. We did a good job here.

I do not know if the gentleman was in the Chamber when I mentioned that the young slasher has notified that he expects the President is going to sign this bill and he is going to recommend that the President sign this bill.

Mr. ROUSSELOT. That is certainly good news. You mean the Government can go on?

Mr. CONTE. The Government can go on and all of you folks can go back home and campaign.

Mr. ROUSSELOT. I intend to do that.

Mr. CONTE. And I hope to see you all back here after November 29.

Madam Speaker, I reserve the balance of my time.

Mr. WHITTEN. Madam Speaker, I yield 3 minutes to the gentleman from Pennsylvania, (Mr. EDGAR).

Mr. EDGAR. I thank the chairman for yielding and want to commend the committee on their conference report, particularly in deleting the language possessed by the Senate relating to the Water Resources Council.

I would, however, like to request of the chairman of the Subcommittee on Water and Power if he might answer a question relating to amendment 99 in the bill.

I am concerned about why the House has accepted the language offered by Senator SASSER to prohibit funding of studies and pricing policies for hydroelectric power. Can the gentleman indicate to us the reasoning behind the acceptance of the language contained in amendment No. 99?

Mr. BEVILL. Madam Speaker, will the gentleman yield?

Mr. EDGAR. I am happy to yield to the gentleman from Alabama.

Mr. BEVILL. I am glad to answer the gentleman's question.

The other body, of course, placed this into the bill and this came up in conference and the conference adopted it unanimously.

The purpose, of course, as the gentleman knows, for example, the TVA has in the law that it is required that they charge enough to cover all costs and this is an investigation to look into the possibilities of raising those rates.

Right now there is not much sympathy for that position and it is something, though, that if it looks like it has some merit in it, when we come back or when we get into the next year, when we have regular hearings, if it looks like it justifies a hearing we will certainly hold a hearing on it and go into it.

But this is a matter that came up on short notice in the conference committee and, as I say, the other body felt very strongly they had to look into it. We had not. But the members felt unanimously that this should be provided and it should be looked into more thoroughly before any such action is taken.

Mr. EDGAR. I thank the gentleman for his explanation. I find it difficult to understand why we would not permit the Energy Department to do a study on the market rate pricing for hydroelectric power and make legitimate changes that need to be made in reforming the pricing policies, whether it is the TVA or any other authority.

I find that that language in amendment 99 is inappropriate for this continuing resolution.

I understand the gentleman's problem because it was a Senate side provision and there has to be a little give and take.

□ 1649

I would have preferred this continuing resolution not have this language and allow the energy agencies to proceed with its approach in looking at market rate pricing.

I thank the gentleman for his explanation in clarifying this.

Mr. BEVILL. If the gentleman will yield further, as the gentleman notices, it does not in any way interfere with the Federal Energy Regulatory Commission which looks into these matters.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I regret that it is again necessary to invite the body's attention to what only can be described as a total lack of control in our rules, procedures, and discipline in this body.

The end of any legislative session is never any event to inspire confidence in the hearts of the governed. Due solely to our own unwillingness to manage our affairs responsibly, we pass most of our legislation in the last week. What passes is done hastily, without regard to proper procedures of safeguard and scrutiny. The result is bad procedure and bad law. Almost nobody knows what is being passed, and nobody at all can assess the risk of what is being passed.

In the name of expediency, we have rolled all of our appropriations into a single foul-smelling lump. We deny amendments; we limit discussion; then we tell people we had to do it or the Government would close down. We do not tell them that we could have passed the appropriations bills previously.

Worse, when our odious lump passes to the other body, it falls into a worse sinkhole of failed discipline. Committees and individuals there merrily attach nongermane, nonsensical, nonuseful, nonstudied, nondebated amendments as a matter of courtesy each to the other. It is of course an odd form of courtesy that uses the taxpayers' money to pander to specific greeds, most of which have no broad public purpose, and many of which are counterproductive to widely accepted social goals.

I do not propose to reform the other body. Far abler people than I have broken their picks on that rock. I do, however, accuse this body and its leadership of encouraging irresponsible deportment in the other body by accepting the frivolous, unnecessary, unknown, nongermane amendments from the other body.

Those amendments are not for fun. They become law, ladies and gentlemen. Those laws generate expenses and deficits and regulation and create needs for more bureaucrats in our Government.

Let us get to the case in point. In this resolution, I am told, there are 50 Senate amendments of various kinds and descriptions that are beyond my ability to describe.

When we put our resolution together for some reason we do not want to pass appropriations bills we rolled all the spending plans up into one. We gathered together all of our wildest current spending dreams into another malodorous lump. Parenthetically, while we are still waiting for the real bills, we probably ought to slow spending down to 85 percent to give us an incentive to pass our real appropriations. Instead, we managed to accelerate the spending in this resolution.

Then the other body did its usual number. During its committees' show-and-tell session, it added 100 amendments. In conference, our intrepid defenders of good order and discipline accepted about half of them. Which half, I do not know. I do not want to take a quiz on the contents of this resolution, and I doubt if many of the conferees would like to either.

The chairman of the other body's Appropriations Committee was quoted in this morning's paper as follows: "I admit we probably added a lot of garbage in it."

Now, most of us would agree with that statement, but everyone who votes for this resolution today accepts that garbage as his or her personal responsibility, because you are ratifying those actions.

I want to just note a couple of the items which, contrary to our rules, invade the jurisdictions of other committees in this body. I again have not had a chance to analyze this resolution, and will not have an opportunity for the next couple of days, but I imagine that most of the committees in this body have had their jurisdictions invaded.

We are going to spend $85 million to buy copper from a stockpile which everybody knows we do not need, which they cannot give away. And yet we are going to saddle the taxpayers with that.

We are going to begin a system of import licensing of steel, which has never had a hearing, which will add enough regulation in at least two major departments to delight the printers of the Federal Register for generations to come and require regular supplemental appropriations for more bureaucrats.

Now, just a few minutes ago we debated the balanced budget amendment. Our orators blasted away on all cylinders for fiscal discipline. And that is wonderful. I am for it. But I wonder how many of our colleagues who stood so tall for discipline on balanced budgets are going to cave into the lack of discipline, the undisciplined anarchy of this bill. I will not, Mr. Speaker.

I cannot tell my constitutents that I seek order and discipline in budgeting unless I seek it in the appropriations process and in the general procedures. I shall not vote for this continuing resolution or anything like it.

The bill is a substitute for honest work. It is a convenience over discipline. Regrettably, it will probably pass, but I will not be responsible.

Finally, I know this is a difficult, imperfect, fragile system, requiring comity, sensitivity and compromise. There is none so naive, not even I, that he does not expect a little give and take. But you, Mr. Speaker, have not given us give and take. You have given us a circus.

My negative vote will be cast both in anger and sorrow. I am enraged at our acceptance of the total breakdown of orderly procedure and angered at the shame that is consequently reflected in this institution.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Illinois (Mr. ROSTENKOWSKI), the chairman of the Ways and Means Committee.

Mr. ROSTENKOWSKI. Mr. Speaker, I would like to address the distinguished chairman of the Committee on Appropriations for the purpose of clarifying the intent of amendment No. 65 in the conference report. This amendment modified Senate language related to State claims for Federal reimbursement for payments made under AFDC, medicaid, title XX social services, and other Social Security Act programs.

Because of a large backlog of old outstanding State claims, in 1980 Congress enacted section 306 of the Adoption Assistance and Child Welfare Act of 1980 (Public Law 96-272). This section established procedures for the disposition of State claims for AFDC, medicaid, and title XX social service payments made before October 1979. Also, in order to prevent a similar backlog from developing in the future, States were required to submit future claims under these Federal/State matching fund programs within 2-years following the State expenditure.

It is my understanding that the Department of Health and Human Services, on the basis of languages contained in subsequent appropriations bills, has imposed a 1-year time limit on the filing of both past and current claims. The retroactive imposition of a 1-year filing period requirement made it impossible for States to obtain reimbursement for millions of dollars of valid claims for payments made in previous years. However, in July of this year, a U.S. court of appeals said the 1-year filing period restriction was not valid with regard to claims for expenditures made prior to October 1978, and directed the Department to pay all legitimate pre-1978 State claims.

Amendment No. 65, contained in the conference agreement before the House today, does restrict the payment of pre-1978 during fiscal 1983. It provides that all such claims determined to be valid by the courts would have to be paid during fiscal years 1984 through 1986 according to a procedure to be established under the Social Security Act.

It is my understanding that this amendment is not intended to prejudice in any way any court case pertaining to these claims.

With regard to State claims for expenditures made since fiscal year 1981, it is my understanding that there is nothing in this amendment that allows HHS to go beyond or be more restrictive than the requirements and procedures contained in section 306 of Public Law 96-272.

Does the distinguished chairman of the Committee on Appropriations agree with my understanding of the intent and implications of this amendment?

Mr. WHITTEN. Mr. Speaker, may I turn to my colleague, the chairman of the subcommittee which deals directly with this matter, the gentleman from Kentucky (Mr. NATCHER).

Mr. NATCHER. Mr. Speaker, the language agreed to in amendment No. 65 affects only those State expenditures which occurred prior to October 1, 1978, and which were not submitted by the States within 1 year. Language prohibiting payment of these claims was included in the 1980, 1981, and 1982 appropriations bills. As you know the validity of these appropriation limitations is at the heart of the case currently before the courts. This language does not prejudice the outcome of this case nor does it affect payment of any claims for State expenditures after fiscal year 1978. It merely provides that if a final judgment is rendered against the Government that payment of the judgment will be spaced out over a 3-year period of time beginning in fiscal year 1984.

Mr. Speaker, I would say to the chairman of the Ways and Means Committee that he is correct.

Mr. ROSTENKOWSKI. I thank the gentleman.

□ 1650

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I intend to vote against this conference report, and this provision, the provision we have been discussing here dealing with amendment No. 95 presented by Senator HEINZ of the Senate, because it was sneaked through. It never had any proper consideration. The administration colluded in sneaking it through. It is going to be very costly. It sets a dangerous precedent. It provides for the steel industry, a sick industry with the highest wages in the world, the highest labor costs in the world, a protection that other struggling industries in this country are not entitled to.

It, in effect says that because you are in the steel industry you can get extraordinary protection from this Government, without proving injury. That is a dangerous precedent. It is something, if it had ever received any consideration in the other body, I am sure it would not have been passed.

The debate over there does not reflect that it was ever accurately described by Senator HEINZ, the Senate if there had been anyone on the floor,

and I do not know if there was more than two or three present.

It is a very poor precedent. I regret that our House conference saw fit to adopt it.

I hope it will not be too expensive for the United States. It is going to cost a lot of money to administer this program, and it is going to be costly in price increases.

Mr. Speaker, I oppose the motion to recede and concur in the Senate amendment. The Senate amendment would authorize the Secretary of the Treasury to regulate imports of steelmill products in order to monitor and enforce foreign export restraints enacted pursuant to an agreement between the United States and a foreign government. The purpose of this provision is to give the administration authority to enforce a cartel-type restraint arrangement. The administration is currently negotiating such an agreement with the European Economic Community in order to settle pending unfair trade practice cases. Let me explain my reasons for opposing this amendment.

First, the effect of passing this measure will almost certainly be to authorize immediate curtailment of steel imports. This will have an impact on customs revenues of potentially significant proportions. The Congressional Budget Office today advised the Ways and Means Committee in writing that if the Secretary exercises his authority as contemplated by the amendment it would have an impact on tariff revenues in fiscal year 1983. It is clear, therefore, that this constitutes revenue legislation which should not be considered in the context of an appropriations measure.

Second, and more important, this provision would establish a dangerous precedent, because it would allow the President to conclude restrictive bilateral restraint agreements without any of the safeguards and procedural requirements contemplated by existing law. Section 201 of the Trade Act of 1974 currently permits the President to negotiate and carry out a bilateral restraint agreement with a foreign government, but not until there is a finding by the International Trade Commission that imports are a substantial cause of serious injury. The Congress has traditionally been unwilling to delegate broad Presidential authority to restrict imports without attaching very clear conditions such as those laid down in the Trade Act. The Senate amendment would therefore represent a fundamental change in U.S. trade policy which will establish a precedent for other industries seeking such treatment. By passing such authority exclusively for the steel industry, we are telling other industries that we adopt special rules for those with political muscle, but others must simply live with the law the way it is.

Third, and most troubling of all to me, this measure was never considered by the appropriate committee, either in the House or in the Senate—where it began as a last minute floor amendment. The administration has not taken a unified position on this major revision in our trade policy. No hearings have been held to examine how this would affect the domestic economy. It could be that such hearings would reveal a need to amend our unfair trade law to provide some kind of general settlement authority. I think we should examine that issue. But we should not hastily and covertly authorize a special deal for one industry and in doing so change established trade policies. I, therefore, urge Members to reject the conference report.

Mr. CONTE. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. HORTON).

Mr. HORTON. Mr. Speaker, legislation that affects the entire Government frequently has undesirable side effects and this conference report is no exception. I want to express my concern about one of those consequences: the potential impact of this measure on the Office of Management and Budget.

H.R. 7158, the Treasury, Postal Service, and General Government Appropriations Act for fiscal year 1983, includes funding for the Office of Management and Budget. As reported by the Appropriations Committee, the bill contains this restriction on OMB's actions during fiscal year 1983:

Provided, That none of the funds made available by this Act may be used by the Office of Management and Budget to interfere with the rulemaking authority of any regulatory agency.

The companion Senate bill, S. 2916, as reported by committee, contains no comparable restriction.

Although neither of these bills has passed its House, and neither is even expected to be considered before the October recess, the continuing resolution has elevated them for the period from October 1 to mid-December to the status of bills which have passed their respective Houses.

The resolution further provides that when, as in this case, the bills have in effect passed the two Houses in different forms, an activity which would be funded by the legislation shall be continued under the more restrictive authority. Because the House's authority for OMB is more restrictive, it will become law once the continuing resolution is enacted.

What is the "interference with rulemaking authority" that OMB will be precluded from doing, and what is a "regulatory agency"? The second part of the question is simpler; it seems reasonable to conclude that a "regulatory agency" is any agency which issues regulations. The first has been the subject of more discussion. I have heard some speculation that this proviso is intended to prevent OMB from carrying out its responsibilities under Executive Order 12291, entitled "Federal Regulation," and the Paperwork Reduction Act of 1980.

As the ranking minority member of the Committee on Government Operations, which has both legislative and investigative jurisdiction over OMB, I have devoted considerable attention to examining the work of that agency. I can assure the House that the restriction contained in H.R. 7158 does not affect OMB's legitimate exercise of authority because the agency does not interfere with rulemaking authority under either of these laws.

Executive Order No. 12,291 is intended—

To reduce the burdens of existing and future regulations, increase agency accountability for regulatory actions, provide for Presidential oversight of the regulatory process, minimize duplication and conflict of regulations, and insure well-reasoned regulations. (Exec. Order No. 12,291, preamble; 46 Fed. Reg. 13193 (Feb. 17, 1981)).

The Paperwork Reduction Act is designed to minimize the Federal paperwork burden for individuals, small businesses, State and local governments, and other persons; to minimize the cost to the Federal Government of collecting, maintaining, using, and disseminating information, (44 U.S.C. 3501).

And accomplish other purposes.

These laws require all Federal agencies to fulfill certain duties, and OMB to exercise central management authority to insure that those functions are performed in a consistent manner.

Both of these laws are clearly reasonable exercises of authority under the Constitution's directive that the President "take Care that the Laws be faithfully executed. . . ." (Article II, section 3). This mandate was given fuller explanation by the Supreme Court in the case of Myers against United States:

The ordinary duties of officers prescribed by statute come under the general administrative control of the President by virtue of the general grant to him of the executive power, and he may properly supervise and guide their construction of the statutes under which they act in order to secure that unitary and uniform execution of the laws which Article II of the Constitution evidently contemplated in vesting general executive power in the President alone. (272 U.S. 52, 135 (1926)).

For more than 40 years, Presidents have chosen to exercise that power to secure unitary and uniform execution of the laws by vesting the Office of Management and Budget and its predecessor with the authority to coordinate the activities of executive agencies. Franklin Roosevelt, for example, transferred that Office from the Treasury Department to the Executive Office of the President to insure that the Government as a whole could perform "promptly, effectively, without waste or lost motion." (84 CONGRESSIONAL RECORD 4741 (1939)). Richard

Nixon gave the Office additional managerial duties, saying that—

The President must . . . have a substantially enhanced institutional staff capability in (more) areas of executive management—particularly in program evaluation and coordination. (116 Cong. Rec. 7088 (1970)).

Both these actions were taken in reorganization plans to which the Congress assented.

Executive Order No. 12,291 and the Paperwork Reduction Act are merely two recent expressions of this historical development. The Executive order is carefully crafted to protect each agency's ability to issue its own rules under the Administrative Procedure Act and other statutes, subject only to additional administrative requirments and consideration of advice from the Presidential Task Force on Regulatory Relief and the Director of OMB. The Paperwork Reduction Act simply restates, in clearer and more detailed terms, a function which since 1942 has been considered a normal part of the procedure for issuing forms. At most, the prohibition on interference is simply a caution that OMB not go beyond its legitimate authority in carrying out the two laws.

● Mr. BROOKS. Mr. Speaker, I rise in support of the conference report and commend Chairman WHITTEN and members of the Appropriations Committee for the diligent and careful though that went into this measure. However, it is my understanding that H.R. 7158, the Treasury, Postal Service and General Government Appropriations Act for fiscal year 1983, contains a provision which prohibits OMB from expending any funds "to interfere with the rulemaking authority of any regulatory agency." I also understand that this provision may be taken by some as a prohibition against OMB in carrying out its responsibilities under the Paperwork Reduction Act of 1980 (Public Law 96-511). I do not believe that is the effect the Appropriations Committee intended this provision to have. Under Public Law 96-511, OMB is responsible for insuring that agencies, in developing rules and regulations, use efficient methods to collect, use, and disseminate needed information. Clearly, the provisions contained in H.R. 7158 does not change or in any way modify OMB's authorities under the Paperwork Act. Further, no reference was made to the Paperwork Act in the bill. Since Public Law 96-511 does not authorize OMB to interfere with the rulemaking authority of regulatory agencies, a prohibition against such activities would have no effect on the paperwork legislation.●

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is easy to take the well and lambast the Committee on Appropriations. But these amendments were not instigated or begun by the Committee on Appropriations on the House side. Neither were they instigated or adopted here in the House of Representatives.

This argument should be over in the other side. It was the other side that put these amendments in.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to my good friend from Florida.

Mr. GIBBONS. I thank the gentleman for yielding.

I realize amendments were not put in over here. I cast no reflections upon any member of the House conference. I am reflecting severely upon the presenter of the amendment in the Senate. He did not accurately describe it. And I do not know who else was on the floor. There has been no request from the administation to ever take up anything like this. They deliberately bypassed the House.

There are plenty of vehicles over in the Senate for dealing with subject matter like this that they could have attached this amendment to. They just used the Appropriations Committee because they figured that they had a situation in which they could take advantage of the fact that the Government would have to close down. And there was no consideration of this matter.

And I realize the gentleman is a very conscientious man, and he does not like to obfuscate, and he is not obfuscating. But there was plenty of it on the other side of the Capitol.

Mr. CONTE. Well, I appreciate the explanation of the gentleman from Florida. They are not the only ones that use the Appropriations Committee. This House has used us time and time again because they cannot get a certain bill out of legislative committee, and then comes the Appropriations Committee on the floor of the House after months of hard work and out comes an amendment saying no funds shall be spent for this or no funds shall be spent for that.

Mr. GIBBONS. If the gentleman will yield further, I want to make it perfectly clear, the Ways and Means Committee was in no way derelict on this. We have never received a request to have a hearing, to entertain the motion by any Member of the House. There has been no bill presented in the House on this subject. This one was plainly and clearly sneaked through the Senate by the administration and by the Senators who colluded in it.

Mr. CONTE. I have a letter written by the Secretary of Commerce to Senator HEINZ on September 29, in regard to the steel amendment. He said,

This amendment would facilitate the implementation and enforcement of the arrangement on steel with the European Community in settlement of the current antidumping and countervailing debt cases. The proposed provision, narrow as it is in product coverage, duration, and prerequisites for application, makes it consistent with the administration policy and approach to our efforts to resolve the steel trade issue.

I might go back to the first paragraph, and in the last line of that paragraph, he says, "I support this amendment."

So, that is what we have before us.

Mr. GIBBONS. If the gentleman will yield further, I will try to be brief. That letter was never sent to any House Member. There are plenty of bills in the Senate that this amendment could have been attached to, and we could have had a discussion of it. Some of our bills have been lying in the Senate, noncontroversial bills, for a year and a half—for a year and a half. And, for some reason, the Senate has never been able to even move them over there. They are noncontroversial bills, bills that affect many Members of this House, bills that passed here by unanimous consent, that they could have connected them to, but they just chose this vehicle.

They took advantage of the gentleman. I am sorry they did, because the gentleman is an honorable man. And the gentleman should not have been imposed on like that.

Mr. CONTE. Wait a minute, now. There is 10 percent unemployment, steel mills closing all over the country. This is not a protectionist measure. This is an antidumping measure. With people out there on the unemployment lines and the soup lines, we should start taking care of our American workers.

Mr. GIBBONS. I agree with that, but we must look after the welfare of all Americans—not just a few at the expense of all other Americans.

Mr. MYERS. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Indiana, he knows a little bit about steel.

Mr. MYERS. I thank the gentleman for yielding.

It is too bad we had to do it this way. I am not sure who is right in this issue. But to attack this committee, when we went over with the Senate with over 100 amendments, and you should have seen this bill. If Members do not like it now, they should have seen it before we cleaned it up. It was a conference. We had to concede in some issues.

What the gentleman from Massachusetts says is absolutely right. Maybe this is not the bill that should have been amended. But would the Members disagree about what we are trying to do for American labor, to protect and keep them on the job? Maybe this is not the right vehicle, but it is the only one available right now. Maybe the other body was wrong in adding it. Maybe we should have made a greater fight. But it was a conference, and you have to give and take

in a conference. The gentleman from Florida has been in many conferences.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield briefly to the gentleman from Florida.

□ 1700

Mr. GIBBONS. I agree with the gentleman. I want to make it perfectly clear, I am not attacking any Member of the House, and that, of course, includes this Appropriations Committee and this conference committee.

Mr. CONTE. I appreciate that.

Mr. GIBBONS. But I want to say again, there are many bills over in the Senate that they could have easily attached this to. We have been having conferences with the Senate all week on a number of bills. No one ever mentioned this, but that is the truth. That is all that happened. They took advantage of the lateness of the hour—and the urgency of the appropriation process to the operation of our Government.

Mr. CONTE. Mr. Speaker, I yield to my good friend, the gentleman from Ohio (Mr. REGULA).

Mr. REGULA. Mr. Speaker, I thank the gentleman for yielding.

I think it ought to be clear, as to what this does. The Commerce Department has brought actions on dumping. It is negotiating a settlement of these cases with the other countries on a country-to-country basis. In order to keep accurate control of what is happening, this provision was requested.

It is not a protectionist issue. It is a matter of administering the existing dumping laws. The administration needs the ability to request export licenses from the country of origin so it can have a control to implement the agreement that is not being worked out to stop the dumping of foreign steel into the American markets.

Of course, we have on the books many statutes to prohibit dumping, but to adequately implement them this is needed.

I understand the gentleman's concern about the procedure on this language, but I think it is a very important issue because Commerce is in the process right now of negotiating these cases and the administration needs the ability to request an export license for steel coming into the United States.

Mr. CONTE. Mr. Speaker, I want to thank the gentleman from Ohio for his explanation.

Mr. WHITTEN. Mr. Speaker, I yield myself 3 minutes.

May I say, the problem stops here, it rests at the steps of your Appropriations Committee, it does not start here. When this Congress provided that we could not move appropriation bills after May 15, but rather until we finally agreed upon a budget ceiling, that is what put us into this situation here.

I spent about an hour before the Rules Committee urging that whatever they did about the Budget Act, either make the budget resolutions conform to the deadlines of the act or at least let us, the Appropriations Committee, go ahead with our work and bring bills to this floor in a timely manner so we can avoid the need for continuing resolutions such as this one.

My testimony went into detail, and I felt the need for it. As all of my colleagues know, I was cochairman of the study committee that recommended the creation of the Budget Act and I support it; but this matter that the Congress cannot move until they reach a final conclusion months beyond the deadline just ties us in knots.

Mr. Speaker, the Senate did not pass this resolution until late Wednesday night. We were not able to go to conference on the 100 amendments of the Senate until midafternoon yesterday. We were under heavy pressure and the situation was most critical. The House members of the conference did an excellent job and we appreciate the cooperation of Chairman HATFIELD of the Senate Appropriations Committee in finding solutions in a timely manner.

In this connection, Mr. Speaker, I wish to pay special tribute to all the staff of the committee. The preparation of the report required a great deal of competence. This resolution included financing for all the Government, it involved all subcommittees, and therefore all the staff shared responsibility.

It was possible through a determined effort by the staff to file this report by midnight last night so that it would be available for consideration by the House today so that essential functions of Government might continue.

Mr. Speaker, especially since I have been chairman of the committee, I have been impressed by the dedication of our staff. They take pride in their work and I must say I have never seen another group which constantly demonstrates such smooth teamwork. They always try to do their best for the committee on both sides, and for the House.

Last year I think we worked 72 hours, two nights we stayed up trying to get through the myriad amendments. Last year we did a good job, and again this year we have done a good job. I understand this conference agreement will be signed.

Your committee on the House side had a very tight bill moneywise and otherwise, and we did refrain from most of those things that under the rules of the other body are permissible on a resolution of this kind.

So I just want to say we did our best; but the point is that we are here because of that requirement that we could not move on with our bills until other actions were taken.

Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. HANCE).

Mr. HANCE. Mr. Speaker, I have a question to be directed to the chairman or one of the subcommittee chairmen.

According to the Washington Post and also the report from the other body, there was a fund of some $500,000 to be provided in 1983, to provide housing for a chimpanzee colony. It reportedly would house 60 animals. I think that kind of monkey business will offend a lot of people. The cost is over $8,000 per monkey. I just would like to know what happened to it in conference.

Mr. NATCHER. Mr. Speaker, will the gentleman yield to me at this time?

Mr. HANCE. I am very glad to yield.

Mr. NATCHER. Mr. Speaker, the matter that the gentleman from Texas discusses was not germane insofar as the conference is concerned and it was not discussed.

Mr. HANCE. I appreciate the gentleman's answer and I am glad the conferees pointed out that it was not germane and it was not included in the conference report.

Mr. WHITTEN. Mr. Speaker, I yield 1 minute to the gentleman from Kentucky (Mr. MAZZOLI).

Mr. MAZZOLI. Mr. Speaker, I thank the chairman for yielding.

I would direct my inquiry to the gentleman from Iowa, the distinguished chairman of the subcommittee.

Amendment No. 88 in the conference report deals with the addition of what amounts to a private immigration bill to this continuing resolution for appropriations.

I commend, first, the chairman for having added the statement that it does not constitute a precedent and that it is a highly unusual procedure.

I wonder if the gentleman might help me, though, by perhaps adding to the legislative record on that.

The gentleman from Kentucky is chairman of the subcommittee and deals with these private bills and, of course, wonders about the procedure where they come back attached to an appropriation bill.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. MAZZOLI. I certainly will.

Mr. SMITH of Iowa. To start with, I take a very dim view of these kinds of bills.

First, we determined that a bill had been approved by the Judiciary Committee. Had that not been the case, we would not even have considered it.

Next we were told that the two individuals, the bill was for a mother and her son, and does not involve a general immigration bill, would have to leave the country by October 10. In addi-

tion, I understand that the woman's husband had cancer, and had come to this country, accompanied by his family, for treatment and had recently died. So there were some very unusual circumstances. We made it very clear that although in this one instance we were including a private bill in a continuing resolution, it is to be considered an exception and not a precedent, and we only did it after we found out that the Judiciary Committee had approved the bill.

Mr. MAZZOLI. I understand. I thank the chairman for that explanation. It helps me, because, of course, the subcommittee takes pride in the deliberations that it conducts on all the hundreds of private bills introduced by Members, and it, of course, wants to proceed on the basis of an orderly legislative process.

I thank the chairman for his explanation.

Mr. DAUB. Mr. Speaker, it is again time to emphasize the Federal responsibility to compensate those local school districts which are heavily impacted with families who live and/or work on military bases. These families are exempt from paying local property taxes—those taxes which principally fund the operating budgets of local public schools. Military dependents were the original justifications for the Federal impact aid reimbursement, and nothing has changed to make them any less deserving.

It is unjustifiable that those school districts which are impacted with military children should undergo financial difficulties as a result of Congress inability to appropriate funds in a timely manner.

The continuing resolution passed by the House provided funding of the impact aid program at current fiscal year 1982 levels. My support of this resolution reflected my desire that the current level of $437 million for fiscal year 1982 be sustained for fiscal year 1983. However, the continuing resolution presented to the Senate would have allowed only those school districts that showed "undue hardship" to receive preliminary payments. These preliminary payments are necessary because school districts need these funds for cash flow purposes.

An amendment was offered to allow schools where at least 20 percent of the students' parents either work or live on Federal property to receive preliminary payments of 75 percent of their 1982 funding level. All other school districts would receive 50 percent of their 1982 funds in preliminary payments. The distribution of additional impact aid funding would be decided upon in the regular appropriations bill for education programs.

This amendment has been agreed upon by House and Senate conferees. This amendment provides an acceptable means to insure that cash flow problems for impacted school districts are minimized, if not eliminated. At the same time, total funds for fiscal year 1983 are made by the appropriation subcommittee.

● Mrs. SCHROEDER. Mr. Speaker, enactment of this conference report will result in Congress passing two rather different approaches to dealing with the same problem, both on the same day. Section 124 of House Joint Resolution 599 authorizes Government agencies to offset the salaries of Government employees where there has been a court decision holding that the employee is indebted to the Government. Section 5 of H.R. 4613, the Debt Collection Act, provides for an offset following an agency determination of indebtedness, but provides for a due process administrative hearing in front of an independent official before the offset can take place. House Joint Resolution 599 says up to 25 percent of gross pay can be withheld to satisfy the debt. H.R. 4613 only permits the withholding of 15 percent of disposable pay.

The provisions of these two bills are not exactly contradictory, but they do go after the same problem in differing ways. The language in the continuing resolution is really a remnant from earlier in the process which should have been discarded in conference. Somehow, the word of final action on H.R. 4613 did not get through to the conferees. The final days of any session bring anamolies of this sort. In the lameduck session, we should repeal section 124 of the continuing resolution.

I take this time to suggest a means of dealing with these two provisions. Section 5 of H.R. 4613 should be used as the primary debt collection mechanism. It is better from the point of view of the Government because it spares the Government of the huge cost of seeking a court order in every case. It is better from the point of view of the employee since the employee will have an independent official in front of whom the employee can argue about the existence and amount of the debt as well as the repayment of schedule. Further, it limits the maximum offset amount to a reasonable level. I cannot imagine where the use of Section 124 of House Joint Resolution 599 would be the preferred course.

One other point. If an agency pursues the administrative route from H.R. 4613 and is not satisfied with the results, I think it is obvious that a Federal court should and would give stare decisis effect to the administrative proceeding, just as a Federal agency could not reconsider a negative decision reached by a Federal court. In other words, the Government should be limited to the pursuit of one and only one of the two mechanisms. I would think that the H.R. 4613 route would be the only one taken.●

● Mr. STARK. Mr. Speaker, I supported initial passage of this continuing resolution. But the bill which has come back from conference has little resemblance to the bill we passed. A Dr. Jekyll has become a Mr. Hyde.

Basically, the House passed bill would have provided for Defense spending at a level of about $205 billion. The Senate passed bill would have provided $233.4 billion. The "compromise" settles at $228.7 billion.

To paraphrase the words of a current, popular country western tune, "the Pentagon got the goldmine and we got the shaft."

Mr. Speaker, $228.7 billion in a budget which cuts major social programs is simply too much.

I vote no.●

● Mr. FIELDS. Mr. Speaker, as we stand here today to consider this final piece of legislation before adjourning for the elections, I feel compelled to bring to the attention of my colleagues a provision in the continuing resolution which is of great concern to me.

In the House-passed version of the continuing resolution, the urban mass transit formula grants were to be apportioned on the basis of half 1970 census figures and one-half 1980 census figures. The Senate on the other hand, in their version of the continuing resolution mandated the use of the latest available census figures as required by the underlying authorizing legislation. The use of outdated census figures represents a potential loss of $1.5 million to my own city of Houston.

During conference, I along with several of my fellow colleagues from Texas worked hard to restore the use of the latest available census figures. A compromise was struck in the conference which requires only 25 percent of the urban mass transit grants to be allocated on the basis on 1970 census figures and 75 percent apportioned on the basis of 1980 figures. Although this compromise will translate into an additional $750,000 for the city of Houston in badly needed transit moneys, I nonetheless remain concerned about the equity of this entire situation.

Mr. Speaker, the legitimate needs of growth areas in the South and West can no longer be ignored or overlooked. We, in Congress must meet these needs just as we met the needs of those areas in our country which are declining in population. Mr. Speaker you can be sure that I will continue to work in this Congress and in future Congresses to assure that the growth areas in our country are fairly represented.

Mr. Speaker, I would like to submit for the RECORD a copy of my letter to the chairman of the Appropriations Committee expressing my strong

desire that the conferees adopt a mass transit formula which uses only the latest available census figures.

Thank you Mr. Speaker.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., September 29, 1982.

Hon. JAMIE L. WHITTEN,
Chairman, Committee on Appropriations, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: In your capacity as Chairman of the House Appropriations Committee and as a member of the House-Senate Conference Committee on the Continuing Resolution for fiscal year 1983, we are writing to call your attention to a provision in this legislation which is of critical importance to us.

As you are aware, under the Urban Mass Transportation Act of 1978, the formula grants for section 5 and section 18 are authorized to be appropriated on the basis of population, as determined by the latest available census figures. This formula would be continued in H.R. 6211, the Surface Transportation Act of 1982, a bill reauthorizing the major highway and transit programs for fiscal year 1983.

Unfortunately, H.R. 7019, the Transportation Appropriations for FY 1983 does not carry out this legislative mandate. Although P.L. 97-102, the transportation appropriations for FY 1982 directed the use of 1970 census figures during the first six months of the year for these programs pending the completion of the 1980 census, this was clearly understood to be a temporary measure and can no longer be justified since 1980 figures are now available.

As representatives from a state which has experienced tremendous growth in the past decade, we are extremely concerned that the continued use of 1970 census figures as provided for in H.R. 7019 as passed by the House, will cost our State of Texas almost $4.8 million next year. Many other southern and western states will experience comparable losses in vitally-needed federal transit funds. Attached is a list of some of the states and cities which will be unduly penalized through the use of these outdated census figures.

During the House-Senate Conference Committee on the Continuing Resolution, we urge your consideration of section 147 of H.J. Res. 599 as passed by the Senate. In short, this section would restore legislative equity by requiring the use of 1980 census figures for the entire fiscal year as previously and presently mandated by the Congress. We hope you will give this issue careful and serious consideration during the course of your deliberations.

Thank you for your attention.

Sincerely,

JACK FIELDS,
TOM LOEFFLER,
KENT HANCE,
RALPH M. HALL,
BILL PATMAN,
CHARLIE WILSON,
BILL ARCHER,
CHARLIE STENHOLM,
JACK HIGHTOWER,
MARVIN LEATH,
SAM B. HALL, JR.

Mr. WHITTEN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 290, nays 123, not voting 19, as follows:

□ 1720

Messrs. CONYERS, WOLPE, CARMAN, HUNTER, GRAY, WASHINGTON, PORTER, WYDEN, VOLKMER, and EMERSON, Mrs. COLLINS of Illinois, Mr. LELAND, and Mr. OBERSTAR changed their votes from "yea" to "nay."

Messrs. FINDLEY, VOLKMER, and ERDAHL changed their votes from "nay" to "yea."

Mr. VOLKMER changed his vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 734) entitled "An act to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade service generally."

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 5447. An act to extend the Commodity Exchange Act, and for other purposes.

REMOVAL OF NAME OF A COSPONSOR OF H.R. 6467

Mr. LANTOS. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of the bill, H.R. 6467.

The SPEAKER pro tempore (Mr. MINETA). Is there objection to the request of the gentleman from California?

There was no objection.

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 599, CONTINUING APPROPRIATIONS, 1983

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the Clerk designate Senate amendments reported in disagreement in lieu of reporting such amendments.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 15: Page 7, line 25, after "Act" insert: ": *Provided*, That whenever the amount which would be made available or the authority which would be granted in this subsection is different from that which would be available or granted under such Act for each pertinent project or activity, as reported to the Senate on September 22, 1983, the pertinent project or activity shall be continued under the lesser amount or the more restrictive authority.".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 15 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided*, That notwithstanding the foregoing provision of this paragraph and notwithstanding any other provision of this joint resolution, such amounts as may be necessary for projects or activities provided for in the Military Construction Act, 1983 (H.R. 6968), at a rate for operations and to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference as filed in the House of Representatives on September 30, 1982, as if such Act had been enacted into law".

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 30: Page 13, line 7, strike out all after "resolution," down to and including "acquisition" in line 25 and insert "for acquisition of strategic and critical materials and for transportation and other incidental expenses related to such acquisitions, $320,000,000, which shall be derived from moneys received in the National Defense Stockpile Transaction Fund established by section 9 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h), as amended by Public Law 97-35 (95 Stat. 381), and shall remain available until expended: *Provided*, That of this amount $200,000,000 shall be obligated for the purchase of domestic copper mined and smelted in the United States after September 30, 1982.".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 30 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert the following: "moneys deposited into the National Defense Stockpile Transaction Fund under section 9(b) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h(b)) are hereby made available, subject to such limitations as may be provided in appropriation Acts and in section 5(a)(1) of such Act, until expended for the acquisition of strategic and critical materials under section 6(a)(1) of such Act (and for transportation and other

incidental expenses related to such acquisition). This paragraph applies without fiscal year limitation to moneys deposited into the fund before, on, or after October 1, 1982: *Provided*, That during the fiscal year ending on September 30, 1983, not more than $120,000,000 in addition to amounts previously appropriated, of which not to exceed $85,000,000 shall be available only until the termination of this joint resolution for the purchase of domestic copper mined and smelted in the United States after September 30, 1982, may be obligated from amounts in the National Defense Stockpile Transaction Fund for the acquisition of strategic and critical materials under section 6(a)(1) of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98e(a)(1)) and for transportation and other incidental expenses related to such acquisition.".

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 33: Page 14, strike out lines 89 to 20, inclusive

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that House recede from it disagreement to the amendment of the Senate numbered 33 and concur therein with an amendment, as follows: Restore the matter striken by said amendment, amended to read as follows:

SEC. 114. (a)(1) Funds provided by this joint resolution for costs to continue the implementation of provisions contained in the District of Columbia Statehood Constitutional Convention Initiative (D.C. Law 3-171) shall be applied first toward ensuring voter education on the proposed constitution by (A) printing, by the Statehood Commission, of the proposed constitution together with objective statements both for and against its provisions as expressed by the Convention delegates taking such positions, (B) mailing of this information to the registered voters of the District of Columbia by October 22, 1982, and (C) preparing for publication as a public document a comprehensive legislative history of the proposed constitution.

(2) None of the funds provided by this joint resolution may be used to pay for the publication of any information or materials by the Statehood Commission which fail to present objective arguments for and against the provisions of the proposed constitution.

(b) Notwithstanding section 102, the paragraph under the heading "LOTTERY AND CHARITABLE GAMES ENTERPRISE FUND" in the District of Columbia Appropriation Act, 1982 (Public Law 97-91; 95 Stat. 1175) is amended—

(1) in the second proviso, by striking out "payments of prizes" and inserting in lieu thereof "payment of fees to ticket agents, fees to contractors supplying gambling paraphernalia or services, and prizes";

(2) in the third proviso, by striking out "payments of prizes" and inserting in lieu thereof "payment of such fees and prizes";

(3) in the fourth proviso, by striking out "prizes and administration of the Board shall not exceed resources available to the Board from appropriated authority or revenues" and inserting in lieu thereof "administration of the Board shall not exceed resources available to the Board from appropriated authority: *Provided, further*, That the annual expenses for fees and prizes shall not exceed revenues"; and

(4) in the fifth proviso, by striking out "for prize money" and inserting in lieu thereof "for fees and prize money".

(c) Notwithstanding any other provision of this resolution, the Superior Court of the District of Columbia may continue to operate the Volunteer Attorney Program and the Community Workers Program, and may implement the hearing commissioner program, from existing resources and position authority. Upon passage of the fiscal year 1983 appropriation Act, full year program funding will be available to pay, retroactively, for program services performed on or after October 1, 1982.

(d) The Washington Convention Center may proceed at an annual rate of operation which does not exceed $5,275,000.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 57: Page 19, after line 2, insert:

SEC. 125. Notwithstanding any other provision of law or this joint resolution, except section 102, an amount for those International Financial Institutions referred to in title I of Public Law 97-121, the Foreign Assistance and Related Program Appropriations Act, 1982, as is equal to the total for such institutions in that title, may be allocated by the President among those institutions in a manner which does not exceed the limits established in authorizing legislation.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion. The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 57 and concur therein with an amendment, as follows: In lieu of the section number 125 named in said amendment, insert "129".

The motion was agreed to.

A motion to reconsider was laid on the table.

□ 1730

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 59: Page 19, after line 2, insert:

SEC. 127. Sections 308(g) and 308a(c) of title 37, United States Code, are amended by striking out "September 30, 1982" and inserting in lieu therof "March 31, 1983".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 59 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 131. Sections 308(g) and 308a(c) of title 35, United States Code, are amended by striking out "September 30, 1982" and inserting in lieu thereof "December 17, 1982".

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 69: Page 19, after line 2, insert:

SEC. 137. Notwithstanding section 5(b)(2) of the Act of September 30, 1950 (Public Law 874, 81st Congress), not later than thirty days after the beginning of the fiscal year, the Secretary of Education shall, on the basis of any application for preliminary payment from any local educational agency which was eligible for a payment during the preceding fiscal year on the basis of entitlements established under section 2 or 3 of such Act, make to such agency a payment of not less than—

(1) in the case of a local educational agency described in section 3(d)(1)(A) of such Act, 75 per centum of the amount that such agency received during such preceding fiscal year; and

(2) in the case of any other local educational agency, 50 per centum of the amount that such agency received during such preceding fiscal year.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 69 and concur therein with an amendment, as follows: In lieu of section number 137 named in said amendment, insert "140".

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 73: Page 19, after line 2, insert:

SEC. 141. Section 93 of title 14, United States Code, is amended by (1) striking out "and" at the end of subsection (p); (2) striking out the period at the end of subsection (q) and inserting in lieu thereof "; and"; and (3) adding at the end thereof the following new subsection: "(r) provide medical and dental care for personnel entitled thereto by law or regulation, including care in private facilities.".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 73 and concur therein with an amendment, as follows: In lieu of the section number 141 named in said amendment, insert "143".

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 75: Page 19, after line 2, insert:

SEC. 143. Notwithstanding any other provision of this joint resolution, the head of any department or agency of the Federal Government in carrying out any loan guarantee or insurance program shall enter into commitments to guarantee or insure loans pursuant to such program in the full amount provided by law subject only to (1) the availability of qualified applicants for such guarantee or insurance, and (2) limitations contained in appropriation Acts.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 75 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 145. Notwithstanding any other provision of this joint resolution, the head of any department or agency of the Federal Government in carrying out any loan guarantee or insurance program shall enter into commitments to guarantee or insure loans pursuant to such program in the full amount provided by law subject only to (1) the availability of qualified applicants for such guarantee or insurance, and (2) limitations contained in appropriation Acts.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 76: Page 19, after line 2, insert:

SEC. 144. Notwithstanding any other provision of law or this joint resolution no change in the regulations subject to the moratorium required by section 135 of Public Law 97-248 shall be promulgated in final form until one hundred and twenty days after the expiration of the moratorium, during which period the Department of Health and Human Services shall seek public review and comment on any such proposed regulations and consult with the appropriate Committee of Congress.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion. The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 76 and concur therein with an amendment, as follows: In lieu of the section number 144 named in said amendment, insert "146".

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 78: Page 19, after line 2, insert:

SEC. 146. Notwithstanding any other provision of this joint resolution or any other provision of law, appropriations for urban and nonurban formula grants authorized by the Urban Mass Transportation Act of 1964 (49 U.S.C. 1601 et seq.) shall be apportioned and allocated using data from the 1980 decennial census.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 78 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 147. Notwithstanding any other provision of this joint resolution or any other provision of law, appropriations for urban and nonurban formula grants authorized by the Urban Mass Transportation Act of 1964 (49 U.S.C. 1601 et seq.) shall be apportioned and allocated using data from the 1970 decennial census for one-quarter of the sums appropriated and the remainder shall be apportioned and allocated on the basis of data from the 1980 decennial census.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 83: Page 19, after line 2, insert:

SEC. 151. (a) Section 4109 of title 5, United States Code is amended by adding at the end thereof the following new subsection:

"(c) Notwithstanding subsection (a)(1) of this section, the Administrator, Federal Aviation Administration, may pay an individual training to be an air traffic controller of such Administration, during the period of such training, at the applicable rate of basic pay for the hours of training officially ordered or approved in excess of forty hours in an administrative workweek.".

(b) Section 5532 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) Notwithstanding any other provision of law, the retired or retainer pay of a former member of a uniformed service shall not be reduced while such former member is temporarily employed, during the period described in paragraph (2) or any portion thereof, under the administrative authority of the Administrator, Federal Aviation Administration, to perform duties in the operation of the air traffic control system or to train others to perform such duties.

"(2) The provisions of paragraph (1) of this subsection shall be in effect for any period ending not later than December 31, 1984, during which the Administrator, Federal Aviation Administration, determines that there is an unusual shortage of air traffic controllers performing duties under the administrative authority of such Administrator.".

(c)(1) Chapter 55 of title 5, United States Code, is amended by inserting after section 5546 the following new section:

"§ 5546a. Differential pay for certain employees of the Federal Aviation Administration

"(a) The Administrator of the Federal Aviation Administration (hereafter in this section referred to as the 'Administrator') may pay premium pay at the rate of 5 per centum of the applicable rate of basic pay to—

"(1) any employee of the Federal Aviation Administration who is—

"(A) occupying a position in the air traffic controller series classified no lower than GS-9 and located in an air traffic control center or terminal or in a flight service station;

"(B) assigned to a position classified not lower than GS-09 or WG-10 located in an airway facilities sector; or

"(C) assigned to a flight inspection crewmember position classified not lower than GS-11 located in a flight inspection field office,

the duties of whose position are determined by the Administrator to be directly involved in or responsible for the operation and maintenance of the air traffic control system; and

"(2) any employee of the Federal Aviation Administration who is assigned to a flight test pilot position classified not lower than GS-12 located in a region or center, the duties of whose position are determined by the Administrator to be unusually taxing, physically or mentally, and to be critical to the advancement of aviation safety.

"(b) The premium pay payable under any subsection of this section is in addition to basic pay and to premium pay payable under any other subsection of this section and any other provision of this subchapter.".

(2) The analysis of chapter 55 of such title is amended by inserting after the item relating to section 5546 the following new item:

"5546a. Differential pay for certain employees of the Federal Aviation Administration.".

(d) Section 5546a of title 5, United States Code (as added by section 152(c) of this joint resolution), is amended by adding at the end thereof the following new subsections:

"(c)(1) The Administrator may pay premium pay to any employee of the Federal Aviation Administration who—

"(A) is an air traffic controller located in an air traffic control center or terminal;

"(B) is not required as a condition of employment to be certified by the Administrator as proficient and medically qualified to perform duties including the separation and control of air traffic; and

"(C) is so certified.

"(2) Premium pay paid under paragraph (1) of this subsection shall be paid at the rate of 1.6 per centum of the applicable rate of basic pay for so long as such employee is so certified.

"(d)(1) The Administrator may pay premium pay to any air traffic controller of the Federal Aviation Administration who is assigned by the Administrator to provide on-the-job training to another air traffic controller while such other air traffic controller is directly involved in the separation and control of live air traffic.

"(2) Premium pay paid under paragraph (1) of this subsection shall be paid at the rate of 10 per centum of the applicable hourly rate of basic pay times the number of hours and portion of an hour during which the air traffic controller of the Federal Aviation Administration provides on-the-job training.

"(e)(1) The Administrator may pay premium pay to any air traffic controller or flight service station specialist of the Federal Aviation Administration who, while working a regularly scheduled eight-hour period of service, is required by his supervisor to work during the fourth through sixth hour of such period without a break of thirty minutes for a meal.

"(2) Premium pay paid under paragraph (1) of this subsection shall be paid at the rate of 50 per centum of one-half of the applicable hourly rate of basic pay.

"(f)(1) The Administrator shall prescribe standards for determining which air traffic controllers and other employees of the Federal Aviation Administration are to be paid premium pay under this section.

"(2) The Administrator may prescribe such rules as he determines are necessary to carry out the provisions of this section.".

(e) Section 5547 of title 5, United States Code, is amended by adding at the end thereof the following: "The first sentence of this section shall not apply to any employee of the Federal Aviation Administration who is paid premium pay under section 5546a of this title.".

(f) Section 8339(e) of title 5, United States Code, is amended by inserting before the period "unless such employee has received, pursuant to section 8342 of this title, payment of the lump-sum credit attributable to deductions under section 8334(a) of this title during any period of employment as an air traffic controller and such employee has not deposited in the Fund the amount received, with interest, pursuant to section 8334(d) of this title".

(g) Section 8344 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(h)(1) Subject to paragraph (2) of this subsection, subsections (a), (b), (c), and (d) of this section shall not apply to any annuitant receiving an annuity from the Fund while such annuitant is employed, during any period described in section 5532(f)(2) of this title or any portion thereof, under the administrative authority of the Administrator, Federal Aviation Administration, to perform duties in the operation of the air traffic control system or to train other individuals to perform such duties.

"(2) Paragraph (1) of this subsection shall apply only in the case of any annuitant receiving an annuity from the Fund who, before August 3, 1981, applied for retirement or separated from the service while being entitled to an annuity under this chapter.".

(h)(1) The amendments made by subsections 152 (b), (c), (e), and (g) of this joint resolution shall take effect at 5 o'clock ante meridian eastern daylight time, August 3, 1981.

(2) The amendments made by the subsection 152(a) and subsection 152(d) of this joint resolution shall take effect on the first day of the first applicable pay period beginning after the date of the enactment of this joint resolution.

(3) The amendment made by subsection 152(f) of this joint resolution shall take effect on the date of the enactment of this joint resolution.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House insist on its disagreement to the amendment of the Senate numbered 83.

PREFERENTIAL MOTION OFFERED BY MR. COUGHLIN

Mr. COUGHLIN. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. COUGHLIN moves that the House recede from its disagreement to the amendment of the Senate numbered 83 and concur therein.

Mr. FORD of Michigan. Mr Speaker, I demand a division of the question.

The SPEAKER pro tempore. The question will be divided.

The Chair will state that the gentleman from Mississippi (Mr. WHITTEN) has the time. Does the gentleman wish to use his time for debate now?

Mr. WHITTEN. Mr. Speaker, I yield to the gentleman from Pennsylvania (Mr. COUGHLIN).

The SPEAKER pro tempore. If the gentleman from Mississippi does not seek to control debate time, the Chair will put the question on receding.

The question is, will the House recede from its disagreement to Senate amendment No. 83?

The House receded from its disagreement to Senate amendment No. 83.

The SPEAKER pro tempore. For what purpose does the gentleman from Michigan (Mr. FORD) seek recognition?

PREFERENTIAL MOTION OFFERED BY MR. FORD OF MICHIGAN

Mr. FORD of Michigan. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. FORD moves that the House concur in Senate amendment numbered 83 with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

SEC. . (a)(1) The Administrator of the Federal Aviation Administration (hereinafter in this section referred to as the "Administrator") may pay premium pay to any eligible employee of the Federal Aviation Administration for service as such an employee between August 3, 1981, and October 1, 1984. Any such premium pay shall be at the applicable rate determined under paragraph (3).

(2) For purposes of this subsection, an employee is an eligible employee if—

(A) the individual occupies a position the duties of which are determined by the Administrator to require the individual to be directly involved in or responsible for the operation or maintenance of the air traffic control system, and the position—

(i) is in an air traffic control center or terminal or in a flight service station, and is classified at a GS-9 level or higher in the air traffic control specialist series,

(ii) is in an airway facility sector and is classified at a GS-9 or WG-10 level or higher, or

(iii) is in a flight inspection field office and is a flight inspection crewmember position that is classified at a GS-11 level or higher;

(B) the individual occupies a flight test pilot position—

(i) the duties of which are determined by the Administrator to be unusually taxing and critical to the advancement of aviation safety, and

(ii) which is in a region or center and is classified as a GS-12 level or higher; or

(c) the individual occupies a position at the Federal Aviation Administration Academy, Oklahoma City, Oklahoma, the duties of which are determined by the Administrator to require the individual to be actively engaged in or responsible for training employees to be air traffic controllers, and the position is classified at a GS-13 level or higher.

(3) Premium pay under this subsection shall be—

(A) at 5 percent of the applicable rate of basic pay, for periods after August 3, 1981, and before October 1, 1983; and

(B) at 3 percent of the applicable rate of basic pay, for periods after September 30, 1983, and before October 1, 1984.

(4) Premium pay under this subsection is in addition to any other premium pay to which the individual involved may be entitled.

(5) Any eligible employee who, before the date of the enactment of this section, separated, or otherwise ceased to be an eligible employee, due to a disability shall not be disqualified from receiving premium pay under this subsection for such service.

(b)(1) Title 5, United States Code, is amended by inserting after section 5546 the following new section:

"§ 5546a. Air traffic controllers; premium pay for providing training

"(a) the Administrator of the Federal Aviation Administration may pay premium pay to any air traffic controller of the Federal Aviation Administration assigned to provide on-the-job training to another controller of the Administration while such other controller is actively engaged in the separation and control of air traffic.

"(b) Premium pay under this section for any controller providing on-the-job training shall be paid at the rate of 10 percent of the basic pay payable for the periods of time the controller provided such training.

"(c) Premium pay under this section is in addition to any other premium pay to which the individual involved may be entitled.".

(2) The analysis of chapter 55 of title 5, United States Code, is amended by inserting after the item relating to section 5546:

"5546a. Air traffic controllers; premium pay for providing training.".

(c)(1) The Secretary of Transportation shall take all practicable steps to assure that the Federal air traffic control system is

at full capacity not later than April 30, 1983. The Secretary shall promptly certify to the Committee on Post Office and Civil Service of the House of Representatives and the Committee on Governmental Affairs of the Senate whenever—

(A) the air traffic allocation system of the Federal Aviation Administration ceases to be in effect, and

(B) the Federal Aviation Administration has employed adequate civilian personnel to operate, on a continuing basis, the Federal air traffic control system at full capacity.

(2) For purposes of this subsection, the term "full capacity" means the capacity to safely handle, on a daily basis and on a peak-hour basis, air traffic levels equal to those which existed during the 12-month period ending July 31, 1981, with workweeks and duty assignments comparable to those in effect during that period.

(d)(1) Title 5, United States Code, is amended by inserting after section 3385 the following new section:

"§ 3386. Personnel management improvement in the Federal Aviation Administration

"(a) For the purpose of this section—

"(1) 'Administration' means the Federal Aviation Administration;

"(2) 'Administrator' means the Administrator of the Federal Aviation Administration; and

"(3) 'employee' means any employee of the Federal Aviation Administration.

"(b) As soon as practicable after the date of the enactment of this section, the Administrator shall develop and thereafter implement a personnel management improvement program within the Administration. The program shall include the following elements (or elements which would provide similar results):

"(1) Improvement of communication in the Administration between employees and management and among various levels of management (A) through the services of individuals who have the demonstrated ability to improve such communications and (B) through the use of management-employee committees.

"(2) Planning for major technological changes which (A) permits and encourages employee participation and (B) takes into account the major personnel factors associated with implementing such changes, such as retraining, relocation, and organizational restructuring.

"(3)" Use of part-time employees, overtime, duty assignments, temporary seasonal transfers, or other comparable means to respond to variations in air traffic levels in a manner which is cost-efficient.

"(4) Periodic employee surveys to determine employee attitudes and opinions with respect to (A) the conditions within the organization which generally affect job performance, including organizational communications, coordination, and duty assignment methods, (B) the quality of supervisory leadership, (C) the quality of interaction among employees, and (D) the degree of employee teamwork, job satisfaction, and motivation.

"(5) Modification of criteria used for selection of supervisors to assure that selection occurs not merely on the basis of technical knowledge and proficiency but also on the basis of the respect accorded the individuals by other employees and the individuals' demonstrated management skills or potential.

"(6)" Modification of criteria used for performance appraisals of supervisors and managers to include (A) the extent to which employees have been kept informed of matters affecting employees, (B) the degree of participation by employees in appropriate decisions, (C) demonstrated employee teamwork, (D) employee morale and job attitudes, and (E) the general quality of the work environment.

"(c)" The Administrator shall annually report to the Congress, the Secretary of Transportation, and the National Transportation Safety Board on the implementation of such program. Such report shall include for the annual period covered by such report—

"(1) a summary of the results of the employee surveys conducted under subsection (b)(4) of this section; and

"(2) relevant personnel statistics indicative of the success of the personnel management program established under subsection (b) of this section, including number of employee grievances filed, extent of sick leave usage, and number of resignations and other separations.".

(2) Section 3384 of title 5, United States Code, is amended by inserting "preceding" before "provisions of this subchapter".

(3) The analysis for chapter 33 of title 5, United States Code, is amended by inserting after the item relating to section 3385 the following new item:

"3386. Personnel management improvement in the Federal Aviation Administration.".

(e) During the period beginning on the date of the enactment of this section and ending 180 days after the date of certification under subsection (c)(1) of this section, no employee of the Federal Aviation Administration who is an eligible employee (as defined in subsection (a)(2)) shall be subject—

(1) to furlough under subchapter II of chapter 75 of title 5, United States Code, or

(2) to any reduction-in-force action under action 3502 of title 5, United States Code.

(f) Air traffic controllers whose employment was terminated on account of the strike of air traffic controllers which began on or about August 3, 1981, shall not, as a class, be considered unsuitable for reinstatement or appointment to any position in the Federal Aviation Administration. Determinations of suitability for reinstatement or appointment to any such position shall be made on a case-by-case basis by the Office of Personnel Management in accordance with part 731 of title 5 of the Code of Federal Regulations (as in effect on January 1, 1982).

(g)(1) Except as provided in paragraph (2), this section shall take effect on the date of the enactment of this section.

(2)(A) Subsection (a) (relating to differential premium pay) shall take effect October 1, 1982.

(B) Subsection (b) (relating to on-the-job training premium pay) shall take effect on the first applicable pay period which begins after the date of the enactment of this section.

Mr. CONTE (during the reading). Mr. Speaker, I ask unanimous consent that the preferential motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. Since the house has receded, the gentleman from Mississippi's original motion has been preempted and he did not seek to control time therefore the gentleman from Michigan (Mr. FORD) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. COUGHLIN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. Mr. Speaker, the amendment I have offered gives Members a choice between two different roads which are both marked "road to a revitalized air traffic system." Unfortunately, one of these roads, the one proposed by the administration, is a dead end. The other, the one proposed by my amendment, may have some potholes due to a hard winter, but should the Secretary of Transportation proceed carefully, he will eventually achieve the goal of a revitalized system.

My colleagues know that I think the fired controllers should be rehired. In my view, the real problem is an intransigent administration which refuses to recede from a hastily arrived at and ill-conceived decision to fire over 11,000 employees. That decision, and the administration's refusal to change it, is forcing the Government to spend over $1 billion to train new controllers with the result that we will have a raw, inexperienced work force for years to come.

If I could pass a bill to accomplish rehiring I would. But the votes are not here. That is a political fact, and I recognize it. The amendment I have offered would not require that anyone be rehired; nor would it entitle any fired controller to a job. Those are the facts. The amendment simply would permit the administration to rehire former controllers in the future, should it decide it wishes to do so.

Unfortunately, the administration is misleading many Members of this House concerning my proposal. It claims my proposal would prevent fired controllers from being disqualified for employment on suitability grounds; it claims it would be forced to rehire all the fired employees; it claims courts would overturn its decisions not to rehire particular controllers. All of these claims are unfounded, unsupported, and untrue.

For months I have been pressing the Secretary and his General Counsel for any legal authority to support these claims. On August 26 I wrote the Secretary asking for any legal opinion or memorandum supporting these claims. I have received nothing. Not a single sheet of paper has been provided. Not a single case or statute cited.

I have authority to support my position that my amendment gives the administration all the discretion it could possibly want, should it decide to begin rehiring. My authority is the law, title 5 of the Code of Federal Reg-

ulations. My amendment overrules the President's suitability bar against controllers as a class and requires case-by-case suitability determinations. And here is what the Code says about these determinations:

§ 731.201 Authority.

Subject to Subpart C of this part OPM may deny an applicant examination, deny an eligible appointment, and instruct an agency to remove an appointee when OPM determines this action will promote the efficiency of the service.

§ 731.202 OPM determination.

(a) General. In determining whether its action will promote the efficiency of the service, OPM shall make its determination on the basis of:

(1) Whether the conduct of the individual may reasonably be expected to interfere with or prevent effective performance in the position applied for or employed in; or

(2) Whether the conduct of the individual may reasonably be expected to interfere with or prevent effective performance by the employing agency of its duties and responsibilities.

(b) Specific factors. Among the reasons which may be used in making a determination under paragraph (a) of this section, any of the following reasons may be considered a basis for disqualification:

(1) Delinquency or misconduct in prior employment;

(2) Criminal, dishonest, infamous or notoriously disgraceful conduct;

* * * * *

(c) Additional considerations. In making its determination under paragraph (a) of this section, OPM shall consider the following additional factors to the extent that these factors are deemed pertinent to the individual case:

(1) The kind of position for which the person is applying or in which the person is employed, including its sensitivity;

(2) The nature and seriousness of the conduct;

(3) The circumstances surrounding the conduct;

(4) The recency of the conduct;

* * * * *

How much more discretion does the administration believe it needs? What are they afraid of?

I think we all know that these unsupported claims of the administration are just a smokescreen thrown up to obscure its real problem. The real problem is that this administration, like all other administrations before it, does not want the Congress to correct its errors. It does not want the Congress to reverse the President's suitability bar. I think we should heed the words of the distinguished minority leader explaining his break with the administration over the Soviet pipeline sanctions. As the minority leader wrote, sometimes you have to provide "a way out for the President from a policy which is counterproductive."

My amendment contains other provisions to promote speedy recovery of the air traffic system. Specifically, it:

First, provides a 5-percent pay differential (retroactive to August 3, 1981) to be phased out by fiscal year 1985.

Second, provides a 10-percent OJT differential.

Third, directs the Secretary of Transportation to take all practicable steps to return the system to full capacity by April 30, 1983.

Fourth, insures implementation of the personnel management recommendations of the Jones' task force.

Fifth, prohibits RIF's or furloughs of essential employees during the rebuilding period.

The administration's proposal does nothing to speed recovery. And it presents the following significant problems:

Five-percent permanent pay differential (retroactive to August 3, 1981) for over 25,000 FAA employees—less than 10,000 are working controllers. This is a bad precedent which distorts the pay and classification system, and hurts morale of other Federal employees who are capped at 4 percent).

Civilian and military retirees employed by FAA can receive both full pay and full pensions (double dipping).

No provision insuring implementation of the Jones' report or to improve morale.

No provision to expedite rebuilding of the system.

I ask unanimous consent to insert in the RECORD at this point a full explanation of my amendment.

I should address one other argument the administration is making—that the House has once before passed its proposal. It is true that the House, by a 30-vote margin, passed the administration proposal last November. But a lot of things have changed since then. The training academy's dismal performance has continued for almost a year, and a Federal grand jury is investigating grade-fixing charges at the academy. Morale has deteriorated. The National Transportation Safety Board supported my committee's findings that the administration's rebuilding schedule was unrealistic. A special task force appointed by the Secretary of Transportation delivered a scathing attack on FAA management finding that poor personnel management was a major factor leading to the strike.

□ 1740

My amendment addresses these matters which have arisen over the last year. The administration's original proposal is unchanged and ignores these important developments.

I have seen "Dear Colleague" letters and I have seen handouts here that truly astound me because there would be, indeed, no compromise before us if they were truthful and they in fact represented what is in my amendment.

I see the gentleman from Illinois (Mr. DERWINSKI) and I took up with him a few moments ago a "Dear Colleague" that he sent to the Members which states, among other things, that my amendment would deny the people who stayed on the job during the strike their pay increase.

I would like to ask the gentleman if he would clarify the statement in his "Dear Colleague" letter at this point.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Illinois.

Mr. DERWINSKI. A clarification is in order.

The gentleman's, at this time and politely I use the word compromise; would provide the same retroactive pay and then the pay for fiscal year 1983 proposed by the administration. It is from that point on, fiscal year 1984 and 1985, where the pay differential becomes an issue.

Mr. FORD of Michigan. I thank the gentleman for that clarification.

It is important that you understand that the substitute that I am offering is virtually everything that the administration has asked for. The difference is that the administration bill attached to this continuing resolution makes a permanent change in law with respect to the pay of 25,000 employees of the Federal Aviation Administration not just air traffic controllers.

A year ago when this same proposal was considered people were misled on this floor into believing that all it did was pay some overtime to the loyal workers who stayed on the job. But we were paying the overtime anyhow because Federal employees are covered by the Fair Labor Standards Act and we are required to pay, by law, overtime to people who work overtime just as private corporations are.

That confusion certainly should not exist in anybody's mind at this point.

What this proposal purports to do is revitalize the entire air traffic control system by giving all of the employees of the FAA a different GS pay schedule than all other Federal employees. Both Senator STEVENS on the other side and I have been concerned about the precedent of having a separate pay system.

Every argument that has been made for a better pay schedule from the top to the bottom of the FAA can certainly be made for the Department of Justice. No one would argue that the FAA has more professional people employed that they are trying to retain than the Department of Justice, the IRS, or NASA.

Our committee reported a bill, as an alternative to the administration bill, that would have given all of the employees who stayed on the job a 10-percent bonus calculated on their total pay from August 3, 1981, to January 3, 1983.

Where did the January 1983 date come from? That was the date that was promiscuously being thrown around the country by which the air

traffic control system would be back in full operation and everything would by hunky-dory, and if we were paying these people for the extra work that they are now faced with because we are short of air traffic controllers, and woefully short, then it was my feeling that that pay ought to be more generous than 5 percent. But it ought to be related to the people who were on the job on August 3, and not all future employees of the FAA.

We gave up on that. Now we have come around to the administration's point of view that they ought to give everybody in the FAA a 5-percent pay increase instead of a 10-percent bonus.

However, the difference between my proposal and the administration's is this: The administration makes it a permanent pay change so that for all time the pay structure in the FAA will be different than the pay structure of all of the rest of the civil service.

My alternative is to give every dollar and every penny to every employee that the FAA wants covered, but to sunset it by fiscal year 1985 on the theory that surely, if they were going to have the system up by January of 1983, they will have the system back to normal in 1985, and there is no further reason for this extraordinary treatment of these 25,000 employees out of the millions of Federal employees.

By contrast, the other day we had a considerable amount of discussion on the floor over the military pay increase. I am going along reluctantly with the administration to give all of the employees of the FAA this year a 9-percent increase while we give the military and civilian employees of every other agency of Government a 4-percent increase.

That is indeed generous. But unfortunately it is not going to buy us anything.

My substitute provides that the bar against hiring former controllers who struck will be removed. In short, any fired controller could now come in and apply for employment with FAA, as they now can, incidentally, with every other agency of the Government.

We are no longer punishing the strikers. We are punishing the American taxpayers and we are punishing the employees on the job. We still have people working 48 hour weeks. We have people on assignments away from their homes. We have retirees who have been called back.

There is nothing in my alternative that mandates the hiring of a single person who is a former controller and, indeed, it spells out specifically that they can refuse on a case-by-case basis to employ anyone who is found to be unsuitable.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from California.

Mr. JOHN L. BURTON. I rise in strong support of the gentleman's motion.

I think by following through on the current practice we are not only punishing the American taxpayer and those workers who have gone out on strike but I think we are also punishing the air traffic safety system of this Nation.

I do not believe that air traffic control has come up to the safety standards that existed prior to the firing of all of the air traffic controllers.

It takes years of training, education, and work experience to have a safe traffic control system. From my experience on our subcommittee that is sadly lacking at this time.

I believe the gentleman's approach, which is just allowing the people to apply and allowing a determination to be made on an individual case-by-case basis is at least a half a step back toward getting our system where it was prior to that.

I think those who are concerned about a wholesale type of amnesty, as some of us would have preferred, should find at least this approach as a good compromise and I commend the gentleman for that.

Mr. FORD of Michigan. I thank the gentleman.

Of course I would like to pass a bill to accomplish the rehiring of all of the employees who lost their jobs. But I think I know the temper of the Congress well enough to know that that would be futile and I have made no attempt to do that although my actions have been characterized in that fashion by people, for whatever purposes.

□ 1750

Mr. JEFFORDS. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Vermont.

Mr. JEFFORDS. As I understand the gentleman's amendment, then, this is no threat to anyone who now holds a job in the FAA, but merely allows those people who were, in a sense, let go or fired because they belonged to unions, to come in and apply, as anyone off the street, and then to fend for the jobs, as they may be able to, using whatever expertise they might have; is that correct?

Mr. FORD of Michigan. That is correct.

Mr. JEFFORDS. If it would appear that the hiring of an individual would cause disruption, it would not be required to hire that individual, is that correct?

Mr. FORD of Michigan. As a matter of fact, the regulations with respect to suitability specifically authorize the OPM to take into account any information about disruptive activites or disruptive action by that person applying for work in previous Government employment.

Mr. JEFFORDS. I commend the gentleman for his amendment. I think it is a very reasonable answer to a very difficult problem and, in my mind, cures what is counterproductive overkill.

Mr. FORD of Michigan. I thank the gentleman.

Mr. JEFFORDS. Mr. Speaker, on December 6, 1981, I introduced House Resolution 309, which asked for the relaxing of limitations placed upon the hiring of fired air traffice controllers. Obviously, I applaud Mr. FORD's hard work on this amendment. I feel as strongly now that the controllers have a right to apply for—not receive—their jobs back, as I did this past December. I feel as strongly today as I did in December that those controllers who worked all these months under adverse conditions deserve a pay increase and differential beyond that of the other controllers.

Mr. FORD's amendment is a simple and congenial way to honorably resolve the air traffic controller problem we now face. The air traffic control system of this country has not returned to normal in over a year's time. The people presently controlling the planes are overworked. Years will pass before the newly trained replacements will be qualified to guide aircraft alone. Pay increases promised to men and women who kept our airlanes open after the strike have not been forthcoming. These same workers, most of them supervisors, are still solely responsible for guiding out heavy air traffic. The economy has suffered because of the limitations imposed upon the strained and overworked system. Because of the difference in the type of work, and due to the heavy demand placed upon them by dual duty, the military controllers assigned to help guide civilian traffic have not been as great an asset as was hoped. I agree that the air traffic control system is safe, but the system is far from healthy.

I supported the President's action in ending the PATCO strike, and I would support it again today. But I do not believe—and I am certain neither do my colleagues here on the floor—that these highly trained, capable, and dedicated workers should be punished any longer. What the Professional Air Traffic Controllers Organization did was wrong. The courts of the United States agreed it was wrong. I say, it will be wrong to not allow those members of that decertified union, who request and who qualify, to be reinstated. The amendment before us does not force the Government to take back fired controllers. All it states is that a case-by-case review of controllers wishing to return to work is in order. The Ford amendment allows those controllers now working, to receive a 5-percent pay differential above and beyond

that of other controllers, to be phased out by fiscal year 1985. Workers who serve their Nation as selflessly as those controllers who stayed on the job have, during less than desirable conditions, should be rewarded for their efforts. I support a pay increase for these people.

As I have said, the time has come to restore the normal system of controlling our air traffic. Air traffic controllers who walked off the job over 1 year ago deserve the right to ask for their jobs back. They have paid enough.

Thank you.

Mr. FORD of Michigan. Mr. Speaker, I just want to point out one other difference between their approach and ours. You remember the horrendous fight that we went through here this year on what we were going to do about Federal pensions. And there seems to be abroad in the land the idea that we have to get ahold of runaway Federal pensions.

Now, one of the things that probably irritates people when they hear about it, more than anything else, is the idea that you can get a Federal pension and a Federal paycheck at the same time, a practice called double-dipping. The administration proposes in their version of this bill to allow retired controllers to come back to work for the Government and receive their full pensions plus their full pay. And we would now, after the blood that was shed here over 4 percent adjustments this year, be going back and saying, "Except for one particular class of employees, any employee who was formerly an employee of the FAA, who is now retired, can come back, be employed and receive both pension and pay." Now, I cannot go for that, and I do not believe that Senator STEVENS and his people on the other side want it. We should not put the stamp of approval, I believe, on the idea of a new form of double-dipping.

Those are the basic differences between the bills.

In closing, I urge the Members to put aside the misleading statements of the administration and do what is right for rebuilding the air traffic control system. No administration likes to have Congress correct its ways, but sometimes the Congress must to discharge faithfully its responsibilities. This is such a case. I urge you to support my amendment.

Mr. LEVITAS. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Speaker, I have discussed this whole problem of the air traffic controller situation with the gentleman on a number of occasions, in my capacity as chairman of the Investigations and Oversight Subcommittee of the Committee on Public Works and Transportation, and I know the gentleman's genuine concern about the problem. We have certain differences about how I think it ought to be approached, different from those of the gentleman, but I think we are agreed on where we need to end up.

The provision in the gentleman's amendment that I would like to ask him about, however, relates to the significance of directing the Secretary of Transportation to take all practicable steps to return the system to full capacity by April 30, 1983.

In hearings which we had, in which Administrator Helms testified, it is my recollection that it was going to be 1984 before the system would be back in full capacity, using their phased-in program.

Now, if this language is adopted, would it not necessarily require the Administrator to rehire controllers who went out on strike in order to make that target date realistic?

Mr. FORD of Michigan. Well, I would just reply to the gentleman that there is nothing mandatory in that provision. It just said, "Get moving," He appointed the Jones Task Force, which I am sure the gentleman is familiar with. And, incidentally, that task force recommended against any pay increase for the employees, saying it was a vain and useless act, it would not produce any benefits. What is wrong in FAA is that it is notoriously poor in its management practices. This is not something invented by this Secretary, it has been a problem for years. We have reports and reports and reports selecting out the FAA as a poorly managed agency, from a personnel point of view.

The Jones Task Force recommended that the only thing that could be done is improve the quality of management. We are asking them to do that. There is no mandate in the April 30, 1983, provision. But I can assure the gentleman that at least by that date next year I will have the Secretary and the Administrator of the FAA in to ask them what they are doing. I will want to know, after they get this pay raise, "What are you doing to make things different than they were before?"

The Jones Task Force tells us that with or without a pay raise, unless there are serious changes made in the FAA, other workers are going to walk. The conditions that were intolerable in the past remain. And they are not being improved. The FAA has not kept pace with its ambitious plans for up-to-date equipment, and so on, and the gripes are still there.

Mr. GINGRICH. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Georgia.

Mr. GINGRICH. I thank the gentleman for yielding.

Mr. Speaker, I just want to make two points: One, is that in the earlier colloquy with the gentleman from Vermont, I was concerned lest someone misunderstand the situation. I believe the gentleman from Vermont suggested that there were people who happened to be fired for belonging to a labor union. The reality is, you could easily belong to a labor union and be employed. In fact, a number of professional traffic controllers stayed on the job and are still working. The people who were fired were specifically fired for illegally breaking the law and endangering the system. I think it is important just to make that point clear.

Second, I would ask the gentleman: I happen to agree with almost everything the gentleman just said about the need of the FAA to clean up its house in midmanagment, the fact that the Jones report is not being heeded adequately, the fact that we have potential future problems. But most of the controllers I talked to—in fact, virtually without exception—who are currently working and who stayed on the job for the last year had indicated that while they would be willing to have very, very carefully selected rehiring of a very few, there is virtually no support under any circumstance for the scale of rehiring that the gentleman's amendment would direct. I would simply ask this question——

Mr. FORD of Michigan. Wait a minute. Where in my amendment? I just got through explaining it. Now, do not try to mischaracterize this thing further. There is no mandate or direction to hire anyone. Not one. Now, let us keep the record straight as long as we can. All I do is let them apply for employment. It does not direct the reemployment of anybody.

Mr. GINGRICH. It is our understanding that it directs the Secretary of Transportation to take all practical steps to return the system to full capacity by April 30.

Mr. FORD by Michigan. Yes. But what practical steps he takes is entirely his decision. All practical steps. Is that an unreasonable request?

Mr. GINGRICH. Let me pose this question, then: Should the Secretary of Transportation decide that the most practical step, given personnel considerations inside the system among currently operating air traffic controllers, is to keep in force the current ban, would you not then file suit?

Mr. FORD of Michigan. He does not have to keep in force the current ban. He can just not rehire any of them. He does not have to rehire anyone.

You see, I have been the insulation for the Secretary for almost a year. Once we pass either my amendment or the administration proposal, he loses me as protection, because right now he tells the airlines that the reason that the thing is not working well is because Congressman FORD, Chairman FORD, is holding up his legislation.

Now, I do not know what he is going to tell them by summer. And maybe by summer he is going to have to look around for other excuses. I want to give him all of the flexibility in the world. I do not want the Secretary to have to make a deliberate decision that he is forgiving somebody for striking or that he is hiring strikers. We are protecting him against that by simply saying that there is no ban against these people as a class.

Mr. GINGRICH. If the gentleman will yield one last time, I agree with the gentleman on his diagnosis about the concern about management and morale problems. I do think there will be morale problems after they receive the pay raise. I do not think that is a solution. But let me just suggest that in fact if you are serious about the Secretary's legal power to continue the ban, you already have a Secretary who is telling you that he will continue the ban, then surely in your position as chairman——

Mr. FORD of Michigan. I have a Secretary who tells me in direct conversation that the ban is not of his choosing.

Mr. GINGRICH. It seems likely that his President will continue the ban. Let me phrase it that way.

Mr. FORD of Michigan. That is exactly right. Let there be no question about that at all. It is the White House that is telling the Secretary not to hire these people back. And it may continue to do that. And if this Secretary wants to make that more important than getting the system back up, that is his choice.

Mr. GINGRICH. If next summer that Secretary decides that you are correct, then as chairman of that committee, you could surely report out an appropriate vehicle within a matter of 24 hours, so there is no need at this moment to do that.

Mr. FORD of Michigan. I must reclaim my time. The gentleman from Massachusetts has already started laughing. You have got to be pulling my leg. I did not come here last term. Are you talking about bringing out a bill containing only the provision the administration opposes. I did not fall off the tree yesterday, Mr. GINGRICH. That is almost insulting to suggest that to me.

Mr. GINGRICH. No one has accused you of that, Mr. FORD.

Mr. FORD of Michigan. Mr. Speaker, I reserve the balance of my time.

□ 1800

The SPEAKER pro tempore. The gentleman from Michigan (Mr. FORD) has consumed 23 minutes.

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, on November 2, 1981, the Secretary of Transportation forwarded to the Congress legislation which would provide an average 6.6 percent pay increase to working controllers.

This same legislation, which will provide necessary tools to the FAA to rebuild the air traffic system and fairly compensate controllers for the outstanding work they do, passed the House last November 22 by a vote of 213 to 183 part of House Joint Resolution 357. Unfortunately, however, we have not yet been able to enact this measure into law to see that our Nation's controllers are recognized for their exceptional performance.

Enactment of this legislation is critically needed. We asked the controllers who honored their oaths of office to help keep our air traffic system going not only immediately following the air traffic control strike but while it was being rebuilt to former capacity levels. They have done just that. In fact, today's system is operating at about 90 percent of the nationwide prestrike commercial traffic levels. These dedicated employees have worked tirelessly to keep our air traffic system operating safely and efficiently; many have made personal sacrifices to accept relocations to facilities where greater staffing was necessary. In short, they have done everything we could possibly have asked of them. So far the Congress recognition of these exceptional efforts has consisted of rhetoric rather than money. It is important to remember that adoption of this package will not increase Federal expenditures. The cost will be absorbed by the FAA's fiscal year 1983 budget.

I ask my colleagues today to support the enactment of the Senate controller and select personnel benefit pay package which recognizes, although long overdue, the outstanding services that FAA controllers and related employees have performed on behalf of the American traveling public and oppose the amendment of the gentleman from Michigan.

SEPTEMBER 21, 1982.

Subject: Pay legislation for Air Traffic Controllers.

HOUSE OF REPRESENTATIVES,
Washington, D.C.

DEAR REPRESENTATIVE: The undersigned organizations representing all segments of the aviation community—airlines, general aviation, airports, pilots—strongly urge your support for long-delayed compensation legislation for working air traffic controllers.

The pay legislation recognizes the vital job performed by controllers and related air traffic control personnel and will insure that these men and women are fairly compensated for the work they do. For more than a year, these FAA employees have been promised the increased benefits contained in the proposed pay package.

We urge you go support legislation identical to that which was passed by the House and Senate last year and approved by the Senate again during 1982. We hope you will join efforts to have the matter brought up and favorably voted on prior to adjournment in October.

The pay package approved by the House and Senate last year is fair, equitable and long-overdue. We are grateful for the professionalism and dedication demonstrated by working controllers and other air traffic control personnel who are serving the nation with loyalty and distinction. The promised benefits are well-deserved and should be promply approved.

Thank you for your consideration and support.

Sincerely

S. L. Wright, Aerospace Industries Association; Paul R. Ignatius, Air Transport Association; John L. Baker, Aircraft Owners and Pilot Association; J. J. O'Donnell, Airline Pilots Association International; Donald Reilly, Airport Operators Council International; Edward Simpson, General Aviation Manufacturers Association; Frank L. Jensen, Jr., Helicopter Association International; Clifton F. von Kann, National Aeronautics Association; L. L. Burian, National Air Transportation Association; John Winart, National Business Aircraft Association; Duane Ehulabe, Regional Airlines Association.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, I just have to defend the people who stayed on the job. The gentleman is suggesting they stayed on the job in expectation of being paid for it. They stayed on the job because they were good Americans and refused to break the law. We were here a year ago, and that was the reason. Now the gentleman is telling me they only stayed on the job because they were waiting for this pay raise. That is a terrible insult to the working controllers.

Mr. CONTE. No; they stayed on the job because they were obeying the law. But at the same time you are not going to deny them pay because they obeyed the law. You are going to take it away from them because they are law-abiding citizens. That is wrong.

Let me read from a letter.

The pay package approved by the House and Senate last year is fair, it is equitable, it is long overdue. We are grateful for the professionalism and dedication demonstrated by the working controllers and the other air traffic control personnel who are serving the Nation with loyalty and with distinction. The promised benefits are well deserved and should be promptly approved.

Signed by the Aerospace Industries Association. Signed by the Air Transport Association. Signed by the Aircraft Owners and Pilots Association. Signed by the Airline Pilots Association International. Signed by the Airport Operators Council International. Signed by the General Aviation Manufacturers, the Helicopter Association, the National Aeronautics Association, the National Air Transport Association.

Mr. COUGHLIN. Mr. Speaker, I yield 8 minutes to the gentleman from Illinois (Mr. DERWINSKI).

Mr. DERWINSKI. Mr. Speaker, this amendment is described as a compromise, but it is basically a rewording of proposals the Federal Aviation Administration could not live with. The amendment takes the same old position to ignore public opinion and rehire the strikers who have inflicted damage on themselves and the Nation. We have here the same old position to deny loyal air traffic controllers the permanent raise negotiated by PATCO to which the administration remains committed. This repeats the same same old confusion of getting back to prestrike capacity by a date deliberately set to force rehiring of at least some strikers; and the false implication, without real evidence, that the FAA is not taking all practicable steps to restore full capacity without compromising safety standards.

What this amendment does is statutorily reverse the President's decision that striking controllers are unsuitable for reemployment by the Federal Aviation Administration. Loyal air traffic controllers have made it clear that they do not want the strikers returned to their jobs. To permit such a situation could create administrative chaos. Furthermore, the selective case-by-case rehiring which the amendment permits is impractical. Different standards applied in different regions would lead to substantial legal challenges by former controllers who do not get rehired.

Most public officials at every level—State, county, township, and city—applauded the President's decision in dealing with the air traffic controllers who went out on an illegal strike on August 3, 1981. The fact that they were misled by their union leaders does not diminish the fact that they violated their no-strike oath. We have to keep faith with the public which expects its public servants to obey the law.

The so-called compromise proposal would deny the administration's pay commitment to loyal air traffic controllers by providing for only temporary pay increases, then phase them down. The loyal men and women who remained on the job deserve to receive the pay package which was promised them despite the ill-advised strike.

Actually I apologize to the House for taking any time, because after the eloquent words of the gentleman from Massachusetts, which probably will go down as one of the more immortal House debates, nothing else really should have to be said.

But just in case he did not make his point completely, I would like to run through some items, and in the process remind the Members of some of the points made earlier by my good friend from Michigan (Mr. FORD).

First, let me explain that there is no real reason why we should have a problem in this continuing resolution. We passed a bill out of committee in May, a bill unacceptable to the administration, basically the same bill that my good freind, the gentleman from Michigan (Mr. FORD) proposes now as a so-called substitute.

The Senate passed their version on May 27 and incorporated that basic language into the continuing resolution.

So that is why we are in the legislative situation that we are.

Now, basically what we are trying to do is live up to the commitment made at the time of the negotiations prior to the strike, when the administration proposed a pay package to PATCO, which was accepted in negotiations by their leaders, and then rejected by the rank and file.

That basically is why we have to go back to August 3, 1981, the purpose being to then provide to those individuals who remained on the job, who did not engage in an illegal strike, to provide them with the pay package that at that time was available to them and to their misdirected——

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield on that point?

Mr. DERWINSKI. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, I just want to correct that. That is one of the most common misconceptions that floats around this place. We heard it so many times, and heard people deny it that we now have an analysis.

For example, that pay package that was agreed to by the representatives of the union and the Secretary but then turned down by the union members, agreed to pay controllers time and a half after 36 hours during a normal 40-hour week. It agreed to change——

Mr. DERWINSKI. Just a minute. Let me reclaim my time. We are speaking of two different points here.

Mr. FORD of Michigan. The point is there are three major things that FAA gave to the employees in the agreement turned down that are not now in the administration bill. How does the gentleman claim that this is just what they promised them before?

Mr. DERWINSKI. One of the points I was about to get to was the fact there was an implication that this was a budgetary problem because there were not the same degree of increases for the military. This item has been properly budgeted. This was the intent.

When I speak of the pay package, I am talking about the costs, the financial costs.

In the last 13 months you have had fewer people manning the airlanes and evidently doing so in a safe fashion. I hate to be personal, but I noticed our dear friend from California (Mr. JOHN L. BURTON) provided a valuable comment early in the debate. I had not noticed the gentlemen around for a few days. It is obvious he had to fly back from somewhere. So he was in the safe hands of the present personnel of the air traffic system.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Speaker, my plane was delayed an hour and a half because of a slow down because they do not have enough competent controllers running the air traffic control system. And every Member of the Congress who has had a flight, every flight they have taken go on time like they used to before the strike, should vote with the gentlemen from Illinois. If the flights have been delayed, the Members know I am telling the truth.

□ 1810

Mr. DERWINSKI. I feel my point has been well made, because first of all, those of you who have any memory of the years you have been flying, that you have had fewer delays in the last 13 months than you had prior to that if you have a delay at the present time, it is for your safety.

Again I say, I am so pleased that my dear friend, the gentleman from California, is back with us to give me the support that he perhaps does not realize he is, but down deep in his heart he knows I am right.

Mr. HYDE. Mr. Speaker, will the gentleman yield?

Mr. DERWINSKI. Yes.

Mr. HYDE. Mr. Speaker, I cannot help but think, for our dear friend from California, that hour and a half delay may have taken them that long to strap him in the seat.

Mr. DERWINSKI. I just hope that we keep referring to our dear friend from California. We remember that he comes from northern California. He is not a Hollywood celebrity, so his ego is not yet out of control.

But I would like to point out, and this is something that is inherent in this entire debate that present data shows that the air traffic system is now operating at 90 percent of the prestrike level.

I reemphasize, the safety factors are being carefully maintained.

One of the points that the so-called substitute or compromise addresses, is that it sets an arbitrary date, the end of April 1983, for compliance. I do not think we should do anything like that. I do not know when the exact compliance will occur, whether it will be May, June, or July. The gentleman from Michigan is right. There has been a public relations factor in some of the statements, but the facts are that very methodically, very carefully, very properly, we are approaching 100-percent functioning of the system.

But what is the real issue? The real issue is that, on April 3, 1981, there was an illegal strike. The goal was to bring the Nation's airlines system to its knees. The President properly responded by keeping the airlines flying. When he did so, he had overwhelming public support. He also, I might add, had the support of State, local and township government officials, who recognized that this was a challenge to the very legality and authority of the government, when there was a no-strike provision that that law be maintained.

Now, the concern over the people who struck, may be justified. I think they were badly misled by their leaders. The point is that they violated their oath and they conducted an illegal strike. The courts have so ruled and we are at the point today, and this is going to be the key vote, and this is what you are voting on. You are voting to provide proper compensation as promised to those men and women who continued to legally meet their obligation as Federal Government employees. That is really the issue.

Do you want to reward the people who served legally or do you want to have your vote interpreted as associated with those illegal strikers who performed a disservice, not just to themselves, but to the Nation. That is the real issue before us. The real issue is shall we now once and for all rectify, clarify, properly meet the responsibility to the loyal Americans who served the public, who met their oath of office, who in a responsible fashion kept the airlines moving when they were faced with a deliberate, illegal strike. That is the issue before us.

Mr. COUGHLIN. Mr. Speaker, I yield 4 minutes to the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Speaker, I rise to oppose the proposal of the gentleman from Michigan and support the proposal that has been added by the other body to the appropriations bill.

My interest in this matter is totally and essentially directed to the safety of the air control system, the safety of the airways. When the air controllers, the PATCO organization, went on an illegal strike in August of last year, it was believed that the system could not be maintained with the remaining controllers who stayed on the job and that the economic problems and chaos that would result would soon bring the Government to its very knees. That did not occur. Steps were taken. Controllers stayed on the job, military controllers were brought in, and a tremendous effort was made by everyone connected with the air control system and it has functioned and it has been rebuilding right along.

But the gentleman from Michigan is correct in several points that he made and there are certain features, by the way, of his proposal that have merit, but essentially the gentleman is correct. There are problems in the air control system. There are problems that are going to increase and many of them are related to the morale of those controllers who have been dedicated and stayed on the job, have worked extra hours, have made that extra effort and feel that they have been doublecrossed by their Government, who made certain commitments to them. Those problems of morale, not all of which are going to be addressed through keeping that commitment to them, but some of them will be, that problem of morale is going to get worse and, indeed, it could get worse to the point were the safety of the air control system, which is now I think in good condition, could rapidly and dangerously deteriorate.

I am not speaking hypothetically. I have had countless conversations with working controllers. Our committee staff has gone all over the country and spoken with those people. They are dedicated, but they feel like someone has welched on their agreement, and that someone is Uncle Sam.

I think it is our responsibility today to rectify that.

I would like to say one other thing. There are other changes that have to be made and I have discussed with Secretary Lewis and Administrator Helms some management changes that have to be brought in or else you are going to have another situation like existed before August 3, where there was bad morale and poor communication between management and the employees. Some of that is beginning to be manifested again and the Jones report, to which the gentleman from Michigan referred, has demonstrated that; but the first step is for the Government to keep its commitment to those people who stayed on the job, who have put out that extra effort. Many of them have told me that on August 3, 1981, when the strike began, the trouble walked out of the control room. The troubles that were plaguing the air control system were many of the dissatisfied and the disaffected members of PATCO. They left.

The system is running well now and it would be a disaster to create a situation where many of those problems were brought back into the control room.

Let us be frank about it, and the gentleman from Michigan has made no bones about it.

The SPEAKER pro tempore. The time of the gentleman from Georgia (Mr. LEVITAS) has expired.

Mr. COUGHLIN. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. LEVITAS. I thank the gentleman.

The heart and soul of the gentleman's amendment are the provisions that first would permit the striking controllers to be rehired, which standing alone may not be such a bad idea on a case-by-case basis, but taken in conjunction with the April 30, 1983, date to get the system back to full capacity, it is simply saying that there would have to be a mass rehiring of the striking controllers who violated the law, many of whom were the problems that created the difficulties that led to that situation on August 3, 1981.

We cannot permit that to happen, but we should keep Uncle Sam's commitment to those controllers who have worked and I think many of the problems that we are now beginning to see will be eliminated and then we can get on with the rest of it and return the system to full capacity with improved morale on the part of the controllers.

I urge support of the Senate provision.

Mr. FORD of Michigan. Mr. Speaker, I yield 5 minutes to the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN. Mr. Speaker, I rise in support of the motion offered by my colleague from Michigan (Mr. FORD), the chairman of the Committee on Post Office and Civil Service.

I agree that our air traffic controllers are dedicated, hard-working employees. They have put forth an extraordinary effort during the past 14 months as our air traffic control system is being rebuilt. Clearly, they deserve a pay raise for these efforts.

Under the compromise motion offered by Mr. FORD, they would receive a pay increase and this increase would cover the time period during which the system is being rebuilt. It would not, however, establish a permanent, separate pay scale for these employees.

Those of you who are interested in balancing the budget in fiscal year 1984 and beyond should support the Ford compromise. It is clearly a less costly alternative and it is better legislation.

Mr. Speaker, I urge the House to support the Ford compromise motion.

□ 1820

Mr. COUGHLIN. Mr. Speaker, I yield 4 minutes to the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. Mr. Speaker, I rise in opposition to the motion of the gentleman from Michigan and support of the administration's proposal to increase the pay of those air traffic controllers who did not, like so many of their colleagues, go on strike last August. I believe the time has finally come for us in the Congress to recognize the outstanding contributions made by those controllers and to compensate them for their faithful and dedicated service rendered during a most difficult period.

As the ranking minority member of the Aviation Subcommittee, I am very well aware of the problems that have resulted from the controllers strike. Countless flights had to be canceled and airlines and general aviation alike have found access into our major cities extremely difficult. However, I would like to remind my colleagues that if it were not for the exemplary service rendered by those supervisors and journeyman controllers who did not strike, the disruptions would have been far more severe and widespread.

I will not repeat all of the provisions of the administration's proposal. Suffice it to say that the major element involves a 5-percent pay increase for all working controllers, as well as flight service station specialists, and the payment of various premiums for controllers who take on additional responsibilities.

The administration plan is essentially the same one which was adopted back in November by this House by a vote of 213 to 183. Most of you supported it then and almost a year later I submit to you that the reasons for your support are even more compelling today.

As you are aware, the gentleman from Michigan, the chairman of the Post Office and Civil Service Committee, has opposed the administration's plan and has attempted to encourage the administration to return the striking controllers to their jobs.

While I would like nothing more than to see the system at full capacity tomorrow, I also realize that if we were to rehire the controllers that did strike, we would only increase the tensions at ATC facilities throughout the country. Moreover, the Ford proposal provides for a smaller pay increase than does the administration's proposal and could require the FAA to rehire striking controllers if this were necessary to return the system to full capacity by April of 1983.

The FAA will achieve this full capacity but it may take somewhat longer before it believes the system can absorb the additional traffic. I, for one, would not want to create any incentive for the administration to rush the system back to full capacity.

When the FAA believes this can be accomplished, it will be done and, until then, capacity will be increased on an incremental basis as the new controllers are brought on line.

Adoption of the administration's plan would be better policy. It gives those controllers who stayed on the job what was promised to them before the strike and does not reward those who deserted the air traffic system and violated their oaths. Moreover, it continues to let FAA decide when the system is ready to return to full capacity—without creating any incentives to do this before the additional traffic can be safely accommodated.

Let me add this—I have personal friends who, within days of the strike, realized the error of their ways and sought to repent. I really would like to see them rehired for personal reasons. I hope the FAA can find a way to do that. However, I sincerely believe that for Congress to suggest this, as the gentleman from Michigan would do, is to invite other Federal employees to follow the PATCO course, relying on this action today as the precedent that Congress will give their tacit approval to striking against our Government. This we must not do.

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. SNYDER. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, I am compelled to respond to the gentleman from Kentucky. He is obviously not current with the situation, and I am certain he did not mean, by implication, to be repudiating—the President's action.

The President has announced to the American public that there is nothing inherently wrong with these people who went on strike; that they indeed can be employed by any agency of the Federal Government, as long as they do not go back to work for the agency for which they were trained to work. We have over $200,000 in training costs invested in each one of these people. The Post Office is hiring them. The Defense Department was the first Federal agency that started hiring the former strikers. The Department of Defense was the first to start putting them in jobs where they could use their controller's training.

Other agencies of the Government have been hiring these people since last summer when the President ordered that. So please do not repudiate that action by him. The President does not say they should not work for the Government; he says they should not work for the FAA.

All we are saying is that as a class they should not be barred, and the FAA ought to be able to pick the good ones that they would like to have back.

Mr. SNYDER. Mr. Speaker, I just want to say that the gentleman ought to appreciate the goodness of the heart of the President of the United States, because under the law that they violated, they could well all be behind bars, which they are not. He has been most gracious, and to now say that you now want to give them encouragement to hire them back to their old jobs is to encourage every other Federal employee in this Government to take the same action which would shut down the whole Government, not just the airlines.

Mr. FORD of Michigan. Mr. Speaker, if the gentleman can explain the logic of taking people and spending a quarter of a million dollars apiece to train, and then employing them in other Federal agencies but not employing them for the job for which they were trained because they committed an illegal act, I would like to follow that.

And tell me who is being punished. We are talking about $1.4 billion. We are all paying that to replace these people. We are not punishing a union. The union has gone out of existence. We are no longer punishing controllers; we are punishing the American taxpayers. We are going to spend $1.4 billion to train people for whom we have a surplus of the same people, the jobs.

I remind the gentleman that at the President's press conference the other night, when he sought to clear up what he thought was a misimpression created last year when he talked about the 54 pages of want ads in the New York Times, he said he was misunderstood last year because people thought that he was denigrating the importance of unemployment. He said, "What I really wanted to point out is that we have to find a way to train people for the jobs that are out there."

Now here is the reverse side of the coin: We have spent money to train people to do these jobs, and we are going to prove what to whom by not hiring them back? Whom are we proving anything to? What are we doing to save taxpayers' money? What are we doing to make the system safer?

I do not know really what the point of all this is. The gentleman from Kentucky just said that his personal desire would be for the Secretary to be able, if he wanted to, to hire some of them back. I am trying to make it possible for the Secretary, if he wants to do that, to do so, and I suggest the gentleman, therefore, should vote for my substitute.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, this is a very complicated issue. There may not be much logic in either position, but on balance I think I am going to support the position of the gentleman from Pennsylvania (Mr. COUGHLIN) and oppose the motion by the gentleman from Michigan (Mr. FORD).

Mr. Speaker, we are completely rebuilding the air traffic control system in America. My subcommittee on the Science Committee has been responsible for the enormously complex process of designing new hardware, new software for this system. Never before, in a non-defense-related function, has our Government bought and managed a computer system of the size and scope we are now proceeding on.

It looks to me as if we need a cadre, a group of air traffic controllers, who are happy in their jobs and desirous of

cooperating in the managing and putting on line of that new system which will revolutionize the American air traffic system.

So, therefore, while I am not totally satisfied, and I have mixed feelings about opposing the proposal of my friend from Michigan, I think that the happiness, the morale, and the system of moving people in airplanes in America is better served by the proposal suggested by the Secretary of Transportation. If the Ford motion prevails there will be a potential for unhappiness among existing air traffic control personnel and, that could lead to difficulties in properly integrating this new, multibillion-dollar equipment into the system. The taxpayers would not be well served by such a problem.

□ 1830

So, I would urge a "no" vote on the motion of the gentleman from Michigan (Mr. FORD).

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. Mr. Speaker, I think that the gentleman from Kansas has begun to carry us toward the bottom line on this issue. Rather than get involved in an extremely complicated situation that has all sorts of labor-management overtones, legal overtones, carries us back to the complexity both of the air traffic system we are trying to build, and also the complexity of relationships; it goes back to the illegal strike of last year—we have a chance by rejecting the amendment of the gentleman from Michigan to have a clean, simple, straightforward process.

Those men and women who obeyed the law, who served their country, who held together the air traffic system, who did the job, who put up with 6-day weeks and a lot of overtime, being away from their families, those people will get a little, small, tiny, little reward for all that long effort, and the simple way to get that done tonight is to vote no on the proposal of the gentleman from Michigan.

By voting no on the proposal of the gentleman from Michigan, we assure no complexity with the Senate, no complexity with the President. It is a simple, straightforward yes. It is saying that we are grateful to the men and women who stayed up long hours, stayed on their jobs, who obeyed the law, who did what they were supposed to do.

Now, everything the gentleman from Michigan has said may or may not be accurate. We can take that up in the special session. As chairman of the committee, he can bring forward a bill at the appropriate time. He has many sorts of redress in the legislative process, but for tonight on this bill, the correct vote, I believe, is to vote no on the amendment of the gentleman from Michigan.

Mr. COUGHLIN. Mr. Speaker, I yield one-half minute to the gentleman from Illinois (Mr. DERWINSKI).

(Mr. DERWINSKI asked and was given permission to revise and extend his remarks.)

Mr. DERWINSKI. Mr. Speaker, as a young man I admired Al Smith. He used to say, "Let's look at the record."

The record should show that the Defense Department does not have any problem with air safety, despite any implication. But, here is the real point of the record: Mr. Jones, whose report was referred to by my good friend, Mr. FORD, testified before our committee on March 21. He was asked about his opinion of bringing back the striking controllers. He said, "This would be another blow to the air traffic control system. To rehire them would not be constructive."

So, I reemphasize a no vote against the pending motion is in order.

Mr. FORD of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I believe that there is no possible way to be legislating something as complex as this. The gentleman from Georgia just said, but he did not, I think, mean to say what he said, we should not be here on a continuing resolution on the last day of a session discussing something that is frought with as many implications with respect to the policy of the personnel of the Federal Government as this bill is. That is what is wrong with legislating on an appropriations bill. That is why we try not to do it this way.

When a committee has difficulty coming to agreement with an agency—and I have been negotiating with the Secretary of Transportation for months, with an open offer to take any kind of suggestion he has that would lead us toward a solution and legislate in the regular way, and then we would have the members of my committee, some of whom have spent years on this; I would like to suggest that I am sure no one over there thinks the Post Office and Civil Service Committee is bereft of people who are concerned for the welfare of the Federal employees. I think that it is the greatest collection of protectors of the rights of Federal employees to be found in the House, on both sides of the aisle, including the gentleman from Illinois who just spoke, who is "notorious" for his support of Federal employees and their organizations, and they find him attractive as a result thereof.

So, what we are doing here is passing a major piece of legislation. We are authorizing about $70 million in the coming fiscal year programs, retroactive pay to August 3, 1981, so we have got two fiscal years involved, about $60 million and $70 million.

It is no small piece of change, this little amendment that was just tacked on by the Senate. If Members want to teach the Senate that it is all right to run around the legislation, never compromise with the House, but just stick it on in the last minute like this, this is the way to do it. I guarantee the Members that when the next Congress is adjourning we will have five major pieces of legislation on a continuing resolution instead of one, so if for no other reason we ought to send it back.

The SPEAKER pro tempore. All time of the gentleman from Michigan (Mr. FORD) has expired.

The gentleman from Pennsylvania (Mr. COUGHLIN) has 3½ minutes remaining.

Mr. COUGHLIN. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, the motion of the gentleman from Michigan is being billed as a compromise motion. It is hardly a compromise—it is hardly a compromise. According to its own sponsor, the President's bar on rehiring controllers who violated the no strike provisions of the law would be lifted. That is no compromise. That lifts the President's ban on rehiring those who violated the no strike provisions.

It says here that this does not require any rehiring of air traffic controllers; does not require it. It directs the Secretary—directs the Secretary to take all practicable steps to return the system to full staffing by April 2, 1983. What is that requiring, but the Secretary to rehire these people? Who would he rehire? There would be lawsuits as to which one might be rehired and which not rehired.

The jobs are no longer there. Rehiring would mean two people on the job. We are almost back to full staffing now.

What kind of pay increase would the gentleman from Michigan provide? It is called a disappearing pay increase. Have the Members ever heard of a disappearing pay increase? It would be 5 percent, then going down to nothing by fiscal year 1985; not the 6.6-pay increase that was agreed to be given to the controllers.

Let me reiterate once more to my colleagues, this is the same pay package which passed the House last year by a vote of 213 to 183. The implementation of this proposal fulfills the Government's commitment to the nonstriking air traffic controllers who have kept the system operating safely since August 1981. The 6.6-percent improvement equals the tentative contract which was agreed to in the original negotiation with the controllers in June 1981. The package will not increase Federal expenditures. The cost will be absorbed by the FAA's operating budget. The nonstriking air traffic controllers deserve the benefits of this

package for their loyalty and dedication of keeping the airways safe.

My colleagues, vote no on the Ford amendment. Vote no, let us finish up this continuing resolution and let us go home.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield.

Mr. MONTGOMERY. Mr. Speaker, I have been totally confused on this today. What do the air traffic controllers want, the ones that stayed on the job? Do they want Mr. FORD's resolution or do they want the proposal that the gentleman is making?

Mr. COUGHLIN. They do not want Mr. FORD's resolution. We want a no vote on that resolution and a yes vote on concurring with the Senate amendment.

Mr. MONTGOMERY. I thank the gentleman.

● Mr. GOLDWATER. Mr. Speaker, I rise in support of the controller pay package and urge my colleagues to join me in seeing that key FAA safety employees receive the overdue pay benefits they so richly deserve.

Much of my life has been spent in aviation. Along with many of my colleagues on both sides of the aisle, I have had many occasions to use the air traffic and other safety services provided by FAA employees. I have also spent many hours visiting FAA towers and centers. You cannot help but be impressed by the enormous responsibilities placed on controllers and by the dedication with which they assume those responsbilities. There is no question in my mind that the pay raise called for by this legislation is well deserved, particularly in light of the tremendous efforts we have seen put forth by our Nation's controllers following the strike of August 1981.

The 6.6-percent pay raise provided by this legislation is no more than what was promised the controllers' union before the strike, and is no less than what the loyal controllers who honored their oaths of office should expect.

Although long overdue, it is not too late for the Congress to send a positive signal, in the form of this legislation, to controllers and related FAA employees that we recognize the superb efforts they have made on behalf of the American traveling public.●

● Mr. WOLF. Mr. Speaker, I rise in support of the continuing appropriations conference report and the Senate amendment providing a pay raise for air traffic control personnel.

I would urge my distinguished colleagues to vote yes on this measure which includes a pay package for the Nation's air traffic controllers. I am especially concerned about this measure due to the large numbers of controllers in the 10th Congressional District. This is the same pay package which the administration offered last year before the PATCO strike. The men and women who did not violate their oaths and walk off in an illegal strike called by PATCO deserve no less than what they were offered before the strike.

I would remind my distinguished colleagues of the importance to the economy and to the Nation of the aviation industry.

I would also remind my colleagues that all segments of the aviation industry—from the airline pilots to the weekend pilot and 11 aviation organizations—are supporting the administration's pay package for the controllers.

All of us, I am sure, regret the action of PATCO. But all of us, I am equally sure, applaud the men and women who stayed in the control towers and centers to keep this vital transportation link functioning.

The system now is almost at prestrike levels, and before many months, will be at prestrike capacity.

It is just and right that we support this 6.6-percent pay increase. I do so without hesitation, and hope my fellow Members will also support this measure.●

● Mr. FRENZEL. Mr. Speaker, last night, the conference committee decided to throw out the air traffic controllers pay and benefit package from the continuing resolution, and force the issue to first be voted on individually as an item of dispute. By removing the pay package from the continuing resolution we have potentially eliminated one of the really meritorious components in an otherwise disorderly piece of legislation.

Actually, this item should never have been part of the continuing resolution. It should have been voted on and passed long before today. Instead, the House, specifically the leadership of the Post Office and Civil Service Committee, has chosen to politicize what should be a nonpolitical issue, in order to satisfy the desires of certain individual Members who apparently think the strike was a good idea.

I agree that the issue of the fired controllers is a problem that should be dealt with by the administration. Those who lost their jobs have been away for well over a year now, and there may be some cases in which rehiring is a good idea. However, rehiring the fired controllers is not the issue at hand. If the Ford motion is passed it will serve only to further delay what has already been postponed for far too long.

All of us have been dependent on the U.S. air system at some time in the last year. We are all indebted to the controllers who have maintained the airways in an efficient, and more importantly, safe, manner. These men and women have served their country in an exemplary fashion during a time of difficult challenge. We owe these individuals our respect and admiration, but more importantly, we owe them just, promised compensation for their extraordinary efforts.

The benefits package should not be considered a bonus, rewarding those controllers who remained on the job. Instead, what we are considering merely provides the working controllers and associated personnel with the benefits they were offered by the Government in the summer of 1981. Last summer they deserved it. Now, after over a year of 6-day weeks, canceled vacations, and added shifts, they deserve it even more.●

● Mr. MINETA. Mr. Speaker, there are few issues that have been as divisive as the issues flowing from the ill-advised strike on August 3, 1981, by air traffic controllers.

The Chairman of the Post Office and Civil Service Committee has done an outstanding job in advocating his position and I commend him for the job he has done.

But whatever the issues of the strike, whatever sympathy or opposition each of us may feel toward those who struck, we now have an obligation to look at the men and women who have made such extraordinary efforts over the past 14 months to keep the system operating. No matter what our feelings on these other issues, we owe these men and women some extra recognition for the sacrifices they have made far above the call of duty.

As long as we continue the debate, as we have over the past year, these on-the-job controllers are not getting the compensation they deserve. I think the time has come to recognize that this debate can be ended in only one way, and that it is by concurring in the Senate amendment.

I will therefore oppose the motion to concur with an amendment and support the motion to concur.●

The SPEAKER pro tempore. All time has expired.

Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Michigan (Mr. FORD).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. FORD of Michigan. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 128, nays 267, answered "present" 1, and not voting 36, as follows:

□ 1850

The Clerk announced the following pairs:

On this vote:

Mr. Guarini for, with Mr. Badham against.

Mr. Moffett for, with Mr. Dickinson against.

□ 1850

Messrs. ZEFERETTI, HOLLAND, LONG of Maryland, and PERKINS changed their votes from "yea" to "nay."

Messrs. WIRTH, SCHEUER, LONG of Maryland, and BONKER changed their votes from "nay" to "yea."

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is, Will the House concur in Senate amendment No. 83?

The House concurred in Senate amendment No. 83.

PERSONAL EXPLANATION

Mr. HAGEDORN. Mr. Speaker, this evening on roll call 389, I am recorded as voting "yea." In fact Mr. Speaker, I voted "nay."

□ 1900

(By unanimous consent, Mr. LEVITAS was allowed to proceed for 1 minute out of order.)

H.R. 746, REGULATORY PROCEDURE ACT OF 1982

Mr. LEVITAS. Mr. Speaker, I asked for this time in order to engage in a colloquy with the distinguished majority leader.

A number of Members have spoken to me during the afternoon and evening of yesterday and today with respect to H.R. 746, the regulation reform bill which has a great deal of support, and which was in the midst of hearings before the Rules Committee yesterday at the time the balanced budget issue came up, and as a result of that and that alone, I am told further proceedings were suspended on the regulation reform bill rule.

The distinguished chairman of the Rules Committee, the gentleman from Missouri (Mr. BOLLING), this afternoon informed me that it was his intention to resume the hearings on the regulation reform bill during the lameduck session in a timely manner so that there would be adequate time to consider such a rule.

And my question to the distinguished majority leader is what would the intentions be of the leadership with respect to consideration of that bill.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, I would like to point out that the bill to which the gentleman refers was scheduled by the leadership for consideration in the House this week subject to the granting of a rule. I know of no Member in the House who has been more diligent than the gentleman from Georgia in pursuit of that bill, and in the promotion of that legislation.

It is my understanding that due in large part to the diligence of the gentleman from Georgia many of the misunderstandings and concerns that earlier existed now have been resolved.

It still is the purpose of the leadership to schedule that bill upon the granting of a rule. If the understanding of the gentleman from Georgia is correct, assuming the granting of a rule, after this Congress returns in late November, it had been and will be the purpose of the leadership to schedule it for consideration in the House.

Mr. LEVITAS. I thank the majority leader for that information.

PERMISSION TO PRINT REMARKS OF PRESIDENT AND VICE PRESIDENT HONORING THE HONORABLE JOHN J. RHODES

Mr. RUDD. Mr. Speaker, on September 28, under a previous order of the House, it was my great pleasure to speak on the great accomplishments of my colleague, JOHN RHODES, who is retiring upon the completion of this Congress.

I have now received the comments of the President and the Vice President of the United States and I ask unanimous consent that these remarks be included in my special order of September 28 in the permanent RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

THE WHITE HOUSE,
Washington, October 1, 1982.

Hon. ELDON RUDD,
House of Representatives,
Washington, D.C.

DEAR ELDON: I appreciate your invitation to join with your colleagues in recognizing the numerous contributions and accomplishments of John J. Rhodes during his thirty years of service to the residents of Arizona's 1st District, which he so ably represented, and the people of the United States.

As the first Republican ever to be elected to the House of Representatives from Arizona, as Chairman of the 1976 and 1980 Republican National Conventions, and as the House Republican Leader from 1974 to 1981, John has won the respect and admiration of private citizens and public officials.

His thirty years of experience cannot be easily replaced. We Republicans are losing an able and faithful friend; the House is losing a skilled, veteran legislator; and the citizens of the 1st District are losing a dedicated Representative.

We all owe a great debt of gratitude to John for his loyal and unselfish service to our nation. His service is a badge of honor that shines with integrity and esteem.

Nancy and I extend to Betty and John our very best wishes for the future.

Sincerely,

RONALD REAGAN.

THE VICE PRESIDENT,
Washington, October 1, 1982.

Congressman ELDON RUDD,
House of Representatives,
Washington, D.C.

DEAR ELDON: I appreciate this opportunity to recognize John Rhodes' tremendous service to the Republican Party and to our country. John has served with the highest distinction and utmost dedication in the House since 1952. His exemplary record is one which serious legislators will both study and follow.

John served as minority leader in the House from 1973 through 1980 and earned the respect and admiration of colleagues on both sides of the aisle. Today, the Republican Party is strong and effective because of the decency and integrity of men like John Rhodes. While John's skills and experience will be missed in the House, I will always cherish his friendship and know full well that his service to country will continue beyond his public service.

Sincerely,

GEORGE BUSH.

PERMISSION FOR COMMITTEE ON SMALL BUSINESS TO HAVE UNTIL MONDAY, NOVEMBER 1, 1982, TO FILE INVESTIGATIVE REPORTS

Mr. MITCHELL of Maryland. Mr. Speaker, I ask unanimous consent that the Committee on Small Business have until November 1, 1982, to file two investigative reports with the Clerk of the House notwithstanding the adjournment date of the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

Mr. WALKER. Mr. Speaker, reserving the right to object, I do so only to inquire of the gentleman whether or not this has been cleared with the minority.

Mr. MITCHELL of Maryland. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Maryland.

Mr. MITCHELL of Maryland. Yes, this has.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 5133

Mr. WINN. Mr. Speaker, I ask unanimous consent to withdraw my name as a cosponsor of the bill, H.R. 5133.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 599, CONTINUING APPROPRIATIONS, 1983

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 85: page 19, after line 2, insert:

SEC. 153. Title IV of the Tariff Act of 1930 (19 U.S.C. 1401 et seq.) is amended by adding after section 625 the following new section:

"SEC. 626. (a) In order to monitor and enforce export measures required by a foreign government or customs union, pursuant to an international arrangement with the United States, the Secretary of the Treasury may, upon receipt of a request by the President of the United States and by a foreign government or customs union, require the presentation of a valid export license or other documents issued by such foreign government or customs union as a condition for entry into the United States of steel mill products specified in the request. The Secretary may provide by regulation for the terms and conditions under which such merchandise attempted to be entered without an accompanying valid export license or other documents may be denied entry into the United States.

"(b) This section applies only to requests received by the Secretary of the Treasury prior to January 1, 1983, and for the duration of the arrangements.".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 85, and concur therein.

Mr. CONTE. Mr. Speaker, I seek recognition.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I thank the distinguished ranking minority Member from Massachusetts for the recognition.

Mr. Speaker, I take this time to discuss briefly amendment No. 85, which was the nongermane Senate amendment offered in the other body by the senior Senator from Pennsylvania relating to a whole new system of steel import licensing. Of course, there have been no hearings and I think most Members of this body and probably of the other have no idea what it is all about.

The amendment was offered in the other body by its sponsor as a technical amendment. And it was mumbled through that body without what I would consider to be any kind of significant description.

The authority addresses the ability of the President under our antidumping and countervailing duty law to come to an agreement with a foreign government to eliminate the injurious effects of dumped or subsided products subject to an investigation by the Commerce Department.

The problem is the Senate amendment does not limit the authority to those products subject to a CVD or dumping investigation where a preliminary determination of injury has been made by the ITC. Therefore, a voluntary restraint agreement could be accepted on products not covered by a case and where no injury determination has been made.

The President has no authority to negotiate restraints in order to eliminate the injurious effects of dumping and subsidies not covered by cases, yet the authority to implement restraint agreements contained in the Senate amendment is so broad that the Customs Service would be able to monitor and thereby implement voluntary restraints on products not subject to cases, or having proved injury.

If implementing authority under our CVD and dumping laws is inadequate, these laws should be changed on an

overall basis—not on an ad hoc, case-by-case or product-by-product basis.

Every other sector in the United States that has any kind of a grievance can seek similar treatment after this outrageous example. Those sectors should be able to expect voluntary restraints to be easily imposed whether they have filed a case or proven injury at all.

Mr. Speaker, the cost of implementing and monitoring the voluntary restraints under this Senate amendment could be outrageously high. Nobody can estimate how many new customs agents we will have to put to work to examine the shipments coming into this country.

The worst of it, of course, is that we are singling out a special industry which is in a difficult situation but has done very little to improve its own lot other than ask for protection. As a matter of fact, its negotiating posture through the past year with the EEC and with Commerce Department has been described by some observers as uncooperative.

To make this complicated system go into force and effect, an agreement will have to be negotiated between the United States and the European Community before January 1. I think if this provision is going to pass, and I am not going to ask for a vote on it, the eyes of the world are going to be on our steel industry to see how it cooperates in those negotiations. If it does not do better, there is not going to be any agreement and it is not going to deserve an agreement.

Since we are determined to embark on this unwise policy. I hope that there will be an agreement, and that our steel industry will begin to work itself out of its problem. I am disappointed that we will adopt this bad policy, but we will make the best of it. I am far more ashamed of the procedure that produced it.

I want to assure this body that I shall monitor the progress, or lack thereof, in these matters, and keep all parties advised.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 86: Page 19, after line 2, insert:

SEC. 154. (a) Subpart J of part I of schedule 5 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by inserting after item 522.51 the following new item:

"522.53 Steam ..... Free ..... Free".

(b) The amendment made by this section shall apply with respect to articles entered, or withdrawn from warehouse for consumption, on or after the date which is fifteen days after the date of enactment of this joint resolution.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 86, and concur therein.

Mr. CONTE. Mr. Speaker, I seek recognition.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts.

□ 1910

Mr. CONTE. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, we have another incursion on committee jurisdiction here for a duty-free importation of steam from the Senate.

It is fair to note that the Senate has received from the House of Representatives 59 of these duty suspension bills in which we try to suspend or eliminate the tariff to take care of special distress conditions in the United States for our Members. We go to great pains to take hearings, to pass bills that make some sense, that have some economic justice to them and do not hurt our economy.

The Senate, however, of those 59 bills, has returned only one. That means that there are hundreds of House Members who have a much better case than the Member who has submitted this bill, at least in the sense of a more timely filing. But they are not going to get their bills. Their constituents' needs are not going to be met despite vaild bases although the Senate would take only one of our 59 bills, our intrepid defenders on the Appropriations Committee have saluted that Senate behavior by accepting the one bill that the Senate wants.

So I just want every Member in here who has got a duty suspension bill, who is not going to get it, to know why you are not going to get it. It is wholly because our Appropriations Committee gives the Senate its bills and apparently does not care what happens to House Members' bills.

Mr. Speaker, I yield to the distinguished gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, first, I want to commend the gentleman from Minnesota for telling it like it is and telling it very effectively like it is.

What the Senate has done to the House is atrocious. The Senate has had House bills over there for a year and a half, relatively noncontroversial, but certainly important pieces of legislation.

Many Members of this body on both sides of the aisle and the industries in their districts are vitally affected by this legislation and the Senate has sat like a bunch of prima donnas over there and not even considered the bills, despite the fact that we have asked them to consider them, written them letters to consider them, and for the 20 years that I have been in Congress they have passed all these bills. They add something and they take something away and we have worked them out, but not this Senate. They have done nothing. They have hurt American industry. They have hurt America's competitive position and they have not done anything, but in the middle of the night, without any discussion, at the urging of the Secretary of Commerce, they have sneaked the steel cartel authorization through.

Now, there are lots of bills over in the Senate that they could have added it to, but they did not do it. They took advantage of the Senate by not fully explaining the position. They took advantage of the deadlines that this Congress faces and the closing down of the Government.

Our conference, our House Members and our appropriation members sent to the Senate a bill that did not have anything other than appropriation matters on it and in the middle of the night some hundred amendments were added. I do not know whether every Senator got 1 or some got 2 or 3 or something, but they added 100 of them to it.

Now, our conferees did the best they could. They did not want to close down the Government. They did not have time to consider these amendments.

The Ways and Means Committee at the same time was engaged in two conferences with the Senate Finance Committee, but nobody even said boo about these things to us.

Now, that is the way the House has been trampled on.

The gentleman from Minnesota is not going to ask for a vote. I am not going to ask for a vote and I do not want to delay the proceeding any further, but somewhere along the line, you know, enough is enough.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the distinguished chairman.

Mr. WHITTEN. Mr. Speaker, I just would like to agree with my colleagues here.

I would like to explain the situation we are in, because we need to prevent this from happening again.

Yesterday our friends on the other side had 100 amendments offered, on the Senate floor they finally just took them all so we could try to go to conference and get this through by midnight, so I am told.

So we have tried to do the best we can. We did fix it where we could have passed it by midnight last night.

So I just agree with the gentleman and hope we can do a better job in the future, but I hope above all we do not get put into this fix again.

Mr. CONTE. Mr. Speaker, I yield 1 additional minute to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I thank the distinguished chairman for his contribution.

I do not expect perfection from this House, and I know we have difficulty dealing with the other body.

I will say, however, that next year when we have our 80 duty-suspension bills that the Members need, shall we send them to the Appropriations Committee? Do you want to do the hearings on them and take care of them?

Well, I hope that in the future you will think about that a little bit when you are working with the Senate.

Mr. Speaker, I do not intend to request a vote. The gentlewoman from Maine, who is going to be affected by this, has every reason to have her bill passed, but so do all the other Members of the House who are going to be denied their relief.

Mr. CONTE. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Maine (Mrs. SNOWE).

Mrs. SNOWE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I am pleased to rise today in support of the motion to recede and concur and agree with the Senate action on this important amendment. This amendment would amend tariff schedules to allow duty-free importation of steam energy to a Madawaska wood pulp plant.

Fraser Paper Co. expects to complete a unique project this fall in which steam created during the pulping process in Fraser's Edmundston, New Brunswick, plant would be piped across the border and used to power the paper drying process at the company's Madawaska plant. The U.S. Customs Service has notified the company that an import tax of as much as $1 million per year could be levied on the steam.

If this amendment were not to pass then the Federal Government would be penalizing Fraser Paper Co. for having planned an inventive method of conserving energy through this project, and, in fact, the project could save as much as 400,000 barrels of oil annually. Furthermore, Fraser's plans would raise the company's thermal self-sufficiency in the Madawaska-Edmundston complex to 80 percent, up from 27 percent. The steam also would be used to heat the Madawaska plant. The efforts that Fraser has made to reduce its dependence on petroleum products and to employ new energy-saving techniques are commendable.

The bill which I introduced is embodied in this amendment, and not only can solve Fraser's problem, but also encourages other companies to explore similar technology for conserving energy. Therefore, Mr. Speaker, for all of these reasons, I urge the passage of this amendment.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 88: Page 19, after line 2, insert:

SEC. 156. For the purposes of the Immigration and Nationality Act, Tessie and Enrique Marfori shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this joint resolution, upon payment of the required visa fee. Upon the granting of permanent residence to such aliens as provided for in this joint resolution, the Secretary of State shall instruct the proper officer to reduce by the required number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 88 and concur therein with an amendment, as follows: In lieu of the section number 156 named in said amendment, insert "155".

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment read as follows:

Senate amendment No. 89: Page 19, after line 2, insert:

SEC. 157. There is appropriated $518,000,000, to remain available until expended, for Department of Transportation Interstate Transfer Grants—Highways, and $365,000,000, to remain available until expended, for Department of Transportation Interstate Transfer Grants—Transit: *Provided*, That, allocations of these funds shall be distributed in accordance with House Report 97-783 or Senate Report 97-567, whichever is higher.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 89 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 156. Notwithstanding any other provision of this joint resolution, there is appropriated $518,000,000, to remain available until expended, for Department of Transportation Interstate Transfer Grants—Highways, and $365,000,000, to remain available until expended, for Department of Transportation Interstate Transfer Grants—Transit: *Provided*, That allocations of these funds shall be distributed in accordance with House Report 97-783 or Senate Report 97-567, whichever is higher.

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 90: Page 19, after line 2, insert:

SEC. 158. Since the United States Congress established the Social Security system in 1935 to provide for the general welfare by establishing a system of Federal old-age benefits; and

Since Medicare was made part of the Social Security system by Act of Congress in 1965 to provide for the general welfare through a system of health benefits for the aged; and

Since Medicare is an insurance program in which working Americans contributed their Social Security payroll taxes and in which the elderly and disabled pay health insurance premiums in order to receive health benefits promised under this insurance plan; and

Since proposals to limit eligibility for Medicare health benefits to lower-income persons would profoundly alter the character of health insurance for the aged and disabled by removing the insurance principle from the Medicare program.

It is the Sense of the Senate that the Congress should reject any proposal to impose a "means test" on eligibility for the Medicare program or benefits provided by the Medicare program.

SEC. 159. The Senate finds that:

a. Wars are raging in several parts of the world inflicting incalculable loss of human lives and property, with unbearable human suffering and grief; and

b. The presence of huge nuclear arsenals in the world present an ever present threat to the survival of mankind; and

c. Though war in a very troubled and divisive world is an ever present possibility and threat, the United States has been at peace since the end of Vietnam conflict; and

d. The benefits of peace and the value of life should be ever present in the thoughts of all people; and

e. A day should be set aside for the American people to reflect on the values of peace and the horrors of war; and

f. The President should proclaim a day of peace and call on the people of the country

to commemorate it with such ceremonies and activities as are appropriate and in keeping with an expression of gratitude for living in a great, free Nation at peace.

In view of these findings, it is the sense of the Senate that October 10, 1982, should be designated as "National Peace Day" and that the President of the United States should issue a proclamation calling upon Federal, State, and local government agencies, interest groups, organizations, and the people of the United States, to observe that day by engaging in appropriate activities and programs, thereby showing their commitment to peace.

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 90 and concur therein with an amendment, as follows: In lieu of the section number 158 named in said amendment, insert "157" and in lieu of the section number 159 in said amendment, insert "158".

Mr. CONTE. Mr. Speaker, I seek recognition.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I yield to the gentleman from Illinois (Mr. PHILIP M. CRANE).

Mr. PHILIP M. CRANE. Mr. Speaker, I thank the distinguished gentleman for yielding.

Mr. Speaker, I rise in opposition to the motion. It is my intent if the motion is defeated, to introduce an amendment that preserves the existing section 158, which would, I gather, be redesignated as 157 and would otherwise strike the section 159 which is to be redesignated 158.

Mr. CONTE. Mr. Speaker, I have no further requests for time.

Mr. WHITTEN. Mr. Speaker, this is a matter involving the Senate. It is not a regular appropriations matter under our jurisdiction. Acting as chairman of the committee, I have offered a motion.

Mr. Speaker, I move the previous question on the motion.

The SPEAKER pro tempore. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. WHITTEN).

The motion was rejected.

MOTION OFFERED BY MR. PHILIP M. CRANE

Mr. PHILIP M. CRANE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. PHILIP M. CRANE moves that the House recede from its disagreement to the amendment of the Senate numbered 90 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SECS. 157-158. Since the United States Congress established the social security system in 1935 to provide for the general welfare by establishing a system of Federal old-age benefits; and

Since medicare was made part of the social security system by Act of Congress in 1965 to provide for the general welfare through a system of health benefits for the aged; and

Since medicare is an insurance program in which working Americans contribute their social security payroll taxes and in which the elderly and disabled pay health insurance premiums in order to receive health benefits promised under this insurance plan; and

Since proposals to limit eligibility for medicare health benefits to lower income persons would profoundly alter the character of health insurance for the aged and disabled by removing the insurance principle from the medicare program.

It is the Sense of the Senate that the Congress should reject any proposal to impose a "means test" on eligibility for the medicare program or benefits provided by the Medicare program.

Mr. PHILIP M. CRANE (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. PHILIP M. CRANE) is recognized for 30 minutes.

Mr. PHILIP M. CRANE. Mr. Speaker, I will not take more than 60 seconds of the busy time of the House.

Mr. Speaker, it is simply a desire to expedite the business this evening. I think this is a noncontroversial amendment that I have proposed. It deals with striking a sense of the Senate resolution, which I think is extraneous and does not deal with the sense of the Congress. Since there seems to be no great controversy involved, I will not occupy any further time.

Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

□ 1920

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. PHILIP M. CRANE).

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 93: Page 19, after line 2, insert:

SEC. 162. Section 2 of the International Coffee Agreement Act of 1980 (19 U.S.C. 1356k) is amended by striking out "October 1, 1982" and inserting in lieu thereof "October 1, 1983".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 93 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 161. Section 2 of the International Coffee Agreement Act of 1980 (19 U.S.C. 1356k) is amended by striking out "October 1, 1982" and inserting in lieu thereof "the expiration of this joint resolution".

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 100: Page 19, after line 2, insert:

SEC. 169. Section 508 of the Airport and Airway Improvement Act of 1982 is amended by adding at the end thereof the following new subsection:

"(e) USE OF CERTAIN APPORTIONED FUNDS FOR DISCRETIONARY PURPOSES.—(1) Subject to paragraphs (2) and (3), if the Secretary determines, based upon notice provided under section 509(e) or otherwise, that any of the amounts apportioned under section 507(a) will not be obligated during a fiscal year, the Secretary may obligate during such fiscal year an amount equal to such amounts at his discretion for any of the purposes for which funds are made available under section 505.

"(2) The Secretary may make obligations in accordance with paragraph (1) only if the Secretary determines that the total of obligations for such fiscal year for purposes of section 505 will not exceed the amount authorized for such fiscal year under section 505(a) and if the Secretary determines that sufficient amounts are authorized under section 505(a) for later fiscal years for obligation for such apportioned amounts which were not obligated during such fiscal year and which remain available under section 508(a).

"(3) For purposes of amounts apportioned for fiscal year 1982, the Secretary may make the determinatons under paragraphs (1) and (2) on or before October 30, 1982. For purposes of any limitation on obligations imposed by law, amounts obligated in accordance with this subsection on or before October 30, 1982, shall be deemed to have been obligated during fiscal year 1982 to the extent that such amounts, when added to amounts obligated on or after October, 1, 1981, and before October 1, 1982, for purposes of section 505, do not exceed $450,000,000.".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 100 and concur therein with an amendment, as follows: In lieu of

the matter inserted by said amendment, insert the following:

SEC. 167. Section 508 of the Airport and Airway Improvement Act of 1982 is amended by adding at the end thereof the following new subsection:

"(e) USE OF CERTAIN APPORTIONED FUNDS FOR DISCRETIONARY PURPOSES.—(1) Subject to paragraphs (2) and (3), if the Secretary determines, based upon notice provided under section 509(e), or otherwise that any of the amounts apportioned under section 507(a) will not be obligated during a fiscal year, the Secretary may obligate during such fiscal year an amount equal to such amounts at his discretion for any of the purposes for which funds are made available under section 505.

"(2) The Secretary may make obligations in accordance with paragraph (1) only if the Secretary determines that the total of obligations for such fiscal year for purposes of section 505 will not exceed the amount authorized for such fiscal year under section 505(a) and if the Secretary determines that sufficient amounts are authorized under section 505(a) for later fiscal years for obligation for such apportioned amounts which were not obligated during such fiscal year and which remain available under section 508(a).

"(3) For the purposes of carrying out this subsection—

"(A) None of the funds provided in the joint resolution providing continuing appropriations for the fiscal year 1983 shall be available for the planning or execution of programs the commitments for which are in excess of $1,050,000,000 for the two fiscal years ending prior to October 1, 1983, for grants-in-aid for airport planning, noise compatibility planning and programs, and development; and

"(B) Section 506(e)(4) of this Act shall not in any manner whatsover impair the limitation established by this paragraph."

Mr. WHITTEN (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The motion was agreed to.

The motion to reconsider was laid on the table.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

AUTHORIZING THE MAKING OF A CERTAIN CORRECTION IN ENROLLMENT OF HOUSE JOINT RESOLUTION 599, CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1983

Mr. WHITTEN. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 420) authorizing that a certain correction be made in the enrollment of House Joint Resolution 599, making continuing appropriations for the fiscal year 1983, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 420

Resolved by the House of Representatives (the Senate concurring), That the Clerk of the House of Representatives is hereby authorized and directed, in the enrollment of the joint resolution (H.J. Res. 599), making continuing appropriations for the fiscal year 1983, to make the following correction: In section 101(c) of the joint resolution, in the second proviso after the word "Jamming" insert "Systems, $14,500,000; NATO Seasparrow Ordalt Kits, $33,000,000; continue".

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 6968, MILITARY CONSTRUCTION APPROPRIATIONS, 1983

Mr. GINN. Mr. Speaker, I call up the conference report on the bill (H.R. 6968) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1983, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of Thursday, September 30, 1982, at page 26272.)

Mr. GINN (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia.

There was no objection.

The SPEAKER pro tempore. The gentleman from Georgia (Mr. GINN) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. REGULA) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Georgia (Mr. GINN).

Mr. GINN. Mr. Speaker, I yield myself such time as I may consume. We are presenting today the conference report on H.R. 6968, providing for military construction for the fiscal year 1983. The conference agreement provides $7.043 billion, which is $1.169 billion below the President's request, $56.668 million below the Senate recommendation, and $42.791 million above the amount recommended by the House. Additionally, the agreement is approximately $427 million below the fiscal year 1983 section 302 budget allocation.

Although I have just noted various reductions, the military construction conference agreement provides for one of the largest expenditures for defense construction ever recommended by Congress. The wide range of military construction projects funded in this agreement represents a confirmation of our commitment to provide the necessary resources for the men and women in our military and for the overall defense of the country.

The conference agreement reflects a series of changes to the House bill, but we have been able to bring the bill back to the House below the President's budget request and still keep intact the majority of the initiatives and concerns of the House. I will highlight some of the major proposals included in the conference agreement:

Quality of life in the military. The conferees agreed to fund almost $100 million in quality of life projects that had been deleted by the Senate. We felt that these projects were an essential portion of our emphasis to improve the working and living conditions for people in the military.

Ras Banas, Egypt. After debating for the past year the issue of whether to proceed with a rapid deployment base in Egypt, the conferees agreed to a compromise position. The Department will have available $91 million of the $178 million requested in fiscal year 1983 to proceed with a true bare base at this location. However, the Department is to provide further assurances on the use of the base, enter into negotiations with our NATO allies and Japan for direct or indirect offset funding, and reduce the scope of construction to a total of $350 million.

Europe. The conferees agreed to restore almost $100 million in projects cut by the Senate in Europe. We felt strongly on this side that it was important to take care of long neglected facilities that are for our own people overseas.

MX missile program. The conferees have not funded any construction for the basing of the MX missile. Also, we have agreed to retain the provision in the House bill that prohibits any site-specific design for an MX basing mode to proceed prior to fulfilling the requirements of the National Environmental Policy Act.

Domestic projects. The conferees have agreed to fund projects and family housing in the United States totaling in excess of $3.5 billion. This will provide direct and indirect job opportunities for more than 200,000 in the construction and construction-related businesses.

The conferees approved all language contained in the report of one body but not addressed by the other body. Thus, in the case of the consolidated space operations center at Peterson Air Force Base, Colo., the additional

requirements imposed by the Senate must be met.

Funding through savings. The conference agreement recommends that all congressional initiatives recommended by the House be funded through the use of savings that have been generated from the good domestic and foreign bidding climate.

Mr. Speaker, the conference agreement before us provides for the highest priority military construction projects in a well-balanced program. This program reflects the top requirements of the Department of Defense and the priorities and initiatives of Congress. I recommend, therefore, approval of the conference report.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	New budget authority—				Conference compared with—				
	Enacted	Estimates	House	Senate	Conference	Enacted	Estimates	House bill	Senate bill
Military construction:									
Army	943,701,000	1,100,200,000	941,570,000	982,810,000	929,720,000	−13,981,000	−170,480,000	−11,850,000	−53,090,000

Mr. ADDABBO. Mr. Speaker, will the gentleman yield to me?

Mr. GINN. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the chairman of the subcommittee for yielding to me.

Mr. Speaker, I want to take this opportunity to express my sincere respect and affection for the gentleman from Georgia, The chairman of the Military Construction Subcommittee. Bo GINN will not be rejoining us next year and I shall miss him in a keenly personal way. We have served together on the Military Construction and Defense Subcommittees. He has worked hard and well for his country and for his people of Georgia. I wish him Godspeed. I know that he will continue to do his best in whatever he undertakes in the future. I thank you, Bo. I hope we will continue to have many opportunities to share our thoughts and our friendship in the days and years ahead.

Mr. GINN. Mr. Speaker, I would say to my distinguished friend from New York that I appreciate his kind and generous and gracious comments. I also say to him what a distinct pleasure it has been to serve on the committee of which he has been such a great chairman.

Mr. WHITTEN. Mr. Speaker, will the gentleman from Georgia yield to me?

Mr. GINN. Yes, I yield to the distinguished chairman of the full committee, the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I would like to join with my friend from New York and say that we all regret the retirement of our friend, the gentleman from Georgia. He has been one of the finest Members of Congress. His contributions to the Committee on Appropriations and to the House would be hard to measure.

Mr. Speaker, I just say to the gentleman that we wish him well. We hope you will continue to remain close with all of your friends here in the House, and we are proud of the record that you leave here.

□ 1930

Mr. GINN. Mr. Speaker, I must thank my distinguished full committee chairman, my dear friend from Mississippi (Mr. WHITTEN) and thank him for the many, many ways in which he has befriended me as a Member of the House, and certainly for the great leadership he has provided me when I served as chairman of the subcommittee.

Mr. Speaker, before yielding to the ranking minority member, the gentleman from Ohio (Mr. REGULA), I want to personally thank all my colleagues, the members of the Subcommittee on Appropriations. I could not have asked for greater cooperation or a greater spirit of togetherness.

In particular I must thank Mr. REGULA for the advice and concern and spirit of cooperation which he has shown to me.

Also, I would like to point out that there is another member of the subcommittee who will be retiring at the conclusion of this Congress. That is CLAIR BURGENER of California. He has served with great distinction on the Subcommittee on Military Construction. He has been a strong supporter of national defense, and he has been a great source of expertise on the subject of military construction. I want to say on behalf of the subcommittee how much we value his service and his friendship.

Mr. REGULA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I echo the remarks about the distinguished chairman of the subcommittee, but I do want to add an additional comment. That is this: Both the taxpayers of the United States and those who serve in our uniformed services owe a great debt to my colleague from Georgia. Thanks to the leadership and the dedication of our colleague, we have been able in this appropriation measure to go considerably below the President's request; considerably below the budget recommendations that were allocated by this body. The taxpayers owe him a great

debt for his cost-effective analysis of the bills that are presented to us by way of budget numbers.

Secondly, the service men and women of our Nation owe the chairman a great debt because he instituted a new program as chairman of the committee whereby we brought in enlisted people and gave these individuals an opportunity to discuss the quality of life issues.

I have been on this committe for several years, and I want to commend the chairman for bringing to the attention of the subcommittee the idea that we should hear from those who use the facilities we construct. Certainly, one of the key elements in reenlistments of our service people is providing a good quality of life both in the workplace as well as in the quarters we provide. The chairman has been a leader in insuring that this happened.

We will miss him a great deal, but we wish him well. I certainly would say for all the members of the subcommittee that he has been an outstanding chairman and an outstanding leader.

Mr. Speaker, Chairman GINN has covered the facts pretty well. I might add just a couple of things. This bill is $1 billion in budget authority under the budget adopted by this House. It is $140 million under the budget adopted by this House in outlays. I daresay that in percentage of being below budget, it will be as good as any appropriations bill that comes before the House in this session. It reflects a lot of hard work on the part of the subcommittee and particularly the chairman.

One last comment: The original appropriation bill passed by a vote of 322-34. I think this reflected the confidence of this body in the leadership of the chairman. There have been very few changes in the conference report, and I would certainly urge the Members to support this conference report.

As the chairman pointed out, we greatly reduced the amount of money that the Senate had put in for Ras Banas in Egypt. Also we put in very strong language at the insistence of the House Members requiring our NATO allies and Japan to make a far greater contribution to securing the oil supply of the Middle East. I think that this is a very important feature of the bill, and I certainly urge all the Members to support it.

Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. LOEFFLER), a member of the subcommittee.

Mr. LOEFFLER. Mr. Speaker, I thank my distinguished ranking Member for yielding to me. I join as well in endorsing this conference report. We have provided adequate moneys for proper and appropriate construction to occur for the Department of Defense as well as providing the opportunity for the enhancement of the quality of life for those who serve in our military, along with their families.

In addition, Mr. Speaker, it is my pleasure this evening to thank our distinguished subcommittee chairman, the gentleman from Georgia, Mr. GINN, for being a great individual as well as a great leader and a great chairman of our subcommittee. He is a man who is fair, honest, aboveboard, working in a collegial manner with all members of the subcommittee as well as this body.

From a Texas perspective, he truly is the epitome of what we call a southern gentleman. From my perspective, and speaking for my side of the aisle, we will miss you, Mr. Chairman, and we thank you for what you have done for our country.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I will be happy to yield to my colleague.

Mr. KAZEN. Let me as a member of the authorizing Committee on Military Construction join with the members of this committee in commending the gentleman from Georgia for the way he has followed through on the authorizations that we have brought him from the Armed Services Committee; and to the members of this committee let me tell them how grateful I am, and particularly to my distinguished friend from Texas on this committee, for obtaining the appropriations that were authorized in our bill, particularly for the training of the personnel and the housing projects that we so badly need in the State of Texas.

Mr. LOEFFLER. I thank my distinguished colleague from Texas, who along with me, also represents part of San Antonio. The gentleman from Georgia as well as our ranking Republican have been very kind and saw as well the need for this additional construction.

With that, again I thank the gentleman from Ohio for yielding to me, and wish you well, Mr. Chairman. We look forward to seeing you soon.

Mr. REGULA. Mr. Speaker, I yield such time as he may consume to the gentleman from Indiana (Mr. HILLIS), a member of the Armed Services Committee.

Mr. HILLIS. Mr. Speaker, I thank my friend and colleague from Ohio (Mr. REGULA) for yielding time to me.

Mr. Speaker, I would like to take a few minutes here to compliment the Department of Defense, the Appropriations Committee, and the Armed Services Committee for the fine work that is being done in improving the living conditions for some of our military personnel.

Last night, the Congress passed the conference report on S. 2586, the Military Construction Authorization Act for fiscal year 1983. The bill contained $3.67 million for the alteration and modernization of two unaccompanied enlisted personnel dormitories and a data processing facility at Grissom Air Force Base. The conference report before us now appropriates the funds authorized.

With the approval of these projects, the inadequate lighting, poor insulation and sound attenuation, obsolete electrical and mechanical systems, and central latrines will be upgraded and modernized to correct the substandard living conditions that presently exist at the base for the enlisted force.

Because of limitations imposed by the first concurrent resolution on the budget with respect to defense spending, certain adjustments to the authorization process had to be made in order to include a number of vitally needed "quality of life" projects such as the projects at Grissom. Budgeted projects were given first priority and were authorized for appropriation of funds. Unbudgeted projects were added to the authorization bill, such as the dormitories at Grissom, were authorized for construction with savings that are expected to be generated as budgeted and authorized projects are put under contract. Experience to date in fiscal year 1982 has shown that savings from the amounts authorized for projects, based upon bids received from the construction industry, have ranged from 12 to 15 percent.

In addition to the savings expected as a result of good bids, savings resulting from project cancellations and savings from prior years are also sources of funds for construction of the unbudgeted projects.

This procedure enabled the Congress to honor the national commitment to improve the quality of life for the men and women in uniform while at the same time fulfilling a commitment to the taxpayers to balance the budget and reduce the deficit facing our country.

I think both the authorizing and appropriations committees deserve to be congratulated for their work in this area.

Mr. REGULA. Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Speaker, I rise in support of the conference report on H.R. 6968, the military construction appropriation bill for fiscal year 1983.

I would like to use this time to establish a little bit of legislative history, very briefly.

I am particularly pleased with what the subcommittee has recommended with respect to Senate amendment No. 8 in disagreement, and I would mention, of course, that Public Law 94-241 with respect to the Northern Marianas provides for and encourages leasing ar-

rangements. I would ask if it would be the intention of the subcommittee to maximize subleasing of this area back for agriculture and other purposes consistent with military uses. I would ask the gentleman from Ohio if he has any reaction to that.

Mr. REGULA. Mr. Speaker, I would respond to the gentleman by saying that we brought this issue up in the conference, and we will put a great effort into encouraging the military to sublease and use this land in the most efficient manner possible, particularly to help the people in the Marianas to become more self-sufficient.

Mr. BEREUTER. I thank the gentleman.

I would ask the chairman if he has any reaction to that.

Mr. GINN. Yes; I believe leaseback agreements are within the context of the lease.

Mr. BEREUTER. I thank the gentleman.

Mr. Speaker, as a member of the Subcommittee on Insular Affairs, I am particularly pleased that this legislation directs that $33 million will be appropriated in order to acquire for national security purposes a 50-year lease (with a 50-year renewal option at no additional cost) on approximately 18,000 acres in the Northern Mariana Islands (NMI).

Last January, I had the opportunity to discuss the strategic significance of these NMI lands with military field commanders in Guam and Honolulu. As a result, I am totally in concurrence with the Secretary of Defense, Mr. Caspar W. Weinberger, whose message to the other body described the importance of the NMI lease as follows:

These lands have great strategic value to our posture in the Pacific. Funding the lease is a political statement of this Nation's unflagging commitment to remain a Pacific power through the next century, and will do much to assuage regional fears of shrinking U.S. commitment in the face of increasing Soviet presence in Southeast Asia. It sends a clear and unmistakable signal of our resolve to protect U.S. national interests in the region.

Public Law 94-241, The Covenant To Establish a Commonwealth of the Northern Mariana Islands in Political Union with the United States of America, authorized the acquisition of the military land lease in the NMI. In recognition that some of these acres will only be required to meet future military contingencies, section 803(d), Public Law 94-241 stipulates:

From the property to be leased to it in accordance with this covenant, the Government of the United States will lease back to the Government of the Northern Mariana Islands, in accordance with the Technical Agreement, for the sum of $1 per acre per year, approximately 6,458 acres . . . on Tinian Island and approximately 44 acres . . . at Tanapag Harbor on Saipan Island, which will be used for purposes compatible with their intended military use.

I am in full accord with this provision if the leaseback acres can be used for such purposes as agricultural and grazing purposes. The NMI Commonwealth—like most insular areas—is experiencing severe problems in meeting its balance of payments. One of the most effective means of correcting such imbalances is to increase food production, initially for domestic consumption and later for export. I therefore call upon the Government of the Northern Marianas to take advantage of section 803(d) in order to augment its agricultural potential, including livestock production and serve notice to the Defense Department that we expect leasing for compatible agricultural uses to be maximized in accordance with the actual military usage of the leased area. Over cautious use of leaseback procedures is strongly discouraged.

Accordingly, Mr. Speaker, in this legislation we have a provision that not only provides for the national defense but also stimulates local economic development. Such a double-barreled impact should not be forgone. Consequently, I urge my colleagues to lend their full support in its passage.

Mr. REGULA. Mr. Speaker, I yield such time as he may consume to the gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. Mr. Speaker, I thank the gentleman for yielding.

I would just like to take a few moments, if I may, to extend my appreciation to the gentleman from Georgia, the chairman of the subcommittee, and the gentleman from Ohio, the ranking minority member, for their kind efforts in making sure that an adequate job was done with many of the construction projects that are funded in this bill, but especially one in our own district.

□ 1940

We still have some problems associated with that project but we are well on our way I think to resolving those favorably.

The committee's guidance and the chairman and ranking minority member's guidance and counsel and wisdom on this matter are greatly appreciated. I wanted to just extend my thanks to both of them for all of the courtesies they have extended to me.

Mr. REGULA. Mr. Speaker, I yield such time as he may consume to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. I thank the gentleman for yielding.

I take just a few moments to express my appreciation to the chairman and ranking member for the good work that they have done on this bill and the leadership they have provided.

This bill comes in under budget at about $1.2 billion, as I recall, which is in the tradition of the Appropriations Committee. I was thinking here a minute ago, as we were discussing the amounts of funds that were saved by the good work of the chairman and the leadership of the chairman, what a stark contrast the work of the Congress is from the rhetoric of the politics in Washington. It is a shame that the American people do not know more clearly of the work of the Congress, as demonstrated by the chairman of this subcommittee.

I observed that there is one member of the press in the gallery to be distinguished from a gallery filled with members of the press just a few hours ago when we were debating a constitutional amendment on a balanced budget.

The gentleman from Georgia (Mr. GINN) has certainly done his part to lower the budget by coming under the President's request by over $1.2 billion.

Additionally, I would like to say as a member of this subcommittee what a pleasure it has been to serve with the chairman during his leadership. I wish the chairman all of the best as he leaves the Congress and engages in life after Congress. I look forward to seeing him during the years ahead.

Mr. REGULA. Mr. Speaker, I yield back the balance of my time.

Mr. GINN. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Speaker, I want to commend the chairman and the ranking Republican for another excellent bill on military construction. My good friend from Georgia and I have had some differences on other issues in other bills but I want to commend him for the job he has done here. He has always been fair. I am going to miss him. I am going to miss his work, his leadership in the military construction area.

I just wish him well and want to say how much the people of the 6th District of the State of Washington appreciate the work that he has done for all Americans.

Mr. GINN. Mr. Speaker, I thank the gentleman from Washington and all of the other Members who have had such kind and generous things to say about my service as chairman.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 1: Page 2, line 3, strike out "$941,570,000" and insert "$982,810,000".

MOTION OFFERED BY MR. GINN

Mr. GINN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GINN moves that the House recede from its disagreement to the amendment of the Senate numbered 1 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$929,720,000".

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 8: Page 3, line 24, strike out "$289,145,000" and insert "$305,143,000".

MOTION OFFERED BY MR. GINN

Mr. GINN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GINN moves that the House recede from its disagreement to the amendment of the Senate numbered 8 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$339,770,000".

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. The Clerk will report the final amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 32: Page 13, after line 5, insert:

SEC. 117. Pursuant to 10 U.S.C. 2394 and section 201 of the Military Construction Authorization Act, 1983, the Navy is authorized (a) to construct and operate a refuse derived fuel-fired electric power generating plant and (b) to contract for fuel supplies at the Norfolk Naval Ship Yard (NNSY). Any electric power and fuel supplies produced in excess of the needs of the Navy may be sold: *Provided, however,* That any proceeds from such sales, adjusted for costs related thereto, shall be credited to the Treasury as miscellaneous receipts.

Mr. GINN (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

MOTION OFFERED BY MR. GINN

Mr. GINN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. GINN moves that the House recede from its disagreement to the amendment of the Senate numbered 32 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

SEC. 119. Pursuant to 10 U.S.C. 2394 and section 201 of the Military Construction Authorization Act, 1983, the Navy is authorized (a) to construct and operate a refuse derived fuel-fired electric power generating plant and (b) to contract for fuel supplies at the Norfolk Naval Shipyard (NNSY). Any electric power and fuel supplies produced in excess of the needs of the Navy may be sold: *Provided, however,* That any proceeds from such sales, adjusted for costs related thereto, shall be credited to the Treasury as miscellaneous receipts.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

GENERAL LEAVE

Mr. GINN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the matters discussed in connection with the conference report on the bill just considered, and to include certain statistical matter.

The SPEAKER pro tempore. Is there any objection to the request of the gentleman from Georgia?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2375. An act to extend the Defense Production Act of 1950; to amend section 719 of such act to transfer the authorities and functions of the Cost Accounting Standards Board; to establish a Commission on Strategic and Critical Materials Stock Piling Needs; and to establish a White House Conference on Productivity.

CONFERENCE REPORT ON H.R. 5890, NATIONAL AERONAUTICS AND SPACE ADMINISTRATION ACT, 1983

Mr. FLIPPO. Mr. Speaker, I call up the conference report on the bill (H.R. 5890) to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of Wednesday, September 29, 1982.)

Mr. FLIPPO (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The SPEAKER pro tempore. The gentleman from Alabama (Mr. FLIPPO) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. WALKER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Alabama (Mr. FLIPPO).

Mr. FLIPPO. Mr. Speaker, I yield myself 2 minutes.

Mr. FLIPPO. Mr. Speaker, the committee of conference for the bill H.R. 5890, authorizing funds for the National Aeronautics and Space Administration for fiscal year 1983 has successfully concluded its work.

The conference report on H.R. 5890, authorizing appropriations for the National Aeronautics and Space Administration, was filed on Wednesday, September 29, and is included in the RECORD of that day, the conference report before you includes the disposition of differences in eight research and development-program line items, construction of facility program funding, the reseach and program management line item, as well as a number of language amendments.

The NASA budget request for fiscal year 1983 was $6,612,900,000. The action of the House/Senate conference would authorize $6,772,900,000 which is $160 million more than the budget request.

The conference action before us represents a fair compromise between the action of the two Houses. The conference action is $124.9 million more than the House action and $160 million more than the Senate action. Although the total authorization agreed to in conference is more than the authorization passed by either House, the action by the conferees is within the scope of the conference because the bill language is not specific with regard to the total authorization.

The conference action would authorize NASA to begin production of the fifth Shuttle orbiter, the need for which has been supported repeatedly in testimony before the Subcommittee on Space, Science and Applications by both NASA and the Air Force. The conference restored $281 million of the Senate reduction in space flight operations for Space Shuttle operations costs related to launch of defense payloads. The conference action also provides for small but important augmentation in space science, applications, and space technology activities.

The most controversial issue in the conference involved a new section 5 in the Senate language which would have required the Secretary of Defense to transfer to the Administration of NASA such funds as necessary to cover the full costs of launching defense payloads into orbit. The committee of conference agreed to a substitute provision directing the Administrator of NASA to charge such prices as necessary to recover the fair value

of placing Department of Defense payload into orbit by the Space Shuttle.

The amount by which the conference action exceeds the NASA budget request is roughly equivalent to the additions made in the Shuttle/Centaur upper stage program and the aeronautical research and technology activities. On May 13, 1982, the House voted to increase the authorization for aeronautical research and technolgy activities by $35.1 million. The conference agreement would authorize an increase of $48 million for these activities. We also had a vote in the House on September 15 to sustain funding in the HUD/Independent Agencies Appropriation bill for the Shuttle/Centaur upper stage development activities.

I would also point out that wording relating to the conference action on the Shuttle/Centaur was inadvertedly omitted from the statement of managers. The statement of managers relating to the second point in disagreement—space flight operations—should read as follows:

The committee of conference authorizes $1,699,000,000 for the Space Flight Operations program including $77.4 million for Development, Test, and Mission Support/Engineering and Technical Base activities; $120 million for Shuttle/Centaur related activities; $5 million for Advance Shuttle Upper State studies; and $1,286.1 million for Space Transportation Systems Operations Activities. The amount for Space Transportation Systems Operations activities reflects a $128 million reduction in authorization of appropriation for Shuttle operations costs related to the launch of defense and national security payloads.

In other actions the conferees adopted minor modifications to NASA reprograming provisions; adopted Senate language to require the Director of the Federal Emergency Management Administration to reserve such funds as are appropriated for functions of FEMA pursuant to the Federal Fire Prevention and Control Act of 1974, including activities of the U.S. Fire Administration and the U.S. Fire Academy. The conferees also adopted title II of the House lanugage to authorize NOAA Landsat activities with the following modifications:

First, provided that the authority to plan and provide for management and operation of the civil land remote sensing satellite system would expire September 30, 1984;

Second, included 30 day notification provision in lieu of legislative veto provision; and

Third, required various studies and analyses be submitted to the Congress.

I am including in the RECORD a summary of the action taken by the committee of conference.

I want to acknowledge the efforts of the House conferees on both sides of the aisle in completing this conference.

I urge the support of my colleagues for this conference report.

SUMMARY OF ADJUSTMENTS TO H.R. 5890—NASA FISCAL YEAR 1983 AUTHORIZATION

	Budget request	House action	Senate action	Committee of conference
Research and Development:				
Space shuttle	$1,718,000,000	$1,706,500,000	$1,808,000,000	$1,798,000,000
Space flight operations	1,707,000,000	1,699,000,000	1,448,000,000	1,699,000,000
Expendable launch vehicles	42,800,000	42,800,000	42,800,000	42,800,000
Physics and astronomy	471,700,000	463,500,000	491,700,000	473,700,000
Planetary exploration	154,600,000	177,600,000	194,600,000	177,600,000
Life sciences	55,700,000	55,700,000	55,700,000	55,700,000
Space applications	316,300,000	330,300,000	336,300,000	336,300,000
Technology utilization	4,000,000	9,000,000	9,000,000	9,000,000
Aeronautical research and technology	232,000,000	267,100,000	296,000,000	280,000,000
Space research and technology	123,000,000	128,000,000	133,000,000	128,000,000
Tracking and data acquisition	508,900,000	498,900,000	508,900,000	503,900,000
Total	5,334,000,000	5,378,400,000	5,324,000,000	5,504,000,000
Construction of facilities	100,000,000	100,000,000	110,000,000	100,000,000
Research and program management	1,178,900,000	1,168,900,000	1,178,900,000	1,168,900,000
Grand total	6,612,900,000	6,647,300,000	6,612,900,000	6,772,900,000

□ 1950

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. FLIPPO. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, the gentleman from Alabama (Mr. DICKINSON) and I were appointed as conferees to the NASA authorization conference to join our colleagues from the Science and Technology Committee and the Intelligence Committee for consideration of section 5 of the Senate amendment to the House bill. Mr. DICKINSON and I were designated conferees so that the views of the Armed Services Committee would be represented at the conference table since section 5 would have required the Department of Defense to pay the full cost of all Space Shuttle launches carrying Department of Defense payloads.

While on the surface section 5 may have seemed reasonable, it in reality did not acknowledge the total contribution that the DOD has and continues to make to the Shuttle program. Over the next decade, under the existing cost sharing arrangement between NASA and the DOD, the DOD will pay roughly one-third of the total cost of the Space Shuttle program and will ride the Shuttle roughly one-third of the time. Now that sounds fair, does it not?

NASA and DOD jointly negotiated the current agreement which reflects DOD's unique position in the Shuttle program as assigned by the Congress and by previous administrations: that is, a partner with NASA in the development of the Shuttle, a partner with NASA in the operation of the Shuttle and a major user of the Shuttle. The existing policy divides the cost of a DOD Shuttle flight into two major areas: Hardware and manpower. DOD pays to NASA the cost of the hardware for each launch at rates equal to those paid by any other user. The cost of manpower is traded between NASA and DOD. NASA contributes the manpower at Kennedy and Johnson Space Center. DOD contributes the manpower at Vandenberg Air Force Base and the consolidated space operations center. In that way the manpower contribution that DOD makes to the national space transportation system is credited to the DOD.

The rising cost of Space Shuttle hardware had been recognized and is the subject of ongoing negotiations between NASA and DOD. NASA and DOD have already tentatively agreed to increase the hardware payment. That increase will require DOD to pay nearly $2 billion more over the next 5 years. Neither NASA nor DOD wish, however, to alter the manpower trade. Does "fair" require that Congress impose a solution different from the one desired by NASA and DOD? I do not think it should: But that is exactly what section 5 would have mandated.

Mr. Speaker, over the objections of Mr. DICKINSON and myself, the conferees agreed to accept a watered down version of section 5 that in essence requires the Administrator of NASA to charge the DOD the "fair value" of Shuttle launch services. Mr. DICKINSON and I objected to the inclusion of this provision because it is unnecessary and conveys the impression that DOD is not now paying its fair share of Shuttle costs. For these reasons,

Mr. DICKINSON and I chose not to sign the conference report.

In concluding, I would like to point out to the Members that a provision was included in the fiscal year 1983 DOD Authorization Act that addresses DOD's payment of Shuttle costs. Section 1106 of that act states:

Notwithstanding any other provision of law, during fiscal year 1983 the Secretary of Defense shall not transfer funds to the Administrator of the National Aeronautics and Space Administration to pay any part of the cost of placing Department of Defense payloads into orbit by means of the Space Shuttle except in accordance with laws in effect on July 1, 1982, and interagency agreements made pursuant to such laws.

In including this provision in the defense authorization bill, it was not the intent of the conferees to preclude a revision of existing DOD/NASA interagency ageements as they might relate to Space Shuttle pricing arrangements. However, it was the intent to insure that such pricing arrangements will be arrived at only in accordance with interagency agreements negotiated by the DOD and NASA.

In conclusion, Mr. Speaker, I do not intend to oppose the entire NASA conference report, but I want the record to clearly show that the Armed Services Committee does not support the inclusion of section 106.

Mr. WALKER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the conference report to S. 2604. The conference report represents an increase of $160 million over the administration request; however, this is also $34 million less than the amount that was appropriated on September 15.

Repeatedly throughout the NASA authorization hearings, and when the authorization bill was brought to the House floor, I opposed any funding over the administration request. I again opposed the appropriations' move to add $194 million to the NASA budget, for which $140 million was slated for the high energy, upper stage, Centaur.

Despite these reservations, I rise in support of the conference report because I feel that it is important for NASA to have an authorization bill for fiscal year 1983.

Mr. Speaker, I yield 3 minutes to the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I commend the gentleman from Florida (Mr. FUQUA), the gentleman from Alabama (Mr. FLIPPO), and the gentleman from Kansas, (Mr. WINN) for bringing this conference report to the House. They and the Science and Technology Committee have worked very hard and they have done a good job.

Mr. Speaker, I served on this conference committee representing the House Permanent Select Committee on Intelligence for consideration of section 5 of the Senate amendment which has resulted in section 106 of the conference report. The Senate amendment would have required the Secretary of Defense to transfer about $400 million in fiscal year 1983 to NASA as an increased payment for Shuttle launch services. The amendment was based on a concept of payment which would try to recover the full cost of all Shuttle services. The House objected to the amendment and agreed instead to direct the Administrator of NASA to charge the fair value for launch services.

Individual conferees held differing views of how much the Department of Defense should pay for Shuttle services Mr. STRATTON has explained. There were also differing views on what formula, or cost basis, should be applied for determining the launch price to DOD. The term "fair value" was ultimately agreed to and it was agreed further that this term does not relate to any specific dollar figure or to any particular formula. The gentleman from Alabama (Mr. FLIPPO) stated, "Fair value is a matter of negotiation and they will negotiate." He further likened "fair value" to a bargain struck "between a willing buyer and a seller." I agree with those views and I believe that the record of the conference is clear that those comments accurately represent the interpretation of the conferees as to the agreement which was reached on this issue.

Mr. Speaker, I also want to point out that the statement of managers, in explaining a related section of the bill, says:

The amount for "Space Flight Operation" activities reflects a $128 million reduction in authorization of appropriation or Shuttle operations costs related to the launch of defense and national security pay loads.

What should be made clear is that the $128 million shortfall in authorization is a result of a limitation of the scope of the conference and had to be related to reduction in funds for defense launches because that was an element of the Senate amendment. The statement should not be thought to be tied to the term "fair value" in section 106. NASA and DOD may negotiate a Shuttle launch price which is lower or which is higher.

Mr. Speaker, I urge adoption of this conference report.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Florida.

Mr. GIBBONS. I just wanted to point out that the failure of the Senate to act on tariff bills that are over in the Senate, noncontroversial tariff bills, is costing NASA in their current year $700,000.

Mr. WALKER. I thank the gentleman.

Mr. BOLAND. Mr. Speaker, I wish to associate myself with the remarks of the gentleman from Virginia (Mr. ROBINSON) and I compliment the committee on bringing this conference report to the House.

I too was a conferee regarding section 5 of the Senate amendment. I accept the agreement that was reached and would add one point of explanation. The gentleman from Virginia has pointed out that section 106 of the conference agreement does not imply any specific dollar figure or formula for determining the price of a Shuttle launch.

Further, I would close by noting that in my remarks on the HUD-independent agencies appropriations conference report, any reference by me to the figure of $128 million was not intended in any way to endorse the transfer of that particular figure from DOD to NASA.

Any agreement regarding Shuttle launch must be the subject of negotiations between those two agencies.

● Mr. HOLLENBECK. Mr. Speaker, I rise in support of the conference report of H.R. 5890. The conference report represents a fair solution to the differences between the House and Senate. Granted, the authorization for NASA is $160 million over the administration request; however, it is still within the scope of our conference and some $34 million less than the amount that the House overwhelmingly appropriated to the civilian space agency on September 15. The authorized funds will provide for the programs that will assure a strong civilian space program and supports important work in aeronautics, planetary exploration, a fifth Space Shuttle orbiter, and the 30/20 gigahertz advanced communications satellite.

I urge adoption of this conference report.●

Mr. WALKER. Mr. Speaker, I yield back the balance of my time.

Mr. FLIPPO. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appear to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 284, nays 83, not voting 65, as follows:

[Roll No. 390]

□ 2010

Messrs. STUMP, STENHOLM, MADIGAN, KINDNESS, and CHENEY changed their votes from "yea" to "nay."

Mr. CARMAN changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FLIPPO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 5890.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

ENVIRONMENTAL RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACT OF 1983

Mr. SCHEUER Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2577) to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1983, and for other purposes, with a Senate amendment to the House amendments, and concur in the Senate amendment to the House amendments.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendments, as follows:

In lieu of the matter proposed to be inserted by the House amendment to the text of the bill, insert:

SHORT TITLE

SEC. 1. This Act may be cited as the "Environmental Research, Development, and Demonstration Act of 1983."

GENERAL AUTHORIZATIONS

SEC. 2. (a) There are authorized to be appropriated to the Environmental Protection Agency for environmental research, development, and demonstration activities:

(1) $55,685,000 for fiscal year 1983 and $59,026,000 for fiscal year 1984 for activities authorized under the Clean Air Act:

(2) $40,790,000 for fiscal year 1983 and $43,237,000 for fiscal year 1984 for activities authorized under the Federal Water Pollution Act;

(3) $25,906,000 for fiscal year 1983 and $27,460,000 for fiscal year 1984 for activities authorized under the Safe Drinking Water Act;

(4) $31,579,000 for fiscal year 1983 and $33,474,000 for fiscal year 1984 for activities authorized under the Solid Waste Disposal Act;

(5) $6,469,000 for fiscal year 1983 and $6,857,000 for fiscal year 1984 for activities authorized under the Federal Insecticide, Fungicide, and Rodenticide Act;

(6) $1,586,000 for fiscal year 1983 and $1,681,000 for fiscal year 1984 for radiation activities authorized under section 301 of the Public Health Service Act;

(7) $13,770,000 for fiscal year 1983 and $14,602,000 for fiscal year 1984 for interdisciplinary activities;

(8) $28,149,000 for fiscal year 1983 and $29,838,000 for fiscal year 1984 for activities authorized under the Toxic Substances Control Act;

(9) $53,530,000 for fiscal year 1983 and $56,742,000 for fiscal year 1984 for energy activities which—

(A) $20,128,000 in fiscal year 1983 and $21,336,000 in fiscal year 1984 is for the Energy Control Technology Research Program;

(B) $6,889,000 in fiscal year 1983 and $7,302,000 in fiscal year 1984 is for the Energy Health Effects Research Program;

(C) $11,484,000 in fiscal year 1983 and $12,173,000 in fiscal year 1984 is for the Energy Ecological Effects Research Program;

(D) $3,000,000 in fiscal year 1983 and $3,180,000 in fiscal year 1984 is for the Energy Monitoring Research Program; and

(E) $12,029,000 in fiscal year 1983 and $12,751,000 in fiscal year 1984 is for the Acid Rain Research Program; and

(b) There are authorized to be appropriated to the Environmental Protection Agency, Office of Research and Development, $9,721,000 for fiscal year 1983, and

$10,304,000 for fiscal year 1984, for program management and support.

(c) When the Administration of the Environmental Protection Agency finds it in the public interest, the Administrator may utilize funds authorized in subsection (a) or (b) for the purpose of conducting appropriate scientific and professional reviews of research and development grant, contract, and cooperative agreement applications and to enter into cooperative agreements to conduct such reviews.

(d) Funds may be transferred between the categories listed in subsections (a) and (b) except that no funds may be transferred to any particular category listed in subsection (a) or (b) from any other category or categories listed in any such subsection if the total of the funds so transferred to that particular category would exceed 10 per centum thereof, unless—

(1) a period of thirty legislative days has passed after the Administrator of the Environmental Protection Agency or his designee has transmitted to the Speaker of the House of Representatives and to the President of the Senate a written report containing a full and complete statement concerning the nature of the transfer involved and the reason therefor; or

(2) each committee of the House of Representatives and the Senate having jurisdiction over the subject matter involved before the expiration of such period, has transmitted to the Administrator written notice to the effect that such committee has no objection to the proposed action.

(3) No funds authorized for appropriation pursuant to this Act may be used for any activities other than those authorized by this Act.

(e)(1) The Administrator shall establish a separately identified program of continuing, long-term environmental research and development for each activity listed in subsection (a) of this section. Unless otherwise specified by law, at least 20 per centum of the total funds appropriated to the Administrator for each activity listed in subsection (a) of this section shall be obligated and expended for such long-term environmental research and development under this subsection.

(2) The Administrator shall prepare an annual report on the performance of the program established under paragraph (1) of this subsection and shall submit the report to appropriate legislative and appropriation committees of the Senate and House of Representatives at the time the President's budget is submitted to Congress. The report shall include—

(A) a list of funded long-term research projects in each activity listed in subsection (a),

(B) the nature, status, and major results of funded long-term research projects,

(C) how the results of funded long-term research projects are likely to be used and what steps are being taken to foster their use, and

(D) any other pertinent information on the performance of the program established under this subsection.

(f) Appropriations made pursuant to the authority provided in section 2 of this Act shall remain available for obligation and expenditure, or for obligation and expenditure, for such period or periods as may be specified in Acts making such appropriations.

(g) At least thirty days prior to issuing any general notice of major reduction in force in any fiscal year, the Administrator shall inform the appropriate legislative and appropriation committees of the Senate and House of Representatives in writing of the reasons for the reduction and the impact of the reduction on carrying out the provisions of this Act.

ENVIRONMENTAL MONITORING

SEC. 3. (a) Of the funds authorized to be appropriated to the Administrator of the Environmental Protection Agency for environmental research and development under section 2, $43,253,000 for fiscal year 1983 for $46,030,000 for fiscal year 1984 are authorized for environmental monitoring activities which are authorized under the Federal environmental statutes and which support development of a continuing national environmental monitoring program. The Administrator, in consultation and cooperation with the heads of the National Bureau of Standards, the United States Geological Survey, the National Institutes of Health, the National Oceanic and Atmospheric Administration, and other Federal and State agencies involved in environmental monitoring activities, shall take such actions on a continuing basis as may be necessary and appropriate to ensure that the national environmental monitoring program called for in this subsection is comprehensive and national in scope and will allow effective and efficient implementation of the Federal environmental statutes, valid assessments of environmental quality in all media, and accurate determination of the impact of environmental protection programs on environmental quality.

(b) The Administrator shall proceed with the development of the national environmental monitoring program called for in subsection (a) by first developing a national monitoring program for air quality, the features of which shall be applied, where appropriate and useful, to monitoring programs for other media. The Administrator shall prepare, in consultation and cooperation with the heads of appropriate Federal and State agencies involved in environmental monitoring activities, a plan for the design and implementation of the monitoring program called for in this subsection. The plan shall—

(1) include a statement of objectives for the program which conform with and are supportive of the goals of such a program as set forth in subsection (a), steps to achieve these objectives, measures of program performance, program participants and their responsibilities and activities in support of the program, and any other pertinent information which may be necessary for successful implementation and appropriate evaluation of the program;

(2) be reviewed by the National Academy of Sciences, with the results of the review being included in the plan along with the Administrator's response to this review; and

(3) be submitted to the appropriate legislative committees of the Senate and House of Representatives one year after the enactment of this Act, and thereafter biannually, following review and update of the plan by program participants, the National Academy of Sciences, and the Environmental Protection Agency.

(c) On the last day of fiscal year 1984, the Administrator shall issue a report on the state of air quality and the factors affecting air quality based on data gathered through the monitoring program established under this section. The report shall be updated and reissued on the last day of each subsequent fiscal year.

(d) The Administrator shall take such actions on a continuing basis as may be necessary or appropriate—

(1) to promote the development and use of accurate and reliable procedures for gathering environmental data of verifiable accuracy; and

(2) to ensure that any environmental datum which is included in the data base of the environmental monitoring programs established pursuant to subsections (a) and (b) has been subjected to validated quality assurances procedures.

ENERGY RESEARCH

SEC. 4. (a) Appropriations authorized for energy research under section 2(a)(9) shall be used for environmental research associated with (1) synthetic fuels production; (2) the extraction, processing, transportation, and combustion of coal, oil, natural gas, and other fossil fuels; and (3) other energy development activities and their related problems, including indoor air pollution, that may pose a threat to public health and environmental quality.

(b) In complying with subsection (a) the Administrator is directed—

(1) to establish and thereafter maintain a long-term health and ecological effects research program on energy-related pollutants whose aim shall be to identify those pollutants most harmful to public helath and environmental quality and to elucidate, for those pollutants found most harmful, the relationship between exposure and health effects;

(2) to take whatever steps are necessary and appropriate to ensure that the research program called for in paragraph (1) is effectiviely coordinated with related research programs of the National Institutes of Health, the Department of Energy, the Department of Commerce, and other Federal agencies involved in such research;

(3) to establish and thereafter maintain a monitoring program on energy-related pollutants which conforms with the requirements set forth in section 3;

(4) to include in the report on air quality required under section 3(c) a section reporting the emission and dispersion of energy-related air pollutants based on the data gathered from the monitoring program established under paragraph (3).

(c) The Administrator shall continue to be responsible for conducting, and shall continue to conduct, development and demonstration of energy-related pollution control technologies as necessary to fulfill the requirements of the Clean Air Act, the Federal Water Pollution Control Act, and other pertinent pollution control statutes.

(d) Energy-related environmental research projects authorized to be administered by the Environmental Protection Agency under this Act shall not be transferred administratively to any other Federal or State agency or reduced through budget amendment.

RESEARCH PROGRAM CONCERNING INDOOR AIR QUALITY

SEC. 5 (a) The Congress finds, on the basis of reports prepared by the General Accounting Office and the National Academy of Sciences, that due to the absence of a statutory mandate for a single Federal agency to undertake and coordinate research, development, and demonstration efforts concerning indoor air pollution—

(1) Federal programs in this field are fragmented and underfunded; and

(2) an adequate information base concerning potential indoor air quality problems is

not being developed by the Federal Government.

(b) The Administrator shall carry out a research program under this section with respect to indoor air quality. Such program shall be designed to (1) gather data and information on all aspects of indoor air quality in order to contribute to the understanding of health problems associated with the existence of air pollutants in the indoor environment, and (2) coordinate Federal, State, local and private research, development, and demonstration efforts relating to the improvement of indoor air quality.

(c) The Administrator may establish such committees, comprised of individuals representing Federal agencies concerned with various aspects of indoor air quality, and such advisory groups, comprised of individuals representing the scientific community, industry, and public interest organizations, as may be necessary to assist the administrator in carrying out the research program required by this section. The Administrator shall also consult and coordinate with state and local officials and other interested parties having concerns related to the program carried out under this section.

(d) The research program required under this section shall include, but not be limited to—

(1) research, development, and demonstration concerning the identification, characterization, and monitoring of indoor air pollution sources and levels (including research, development, and demonstration relating to (A) the measurement of various pollutant concentrations and their strengths and sources, (B) high-risk building types, and (C) instruments for indoor air quality data collection);

(2) research relating to the effects of indoor air pollution on human health;

(3) research, development, and demonstration relating to control technologies to prevent or abate indoor air pollution (including the development, evaluation, and testing of individual and generic control devices and systems); and

(4) the dissemination of information to assure the public availability of the findings of the Administrator pursuant to the research, development, and demonstration activities under this section.

(d)(1) Not later than one year after the date of the enactment of this Act, the Administrator shall submit to the Congress a plan for the implementation of the research program required under this section.

(2) Not later than thirty-six months after such date of enactment, the Administrator shall submit a progress report, including an assessment of future research needs.

(3) Not later than fifty-four months after such data of enactment, the Administrator shall submit to the Congress a final report setting forth the results of the program, assessing the state of knowledge concerning the risk to human health associated with indoor air pollution, assessing the need for further research, and making such recommendations as may be appropriate.

(4) The progress report and the final report submitted under this subsection shall be submitted to the National Academy of Sciences within a reasonable period before the dates required for submittal to the Congress and, when submitted to Congress, such reports shall contain any comments provided by the National Academy of Sciences.

(e) Nothing in this section shall be construed to authorize the Administrator to carry out any regulatory program or any activity other than research, development, and demonstration and the related reporting, information dissemination, and activities specified in this section. Nothing in this section shall be construed to limit the authority of the Administrator or if any other agency or instrumentality of the United States under any other authority of law.

(f) Of the funds appropriated pursuant to the authorization contained in section 2(a)(9) of this Act for each of the fiscal years 1983 and 1984, the sum of $4,000,000 is authorized to be appropriated to carry out this section.

SENIOR ENVIRONMENTAL ASSISTANCE PROGRAM

SEC. 6. (a) To carry out the purposes of this Act, the Administrator of the Environmental Assistance Program is directed to develop a Senior Environmental Assistance Program designed to assist Federal, State, and local environmental agencies in carrying out programs authorized under this Act.

(b) In providing assistance under subsection (a), the Administrator shall utilize, to the fullest extent possible, existing older American employment programs as provided for in Sec. 105(b)(4) of Public Law 95-478.

(c) The Administrator shall not make any grant to, or enter into any agreement with, any State or local environmental agency for funding of any activity under this section unless such agency certifies that such activity will supplement and not supplant any existing jobs.

SEC. 7. Of the funds appropriated from the Hazardous Substance Response Trust Fund for fiscal year 1983 and fiscal year 1984, $15,000,000 may be expended for research and development activities for each fiscal year. It is the sense of the Congress that the costs of those research and development activities associated with or necessitated by the actual or threatened release of hazardous substances, as those terms are defined under Public Law 96-510, be paid for out of that fund created by Public Law 96-510, the Comprehensive Environmental Response Compensation and Liability Act of 1980.

SCIENCE ADVISORY BOARD

SEC. 8. (a) Section 8(b) of the Environmental Research, Development, and Demonstration Authorization Act of 1978 (Public Law 95-155) is amended to read as follows:

"(b)(1) The Board shall be comprised of at least nine members appointed by the Administrator from nominees recommended to the Administrator by a nominating committee. The nominating committee shall include representatives of Federal research agencies including but not limited to the National Institute of Occupational Safety and Health, National Institute of Environmental Health Sciences, National Cancer Institute, National Science Foundation and the National Academy of Sciences and the Executive Director and representative members and former members of the Science Advisory Board. The nominating committee shall be chaired, in consultation with the Administrator, by the National Institute of Environmental Health Sciences. The nominating committee shall solicit from the general public, through notice in the Federal Register, candidates for nomination to the Board. The Administrator may require such information from the nominees to the Board as the Administrator deems necessary, and the Administrator shall publish in the Federal Register the name, address and professional affiliation of each nominee.

"(2) Each member of the Board and nominee to the Board shall be qualified by education, training, and experience to evaluate scientific and technical information on matters referred to the Board under this section. The Administrator shall select persons nominated for the Board to ensure that Board membership is fairly balanced in terms of the points of view represented and the functions to be performed by the Board. In order to provide this balance, the Board membership must represent the States, industry, labor, academia, consumers, and the general public; and the nominating committee established under paragraph (1) shall make certain that this requirement is met when selecting nominees to the Board which in turn are recommended to the Administrator for selection as members of the Board.

"(3) The terms of the members of the Board shall be one to three years, and shall be staggered so that the terms of no more than one-third of the total membership of the Board and its committees shall expire within a single fiscal year. Each member of the Board shall serve the full length of that member's term unless that member is unable, for involuntary reasons, to discharge his or her duties as set forth in this section or has violated the regulations promulgated pursuant to paragrapth (5).

"(4) If a vacancy on the Board is not filled by the Administrator within ninety days of the occurence of that vacancy, the nominating committee established under paragraph (1) shall meet and appoint, within sixty days, a member of the Board to fill that vacancy from the list of nominees recommended to the Administrator under paragraph (1) in accordance with the selection criteria set forth in paragraph (2).

"(5) In order to ensure the objectivity of the Board, the Administrator shall promulgate, within one hundred and twenty days after the date of the enactment of this paragraph, regulations regarding conflicts of interest with respect to the members of the Board.".

(b) Section 8(e)(2) of such Act (Public Law 95-155) is amended by adding at the end thereof the following: "The Board's advice and comments and the response of the Administrator shall be included in the record with respect to any proposed rule and published in the Federal Register in accordance with the requirements of the environmental statutes and the authority of the Administrator.".

(c) The provisions of this section relating to the qualifications, appointments, and terms of members of the Board shall take effect upon the expiration of the terms of members serving on the Board as of the date of enactment of this Act.

Mr. SCHEUER (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to the House amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. CARNEY. Mr. Speaker, reserving the right to object, I do so only for the purpose of requesting that the chairman of the subcommittee explain the intent of the Senate amendment and how this differs from H.R. 6323, which was passed by this body on August 17 of this year.

Mr. SCHEUER. Mr. Speaker, will the gentleman yield?

Mr. CARNEY. I yield to the gentleman from New York.

Mr. SCHEUER. Mr. Speaker, on August 17, the House considered the EPA research authorization bill, H.R. 6323, and passed it by an overwhelming margin of 314 to 94. At that time, the Senate counterpart bill, S. 2577, was amended by substituting the House-passed bill. The Senate responded on September 29 with a Senate amendment to the House amendments to S. 2577. The motion I have offered would concur in the Senate amendment and clear this legislation for the President's signature.

With respect to the substance of the Senate amendment, I want to inform my colleagues that it represents a compromise negotiated with the Senate that is most favorable to us. This amendment is such that most of the provisions and intent of the House-passed bill are retained. These provisions include the House-passed authorization of $267.2 million for fiscal year 1983 and $283.3 million for fiscal year 1984 for EPA research activities. Excluded from this authorization is new funding for Superfund; that is, hazardous waste research. We accept the Senate position that these activities can appropriately be supported with money out of the trust fund established under Superfund legislation.

In addition, the House-passed provisions pertaining to environmental monitoring, energy research, indoor air quality research, senior citizen assistance, and the EPA Science Advisory Board are retained with slight technical modifications. Other House passed provisions, however, would be more substantially changed by the Senate amendment. These changes, which I believe are acceptable, would relax the restrictiveness of language related to the transfer of funds, reduction-in-force actions, and long-term environmental research.

Overall, the Senate amendment is most compatible with the House position on this legislation. It is a responsible amendment which is widely supported and I urge its adoption.

I want to express my deep appreciation to the distinguished chairman of the committee, DON FUQUA, and the ranking member of the committee, LARRY WINN, and subcommittee, BILL CARNEY, for their support and efforts on this legislation.

□ 2020

Mr. CARNEY. Mr. Speaker, I thank my colleague the gentleman from New York.

Having no objection to the explanation of the subcommittee chairman or to the Senate amendment, Mr. Speaker, I withdraw my reservation of objection and join the chairman of the Committee on Science and Technology, as well as the subcommittee chairman, in supporting the adoption of the Senate amendment to the House amendment to the Senate bill, S. 2577.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from New York?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SCHEUER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

CONFERENCE REPORT ON H.R. 4717, MISCELLANEOUS REVENUE ACT OF 1982

Mr. ROSTENKOWSKI submitted the following conference report and statement on the bill (H.R. 4717) to delay for 1 year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases:

CONFERENCE REPORT (H. REPT. No. 97-929)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the amendment of the Senate to the bill (H.R. 4717) to delay for one year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its desagreement to the amendment of the House to the amendment of the Senate and agree to the same with amendments as follows:

In lieu of the matter proposed to be inserted by the House amendment to the Senate amendment, insert the following:

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE

(a) SHORT TITLE.—This Act may be cited as the "Miscellaneous Revenue Act of 1982".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I—TAX PROVISIONS

SEC. 101. REDUCTION OF LIFO RECAPTURE AMOUNT WITH RESPECT TO CERTAIN PLANS OF LIQUIDATION ADOPTED DURING 1982.

Subsection (b) of section 403 of the Crude Oil Windfall Profit Tax Act of 1980 (relating to effective date for recognition of gain on certain dispositions of LIFO inventories) is amended by adding at the end thereof the following new paragraph:

"(4) PLANS OF LIQUIDATION ADOPTED DURING 1982.—

"(A) IN GENERAL.—If—

"(i) a corporation adopts a plan of liquidation during 1982, and

"(ii) such liquidation is completed before January 1, 1984,

then the LIFO recapture amount taken into account with respect to such liquidation under the amendments made by paragraphs (1) and (2) shall be reduced (but not below zero) by $1,000,000.

"(B) MORE THAN 1 PLAN OF LIQUIDATION.—If a corporation (or group of corporations treated as 1 corporation under subparagraph (C)) has more than 1 liquidation which qualified under subparagraph (A), the dollar amount under such subparagraph shall apply to all such liquidations in the order in which the distributions, sales, and exchanges occur until such dollar amount is used up.

"(C) APPLICATION TO MEMBERS OF CONTROLLED GROUP.—

"(i) IN GENERAL.—For purposes of this paragraph, all corporations which are component members of the same controlled group of corporations at any time after December 31, 1981, and before January 1, 1984, shall be treated as 1 corporation.

"(ii) CORPORATIONS MEMBERS OF MORE THAN 1 GROUP.—For purposes of this subparagraph, if (but for this clause) a corporation would be a component member of more than 1 controlled group of corporations during the period described in clause (i)—

"(I) if such corporation is a component member of a controlled group on October 1, 1982, such corporation shall be treated only as a component member of such group, or

"(II) if subclause (I) does not apply, such corporation shall be treated as a component member of only the first such controlled group.

"(iii) CONTROLLED GROUP OF CORPORATIONS DEFINED.—For purposes of this subparagraph, the term 'controlled group of corporations' has the meaning given such term by section 1563(a) of the Internal Revenue Code of 1954, except that—

"(I) 'more than 50 percent' shall be substituted for 'at least 80 percent' each place it appears in section 1563(a)(1) of such Code, and

"(II) the determination shall be made without regard to subsections (a)(4), (b), and (e)(3)(C) of section 1563 of such Code.

"(D) TREATMENT OF DEEMED LIQUIDATIONS UNDER SECTION 338.—If an election under section 338 of the Internal Revenue Code of 1954 is made during 1982 with respect to any qualified stock purchase (within the meaning of such section 338), the requirements of clauses (i) and (ii) of subparagraph (A) shall be treated as met with respect to the target corporation for purposes of applying section 338 of such Code. For purposes of this paragraph, an election to which subparagraph (A) applies by reason of this subparagraph shall be treated as a sale and a liquidation."

SEC. 102. ADJUSTMENTS TO NET OPERATING LOSS CARRYBACK AND CARRYFORWARD RULES FOR FEDERAL NATIONAL MORTGAGE ASSOCIATION.

(a) 10-YEAR CARRYBACK AND 5-YEAR CARRYFORWARD FOR LOSSES OTHER THAN MORTGAGE DISPOSITION LOSSES.—Paragraph (1) of section 172(b) (relating to net operating loss carrybacks and carryovers) is amended by redesignating subparagraphs (H) and (I) as subparagraphs (I) and (J), respectively, and by inserting after subparagraph (G) the following new subparagraph:

"(H) In the case of a net operating loss of the Federal National Mortgage Association for any taxable year beginning after December 31, 1981—

"(i) such loss, to the extent it exceeds the FNMA mortgage disposition loss (within the meaning of subsection (i)), shall be—

"(I) a net operating loss carryback to each of the 10 taxable years preceding the taxable year of the loss, and

"(II) a net operating loss carryover to each of the 5 taxable years following the taxable year of the loss, and

"(ii) the FNMA mortgage disposition loss shall be—

"(I) a net operating loss carryback to each of the 3 taxable years preceding the taxable year of the loss, and

"(II) a net operating loss carryover to each of the 15 taxable years following the taxable year of the loss."

(b) RULES RELATING TO FNMA MORTGAGE DISPOSITION LOSS.—Section 172 is amended by redesignating subsections (i) and (j) as subsections (j) and (k), respectively, and by inserting after subsection (h) the following new subsection:

"(i) RULES RELATING TO FNMA MORTGAGE DISPOSITION LOSS.—

"(1) FNMA MORTGAGE DISPOSITION LOSS DEFINED.—

"(A) IN GENERAL.—For purposes of subsection (b)(1)(H) and this subsection, the term 'FNMA mortgage disposition loss' means for any taxable year the excess (if any) of—

"(i) the losses for such year from the sale or exchange of mortgages, securities, and other evidences of indebtedness, over

"(ii) the gains for such year from the sale or exchange of such assets.

"(B) FNMA MORTGAGE DISPOSITION LOSS CANNOT EXCEED THE NET OPERATING LOSS FOR THE YEAR.—The amount of the FNMA mortgage disposition loss for any taxable year shall not be greater than the net operating loss for such year.

"(C) FORECLOSURE TRANSACTIONS NOT INCLUDED.—In applying subparagraph (A), any gain or loss which is attributable to a mortgage foreclosure shall not be taken into account.

"(2) COORDINATION WITH SUBSECTION (b)(2).—In applying paragraph (2) of Subsection (b), a FNMA mortgage disposition loss shall be treated in a manner similar to the manner in which a foreign expropriation loss is treated."

(c) CONFORMING AMENDMENTS.—

(1) Subparagraph (A) of section 172(b)(1) is amended by striking out "(H), and (I)" and inserting in lieu thereof "(H), (I), and (J)".

(2) Subparagraph (B) of section 172(b)(1) is amended by striking out "and (I)" in the second sentence and inserting in lieu thereof "(H), and (J)".

(3) Subparagraph (i) of section 172(b)(1), as redesignated by subsection (a), is amended by striking out "subsection (i)" and inserting in lieu thereof "subsection (j)".

(4) Paragraph (3) of section 172(j), as redesignated by subsection (b), is amended by striking out "subsection (b)(1)(H)" each place it appears and inserting in lieu thereof "subsection (b)(1)(I)".

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to net operating losses for taxable years beginning after December 31, 1981.

SEC. 103. ROLLOVER OF GAIN ON CERTAIN SALES UNDER FCC ORDER WHERE NEWSPAPERS ARE BOUGHT.

If—

(1) a corporation was ordered by the Federal Communications Commission in January 1975 to divest itself of its newspaper operations or its broadcasting operations,

(2) after the conclusion of the appellate process, the order was again issued in October 1979,

(3) the corporation sold its broadcasting operations before 1982, and

(4) on October 15, 1981, the corporation acquired 100 percent of the stock of a publishing company,

then the second sentence of section 1071(a) of the Internal Revenue Code of 1954 shall be applied with respect to sales and exchanges by such corporation before January 1, 1982, which are related to such order as if such second sentence treated stock of any corporation the principal business of which is operating newspapers and related printing operations in the same manner as stock of a corporation operating a radio broadcasting station.

SEC. 104. TREATMENT OF CERTAIN SHALE OIL PROPERTY AS ENERGY PROPERTY.

(a) IN GENERAL.—Paragraph (7) of section 48(l) is amended by striking out "but does not" and all that follows and inserting in lieu thereof "; except that such term does not include equipment for hydrogenation, refining, or other process subsequent to retorting other than hydrogenation or other process which is applied in the vicinity of the property from which the shale was extracted and which is applied to bring the shale oil to a grade and quality suitable for transportation to and processing in a refinery."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to periods beginning after December 31, 1980, and before January 1, 1983, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1954.

SEC. 105. ANNUITIES FOR SURVIVORS OF TAX COURT JUDGES.

(a) COMPUTATION OF ANNUITIES.—Subsection (m) of section 7448 (relating to computation of annuities) is amended—

(1) by striking out "5 consecutive years" and inserting in lieu thereof "3 consecutive years", and

(2) by striking out "37½" and inserting in lieu thereof "40".

(b) COST-OF-LIVING ADJUSTMENTS.—Section 7448 (relating to annuities to surviving spouses and dependent children of judges) is amended by redesignating subsection (s) as subsection (t), and by inserting after subsection (r) the following new subsection:

"(s) INCREASES ATTRIBUTABLE TO INCREASED PAY.—Whenever the salary of a judge under section 7443(c) is increased, each annuity payable from the survivors annuity fund which is based, in whole or in part, upon a deceased judge having rendered some portion of his or her final 18 months of service as a judge of the Tax Court, shall also be increased. The amount of the increase in such an annuity shall be determined by multiplying the amount of the annuity, on the date on which the increase in salary becomes effective, by 3 percent for each full 5 percent by which such salary has been increased.

(c) CATCHUP FOR SURVIVORS ANNUITIES IN PAY STATUS ON DATE OF ENACTMENT.—If an annuity payable under section 7448(h) of the Internal Revenue Code of 1954 (relating to entitlement to annuity) to the surviving spouse of a judge of the United States Tax Court is being paid on the date of the enactment of this Act, then the amount of that annuity shall be adjusted, as of the first day of the first month beginning more than 30 days after such date, to reflect the amount of the annuity which would have been payable if the amendment made by subsection (a) applied with respect to increases in the salary of a judge under section 7443(c) of such Code taking effect after December 31, 1963.

(d) EFFECTIVE DATE.—

(1) SUBSECTION (a).—The amendment made by subsection (a) shall apply to annuities payable with respect to judges dying after the date of the enactment of this Act.

(2) SUBSECTION (b).—The amendment made by subsection (b) of this section shall apply with respect to increases in the salary of judges of the United States Tax Court taking effect after the date of the enactment of this Act.

SEC. 106. TAX COURT PROCEDURES.

(a) DISPUTES INVOLVING CERTAIN EXCISE TAXES.—

(1) IN GENERAL.—Subsection (a) of section 7463 (relating to disputes involving $5,000 or less) is amended—

(A) by striking out "or" at the end of paragraph (2),

(B) by adding "or" at the end of paragraph (3), and

(C) by inserting after paragraph (3) the following new paragraph:

"(4) $5,000 for any 1 taxable period (or, if there is no taxable period, taxable event) in the case of any tax imposed by subtitle D which is described in section 6212(a) (relating to a notice of deficiency),".

(2) EFFECTIVE DATE.—The amendment made by this subsection shall apply with respect to petitions filed after the date of the enactment of this Act.

(b) ORAL FINDINGS OF FACT OR OPINIONS.—Subsection (b) of section 7459 (relating to inclusion of findings of fact or opinions in report) is amended by adding at the end thereof the following new sentence: "Subject to such conditions as the Tax Court may by rule provide, the requirements of this subsection and of section 7460 are met if findings of fact or opinion are stated orally and recorded in the transcript of the proceedings."

(c) HEARINGS AND OPINIONS BY COMMISSIONERS IN CASES INVOLVING DEFICIENCIES OF $5,000 OR LESS.—

(1) Section 7456 (relating to administration of oaths and procurement of testimony) is amended by redesignating subsection (d) as subsection (e) and by inserting after subsection (c) the following new subsection:

"(d) PROCEEDINGS WHICH MAY BE ASSIGNED TO COMMISSIONERS.—The chief judge may assign—

"(1) any declaratory judgment proceeding,

"(2) any proceeding under section 7463, and

"(3) any other proceeding where neither the amount of the deficiency placed in dispute (within the meaning of section 7463) nor the amount of any claimed overpayment exceeds $5,000,

to be heard by the commissioners of the court, and the court may authorize a commissioner to make the decision of the court with respect to any such proceeding, subject

to such conditions and review as the court may by rule provide."

(2) Subsection (c) of section 7456 is amended by striking out the last sentence.

(d) DESIGNATION OF JUDGES WHO ARE RECEIVING RETIRED PAY.—Subsection (b) of section 7447 (relating to retirement) is amended by adding at the end thereof the following sentence: "Any judge who retires shall be designated 'senior judge'."

SEC. 107. WITHOLDING STATEMENTS FOR TERMINATED EMPLOYEES.

(a) IN GENERAL.—Subsection (a) of section 6051 (relating to receipts for employees) is amended by striking out "on the day on which the last payment of remuneration is made" and inserting in lieu thereof "within 30 days after the date of receipt of a written request from the employee if such 30-day period ends before January 31".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to employees whose employment is terminated after the date of the enactment of this Act.

SEC. 108. WITHHOLDING OF STATE INCOME TAX FROM THE WAGES OF CERTAIN SEAMEN.

Section 12 of the Act of March 4, 1915 (38 Stat. 1169; 46 U.S.C. 601), is amended by inserting before the period at the end of the second proviso the following: ", but nothing in this section shall prohibit any such withholding of the wages of any seaman who is employed in the coastwise trade between ports in the same State if such withholding is pursuant to a voluntary agreement between such seaman and his employer".

SEC. 109. WAGERING PERMITTED UNDER STATE LAW.

(a) TAX ON WAGERS.—Subsection (a) of section 4401 (relating to wagers) is amended to read as follows:

(a) WAGERS.—

"(1) STATE AUTHORIZED WAGERS.—There shall be imposed on any wager authorized under the law of the State in which accepted an excise tax equal to 0.25 percent of the amount of such wager.

"(2) UNAUTHORIZED WAGERS.—There shall be imposed on any wager not described in paragraph (1) an excise tax equal to 2 percent of the amount of such wager."

(b) OCCUPATIONAL TAX.—Section 4411 (relating to imposition of tax) is amended to read as follows:

"SEC. 4411. IMPOSITION OF TAX.

"(a) IN GENERAL.—There shall be imposed a special tax of $500 per year to be paid by each person who is liable for the tax imposed under section 4401 or who is engaged in receiving wagers for or on behalf of any person so liable.

"(b) AUTHORIZED PERSONS.—Subsection (a) shall be applied by substituting '$50' for '$500' in the case of—

"(1) any person whose liability for tax under section 4401 is determined only under paragraph (1) of section 4401(a), and

"(2) any person who is engaged in receiving wagers only for or on behalf of persons described in paragraph (1)."

(c) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendment made by subsection (a) shall take effect on January 1, 1983.

(2) SUBSECTION (b).—The amendment made by subsection (b) shall take effect on July 1, 1983.

TITLE II—OTHER PROVISIONS

SEC. 201. UNEMPLOYMENT BENEFITS PAID TO EX-SERVICE MEMBERS.

(a) ELIGIBILITY REQUIREMENTS.—Paragraph (1) of section 8521(a) of title 5, United States Code, is amended to read as follows:

"(1) 'Federal service' means active service (not including active duty in a reserve status unless for a continuous period of 180 days or more) in the armed forces or the Commissioned Corps of the National Oceanic and Atmospheric Administration if with respect to that service—

"(A) the individual was discharged or released under honorable conditions (and, if an officer, did not resign for the good of the service); and

"(B)(i) the individual was discharged or released after completing his first full term of active service which the individual initially agreed to serve, or

"(ii) the individual was discharged or released before completing such term of active service—

"(I) for the convenience of the Government under an early release program,

"(II) because of medical disqualification, pregnancy, parenthood, or any service-incurred injury or disability,

"(III) because of hardship, or

"(IV) because of personality disorders or inaptitude but only if the service was continuous for 365 days or more;"

(b) PERIOD FOR WHICH BENEFITS PAYABLE.—Section 8521 of such title 5 is amended by adding at the end thereof the following new subsection:

"(c)(1) An individual shall not be entitled to compensation under this subchapter for any week before the fifth week beginning after the week in which the individual was discharged or released.

"(2) The aggregate amount of compensation payable on the basis of Federal service (as defined in subsection (a)) to any individual with respect to any benefit year shall not exceed 13 times the individual's weekly benefit amount for total unemployment."

"(d) EFFECTIVE DATE.—

"(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply with respect to terminations of service on or after July 1, 1981, but only for purposes of determining eligibility for benefits for weeks of unemployment beginning after the date of the enactment of this Act.

"(2) TRANSITIONAL RULE.—The amendments made by this section shall not apply to the extent that such amendments would (but for this paragraph) reduce the amount of compensation payable in the case of benefit years established before the date of the enactment of this Act.

SEC. 202. COMPENSATION PAID TO EX-SERVICE MEMBERS CHARGED TO DEPARTMENT OF DEFENSE.

(a) GENERAL RULE.—

(1) Subsections (b) and (c)(1) of section 8509 of title 5, United States Code, are each amended by striking out "subchapter" each place it appears and inserting in lieu thereof "chapter".

(2) Section 8509 of such title 5 is amended by adding at the end thereof the following new subsection:

"(h) For purposes of this section, the term 'Federal service' includes Federal service as defined in section 8521(a)."

(b) EFFECTIVE DATE.

(1) IN GENERAL.—The amendments made by subsection (a) shall take effect on October 1, 1983.

(2) TREATMENT OF PREVIOUSLY APPROPRIATED FUNDS.—All funds appropriated which are available (on October 1, 1983) for the making of payments to States under chapter 85 of title 5, United States Code, on the basis of Federal service (as defined in section 8521(a) of such title 5) or for the making of payments under such chapter on the basis of such service in States which do not have in effect an agreement under such chapter, shall be transferred on such date to the Federal Employees Compensation Account established by section 909 of the Social Security Act. On and after such date, all payments described in the preceding sentence shall be made from such account as provided by section 8509 of such title 5.

SEC. 203. EXCLUSION OF CERTAIN SERVICES FROM THE FEDERAL UNEMPLOYMENT TAX ACT.

Subsection (b) of section 822 of the Economic Recovery Tax Act of 1981 is amended by striking out "during 1981" and inserting in lieu thereof "after December 31, 1980, and before January 1, 1983".

SEC. 204. ELIGIBILITY REQUIREMENTS FOR TRADE ADJUSTMENT ASSISTANCE.

Section 2514(a)(2)(A) of the Omnibus Budget Reconciliation Act of 1981 (95 Stat. 889) (relating to the effective date of amendments relating to group eligibility requirements for adjustment assistance for workers under the Trade Act of 1974) is amended by striking out "the 180th day after the date of the enactment of this Act" and inserting in lieu thereof "October 1, 1983".

And the House agree to the same.

Amend the title so as to read: "An Act to reduce the amount of LIFO recapture in the case of certain plans of liquidation adopted during 1982, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and for other purposes."

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

I. EXPLANATION OF PROVISIONS

A. Tax Provisions

1. ONE-YEAR POSTPONEMENT OF EFFECTIVE DATE FOR LIFO RESERVE RECAPTURE RULE (SEC. 102 OF THE HOUSE BILL, SEC. 101 OF THE SENATE AMENDMENT, AND SECS. 336(B) AND 337(F) OF THE CODE)

Present law

Under provisions enacted in P.L. 96-223 (Crude Oil Windfall Profit Tax Act of 1980), a corporation which distributes its LIFO inventory to its shareholders as part of a partial or complete liquidation generally must "recapture" (recognize as ordinary income) an amount equal to its LIFO reserve (Code sec. 336). (The LIFO reserve is the difference between the cost of inventory valued by the LIFO method and the cost of inventory valued by the FIFO method.) Also, a corporation which sells its LIFO inventory in the course of a 12-month liquidation must recapture an amount equal to its LIFO reserve (sec. 337(f)). These rules apply to distributions and dispositions made pursuant to plans of liquidation adopted after December 31, 1981.

House bill

The House bill postpones for one year the effective date of the LIFO reserve recapture rule as enacted in P.L. 96-223. Thus, the new LIFO reserve recapture rule will apply only to distributions and dispositions made pursuant to plans of liquidation adopted after December 31, 1982.

Senate amendment

Same as House bill.

Conference agreement

The conference agreement follows the House bill and Senate amendment with the following modifications. The LIFO reserve recapture rule will apply, with respect to a corporation, to distributions and dispositions made pursuant to plans of liquidation adopted after December 31, 1981, and before January 1, 1983, only to the extent that the LIFO reserve to be recaptured by that corporation is greater than $1 million, (i.e., the amount of the recapture otherwise required would be reduced by up to $1 million). However, in order to qualify for this exemption, the liquidation pursuant to the plan must be completed before January 1, 1984. For this purpose, the rules applicable under sections 333 and 337 shall apply in determining when a liquidation is completed. If a corporation has more than one qualifying sale or liquidation, then the $1 million shall apply to the sales or liquidations in the order in which the distributions, sales or exchanges occur until the $1 million is used up.

For purposes of the $1 million exemption of LIFO recapture, all corporations which are members of a controlled group any time in 1982 will be treated as one corporation. For this purpose, a controlled group of corporations is determined under section 1563 except that "more than 50 percent" is substituted for "at least 80 percent." Where, under this rule, a corporation is a member of more than one controlled group in 1982, the corporation will be treated as a member of the controlled group of which it was a member on October 1, 1982, or, if it was not a member of a controlled group on October 1, 1982, then it will be treated as a member of the first controlled group of which it was a member in 1982.

Where an election is made under section 338 in 1982, the conference agreement provides a rule which automatically qualifies the election for the $1 million LIFO exemption. Under this rule, the section 338 election is treated as the adoption of a plan of liquidation in 1982, followed by a sale of its assets during 1982 in a transaction to which section 337 applies, and then followed by a complete liquidation in 1982.

2. MODIFICATION OF NET OPERATING LOSS RULE FOR THE FEDERAL NATIONAL MORTGAGE ASSOCIATION (SEC. 103 OF THE HOUSE BILL, SEC. 102 OF THE SENATE AMENDMENT, AND SEC. 172 OF THE CODE)

Present law

Under provisions enacted in the Economic Recovery Tax Act of 1981, taxpayers may carry back a business net operating loss (NOL) against income for the 3 taxable years preceding the loss year and carry forward any remaining unused losses to the 15 years following the loss year (Code sec. 172(b)).

In an exception to this general carryover rule, present law provides a 10-year carryback and a 5-year carryforward for NOL's of banks and certain other financial institutions. Since the Federal National Mortgage Association (FNMA) is not such a financial institution, it is not eligible for the 10-year carryback treatment, and thus must use a 3-year carryback and a 15-year carryforward.

House bill

The House bill provides a 10-year carryback and 5-year carryforward of the NOL of the FNMA to the extent the amount of the NOL exceeds the FNMA mortgage disposition loss.

The FNMA mortgage disposition loss is the net loss from the sale or exchange of mortgages, securities (not including stock), and other evidences of indebtedness to the extent that such net loss is not greater than the NOL for the taxable year. Gains and losses attributable to mortgage foreclosures will not be taken into account in determining the amount of an FNMA disposition loss. The FNMA mortgage disposition loss will continue to have a 3-year carryback and a 15-year carryforward, as under present law.

The provision is effective for NOL's incurred in taxable years of the FNMA beginning after 1981. Thus, for example, an NOL for its taxable year beginning in 1982 in excess of the FNMA mortgage disposition loss could be carried back as far as its taxable year beginning in 1972.

Senate amendment

Same as House bill.

Conference agreement

The conference agreement is the same as the House bill and the Senate amendment.

3. AWARD OF REASONABLE LITIGATION COSTS WHERE TAXPAYER PREVAILS AND GOVERNMENT POSITION WAS UNREASONABLE (SEC. 104 OF THE HOUSE BILL, SEC. 301 OF THE SENATE AMENDMENT, AND SEC. 6673 AND NEW SEC. 7430 OF THE CODE)

Present law

Award of Litigation Costs

Under the Equal Access to Justice Act (P.L. 96-481), a taxpayer who prevails in civil tax litigation in the Federal courts (other than the U.S. Tax Court) may be awarded reasonable attorney fees and other litigation costs, unless the court finds that the position of the United States was substantially justified or that special circumstances make an award unjust.

Damages for Delay in Tax Court

Under present law, if a Tax Court proceeding has been instituted by the taxpayer merely for delay, the Court may award damages to the United States in an amount not to exceed $500 (Code sec. 6673).

House bill

1. General rule.—A taxpayer who prevails in civil tax litigation in the Federal courts, including the U.S. Tax Court, may be awarded reasonable attorney fees and other ligitation costs.

2. Dollar limitation on award.—$50,000 (no special rule for multiple actions which involve the same taxpayer or which could be joined).

3. Prerequisite for recovery.—The taxpayer may recover litigation costs only if the position of the United States in the case was unreasonable.

4. Special rule for charities.—In litigation where the deductibility of contributions by a taxpayer to a charitable organization is the most significant issue, the organization (as well as the taxpayer) may recover costs incurred by it in the litigation if the taxpayer prevails, even though the charity is not a party to the action.

5. Effective date.—The House litigation costs provision applies to U.S. Tax Court cases begun after 1982, and to other Federal tax cases pending on, or begun after, October 1, 1981.

6. Termination date.—The House litigation costs provision will not apply to cases begun after September 30, 1984.

7. Damages for delay in Tax Court.—If U.S. Tax Court proceedings have been brought by a taxpayer primarily for delay, or if the taxpayer's positon in a case is frivolous or groundless, the Court may award damages to the United States of up to $5,000, effective for Tax Court cases begun after 1981.

Senate amendment

1. General rule.—Same as House bill.

2. Dollar limitation on award.—$25,000 (special rule for multiple actions which involve the same taxpayer or which could be joined).

3. Prerequisite for recovery.—Same as House bill, except that the Senate amendment provides explicitly that the taxpayer has the burden of establishing that the government's position was unreasonable.

4. Special rule for charities.—None (but under the Senate amendment, a taxpayer could recover costs incurred by a third party on behalf of the taxpayer).

5. Effective date.—The Senate litigation cost provision applies to civil tax litigation, including U.S. Tax Court cases, begun after May 31, 1982.

6. Termination date.—The Senate litigation cost provision will not apply to cases begun after May 31, 1987.

7. Damages for delay in Tax Court.—Same as House bill, except that the maximum damages awardable to the United States are $2,500 and that the provision is effective for Tax Court cases begun after May 31, 1982.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

4. MODIFICATION OF RULES AS TO ACCELERATION OF ACCRUAL OF TAXES (SEC. 105 OF THE HOUSE BILL AND SEC. 461(d) OF THE CODE)

Present law

Under the accrual method of accounting, an expense generally is deductible for the taxable year in which all the events which determine the fact of the liability have occurred and the amount of the deduction can be determined with reasonable accuracy.

However, present law also provides that, if a taxing jurisdiction changes the date for imposing a deductible tax so that the tax would be deductible in an earlier period under the general rule, an accrual-basis taxpayer may not deduct the tax in the earlier period. Instead, the taxpayer may deduct the tax in the period that the tax otherwise would have been deductible as if the taxing jurisdiction had not accelerated the date for imposing the tax (Code sec. 461(d)).

House bill

Under the House bill, an accrual-basis taxpayer may accrue a deduction for taxes on the liability date of the tax, even if that date has been accelerated by the taxing jurisdiction. The taxpayer is not allowed to take two deductions for taxes for a taxable year in which the liability date is changed, and must account for the disallowed deduction by establishing a suspense account.

The provision applies to changes in tax liability dates that occur after the date of enactment. However, in the case of a State franchise tax based on income the assessment date of which has been changed, a

taxpayer which first accrued such tax after the date of the change and which has consistently accrued the deduction for the tax on the new liability date could continue to accrue the deduction on the date used, without complying with the suspense account requirements under the provision.

Senate amendment

No provision.

Conference agreement

The conference agreement does not include the House provision.

5. TREATMENT OF CERTAIN LENDING OR FINANCE BUSINESSES FOR PURPOSES OF THE TAX ON PERSONAL HOLDING COMPANIES (SEC. 106 OF THE HOUSE BILL, SEC. 103 OF THE SENATE AMENDMENT, AND SEC. 542 OF THE CODE)

Present law

Certain types of corporations, actively engaged in a trade or business which produces income that usually would be considered passive investment income, are excluded from the personal holding company tax provisions (Code sec. 541). Present law excludes from this tax a corporation actively engaged in a lending or finance business if the corporation has qualifying business expense equal to 15 percent of the first $500,000 of ordinary gross income from its lending or finance business, plus 5 percent of such ordinary gross income from $500,000 to $1 million. The term "lending or finance business" is defined to include the business of making loans with maturities of not more than 60 months.

House bill

Effective for taxable years beginning after 1980, the House bill increase the 60-month loan maturity limitation of present law to 144 months and amends the definition of a lending or finance business qualifying for the tax exclusion to include the business of making loans in indefinite maturity credit transactions.

Effective for taxable years beginning after 1981, the House bill also modifies the business expense test of present law, to require a lending or finance company qualifying for the tax exclusion to have qualifying business expenses equal to 15 percent of the first $500,000 of ordinary gross income from the lending or finance business, plus 5 percent of such ordinary gross income in excess of $500,000. Thus, 5 percent of ordinary gross income in excess of $1 million will be added to the qualifying business expense test of present law.

Senate amendment

Same as House bill.

Conference agreement

The provision was deleted from this bill because it was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

6. ADDITIONAL REFUNDS RELATING TO REPEAL OF THE EXCISE TAX ON BUSES (SEC. 107 OF THE HOUSE BILL, SEC. 401 OF THE SENATE AMENDMENT, AND SEC. 231(C)(2) OF THE ENERGY TAX ACT OF 1978)

Present law

P.L. 95-618 (the Energy Tax Act of 1978) repealed the prior 10-percent manufacturers excise tax on the sale of buses, effective for buses sold after November 9, 1978. The Act also allowed a credit for or refund of the excise tax paid on buses sold after April 19, 1977 and before November 10, 1978, if the manufacturer (1) possessed evidence of sale and reimbursement of tax to the ultimate purchaser; (2) filed a claim for credit or refund with the Treasury Department before September 5, 1979; and (3) reimbursed the ultimate purchaser for the tax paid before September 5, 1979.

House bill

The House bill modifies the requirements for obtaining credits for or refunds of excise taxes paid on buses sold after April 19, 1977 and before November 10, 1978.

Under the bill, the date before which the ultimate purchaser must have been reimbursed is extended from September 5, 1979, to January 1, 1983. Also, the bill relaxes the present law requirement that the manufacturer must possess evidence of reimbursement of the tax to the ultimate purchaser. Under the bill, the manufacturer may make reimbursement at the same time it receives the refund, provided that the plan is satisfactory to the Treasury.

The provision is effective on the date of enactment.

Senate amendment

Same as House bill.

Conference agreement

The provision was deleted from this bill because it was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

7. ALLOWANCE OF REGULATED INVESTMENT COMPANY STATUS TO CERTAIN SMALL BUSINESS DEVELOPMENT COMPANIES (SEC. 104 OF THE SENATE AMENDMENT AND SEC. 851(a) OF THE CODE)

Present law

Under present law, a regulated investment company (commonly called a "mutual fund" or "money market fund") is treated, in essence, as a conduit for tax purposes. This treatment is achieved by allowing a regulated investment company a deduction for dividends paid to its shareholders. To qualify as a regulated investment company under the Code, a company that is an investment company under the Investment Company Act of 1940 must be registered under that Act with the Securities and Exchange Commission (Code sec. 851(a)).

Under the Small Business Incentive Act of 1980 (P.L. 96-477), certain investment companies providing capital and management assistance to small businesses (called "business development companies") may elect an alternative form of regulation in lieu of registration under the Investment Company Act. A business development company which elects this alternative form of regulation is precluded from qualifying as a regulated investment company under the Code, because the company did not register with the SEC under the Investment Company Act.

House bill

No provision.

Senate amendment

A business development company will qualify as a regulated investment company for tax purposes if it could qualify for registration under the Investment Company Act of 1940, but elects to be regulated under the Small Business Incentive Act of 1980. The provision applies to taxable years ending after the date of enactment.

Conference agreement

The conference agreement does not include the Senate amendment.

8. ROLLOVER OF GAIN ON FCC-ORDERED DISPOSITION OF BROADCAST PROPERTY (SEC. 105 OF THE SENATE AMENDMENT AND SEC. 1071 OF THE CODE)

Present law

Under present law, gain realized on the sale or exchange of property (including stock in a corporation) is not recognized if the sale or exchange is certified by the Federal Communications Commission (FCC) as necessary or appropriate to effectuate a change in policy or adoption of a new policy with respect to the ownership and control of a radio or television station or newspaper and the taxpayer elects to treat the sale or exchange as an involuntary conversion or to reduce basis in depreciable assets.

If the taxpayer elects involuntary conversion treatment, gain is not recognized to the extent the taxpayer purchases replacement property that is similar or related in service or use to the property sold or exchanged (sec. 1033). For purposes of this provision, however, stock in a corporation operating a radio broadcasting station, whether or not such stock represents control, is treated as property similar or related in service or use to the property sold or exchanged even if it would not be so classified under section 1033.

The Internal Revenue Service has ruled (in a private letter ruling) that nonrecognition treatment is not available under this provision when a corporation, in an FCC-certified sale or exchange, divests itself of a television station and reinvests in stock of a corporation operating a newspaper. The Service concluded that reinvestment in a newspaper company did not constitute an investment either in property similar or related in service or use to the television station sold or exchanged, or investment in the stock of a radio broadcasting station.

House bill

No provision.

Senate amendment

The Senate amendment amends section 1071 to provide nonrecognition of gain in FCC-certified divestures where the taxpayer reinvest in stock of a corporation operating a newspaper after June 24, 1981.

Conference agreement

The conference agreement provides for a non-Code provision of law which fixes the right to nonrecognition treatment on the reinvestment in the stock of a newspaper corporation after the FCC-certified sale of broadcast properties. Four criteria must be met, however. First, the corporation must have been ordered by the Federal Communications Commission in January 1975 to divest itself of its newspaper operations or its broadcasting operations. Second, the corporation must have gone to court, and after the conclusion of the appellate process, the FCC order must have been reissued in October 1979. Three, the corporation must have sold its broadcasting operations before 1982. Four, on October 15, 1981, the corporation must have acquired 100 percent of the stock of a publishing company. If all four criteria are met, then the second sentence of section 1071(a) of the Internal Revenue Code of 1954 will be applied as if such second sentence treated stock of any corporation, whether or not representing control of such corporation, the principal business of which is operating newspaper and related printing operations (such as an advertising circular business) in the same manner as stock of a corporation operating a radio broadcasting station, where the FCC-certified sale or ex-

change occurs before January 1, 1982. Thus, for example, if a radio or televison broadcasting corporation makes one or more FCC-certified sales or exchanges of radio broadcasting property (including stock in a corporation) in 1981 and made at least one qualified reinvestment on October 15, 1981, then all such 1981 sales or exchanges will be treated as involuntary conversions (subject to the 2 year reinvestment rule) under section 1033 at the taxpayer's election.

9. EXCLUSION OF CERTAIN RESEARCH EXPENSES FROM CAPITAL EXPENDITURE LIMITATION FOR SMALL ISSUE INDUSTRIAL DEVELOPMENT BONDS (SEC. 106 OF THE SENATE AMENDMENT AND SEC. 103(b)(6) OF THE CODE)

Present law

Interest on certain "small issue" industrial development bonds is exempt from Federal income tax if the aggregate amount of outstanding exempt small issues and capital expenditures (financed otherwise than out of the proceeds of an exempt small issue) made over a six-year period does not exceed $10 million (Code sec. 103(b)(6)).

Under present law, research or experimental expenditures incurred in connection with a taxpayer's trade or business are taken into account for purposes of determining if the small issue limitation of $10 million is exceeded, whether or not the taxpayer elects (under Code sec. 174(a)) to deduct currently such research expenses.

House bill

No provision.

Senate amendment

Under the Senate amendment, expenditures for research wages or for research supplies (as defined in secs. 44F(b)(2)(A)(i) or (ii)) which the taxpayer elects to deduct currently (under sec. 174(a)) are not taken into account for purposes of the $10 million capital expenditure limitation on tax-exempt small issue industrial development bonds. The provision applies to research wage and supply expenditures made after the date of enactment.

Conference agreement

The provision was deleted from this bill because it was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

10. EXPANSION OF OIL SHALE TAX CREDITS FOR 1981 AND 1982 (SEC. 107 OF THE SENATE AMENDMENT AND SEC. 48(l) OF THE CODE)

Present law

The Energy Tax Act of 1978 provided a 10-percent energy investment tax credit for "shale oil equipment", defined for this purpose to mean equipment for producing or extracting oil from oil-bearing shale rock (Code sec. 48(l)(7)). Under present law, the statute expressly excludes equipment for hydrogenation, refining, or other processes subsequent to retorting from the definition of qualifying shale oil equipment.

House bill

No provision.

Senate amendment

The Senate amendment expands the definition of shale oil equipment for purposes of the energy investment tax credit to include equipment used in hydrogenation or other similar processes subsequent to retorting that are necessary to bring about the chemical change in the hydrocarbons necessary to make the shale oil less viscous and to remove contaminants such as sulphur and arsenic so that it may be transported to the refinery. The amendment does not expand the definition of shale oil equipment to include equipment, including hydrogenation equipment, used to refine shale oil.

The provision applies to periods beginning after December 31, 1980, and before January 1, 1983.

Under present law, the energy investment credit for shale oil equipment generally is available after 1982 and before 1991 if specified affirmative commitments are undertaken with respect to qualified property that involves long-term projects of two years or more. This special affirmative commitment rule under present law does not apply to hydrogenation equipment made eligible as oil shale property under the amendment. Thus, the credit for hydrogenation equipment under the Senate amendment will not apply to any construction or acquisition after December 31, 1982.

Conference agreement

The conference agreement follows the Senate amendment with technical modifications. As modified, the provision refers to equipment rather than property. This change is necessary to maintain consistency with present law. In addition, the agreement clarifies that only equipment for processes located within the vicinity of the property from which the shale was extracted (i.e., within 50 miles) qualifies for the credit, provided that such processes are applied to bring the shale oil to a grade and quality suitable for transportation to and processing in a refinery.

11. MODIFICATION OF RESIDENTIAL ENERGY TAX CREDIT SUBSIDIZED FINANCING RULES (SEC. 108 OF THE SENATE AMENDMENT AND SEC. 44C(C)(10) OF THE CODE)

Present law

Under present law (Code sec. 44C(c)(10), expenditures financed by Federal, State, or local grants which are exempt from Federal income tax are not eligible for the residential energy tax credit for conservation and renewable energy source expenditures. Further, any portion of qualified expenditures financed by subsidized energy financing is not eligible for the credit. Also, the expenditure limits for energy conservation expenditures $2,000) and for renewable energy source expenditures ($10,000) are reduced by any portion of expenditures which is financed by subsidized energy financing or by nontaxable government grants.

Subsidized energy financing means financing provided under a government program if a principal purpose of the program is to provide subsidized financing for projects designed to conserve or produce energy. The term includes the direct or indirect use of bonds which are exempt from Federal income tax and which provide funds under such a program. Subsidized energy financing, however, does not include loan guarantees.

House bill

No provision.

Senate amendment

The Senate amendment provides an exception to the definition of subsidized energy financing applicable to the residential energy credit. Specifically, subsidized energy financing will not include loans under a program which provides a State tax credit to a financial institution in order to provide residential energy loans to individuals at a below-market rate of interest. Thus, an individual who receives financing made after December 31, 1980 under such a loan program will be eligible for any applicable Federal residential energy tax credit.

Conference agreement

The conference agreement does not include the Senate amendment.

12. DEFERRED COMPENSATION PLANS FOR STATE JUDGES (SEC. 109 OF THE SENATE BILL AND SEC. 457(e) OF THE CODE)

Present law

Compensation deferred by an employee under an unfunded eligible State deferred compensation plan generally is excluded from the employee's income until paid or made available to the employee under the plan. However, if an unfunded deferred compensation plan fails to meet the requirements of an eligible plan, then all compensation deferred under the plan is includible in income currently unless the amounts deferred are subject to a substantial risk of forfeiture, or is includible in the first taxable year in which there is no substantial risk of forfeiture.

House bill

No provision.

Senate amendment

Participants in an unfunded qualified State Judicial plan will not be subject to the rule requiring participants in an ineligible plan to include plan benefits in gross income merely because there is no substantial risk that the benefits will be forfeited.

A State's unfunded retirement plan for the exclusive benefit of its elected or appointed judges or their beneficiaries will be a qualified State judicial plan if (1) the plan has been in existence since December 31, 1978; (2) all judges eligible to benefit are required to participate and to contribute the same fixed percentage of compensation; and (3) a judge's retirement benefit under the plan is a percentage of the compensation of judges of the State holding similar positions.

In addition, the plan may not pay benefits with respect to a participant which exceed the limitations on benefits permitted under tax-qualified plans, and may not provide an option to plan participants as to contributions or benefits the exercise of which would affect the amount of the participant's currently includible compensation. Further, the plan will not be qualified if judges participating in the plan are also eligible to participate, on the basis of their judicial service, in any eligible State or local government deferred compensation plan.

The provision applies to taxable years beginning after 1978.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

13. DECLARATORY JUDGMENT FOR CURRENT USE VALUATION (SEC. 201 OF THE SENATE AMENDMENT AND NEW SEC. 7479 OF THE CODE)

Present law

If certain requirements are met, family farms and real property used in other closely held businesses may be valued for estate tax purposes at the property's current use value, rather than at its full fair market value, provided that the gross estate may not be reduced by more than a specified amount (Code sec. 2032A). If, within 10 years of the decedent's death, the property is disposed of to non-family members or ceases to be used for such purposes, estate tax benefits obtained by virtue of the reduced valuation are recaptured by means of a special "additional estate tax" imposed on

the qualified heir. A special lien is imposed on the real property for the amount of the additional estate tax (sec. 6324B).

To compute the amount of the reduction in estate tax value from current use valuation and, thus, the maximum amount of the potential "additional estate tax," both the current use value and the fair market value of the qualified property must be established as of the date of death. Since the issue of the fair market value of specially valued property may not affect any presently assessable amount of tax if it is the only unresolved issue in an estate, there is no opportunity for judicial review of the issue under present law unless the entire use valuation election is disallowed.

House bill

No provision.

Senate amendment

In general, the Senate amendment provides for Tax Court review of Treasury Department determinations of the fair market value of specially valued property. The amendment permits an executor to request the Treasury Department to examine the fair market value of the specially valued property and, thereby, finally determine that value for all purposes. The amendment further provides that the Treasury can initiate such examinations without the executor's request.

If the Treasury Department determines the fair market value of the specially valued property is different from that value as reported by the executor (either pursuant to an examination requested by the executor or an examination initiated by the Treasury), a notice of the Treasury's determination is to be sent to the executor by registered or certified mail. If the executor and the Treasury agree on the fair market value after the notice is sent, that value is binding on all parties in future actions. If the executor does not agree with the Treasury Department's determination, the executor has 90 days from the date on which notice of the Treasury's determination is sent to petition the Tax Court to review the fair market value of the property. A decision of the Tax Court is binding on all parties in future actions in which the fair market value of the specially valued property on the date of the decedent's death is at issue. The decision of the Tax Court is reviewable in the same manner as other decisions of that court. In cases where the examination is requested by the executor and the executor fails to petition the Tax Court within the 90-day period, the value as determined by the Treasury Department is binding on all parties in any further action where that value is an issue.

Because the fair market value of the specially valued property determines the maximum amount of the recapture tax for which a qualified heir is personally liable, the heir is granted a right to intervene in any action before the Tax Court brought by an executor.

In cases where the executor does not request the Treasury Department to examine the fair market value of specially valued property, if (1) the Treasury does not determine that the fair market value of the property is different from that value as reported by the executor on the decedent's estate tax return, within the period of limitations for assessment of estate tax, or (2) the executor fails to agree to the value as determined by the Treasury Department or to petition the Tax Court within the time provided, the value as reported by the executor is not binding on the executor, the qualified heirs, or the Treasury Department in any future actions involving any matters arising under the use valuation provision, the special lien under section 6324B, or with respect to the qualified heir's income tax basis in the specially valued property.

If, however, the executor requests a Treasury Department examination of the fair market value of specially valued property and the Treasury fails to make that examination, that value as shown on the decedent's estate tax return is binding on all parties in any future actions in which it is an issue.

The amendment is effective for estates of decedents dying after December 31, 1981.

Conference agreement

The conference agreement does not include the Senate amendment.

14. DECLARATORY JUDGMENT FOR INSTALLMENT PAYMENT OF ESTATE TAXES (SEC. 202 OF THE SENATE AMENDMENT AND NEW SEC. 7480 OF THE CODE)

Present law

If the value of an interest in a closely held business exceeds 35 percent of the adjusted gross estate, estate taxes attributable to the interest may be deferred for up to 14 years (annual interest payments for four years, followed by up to 10 annual installments of principal and interest) (Code sec. 6166). If certain events occur during the extended payment period, payment of the entire unpaid tax (plus accrued interest) is accelerated. A special four-percent interest rate applies to deferred tax on the first $1 million of value of an interest in a closely held business (sec. 6601(j)).

An administrative determination that interests in an estate do not meet the conditions for installment payment of estate tax, or that payment of remaining installments must be accelerated under certain rules, is not subject to judicial review under present law because no tax deficiency is involved in such determination.

House bill

No provision.

Senate amendment

The Senate amendment establishes a procedure for obtaining a declaratory judgment in the U.S. Tax Court with respect to (1) the extent to which an estate is eligible for extended payment of estate taxes attributable to an interest in a closely held business, and (2) whether there is an acceleration of the extended payments. Under this provision, for example, the Tax Court can determine whether a proprietorship, partnership, or corporation, all or part of the value of which is included in the decedent's estate, is carrying on a trade or business within the meaning of the installment payment provision.

Because this declaratory judgment procedure only applies where there is an actual controversy, no declaratory judgment will be available prior to decedent's death (with respect to eligibility for the installment payment provision) or prior to a transaction involving dispositions or withdrawals of an interest in a closely held business (with respect to whether there is an acceleration). Jurisidction to issue a declaratory judgment is limited to the United States Tax Court, and the determination of that court is final and conclusive and is not reviewable by any other court.

This remedy is available only if the petitioner (i.e., the executor of the decedent's estate) has exhausted all available administrative remedies within the Treasury Department. Thus, the executor must demonstrate that the Internal Revenue Service has acted adversely to the decedent's estate, that he has appealed any adverse determination by a district office to the appeals division of the Internal Revenue Service, and has obtained through the District Director technical advice of the National Office. To exhaust his administrative remedies, a party must satisfy all procedural requirements of the Service.

In addition, no petition to the Tax Court may be filed after 90 days from the date on which the Secretary or his delegate sends notice to the executor of his determination as to the estate's eligibility for the installment payment provision or the occurrence of an accelerating event.

In the case of controversies concerning an estate's eligibility for installment payment of estate tax, the amendment applies to estates of decedents dying after December 31, 1981. In the case of controversies concerning acceleration of unpaid tax, the amendment applies to transactions occurring after December 31, 1981 as they relate to section 6166 as amended by ERTA, sections 6166 or 6166A as they existed before ERTA, or section 6166 as it existed prior to the Tax Reform Act of 1976.

Conference agreement

The conference agreement does not include the Senate amendment.

15. CHANGE TO SECTION 6166 "SECOND DEATH" PROVISION (SEC. 203 OF THE SENATE AMENDMENT AND SEC. 6166 OF THE CODE)

Present law

If the value of an interest in a closely held business exceeds 35 percent of the adjusted gross estate, estate taxes attributable to the interest may be deferred for up to 14 years (annual interest payments for four years, followed by up to 10 annual installments of principal and interest) (Code sec. 6166). A special four-percent interest rate applies to deferred tax on the first $1 million of value of an interest in a closely held business (sec. 6601(j)).

The remaining unpaid tax balance is accelerated if there is a disposition of a specified fraction of the value of a decedent's interest in the business. The transfer of the decedent's interest in a closely held business from the estate to the decedent's heirs is not considered a disposition, whether or not the interest passes to family members.

For transfers made after 1981, the Economic Recovery Tax Act of 1981 provides that the transfer of an interest in a closely held business from an heir (or subsequent transferee) at the heir's (or subsequent transferee's) death to a family member of the heir (or subsequent transferee) is not considered a disposition.

House bill

No provision.

Senate amendment

The Senate amendment further expands the exception from the acceleration rules for subsequent transfers caused by the death of an heir or subsequent transferee, by eliminating the requirements that the interest in a closely held business must pass to a family member of the heir or subsequent transferee. Under the amendment, any transfer of an interest in a closely held business caused by the death of the heir (or subsequent transferee) is not considered a disposition resulting in acceleration of the unpaid tax.

The provision applies to transfers occurring after 1981.

Conference agreement

The conference agreement does not include the Senate amendment.

16. ANNUITIES FOR SURVIVORS OF TAX COURT JUDGES (SEC. 302 OF THE SENATE AMENDMENT AND SEC. 7448 OF THE CODE)

Present law

Under the survivors annuity plan for U.S. Tax Court judges (Code sec. 7448), the annuity payable to a surviving spouse is equal to a percentage (generally 1¼ percent) of the average annual salary (whether judge's salary or compensation for other allowable Federal service) for the five consecutive years for which the judge received the largest average annual salary, multipled by the sum of the judge's years of judicial or other allowable Federal service. However, under present law, the annuity for the surviving spouse cannot exceed 37½ percent of such average annual salary. The amount of annuity payable to a surviving dependent is based on the amount payable to a surviving spouse, subject to certain dollar limits.

House bill

No provision.

Senate amendment

The annuity amount payable from the Tax Court survivors annuity fund with respect to a judge dying after the date of enactment generally will be increased by (1) basing such amount upon the judge's average annual salary for the three (rather than five) consecutive years for which the judge received the largest average annual salary, and (2) increasing the maximum annuity for a surviving spouse to 40 percent (rather than 37½ percent) of the judge's average annual salary.

Subject to certain limitations, such annuity amount will also be adjusted for cost-of-living increases by increasing the amount of the annuity when the salary of Tax Court judges is increased. A survivor annuity payable with respect to a judge who rendered some portion of his or her final 18 months of service as a Tax Court judge will be increased by three percent for each five percent by which the salary of the judges is increased. (A salary increase of less than five percent is disregarded in computing increases for current and future annuities.) These cost-of-living adjustment provisions will apply with respect to salary increases taking effect after the date of enactment, except that a survivor annuity in pay status on the date of enactment will be immediately increased to reflect post-1963 salary increases.

Conference agreement

The conference agreement follows the Senate amendment.

17. MODIFICATION OF CERTAIN TAX COURT PROCEDURAL RULES (SEC. 303 OF THE SENATE AMENDMENT AND SECS. 7447, 7456, 7459, AND 7463 OF THE CODE)

Present law

The chief judge of the U.S. Tax Court may assign "small tax cases" (i.e. certain cases in which the deficiency is not more than $5,000) and certain declaratory judgment actions to commissioners (special trial judges) for hearing and decision (Code sec. 7456(c)). Special procedural rules to apply to small tax cases (sec. 7463).

The findings of fact and opinion in a Tax Court case must be reported by the judge in writing (sec. 7459).

House bill

No provision.

Senate amendment

The Senate amendment provides that commissioners (special trial judges) may also hear and decide regular cases (i.e. cases that are not small tax cases) if the deficiency is not more than $5,000. In addition, subject to the $5,000 limitation, the category of small tax cases is expanded to individual retirement accounts, (2) the excise taxes relating to public charities, private foundations, qualified pension, etc. plans, and real estate investment trusts, and (3) the crude oil windfall profit tax.

The amendment also provides that a Tax Court judge may in appropriate cases orally state and record in the transcript of the proceedings, the findings of fact or opinion in the case.

Under the amendment, a retired judge of the Tax Court will be designed as a senior judge.

The provision which allows cases involving certain excise taxes to be treated as small tax cases in effective with respect to Tax Court cases begun after the date of enactment. The other provisions are effective on enactment.

Conference ageement

The conference agreement generally follows the Senate amendment, except that the chief judge of the Tax Court may assign any declaration judgement action under the Internal Revenue Code to a special trial judge for hearing and decision. In addition, the conferees intend that, if findings of fact or opinion are orally stated and are recorded in the transcript of the proceedings, then those pages of the transcript which record the findings (or a written summary of the findings) will be provided to the parties free of any otherwise applicable charges. Also, the transcript of the proceedings (or the written summary) provided to the parties is to include all findings of fact or opinion, not merely the Court's final determination in favor of the taxpayer or the Commissioner.

18. TIME FOR FURNISHING FORM W-2 TO TERMINATED EMPLOYEE (SEC. 304 OF THE SENATE AMENDMENT AND SEC. 6051 OF THE CODE)

Present law

Present law generally requires an employer to provide an employee with a Form W-2 no later than January 31 of the year following the year in which wages are paid. However, in the case of an employee whose employment terminates during the year, Code section 6051(a) provides that a Form W-2 must be supplied to the employee with the final payment of wages. (Treasury Regulations generally have taken the position that the employer may furnish a Form W-2 to an employee whose employment terminates prior to the close of the calendar year at any time after the termination but not later than January 31 of the following year, except where the employee requests earlier receipt.)

House bill

No provision.

Senate amendment

The Senate amendment requires the employer of an employee whose employment terminates during the year to furnish the employee with a Form W-2 no later than January 31 of the following year, unless the employee requests earlier receipt. If the employee makes a written request for early receipt, then the employer must furnish the Form W-2 no later than 30 days after receipt of the request.

The provision applies to employees whose employment terminates after the date of enactment.

Conference agreement

The conference agreement follows the Senate amendment.

19. WITHHOLDING OF STATE INCOME TAX FROM SEAMEN'S WAGES ON A VOLUNTARY BASIS (SEC. 305 OF THE SENATE AMENDMENT AND SEC. 601 OF 46 U.S.C.)

Present law

Present law requires employers to withhold Federal employment taxes from wages paid to employees. Also, employers generally are permitted (and may be required by State law) to withhold State income taxes from wages paid to employees. However, withholding of State income taxes from the wages of seamen or fishermen is prohibited by Federal law (46 U.S.C. sec. 601).

House bill

No provision.

Senate amendment

The Senate amendment provides that a seaman or fisherman employed in the coastwise trade between ports in the same State may enter into a voluntary agreement with employers for withholding from wages of amounts as State income taxes. The provision is effective on enactment.

Conference agreement

The conference agreement follows the Senate amendment.

20. FINANCING OF THE REFORESTATION TRUST FUND (SEC. 403 OF THE SENATE AMENDMENT AND SEC. 303(b)(1) OF PUBLIC LAW 96-451)

Present law

Receipts from lumber and plywood import duties are appropriated to the Reforestation Trust Fund to supplement appropriations for reforestation and timber stock improvement on publicly owned national forests. The Secretary of the Treasury is required to transfer receipts from these tariffs to the Reforestation Trust Fund in amounts up to $30 million for each fiscal year during the six-year period from October 1, 1979 through September 30, 1985.

For each of fiscal years 1981 through 1985, appropriations have been authorized from the trust fund, but only to the extent these estimated costs exceed amounts appropriated out of the general fund for these purposes.

House bill

No provision.

Senate amendment

Instead of transferring $30 million to the trust fund from lumber and plywood tariff receipts, the Secretary of the Treasury will be required to transfer the same amount from 65 percent of the amounts received from sales of trees or forest products located on National Forest System lands. Existing commitments for uses of these funds will not be affected. The provision takes effect January 1, 1982.

Conference agreement

The conference agreement does not include the Senate amendment.

21. DUE DATE FOR ENERGY TASK FORCE STUDY ON OIL SUPPLY DISRUPTION (SEC. 405 OF THE SENATE AMENDMENT)

Present law

An interagency task force is understood to be studying the threat of a petroleum supply disruption on the Nation's economy and ways of limiting the effects of any such

disruption. There is no provision in current law, however, which would require this task force to submit a report on its study to the Congress at any particular date.

House bill

No provision.

Senate amendment

The Senate amendment directs the Secretary of the Treasury to submit to the Congress by June 15, 1982, the report of the interagency task force evaluating the alternative fiscal policies which could be used to help mitigate the adverse economic effects of an oil supply disruption. The provision is effective on the date of enactment.

Conference agreement

The conference agreement does not include the Senate amendment.

22. DELAY OF BANKRUPTCY TAX ACT EFFECTIVE DATE RELATING TO DISCHARGE OF INDEBTEDNESS (SEC. 406 OF THE SENATE AMENDMENT AND SEC. 7(a)(2) OF THE BANKRUPTCY TAX ACT OF 1980)

Present law

The Bankruptcy Tax Act of 1980 (P.L. 96-589) was a comprehensive revision of the income tax rules for bankruptcy, insolvency, and debt discharge, following the 1978 repeal by the Congress of the former tax rules.

The 1980 Act provides that no amount is included in gross income by reason of a debt discharge in a bankruptcy case or insolvency. Under the Act, the amount of debt discharge first reduces net operating losses or certain other tax attributes of the debtor company before reducing basis in assets. To provide flexibility, the Act allows the debtor instead first to reduce basis of depreciable property (Code secs. 108, 1017).

In general, the Act's provisions on debt discharge apply to bankruptcy cases beginning after 1980, and to other discharges (outside bankruptcy) occurring after 1980. However, the rule requiring that the amount of debt discharge in bankruptcy or insolvency must first be applied to reduce NOL's, or basis in depreciable assets, was postponed (for one additional year) until bankruptcy cases beginning after 1981 or, in the case of an insolvent debtor outside bankruptcy, where the discharge occurred after 1981.

House bill

No provision.

Senate amendment

The Senate amendment postpones, for an additional three months, the 1980 Act rule relating to the tax consequences of debt discharge in bankruptcy cases or insolvency. Thus, the new rule would apply to bankruptcy cases commencing on or after April 1, 1982, and in the case of a debtor outside bankruptcy which is insolvent at the time of the debt discharge, to debt discharges occurring on or after April 1, 1982.

Conference agreement

The conference agreement does not include the Senate amendment.

23. AMENDMENTS TO THE MORTGAGE SUBSIDY BOND TAX ACT (SEC. 408 OF THE SENATE AMENDMENT AND SECS. 103(b)(4) AND 103A(i) OF THE CODE)

Present law

The Mortgage Subsidy Bond Tax Act of 1980 was enacted generally to direct the subsidy from the use of tax-exempt bonds for housing to those individuals who have the greatest need for the subsidy, to increase the efficiency of the subsidy, and to reduce the overall revenue loss to the Federal Government from the use of tax-exempt bonds for housing.

Present law provisions affected by H.R. 4717 are summarized below.

Single-family Mortgage Bonds

Arbitrage limitations on mortgage investment.—The effective interest rate on mortgages financed with tax-exempt mortgage bonds may not exceed the yield on the issue by more than one (1.0) percentage point.

Loss on reserve liquidations.—The dollar amount of reserves must be reduced as mortgages are paid off, since higher reserves no longer are needed to secure the repayment of debt service on the issue.

Industrial Development Bonds for Multi-family Rental Projects

Definition of "low or moderate income".—Tax-exempt industrial development bonds may be used for multi-family rental projects only if 20 percent of the units (15 percent in targeted areas) are occupied by individuals of "low or moderate income", as defined in section 8 of the United States Housing Act of 1937.

Duration of targeting requirement.—The 20-percent requirement (15 percent in targeted areas) must be met for 20 years with respect to any obligations issued before January 1, 1984.

House bill

No provision

Senate amendment

Single-family Mortgage Bonds

Arbitage limitations on mortgage investments.—The 1.0 percent limit is replaced by a limit which varies with the size of the issue, beginning at one and one-sixteenth (1 1/16) percentage points but not to exceed one and one-eighth (1 1/8) percentage points. The limitation is 1.0625 percentage points plus 0.01 percentage point (not to exceed 1.125 percentage points) for each $10 million that the aggregate face amount of the issue is less than $100 million.

Loss on reserve liquidations.—The rule requiring liquidation of nonmortgage investments with a yield higher than the issue yield will not apply to the extent that it would require disposition of any nonmortgage investment resulting in a loss in excess of the amount which could be earned from investments in qualified mortgages. However, the rule will continue to apply if the sale of such nonmortgage investments would not result in a loss when the investments are sold to meet the liquidation rule. Similarly, the rule will apply if loss assets appreciate so that they would not result in such loss.

Industrial development bonds for multi-family rental projects

Definition of "low or moderate income".—The Senate amendment provides a separate definition of "low or moderate income", by adopting the definition of "low or moderate income" under the section 8 program except that the applicable percentage will be 80 percent of area median income (regardless of the percentage used under section 8 program).

Duration of targeting requirement.—The Senate amendment also provides that the requirement that 20 percent of the rental units (15 percent in targeted area) must be occupied by individuals of low or moderate income applies from the date that the first unit in the project is occupied and continues until the later of (1) 10 years after one-half of the units in the project are first occupied, (2) a date when 50 percent of the maturity of the bond has been exceeded, or (3) the date on which any section 8 assistance terminates.

Effective Date

The provision is effective as if it had been included in the Mortgage Subsidy Bond Tax Act of 1980.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

24. REDUCTION IN EXCISE TAX ON WAGERS AND OCCUPATIONAL TAX ON WAGERING IN STATES AUTHORIZING WAGERING (SEC. 409 OF THE SENATE AMENDMENT AND SECS. 4401 AND 4411 OF THE CODE)

Present law

Under present law, a two-percent excise tax is imposed on the amount of wagers which are (1) placed with a person in the business of accepting wagers on the outcome of a sports event or contest, (2) with respect to a sporting event or contest placed in a wagering pool conducted for profit, or (3) placed in a lottery conducted for profit (including the numbers game, policy, and similar types of wagering). The tax applies to "off-track" betting authorized by State law. However, the tax is not imposed on (1) wagers placed with a parimutuel wagering enterprise licensed under State law, (2) wagers placed in coin-operated gaming devices, such as slot machines, or (3) State-conducted wagering, such as sweepstakes and lotteries (Code secs. 4401-4405, 4421-4424).

Under present law, an occupational tax of $500 per year is imposed on each person who is in the business of accepting wagers and on each person who is engaged in receiving wagers for or on behalf of such person (secs. 4411-4414).

House bill

No provision.

Senate amendment

The Senate amendment reduces the two-percent excise tax on certain wagers to 0.25 percent for wagers authorized by State law. Also, under the amendment, the $500 occupational tax is reduced to $50 in the case of persons authorized by State or local law to accept wagers in a wagering business authorized by State law. In States where wagering is illegal, the two-percent excise tax and $500 occupational tax will continue to apply.

The provision applies to taxable periods beginning after 1981.

Conference agreement

The conference agreement follows the Senate amendment, except for the effective dates. Under the conference agreement, the reduction in the excise tax on certain wagers is effective on January 1, 1983, and the reduction in the occupational tax is effective on July 1, 1983.

25. LIMITATION ON USE OF SMALL ISSUE INDUSTRIAL DEVELOPMENT BONDS (SEC. 410 OF THE SENATE AMENDMENT AND SEC. 103(b)(6) OF THE CODE)

Present law

As an exception to the general rule of taxability of interest paid on industrial development bonds, present law provides an exemption for interest on issues of up to $1 million if the proceeds are used for the acquisition, construction, or improvement of land or depreciable property. The limitation may be increased to $10 million for projects where the aggregate amount of outstanding

exempt small issues and capital expenditures (financed otherwise than out of the proceeds of an exempt small issue) made over a six-year period does not exceed $10 million (Code sec. 103(b)(6)).

Under present law, there are no restrictions on the types of facilities or purposes for which the proceeds of qualified "small issues" of industrial development bonds may be used, other than the requirement that the proceeds be used for land or depreciable property and not for residential real property for family units. In addition, there are no general requirements for reporting information concerning the issue to the Treasury Department.

House bill

No provision.

Senate amendment

Under the amendment, interest on small issue industrial development bonds is subject to Federal income tax if any portion of the proceeds is to be used for any private or commercial golf course, country club, massage parlor, tennis club, skating facility (including roller skating, skateboard, and ice skating), ski resort, racquet sports facility (including handball and racquet ball courts), hot tub facility, suntan facility, or racetrack. The Senate amendment does not affect the present-law exemption of interest on industrial development bonds where the proceeds are used for certain exempt facilities (sec. 103(b)(4)), including sports facilities available on a regular basis for public use.

Also, under the amendment, the issuer of any tax-exempt small issue industrial development bond must report the following to the Treasury: any purchaser of more than 25 percent of the face value of the issue, (2) the underwriter (if any), (3) the interest rate, (4) the issue's rating (if any), (5) the face amount, (6) a description of any facility to be financed from the proceeds of the issue and its location, (7) each user of a facility financed from the proceeds of the issue, (8) bond counsel, and (9) any other information the Treasury determines appropriate.

The provision applies to obligations issued after the date of enactment.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

B. Other Provisions

1. USE OF CERTAIN AMOUNTS TRANSFERRED TO STATE UNEMPLOYMENT FUNDS—REED ACT (SEC. 201 OF THE HOUSE BILL, SEC. 501 OF THE SENATE AMENDMENT, AND SEC. 903(C) OF THE SOCIAL SECURITY ACT)

Present law

Section 903 of the Social Security Act, commonly referred to as the Reed Act, provides for the transfer of any excess Federal Unemployment Tax Act (FUTA) receipts to the individual State accounts in the unemployment trust fund. Each State's share is proportionate to its share of wages subject to FUTA taxes. Excess funds have accrued only three times since the passage of the Reed Act—in 1956, 1957, and 1958. Current unobligated State Reed Act account balances total some $25 million.

Reed Act funds may be used by the States either to pay unemployment benefits or for administrative purposes. However, under present law, authority to use funds credited in 1956 and 1957 for administrative purposes expired on July 1, 1981; and authority to use funds credited in 1958 for administrative purposes will expire on July 1, 1983.

House bill

The House bill extends for 10 years the authority for States to use Reed Act funds for administrative purposes. Also, the bill permits States that have used such funds to pay unemployment benefits to reestablish a Reed Act account.

Senate amendment

Same as House bill.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

2. REMOVAL OF AGE LIMITATION FOR EXCLUSION FROM FUTA OF WAGES PAID TO STUDENT INTERNS (SEC. 202 OF THE HOUSE BILL, SEC. 502 OF THE SENATE AMENDMENT, AND SEC. 3306(C)(10(C) OF THE CODE)

Present law

Under current law, wages paid to a student under age 22 who is enrolled full-time in a work-study or internship program are exempted from the Federal unemployment tax (FUTA) if the work performed is an integral part of the student's academic program (Code sec. 3306(c)(10)).

House bill

The House bill exempts from FUTA tax any wages paid to student interns, regardless of age, for work that is an integral part of the student's academic program, effective for service performed after the date of enactment.

Senate amendment

Same as House bill.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Repsonsibility Act of 1982 (P.L. 97-248).

3. EXTENSION OF EXCLUSION FROM FUTA OF WAGES PAID TO CERTAIN ALIEN FARMWORKERS (SEC. 203 OF THE HOUSE BILL, SEC. 503 OF THE SENATE AMENDMENT, AND SEC. 3306(C)(19) OF THE CODE)

Present law

Under the Immigration and Nationality Act, residents of foreign countries who do not intend to abandon such residency may be admitted to the U.S. to work for a temporary period of time during peak agricultural crop seasons. Prior to 1982, wages paid to such alien farmworkers were excluded from Federal unemployment (FUTA) taxes.

House bill

The House bill extends for two years—from January 1, 1982 to January 1, 1984—the provision of prior law that excluded wages paid to certain alien farmworkers from FUTA taxes.

Senate amendment

Same as House bill.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

4. UNEMPLOYMENT BENEFITS PAID TO EX-SERVICE MEMBERS (SEC. 204 OF HOUSE BILL AND SEC. 2405 OF P.L. 97-35)

Present law

Section 2405 of the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) established new requirements for the payment of benefits to ex-Servicemembers under the Unemployment Compensation for Ex-Service members (UCX) program. Under the new rules, benefits are limited to individuals who (1) have 365 or more days of military service; (2) were discharged or released under honorable conditions; (3) did not resign or voluntarily leave the service (i.e., they were not eligible for reenlistment); and (4) were not released or discharged "for cause" as defined by the Department of Defense. These new requirements apply to individuals who left Federal military service on or after July 1, 1981, but only for weeks of unemployment that began on or after August 13, 1981, the date of enactment of P.L. 97-35.

House bill

The House bill subsitutes for the requirements enacted in P.L. 97-35 new Federal unemployment compensation eligibility requirements for individuals separated from the military. The provision (1) limits unemployment benefits to ex-Servicemembers who have served 730 or more continuous days in the military and who have been discharged under other than dishonorable conditions; (2) requires a four-week waiting period between the week in which the individual is separated and the week in which he or she first becomes entitled to compensation; and (3) limits an eligible ex-Servicemember's benefits to 13 weeks. The provision would be effective for separations on or after July 1, 1981, but only for benefits payable after the date of enactment.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with the following modification: Federal unemployment benefits would be payable to unemployed ex-service members who (1) were separated under honorable conditions (and, in the case of officers, did not resign for the good of the service); and, (2) had completed the first full term of active service they agreed to serve. Ex-service members who were separated prior to completing their initial term of active service could qualify for unemployment benefits if they were separated under honorable conditions (a) for the convenience of the Government under an early release program, (b) because of medical disqualification, pregnancy, parenthood, or any service-incurred injury or disability, (c) because of hardship, or (d) if they had served for 365 continuous days, because of personality disorders or inaptitude. Also, effective October, 1, 1983, current law would be amended to ensure that Federal unemployment benefits paid to ex-Service members would be charged to the Department of Defense in the same manner as Federal benefits paid to former civilian Federal employees are charged to other Federal agencies.

5. CHANGE IN SSI ACCOUNTING PERIOD (SEC. 205 OF THE HOUSE BILL AND SEC. 1611(C) OF THE SOCIAL SECURITY ACT)

Present law

Under the Supplemental Security Income (SSI) law in effect through March 1982, computation of SSI eligibility and amount of benefits are based on the income and resources for the current calendar quarter.

The Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) requires that, after March 1982, the computation period for determination of eligibility and amount of SSI benefits will be on a monthly basis. Benefits, generally, will be determined on a

monthly retrospective basis. That is, the amount of the SSI benefit for any month will be determined on the basis of the individual's or couple's income, resources, and other circumstances in the preceding month. The SSI payment received in June 1982, for example, will not reflect the amount of any other income the recipient had in June; rather, it will reflect the amount of any such income the person received in April.

House bill

Under the House bill, a one-month "prospective" accounting period in SSI is substituted for the "retrospective" account period required by P.L. 97-35 to go into effect in April. The provision is effective with respect to months after the first calendar quarter which ends more than two months after the month in which the provision is enacted.

Senate amendment

No provision.

Conference agreement

The conference agreement does not include the House provision because the issue was dealt with in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

6. TREATMENT OF UNNEGOTIATED CHECKS UNDER THE SSI PROGRAM (SEC. 206 OF THE HOUSE BILL AND SEC. 1631(A)(1)(2) OF THE SOCIAL SECURITY ACT)

Present law

More than one-half of the States have agreements with the Social Security Administration to include State-funded supplementation of the Federal SSI benefit in the check issued by the U.S. Treasury. The Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) amended title XVI (SSI) of the Social Security Act to establish a process for crediting States with their share (included as State supplementation) of benefit checks remaining unnegotiated for more than 180 days. It is not clear whether this legislation applies to SSI checks which are entirely State financed.

Some SSI recipients have social security or other income which exceeds the Federal SSI level, so that they qualify only for a State supplementation of the Federal SSI benefit standard. That is, the benefits in such instances are entirely State financed, even though paid by Treasury check.

House bill

The House bill clarifies the authority to credit States for unnegotiated SSI benefit checks which are "State supplementation only" checks. The provision will be effective on October 1, 1982.

Senate amendment

No provision.

Conference agreement

The conference agreement does not include the House provision because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

7. COLLECTION OF ADMINISTRATIVE COSTS FOR NON-AFDC CHILD SUPPORT ENFORCEMENT (SEC. 207 OF THE HOUSE BILL AND SEC. 454(19) OF THE SOCIAL SECURITY ACT)

Present law

States are required to provide child support collection services to non-AFDC families requesting assistance. Prior to the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35), States had the option of charging non-AFDC families a reasonable fee and then retaining a portion of any child support collection to pay for administrative expenses not covered by the fee. Under the Reconciliation Act provisions, States retain the option of charging non-AFDC recipients a reasonable application fee, but are required to charge a fee equal to 10 percent of the support collected. The 10 percent fee must be charged against the absent parent and added to the amount to be collected.

House bill

The House bill repeals the provisions enacted in P.L. 97-35 which would require States, in cases involving non-AFDC families, to charge any absent parent who is obligated to pay child support through the State Child Support Enforcement Agency a fee equal to 10 percent of the child support payment. The House bill restores the law in effect prior to P.L. 97-35 which allows States to charge a reasonable fee for a non-AFDC collection and retain from the amount collected an amount equal to administrative costs not covered by the fee. The House bill also retains, as a State option, the authority to collect from the parent who owes child or spousal support an amount to cover administrative costs, in addition to the child support payment. The provision is effective as of October 1, 1981.

Senate amendment

No provision.

Conference agreement

The conference agreement does not include the House provision because the issue was dealt with in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

8. TECHNICAL AMENDMENTS TO CHILD SUPPORT ENFORCEMENT PROVISIONS IN P.L. 97-35 (SEC. 208 OF THE HOUSE BILL)

Present law

Several inaccurate references were included in the child support enforcement provisions of the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35).

House bill

The House bill makes several technical corrections in the child support enforcement provisions contained in P.L. 97-35, including the correction of inaccurate references. The provision is effective as of October 1, 1981.

Senate amendment

No provision.

Conference agreement

The conference agreement does not include the House provision because it was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

9. TECHNICAL AMENDMENTS TO SOCIAL SERVICES AND FOSTER CARE PROVISIONS IN P.L. 97-35 (SEC. 209 OF THE HOUSE BILL AND SECS. 471(A)(10), 1101, 1108, and 2003(B) of the social security act)

Present law

1. The Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) unintentionally repealed the authority for Puerto Rico, Guam, the Virgin Islands, and the Northern Mariana Islands to finance social services from funds received under the cash assistance titles, and provided that these territories are eligible for funds for social services only under the title XX social services block grant.

2. The formula for allocating funds to the States and territories under the title XX social service block grant program could be interpreted in such a way that a portion of the funds are not avaialable for allocation to any jurisdiction.

3. There are inconsistencies between titles XI and XX of the Social Security Act as to jurisdictions eligible for title XX funds.

4. P.L. 97-35 incorrectly referenced child day care instead of foster care standards in the requirements that States have standards for foster family home or child care institutions under their title IV-E foster care program.

House bill

The House bill makes the following technical corrections:

(1) Restores the option to Puerto Rico, Guam, the Virgin Islands, and the Northern Mariana Islands to utilize funds available under the cash assistance titles for social services.

(2) Insures that all the title XX funds under the ceiling are available for allotment to the States and other jurisdictions.

(3) Makes the title XI definition of the term "State," as it pertains to title XX funding, consistent with the list of jurisdictions cited in title XX as eligible for funds under the allotment formula.

(4) Incorporates into the title IV-E foster care law the same standards for foster care as were previously required by reference to the standards in title XX which were in effect prior to P.L. 97-35.

The provision is effective as of October 1, 1981.

Senate amendment

No provision.

Conference agreement

The conference agreement does include the House provision because similar provisions were included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

10. ONE-YEAR EXTENSION OF EXISTING ONE-YEAR FUTA EXEMPTION FOR CERTAIN FISHERMEN (SEC. 402 OF THE SENATE AMENDMENT AND SEC. 3306(C) OF THE CODE)

Present law

Services performed by members of the crew on boats engaged in catching fish or other forms of aquatic animal life are exempt from FICA tax if their remuneration is a share of the boat's catch (or cash proceeds from the sale of a share of the catch) and if the crew of such boat normally is made up of fewer than ten individuals. In addition, the remuneration received by those fishing boat crew members whose services are exempt for purposes of FICA is not considered to be wages for purposes of income tax withholding. Furthermore, the Economic Recovery Tax Act of 1981 (P.L. 97-34) provided that wages paid during 1981 to certain fishing boat crew members who are self-employed for purposes of FICA are not subject to FUTA taxes.

House bill

No provision.

Senate amendment

The Senate amendment extends for one year (through 1982) the FUTA tax exemption for wages paid to fishermen whose remuneration is exempt for purposes of FICA. The provision applies to remuneration paid during 1982.

Conference agreement

The conference agreement follows the Senate amendment.

11. ELIGIBILITY REQUIREMENTS FOR TRADE ADJUSTMENT ASSISTANCE (SEC. 404 OF THE SENATE AMENDMENT AND SEC. 2514(a)(2)(A) OF P.L. 97-35)

Present law

Under prior law, workers could be certified eligible to apply for benefits under the trade adjustment assistance program if increased imports "contributed importantly" to worker layoffs and production/sales declines of the firm. Pursuant to the Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) the causation standard was strengthened to require that increased imports be a "substantial cause" of such layoffs and declines, defined as a cause which is "important and not less than any other cause." The new test applied to petitions filed on or after February 9, 1982.

House bill

No provision.

Senate amendment

The Senate amendment amends Public Law 97-35 to restore the "contributed importantly" standard through September 30, 1983, the statutory termination date of the program. The provision is effective on date of enactment.

Conference agreement

The conference agreement follows the Senate amendment.

12. MEDICARE ENROLLMENT PERIOD FOR INDIVIDUALS FORMERLY ELIGIBLE FOR BENEFITS UNDER THE PUBLIC HEALTH SERVICE ACT (SEC. 407 OF THE SENATE AMENDMENT AND SEC. 322(A) OF THE PUBLIC HEALTH SERVICE ACT)

Present law

Individuals who voluntarily choose to enroll in the Supplementary Medical Insurance (Part B) portion of the Medicare program may enroll during one of two periods: (1) their initial enrollment period, which is based on the date when such individuals meet the eligibility requirements for enrollment, or (2) during a general enrollment period, during which persons who failed to enroll during their initial period or whose enrollment has been terminated may first enroll or re-enroll. Individuals who elect to enroll after their initial opportunity to do so, or who re-enroll after a termination of coverage, are required (with certain minor exceptions) to pay increased monthly premiums for delinquent enrollment of 10 percent for each 12 months of delay in enrollment or re-enrollment.

House bill

No provision.

Senate amendment

The Senate amendment establishes a special Part B enrollment period from April 1, 1982 through December 31, 1982 for certain individuals (generally elderly merchant seamen) who were formerly eligible for benfits under section 322(a) of the Public Health Services Act (between March 10, 1981 and through September 30, 1981) and who were eligible but not enrolled in the Medicare Part B program. No portion of any period during which such persons were entitled to benefits under the Public Health Service Act counts in determining any increase in monthly premiums for delinquent enrollment. The provision is effective on the date of enactment.

Conference agreement

The provision was deleted from this bill because a similar provision was included in the Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248).

II. ESTIMATED BUDGET EFFECTS

ESTIMATED BUDGET EFFECTS OF H.R. 4717 AS AGREED TO BY THE CONFERENCE COMMITTEE, FISCAL YEARS 1983-1986

[In millions of dollars]

Provision	1983	1984	1985	1986
A. Tax Provisions:				
One-year postponement of effective date for LIFO reserve recapture rule	−56	(2)	(2)	(2)
Modification of net operating loss rule for the Federal National Mortgage Association	−14	14		
Rollover of gain on FCC-ordered disposition of broadcast property	(1)	(1)		
Expansion of oil shale tax credits	(2)			
Annuities for survivors of Tax Court judges (outlays)	(3)	(3)	(3)	(3)
Modification of certain Tax Court procedural rules				
Furnishing of Form W-2 to terminated employees				
Withholding of State income tax from seamen's wages				
Reduction in excise taxes on wagering	−8	−14	−16	−17
Total, tax provisions*	−89	−11	−22	−23
B. Other Provisions:				
Unemployment benefits paid to ex-service members (outlays)**	90	70	60	55
Eligibility requirements for trade adjustment assistance (outlays)	(4)	(4)	(4)	(4)
One-year extension of existing FUTA exemption for certain fishermen	(5)			

[1] Loss of less than $10,000,000.
[2] Loss of less than $5,000,000.
[3] Increases outlays by less than $50,000.
[4] Increases outlays by indeterminate amount.
[5] Revenue loss of less than $1,000,000.
* For budget scorekeeping purposes, totals include $3 million for each figure shown as "less than $5 million" and $5 million for each figure shown as "less than $10 million."
**Preliminary estimate supplied by the Congressional Budget Office.

MALCOLM WALLOP,
RUSSELL B. LONG,
HARRY F. BYRD, Jr.,
Managers on the Part of the Senate.

Mr. ROSTENKOWSKI. Mr. Speaker, I call up the conference report on the bill, H.R. 4717, to delay for 1 year the effective date of certain provisions recognizing gain on certain dispositions of LIFO inventories, to make adjustments in the net operating loss carryback and carryforward rules for the Federal National Mortgage Association, and to require information returns with respect to safe harbor leases, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. CONABLE. Mr. Speaker, reserving the right to object, I do so for the purpose of exploring the meaning of this particular proposal as it has come from conference, with my distinguished chairman.

Mr. Speaker, I would like to ask him if he has an explanation of the provisions of this measure.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield to me?

Mr. CONABLE. I yield to the gentleman such time as he may consume, pursuant to my reservation of objection.

Mr. ROSTENKOWSKI. I thank the gentleman for yielding so that I may explain the conference report.

GENERAL LEAVE

Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report presently being considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, the House and Senate conferees have reached agreement on H.R. 4717, the Miscellaneous Revenue Act of 1982. I rise today to ask the House to apporove the conference agreement.

The most significant provision of the bill would delay the effective date of the LIFO reserve recapture rule enacted in Public Law 96-223 for 1 year. This provision was included in both House and Senate bills. The conferees have agreed that this deferred effective date will apply to the first $1 million of LIFO reserves for liquidations occurring on or before December 31, 1983.

The conference agreement also includes the modification of the net operating loss rule for the Federal National Mortgage Association as contained in both House and Senate versions of the bill

The other provisions of the conference agreement relate to provisions added by the Senate Finance Committee. These include any expansion of oil shale credits for 1981 and 1982 tax years, a reduction in gambling excise and occupational taxes in States where gambling is authorized by State law, a modification of the nonrecognition rules for a certain FCC-ordered disposition of broadcast property, revisions to the procedural rules of the Tax Court, and increases in the survivors' annuities of Tax Court judges. Two other minor and noncontroversial changes to withholding provisions are also included.

The conference agreement also contains two unemployment compensation related amendments. First, under present law, individuals who leave the military at the end of a term of enlistment are not eligible for Federal unemployment benefits if they had the opportunity to reenlist. In effect, this provision prevents most ex-service members who cannot find civilian jobs immediately after leaving the military from receiving unemployment benefits. The conference agreement substitutes new eligibility requirements for those under present law. Under the conference agreement, 13 weeks of

Federal benefits would be payable, after a 4-week waiting period, to unemployed ex-service members who had completed their first full term of active service. Certain individuals separated from the military because of hardship, disability, for the convenience of the Government or other reasons could receive benefits even though they have not completed their first full term of service. The fairness that this amendment brings to the treatment of unemployed ex-service members reflects the great effort that our distinguished colleague from Pennsylvania, DON BAILEY, has continuously made on their behalf. Throughout his service on the Committee on Ways and Means, DON BAILEY has worked tirelessly on behalf of issues such as this, and as chairman, I want to thank him for his constant dedication and diligence.

Second, the Economic Recovery Tax Act of 1981 (Public Law 97-34) provided that wages paid during 1981 to certain fishing boat crew members who are self-employed for purposes of social security taxes are not subject to the Federal unemployment tax (FUTA). The conference agreement extends this FUTA exemption for an additional year.

Finally, the conference agreement includes a Senate amendment which revises the eligibility requirements for trade adjustment assistance for workers by restoring the "contributed importantly" standard for certification through September 30, 1983, which is the statutory termination date of the program.

Mr. Speaker the conference agreement before us represents a good compromise, and I recommend its adoption by the House.

Mr. CONABLE. Mr. Speaker, further reserving the right to object, this is a difficult matter involving several provisions. It has been pending and in conference since the end of last year.

For the purpose of further explanation of a provision of this measure, which has already been described in some detail by the chairman of the committee, and subject to my reservation, I now yield to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, one provision of this report dealing with unemployment compensation to ex-service personnel, is a troubling one. As agreed to in conference, this provision liberalizes last year's reform of the so-called UCX program. Current law limits benefits to individuals who did not resign or voluntarily leave the service. The conference provision would pay benefits to those who quit the service voluntarily after serving 2 years, even if they declined an offer to reenlist.

In fiscal year 1981, thousands of military personnel who were discharged under honorable or general conditions would not be allowed to reenlist. Personnel were discharged for drug abuse, unsuitability, misconduct, discreditable incidents, shirking, failure to support dependents, sexual perversion, fradulent enlistment, and prolonged unauthorized absence. Thousands more were discharged in lieu of court-martial. Such individuals most certainly cannot be held faultless for such discharges, and this provision would actually pay benefits to personnel who failed to perform in a responsible manner during their tours of duty.

The historic philosophy of our unemployment insurance program calls for paying benefits to those who lose jobs through no fault of their own. The UCX provision in H.R. 4717 openly contradicts the purpose of unemployment compensation. It simply cannot be justified. Additionally, the whole point of the 1981 UCX reform was to stop paying benefits to those who quit the military voluntarily or who were released for cause. The conference provision would provide UCX to those who quit the service voluntarily after serving 2 years, even if they declined an offer to reenlist. A civilian who declined an offer of suitable work would not be eligible for unemployment compensation. How can we in good conscience grant the privilege of benefits to the military while denying civilians of equal treatment? Further, if a civilian employee were involved in some of the activities for which military personnel receive honorable or general discharges, they would be fired and therefore ineligible for benefits.

In addition, recruitment standards for the military have been raised as national unemployment has increased. Under H.R. 4717, benefits would be paid to individuals who willingly quit military service in a job-scarce economy. Many civilians do not have the luxury of leaving unsatisfactory jobs to collect unemployment compensation while searching for more favorable employment. It is again evident that this provision fosters a double standard for American workers.

Further, in a time of scarce resources for the deserving and needy segments of society, we are considering a provision which would increase 1983 outlays by more than $100 million above the President's request. Over a 5-year period, CBO estimates this provision would cost an additional $359 million.

I have objected to the UCX program, since we started discussing it 2 years ago. I still think it is an unwise program.

Even though I am not satisfied with the conclusion of this conference report on UCX, but it should not be used to hold up the other half-dozen provisions in this bill.

The conference committee, over a 10-month period, has worked very hard and done its best. We cannot make any more out of it than what we have now so I signed the conference report. I reluctantly support the package.

Mr. CONABLE. Further reserving the right to object, Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. I thank the gentleman from New York for yielding to me.

Mr. Speaker, I asked for this time just to direct a question to the gentleman from Illinois (Mr. ROSTENKOWSKI), the chairman of the Ways and Means Committee.

I understand that it was not timely or appropriate to get relief in this legislation for State tax commissioners, who brought to our attention the requirement of section 313 of the tax bill passed earlier this year, imposing a very considerable additional cost on States to send out an extra report to people who receive refunds of State or local income taxes.

We require under section 313 of the tax bill that report be sent out to people in January. Most States send it out earlier, along with the refund. I would certainly ask that the Ways and Means Committee act before next year, which is when that requirement will go into effect, so that we do not have, in the case of California, unnecessary postage alone which is going to be $2.5 million extra, and in the case of the State of Ohio, the total cost the extra reports including postage is something in that same neighborhood, and among all the States it would be considerable. But if we just changed that requirement to make it necessary for the States to report by the end of January, it would relieve them of that extra reporting responsibility and would be very much welcomed by the States.

I would hope that could be considered in the near future by the Ways and Means Committee.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield to me?

Mr. CONABLE. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. I thank the gentleman for yielding.

Mr. Speaker, the gentleman points out a potential problem here, but it is certainly unrelated to this legislation. However, it was complex legislation that we passed last August, and we probably will review much of it early next year.

Mr. KINDNESS. I thank the gentleman from Illinois.

□ 2030

Mr. CONABLE. Mr. Speaker, further reserving the right to object, I be-

lieve there are other provisions that should be discussed, at least modestly, and I would like to add something to the explanation of the chairman, if I may.

For instance, the LIFO provisions have drawn some controversy in this particular measure. The LIFO is, in the measure, delayed until January 1, 1983, the effective date of changes in the tax treatment of LIFO accounting which were enacted as part of the Crude Oil Windfall Profit Tax Act of 1980 and which are scheduled to take effect January 1, 1982.

LIFO stands for the "last-in, first-out" method of accounting for inventory profits. It is LIFO accounting in inflationary times because it reduces what would otherwise be artifically high nominal profits. Part of LIFO accounting includes the establishment of a reserve account which represents deferred inventory profits and is ultimately captured.

Under the normal corporate tax rules, no gain or loss is recognized in a liquidation where there is an exchange of assets for stock held by the shareholders. The Crude Oil Windfall Profit Tax Act provided that beginning January 1, 1982, the corporate liquidation of LIFO inventory assets generally will be a taxable transaction. That is, the LIFO reserve will be taxed as ordinary income. H.R. 4717 postpones the effective date of this change until January 1, 1983.

This gives us some idea as to how long this matter has been pending and how many taxpayers are concerned about it.

The extent to which LIFO reserves may come into play under this extension is limited, and this undoubtedly will come as less than good news to many businesses. However, it became clear in the conference that the limitation, up to $1 million of those LIFO reserves, was the best obtainable. This is obviously a subject to which the Committee on Ways and Means can be expected to return in the relatively near future.

Mr. Speaker, there also is a net operating loss carryover and carryback provision which gives Fannie Mae a status similar to that at other banks. Fannie Mae as it presently stands is much in the same relationship to the mortgage market that banks are, and it should have the same net operating loss carryovers and carrybacks that banks do. If we do not give Fannie Mae this power, it will affect Fannie Mae's ability to finance the purchase of additional mortgages. This has been pending also for all too long a time.

We are also taking a few comparatively modest amendments added by the Senate, in one of which I have an interest only because it affects New York State. It involves the compulsory divesture under the Federal Communication Commission rules of a television station and a tax free acquisition of a newspaper. And that incidentally has been taken care of on a very limited basis. The measure generally represents a good balance, and I intend to support it.

Unless there are other requests for time, Mr. Speaker, I believe this matter has now been adequately explained.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the statement of the managers be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see prior pages of today's proceedings of the House.)

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ROSTENKOWSKI. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

SUBCHAPTER S REVISION ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6055) to revise subchapter S of the Internal Revenue Code of 1954—relating to small business corporations—with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 8, strike out lines 15 to 24, inclusive and insert:

"(B) MANNER AND TIME OF ELECTION.—

"(i) SEPARATE ELECTION WITH RESPECT TO EACH S CORPORATION.—An election under this paragraph shall be made separately with respect to each S corporation the stock of which is held by the trust.

"(ii) ELECTIONS WITH RESPECT TO SUCCESSIVE INCOME BENEFICIARIES.—If there is an election under this paragraph with respect to any beneficiary, an election under this paragraph shall be treated as made by each successive beneficiary unless such beneficiary affirmatively refuses to consent to such election.

"(iii) TIME, MANNER, AND FORM OF ELECTION—Any election, or refusal, under this paragraph shall be made in such manner and form, and at such time, as the secretary may prescribe.

Page 9, strike out all after line 15 over to and including line 4 on page 10, and insert:

"(C) the terms of which require that—

"(i) during the life of the current income beneficiary there shall be only 1 income beneficiary of the trust,

"(ii) any corpus distributed during the life of the current income beneficiary may be distributed only to such beneficiary,

"(iii) the income interest of the current income beneficiary in the trust shall terminate on the earlier of such beneficary's death or the termination of the trust, and

"(iv) upon the termination of the trust during the life of the current income beneficiary, the trust shall distribute all of its assets to such beneficiary.

Page 14, strike out lines 4 to 21, inclusive, and insert:

"(3) Where passive investment income exceeds 25 percent of gross receipts for 3 consecutive taxable years and corporation has subchapter C earnings and profits.—

"(A) TERMINATION.—

"(i) IN GENERAL.—An election under subsection (a) shall be terminated whenever the corporation—

"(I) has subchapter C earnings and profits at the close of each of 3 consecutive taxable years, and

"(II) has gross receipts for each of such taxable years more than 25 percent of which are passive investment income.

"(ii) WHEN EFFECTIVE.—Any termination under this paragraph shall be effective on and after the first day of the first taxable year beginning after the third consecutive taxable year referred to in clause (i).

"(iii) YEARS TAKEN INTO ACCOUNT. A prior taxable year shall not be taken into account under clause (i) unless—

"(I) such taxable year began after December 31, 1981, and

"(II) the corporation was an S corporation for such taxable year.

Page 27, after line 11, insert:

"(3) REDUCTION IN PASS-THRU FOR TAX IMPOSED ON EXCESS NET PASSIVE INCOME.—If any tax is imposed under section 1375 for any taxable year on an S corporation, for purposes of subsection (a), each item of passive investment income shall be reduced by an amount which bears the same ratio to the amount of such tax as—

"(A) the amount of such item, bears to

"(B) the total passive investment income for the taxable year.

Page 33, after the matter which follows line 8, insert:

"Sec. 1375. Tax imposed when passive investment income of corporation having subchapter C earnings and profits exceeds 25 percent of gross receipts.

Page 39, after line 24, insert:

"SEC. 1375. TAX IMPOSED WHEN PASSIVE INVESTMENT INCOME OF CORPORATION HAVING SUBCHAPTER C EARNINGS AND PROFITS EXCEEDS 25 PERCENT OF GROSS RECEIPTS.

"(a) GENERAL RULE.—If for the taxable year an S corporation has—

"(1) subchapter C earnings and profits at the close of such taxable year, and

"(2) gross receipts more than 25 percent of which are passive investment income,

then there is hereby imposed a tax on the income of such corporation for such taxable year. Such tax shall be computed by multiplying the excess net passive income by the highest rate of tax specified in section 11 (b).

"(b) DEFINITIONS.—For purposes of this section—

"(1) EXCESS NET PASSIVE INCOME.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), the term 'excess net passive income' means an amount which bears the same ratio to the net passive income for the taxable year as—

"(i) the amount by which the passive investment income for the taxable year exceeds 25 percent of the gross receipts for the taxable year, bears to

"(ii) the passive investment income for the taxable year.

"(B) LIMITATION.—The amount of the excess net passive income for any taxable year shall not exceed the corporation's taxable income for the taxable year (determined in accordance with section 1374(d)).

"(2) NET PASSIVE INCOME.—The term 'net passive income' means—

"(A) passive investment income, reduced by

"(B) the deductions allowable under this chapter which are directly connected with the production of such income (other than deductions allowable under section 172 and part VIII of subchapter B).

"(3) PASSIVE INVESTMENT INCOME; ETC.—The terms 'subchapter C earnings and profits', 'passive investment income', and 'gross receipts' shall have the same respective meanings as when used in paragraph (3) of section 1362(d).

"(c) SPECIAL RULES.—

"(1) DISALLOWANCE OF CREDIT.—No credit shall be allowed under part IV of subchapter A of this chapter (other than section 39) against the tax imposed by subsection (a).

"(2) COORDINATION WITH SECTION 1374.—If any gain—

"(A) is taken into account in determining passive income for purposes of this section, and

"(B) is taken into account under section 1374, the amount of such gain taken into account under section 1374 shall be reduced by the portion of the excess net passive income for the taxable year which is attributable (on a pro rata basis) to such gain.

Page 43, strike out lines 9 to 19, inclusive, and insert:

"(3) STOCK ACQUIRED BY REASON OF DEATH, GIFT FROM FAMILY MEMBER, ETC.—

"(A) IN GENERAL.—For purposes of paragraph (2), if—

"(i) a person acquired stock in the corporation after December 31, 1982, and

"(ii) such stock was acquired by such person—

"(I) by reason of the death of a qualified transferor,

"(II) by reason of a gift from a qualified transferor who is a member of such person's family, or

"(III) by reason of a qualified buy-sell agreement from a qualified transferor (or his estate) who was a member of such person's family,

then such stock shall be treated as held on December 31, 1982, by the person described in clause (i).

"(B) QUALIFIED TRANSFEROR.—For purposes of subparagraph (A), the term 'qualified transferor' means a person—

"(i) who held the stock in the corporation (or predecessor stock) on December 31, 1982, or

"(ii) who acquired the stock in an acquisition which meets the requirements of subparagraph (A).

"(C) FAMILY.—For purposes of subparagraph (A), the term 'family' has the meaning given such term by section 267(c)(4).

"(D) QUALIFIED BUY-SELL AGREEMENT.—For purposes of subparagraph (A), the term 'qualified buy-sell agreement' means any agreement which—

"(i) has been continuously in existence since September 28, 1982, and

"(ii) provides that on the death of any party to such agreement, the stock in the S corporation held by such party will be sold to surviving parties to such agreement who were parties to such agreement on September 28, 1982.

Page 70, line 14, strike out "provided in subsection (b)" and insert "otherwise provided in this section".

Page 71, after line 5, insert:

(3) NEW PASSIVE INCOME RULES APPLY TO TAXABLE YEARS BEGINNING DURING 1982.—In the case of a taxable year beginning during 1982—

(A) sections 1362(d)(3), 1366(f)(3), and 1375 of the Internal Revenue Code of 1954 (as amended by this Act) shall apply, and

(B) section 1372(e)(5) of such Code (as in effect on the day before the date of the enactment of this Act) shall not apply.

Page 71, line 9, strike out June 23 and insert "September 28".

Page 73, after line 7, insert:

(3) CERTAIN CORPORATIONS WITH OIL AND GAS PRODUCTION.—

(A) IN GENERAL.—In the case of any qualified oil corporation—

(i) the amendments made by this Act shall not apply, and

(ii) subchapter S (as in effect on July 1, 1982) of chapter 1 of the Internal Revenue Code of 1954 shall apply.

(B) QUALIFIED OIL CORPORATION.—For purposes of this paragraph, the term "qualified oil corporation" means any corporation if—

(i) as of September 28, 1982, such corporation—

(I) was an electing small business corporation, or

(II) was a small business corporation which made an election under section 1372(a) after December 31, 1981, and before September 28, 1982,

(ii) for calendar year 1982, the combined average daily production of domestic crude oil or natural gas of such corporation and any one of its substantial shareholders exceeds 1,000 barrels, and

(iii) such corporation makes an election under this subparagraph at such time and in such manner as the Secretary of the Treasury or his delegate shall prescribe.

(C) AVERAGE DAILY PRODUCTION.—For purposes of subparagraph (B), the average daily production of domestic crude oil or domestic natural gas shall be determined under section 613A(c)(2) of such Code without regard to the last sentence thereof.

(D) SUBSTANTIAL SHAREHOLDER.—For purposes of subparagraph (B), the term "substantial shareholder" means any person who on July 1, 1982, owns more thn 40 percent (in value) of the stock of the corporation.

Page 73, line 8, strike out (3) and insert "(4)".

Page 74, after line 7, insert:

(d) TREATMENT OF EXISTING FRINGE BENEFIT PLANS.—

(1) IN GENERAL.—In the case of existing fringe benefits of a corporation which as of September 28, 1982, was an electing small business corporation, section 1372 of the Internal Revenue Code of 1954 (as added by this Act) shall apply only with respect to taxable years beginning after December 31, 1987.

(2) REQUIREMENTS.—This subsection shall cease to apply with respect to any corporation after whichever of the following first occurs:

(A) the first day of the first taxable year beginning after December 31, 1982, with respect to which the corporation does not meet the requirements of section 1372(e)(5) of such Code (as in effect on the day before the date of the enactment of this Act),

(B) any termination after December 31, 1982, of the election of the corporation under subchapter S of chapter 1 of such Code, or

(C) the first day on which more than 50 percent of the stock of the corporation is newly owned stock within the meaning of section 1378 (c) (2) of such Code (as amended by this Act).

(3) EXISTING FRINGE BENEFIT. For purposes of this subsection the term "existing fringe benefit" means any employee fringe benefit of a type which the corporation provided to its employees as of September 28, 1982.

Page 74, after line 7, insert:

(e) TREATMENT OF CERTAIN ELECTIONS UNDER PRIOR LAW.—For purposes of section 1362(g) of the Internal Revenue Code of 1954, as amended by ths act (relating to no election permitted within 5 years after termination of prior election), any termination under section 1372(e) of such Code (as in effect on the day before the date of the enactment of this Act) shall not be taken into account.

Mr. ROSTENKOWSKI (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. CONABLE. Mr. Speaker, reserving the right to object, I ask the distinguished chairman if he would wish to explain this measure so that the Members can understand what it is about.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. Speaker, on September 20, the House passed H.R. 6055, the Subchapter S Revision Act of 1982. This is a very important tax bill for small business corporations. As I noted during House consideration of H.R. 6055, the bill simplifies and updates the tax rules in the Internal Revenue Code that permit certain small businesses to incorporate and operate without the imposition of tax at both the corporate and shareholder level. This legislation is the result of a collegial effort within and without the Congress. The original bill was cosponsored by the chairman and ranking minority members of the House and Senate tax-writing committees. It represents literally a decade of work by the respective tax staffs in cooperation with the Treasury Department, the professional tax bar, accounting groups and small business reepresentatives.

Mr. Speaker, a long and considered effort went into making this legislation a consensus product. The smooth

sailing this bill has had in the House and Senate testifies to that. Where differences over the details arose, they were modest and have been resolved by careful compromise.

Yesterday, the Senate passed H.R. 6055 with several amendments developed in the Senate Finance Committee consideration of the legislation. I would like to summarize the principal Senate amendments for the Members of the House.

The major Senate amendment to the House-passed bill involves the passive investment income limitation. The House bill repealed the subchapter S limitation for most small business corporations but retained it in the case of subchapter C corporations that have accumulated earnings and profits and then elect subchapter S treatment. In short, the outright repeal of the 20-percent passive income test would have presented tax bailout opportunities in such cases. The Senate bill has modified the House bill by raising the passive income limit to 25 percent and applying a corporate level tax to the investment income in excess of that amount instead of having a corporation lose its subchapter S status. Only firms exceeding the limit for 3 consecutive years would have their subchapter S election terminated. The general repeal of the passive income limitation and the new 3-year provisions would be effective beginning in 1982.

The Senate amendments also included a rule that would allow existing subchapter S corporations to continue corporate tax treatment of existing employer-provided fringe benefits through 1987. Under the provision in the House bill, subchapter S corporations would be treated as partnerships beginning in 1983.

The Senate also provided that, upon enactment of these new subchapter S provisions, any termination of an election under prior law, which ordinarily bars subchapter S status for the next 5 years, would not be taken into account. This would permit small business corporations that terminated their subchapter S status under old law to qualify for the new rules beginning with the general effective date of 1983. The Senate amendments further conformed the effective date rules for old-law treatment of certain subchapter S DISC's and foreign subsidiaries to the date of Senate Finance Committee action. Finally, the Senate amendments included several amendments of a purely technical nature.

Mr. Speaker, I recommend that the House concur in the Senate amendments to H.R. 6055. The Senate's modest amendments to the House version are generally fair compromises and, in the case of the technical amendments, further simplify the subchapter S system and remove additional traps for unwary taxpayers. It is very late in this Congress. We now have an opportunity to bring to a successful conclusion over a decade of hard work on a major protaxpayer simplification project. Enactment of H.R. 6055 will be a major congressional contribution to the small business sector of the economy. The bill should be passed in time to speed its implementation by the IRS and taxpayers in 1983. In closing, it would be remiss of me to fail to call to the attention of the House the hard work and support this project has received from its cosponsors: Senator DOLE and Senator LONG in the other Chamber, and Mr. CONABLE, the ranking minority member of the Committee on Ways and Means. Also, Mr. STARK should be congratulated for the many hours spent perfecting this legislation in the Subcommittee on Select Revenue Measures.

Mr. CONABLE. Mr. Speaker, further reserving the right to object, this bill is long overdue, and I want to congratulate the chairman for finally bringing it to the floor, because it is a good bill and the amendments of the Senate are an improvement over our own work. That is not always the case.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I also want to congratulate the conference committee for making it a better bill, particularly with respect to the passive income test.

Mr. CONABLE. Mr. Speaker, if I may explain some of the changes very briefly, because the chairman has already gone into it, the Senate amendments liberalize H.R. 6055, as passed by the House, and make it easier for families to retain ownership in subchapter S corporations. One of the difficulties there has been the irreversibility of elections made as part of subchapter C and subchapter S corporations.

□ 2040

Specifically, the Senate amendments first liberalize the passive income tax test by raising the allowable amount of passive income to 25 percent from 20 percent.

Second, it allows certain transfers of stock to be made between family members without requiring the corporation to lose its subchapter S status.

Third, it continues the current treatment of fringe benefits for 5 years, something that was not included as originally passed in the House measure.

Fourth, it allows certain corporations which currently cannot do so to reelect subchapter S status. Thus, in some cases, the election can be reversed.

Other technical changes are made that in no way vitiate the corrective effects of this measure.

In my judgment, as passed by the Senate, this is a better bill than we passed previously and the conference report should be approved.

Mr. CONABLE. Mr. Speaker, I know of no other requests and, therefore, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Illinois?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the measure just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

REQUEST FOR CONSIDERATION OF SENATE AMENDMENTS TO H.R. 6056, TECHNICAL CORRECTIONS ACT OF 1982

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6056), to make technical corrections related to the Economic Recovery Tax Act of 1981, the Crude Oil Windfall Profit Tax Act of 1980, and the Installment Sales Revision Act of 1980, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. FRENZEL. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

● Mr. PICKLE. Mr. Speaker, since the gentleman from Minnesota has already objected to the consideration of H.R. 6056, the Technical Corrections Act of 1982, I will not further impose on the time of the House this evening. It had been my intent to reserve the right to object and to ask the gentleman from Illinois, my committee chairman, if that legislation contained a Senate amendment which would allow an airline, in a bankruptcy proceeding, to sell an aircraft to a foreign carrier without running the risk of recapture of any foreign tax credits.

Mr. Speaker, assuming these were the facts, the effect of this amendment would be to insulate companies entering into safe harbor lease transactions from the risk of losing a portion of the tax benefit because of a

possible bankruptcy. This is tantamount to a Federal guarantee.

We already have provided, as part of the recently passed tax bill, generous transitional rules that permit one or two airline carriers to use the old safe harbor leasing rules rather than the new restrictive ones. We should not further expand this unfair advantage by way of an amendment to the technical corrections bill.

Further, it is my understanding that this amendment would allow assets which have had the benefit of investment credit treatment to be sold to a foreign person for use in a foreign country and continue to have that tax advantage. This, I think, is unchartered territory and deserves an extensive review.

While it had been my intent to object to the consideration of H.R. 6056 on the basis of this amendment, I now place this statement in the RECORD so that Members might know of the unfair nature of that provision.●

REQUEST FOR CONSIDERATION OF H.R. 3197, AUTHORIZING APPROPRIATIONS FOR CERTAIN HIGHWAY CONSTRUCTION

Mr. HOWARD. Mr. Speaker, I call up the bill (H.R. 3197) to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, to amend the Highway Safety Act of 1966, to authorize appropriations, and for other purposes, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. ROSTENKOWSKI. Mr. Speaker, reserving the right to object, I would ask the gentleman from New Jersey to explain the bill.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from New Jersey.

Mr. HOWARD. Mr. Speaker, the measure which we bring before the House today is the result of enormous effort and determination on the part of the Committee on Public Works and Transportation to keep at least a minimal highway program going.

Starting early in this session, we moved a major, 4-year highway, safety and transit bill consistent with the needs of the country, but which would have required a revenue increase that failed to materialize.

Then we moved with a scaled-down, 1-year bill that still contained a number of policy changes and other provisions which we thought worthwhile, and also provided authorizations for transit as well as highways and safety. Delays not of our making have made it no longer possible to pursue that measure at this late date—partly because no public transportation bill has emerged from the Senate and partly because of differences between the two Houses on highway legislation.

Now we are down to the wire on the closing day of the regular session, and incidentally the date by which the Federal Highway Administration has told us that some 30 States are out of money for a number of our basic programs. For this reason, we offer the House what is the final opportunity to keep the highway program going without disastrous disruption.

Despite the hour, this measure does have the virtue of having been worked out in advance with the Senate Commerce Committee on Environment and Public Works, which is prepared to accept it as is in lieu of S. 2474 which was passed on the Senate floor today. It can pass and pass today. I particularly want to offer some assurances to Members who might be concerned over the fact that this compromise package, which was only agreed to earlier today, has not been available for examination.

It is well within the budget totals assigned to highway direct spending by the budget resolution; in fact, our committee is well within its direct spending authority for all programs. Policy changes contained in both H.R. 6211 and H.R. 6965 have been held to a minimum.

The bill authorizes $8.865 billion in contract authority from the Highway Trust Fund, of which the bulk goes for the basic Federal-aid programs: Interstate construction, $3.3 billion; interstate 4-R, $1 billion; primary highways, $1.5 billion; bridges, $1 billion; secondary highways, $400 million, and urban highways, $800 million. These represent either increases over existing law or continuation at existing levels.

The remainder of contract authority programs are generally at current levels or somewhat reduced. The same is generally true of appropriated programs for which appropriations are required, whose direct spending authority is allocated to the Committee on Appropriations.

Also contained in this package, which we are bringing up for consideration under unanimous consent, is a basic 1-year extension of the Highway Trust Fund which is needed to continue the authorized programs for 1 year. Essentially an extension of existing law, it does contain language to provide iron-clad assurance—if any be needed—that authorizations in the future cannot exceed the ability of the trust fund to finance without threat of insolvency.

The Byrd amendment in existing law provides as absolute assurance against the trust fund's being oversubscribed, and it has not been invoked in more than 20 years. It certainly would not be triggered by this measure before the House, or any measure which the Committee on Public Works and Transportation intends to bring to the floor in the future.

However, to provide additional assurance to anyone with concerns over this matter, our language also provides that a point of order may lie against floor consideration of any authorization measure which, if enacted, would trigger the Byrd amendment.

Mr. Speaker, this bill represents a compromise: A compromise with budget considerations, a compromise with the Senate, a compromise with those who claim the trust fund needs greater protection, and a compromise with the clock.

I do not ask that it be enacted for the sake of the committee, or in deference to our labors on surface transportation this year. I ask that it be enacted in the interest of the country, the people, the communities, and the industries served by the highway system in this country—a system that is in trouble.

I would like to lend my support and make clarifications on several projects which have been mentioned by several colleagues on this side of the aisle and the other.

Congressman JOHN BREAUX has a project in this legislation which could clear up a severe problem at the intersection of College Drive and Interstate 10 in East Baton Rouge, La. I agree with my colleague that this project should be given expeditious consideration.

In section 116(b), there is a project intended to demonstrate the latest state-of-the-art highway technology. It is stated in this section, among other criteria, that this project should close a gap of not more than 10 miles and connect both highway construction using current technology and older completed highway construction. I agree with my colleague, Mr. SHUSTER, of Pennsylvania, that this project should be given priority consideration and that a segment of route 220 from East Freedom, Pa. south to the Blair County/Bedford County line qualifies for all the specific criteria in this section and shall be eligible for this demonstration project and shall be funded.

In regard to discretionary bridges, I would like to make reference to those bridges mentioned by the committee in House Report 97-555. I agree with my colleagues that these bridges should be given priority consideration.

I also want to make it clear that the committee intends that the relevant legislative history in House Report 97-

555, including sections 105, 107, 118, 120, 127, 133, and 137, concerning special concerns and priorities apply to the appropriate provisions in our 1-year substitute.

I also want to note that the committee will be publishing a revised table of priority primary routes. This table will include the state of Franklin Road in the vicinity of Johnson City, Tenn. This matter was brought to our attention by the distinguished gentleman from Tennessee, JAMES QUILLEN, and I am most pleased that we have been able to take care of this important matter.

I would wholeheartedly agree with my colleague from California, Mr. CLAUSEN, that the Russian River Bridge near Cloverdale, Calif., receive priority funding under the discretionary bridge program and priority consideration should be warranted as referenced in section 122(b).

In addition, I would agree with ROBERT MICHEL, the distinguished minority leader, that the Franklin Street Bridge in Peoria, Ill., should be given priority in the allocation of discretionary bridge funds. The Franklin Street Bridge is in serious need of replacement because it is a narrow two-lane bridge serving 12,000 vehicles daily and has been closed frequently for repairs.

Congressman TRENT LOTT has also expressed his concern about two critical projects in Mississippi. I agree with Mr. LOTT that the Fort Bayou Bridge and the Moss Point-Escatawpa Bridge qualify under the discretionary bridge program and should be given priority consideration. The Fort Bayou Bridge would need $10.3 million and the Moss Point-Escatawpa Bridge would need $27 million.

This bill omits the provision contained in section 133 of H.R. 6965 requiring an investigation by the Comptroller General into competitive bidding practices with respect to highway and mass transit construction in this country. Our sole reason for dropping this provision is that it has proven to be unnecessary, This is because, since the time our highway legislation was first developed this past spring, the study has been requested and is now under way.

The deletion has been discussed by both the House and Senate sides with full agreement that, whether initiated by statute or otherwise, this investigation is urgently needed, has the support of both the House and Senate committees, and should be completed expeditiously.

The purpose of the language in section 108, dealing with resurfacing standards under section 109 of title 23, United States Code, is to assure that enhancement of highway safety result from the carrying out of any project for the resurfacing, restoring, or rehabilitation of any highway. The intent of this provision, morever, is to provide some flexibility to the States in the degree of safety improvement which reasonably can be required in the circumstances of a given project. It is explicitly not the intent of the committee, for example, that new construction standards necessarily be applied in every case.

During the discussions which led to the negotiation of this bill by both House and Senate committees, it was agreed that this would be the case.

One final point on this provision: It is further the intent of both sides that adequate opportunity for public participation be provided as standards mandated under this provision are developed to the point of approval by the Congress.

Congressman JACK BRINKLEY has been instrumental in calling to the committee's attention, the 13th Street viaduct bridge in Columbus, Ga. The bridge is a vital link in an east-west transportation corridor which facilitates the movement of interstate and intracity traffic. Replacement of the bridge is essential for two reasons. The bridge is in a state of disrepair resulting from 57 years of service. If the bridge were to be declared unsafe and placed out of service, the disruption to traffic flow and the progress of commerce would be severe. Second, the existing viaduct no longer meets the necessary traffic capacity standards. Traffic volume presently exceeds 20,000 vehicles per day. The Columbus-Phenix City transportation study calls for additional reliance on the 13th Street corridor for east-west traffic movement. A multilane replacement of the existing viaduct is imperative to provide necessary traffic capacity. The existing 13th Street viaduct bridge has a sufficiency rating under 50 and an estimated replacement cost of $13.8 million. The committee believes it should receive priority consideration under the discretionary bridge program.

Similarly, the Green Bridge in Manatee County, Fla., qualifies under the discretionary bridge program. It has a sufficiency rating of 28.7, and will cost $16.1 million to replace. It is structurally deficient, functionally obsolete, and yet vitally important to surface transportation in the county. The Green Bridge should receive priority consideration when discretionary bridge funds are distributed. The committee wishes to thank Congressman IRELAND for his tireless efforts on behalf of this project.

Chairman ANDERSON and Congressman SHAW have expressed a great concern over the availability of section 402 funding for safety projects related to motorcycle, bicycle, and pedestrian safety. It should be made quite clear that the States may apply for such funds. We are concerned, though, that the States may be laboring under the false impression that these programs are not eligible for funding despite the fact that they have proven successful and effective, and are certainly eligible for funding under requirements set forth in the Code of Federal Regulations.

Congressman GEORGE MILLER has worked hard to make this committee and the Federal Highway Administration aware of funding problems associated with the 24/I-680 interchange in California. The committee believes that the Federal Highway Administration should review its earlier decision to drop funding from this project as eligible under the interstate construction program, and are sympathetic to presentations made by Mr. MILLER that this project is eligible.

Mr. Speaker, I have also discussed with Mr. ANDERSON, Mr. SHUSTER, and Mr. CLAUSEN a number of other projects and policy concerns of other Members which Mr. SHUSTER has agreed to cover on his time. I want the record to show I concur with my colleagues from California and Pennsylvania concerning the intent of the committee and wish to state we are in agreement.

Mr. HOWARD. Mr. Speaker, the measure we intend to bring to the House at this time is a 1-year highway bill so that we can keep a minimal highway program going. It would require only a 1-year extension of the highway trust fund.

I understand the chairman of the Ways and Means Committee is going to object.

Mr. ROSTENKOWSKI. Further reserving the right to object, I would like to inquire of the gentleman from New Jersey whether or not the tax provisions as reported by the Ways and Means Committee are attached to the bill the gentleman is presently offering. Are his tax provisions the same provisions that were approved by the Ways and Means Committee or are they different?

Mr. HOWARD. If the gentleman means the exemption of the taxicab from it, I believe that they are not. It is a 1-year extension of the trust fund, a straight 1-year extension of the trust fund with an added provision that would make it not in order for either the House or the Senate Public Works Committee to bring to the floor of the House a highway bill which would trigger the Byrd amendment, meaning having obligations which could not be met by the funds coming to the trust.

Mr. ROSTENKOWSKI. If the gentleman will answer my question, is the text of the Ways and Means Committee bill included in the provisions offered by the gentleman?

Mr. HOWARD. The answer is no.

Mr. ROSTENKOWSKI. Mr. Speaker, I had hoped to offer the text of H.R. 7092, as reported by the Committee on Ways and Means, as a revenue

title to the legislation of the House Committee on Public Works and Transportation (H.R. 6211 and its substitute, H.R. 6965) which provides highway authorizations for fiscal year 1983.

Under present law, the transfer of highway excise tax revenues to and expenditure authority from the highway trust fund expire after September 30, 1984. The highway excise taxes are scheduled to be reduced or expire after that date. H.R. 7092 would provide a 1-year extension through September 30, 1985, of the highway trust fund and its related excise taxes.

This extension would have permitted the full amount of the fiscal year 1983 trust fund authorizations proposed by the Committee on Public Works and Transportation to be apportioned without triggering the present Byrd amendment. The Byrd amendment was included in the 1956 Highway Revenue Act to insure that the highway trust fund could not operate in a deficit position. This provision requires that, if the trust fund balance plus projected revenues are insufficient to fund existing unpaid authorizations plus the authorizations for the fiscal year in question, apportionments out of the trust fund must be proportionately reduced. Specifically, the current trust fund balance plus estimated revenues for fiscal years 1983 and 1984 are insufficient to cover the outstanding authorizations of $19 billion plus the new authorizations of $9.5 billion in the Public Works Committee's bill. Thus, H.R. 7092 would provide an additional year's revenues—those from fiscal year 1985—in order to fully fund the fiscal year 1983 authorizations.

H.R. 7092 also would transfer the highway trust fund provisions into the trust fund code of the Internal Revenue Code. Presently, the highway trust fund provisions are uncodified and may be found only in a note to section 120 of title 23 of the United States Code. Last year, the Committee on Ways and Means established a trust fund code in the Internal Revenue Code and began transferring the provisions of trust funds within the committee's jurisdiction into this code. Two funds, the black lung disability trust fund and the airport and airway trust fund, have already been transferred.

In transferring the highway trust fund provisions, certain modernizing and conforming changes would have been made—none of which was intended to have substantive effect. For example, the trust fund code provisions in the Internal Revenue Code contain general provisions applicable to all funds on transfers of revenues, required reports and fund investment policies. Therefore, separate provisions for each trust fund are not necessary.

Further, in transferring the highway trust fund provisions that govern expenditures from the fund, certain conforming and updating changes would be made. The present language has not been changed in many years, and still refers to the Federal-Aid Road Act of 1916 and the administrative expenses of the Bureau of Public Roads, The committee's bill would revise this provision to delete these archaic references,

Finally, the bill would provide that expenditures may be made out of the trust fund for all existing authorizations and for those authorizations approved by the Committee on Public Works in the present bill, H.R. 6965. This approach conforms to that presently used in the other trust funds, including the airport and airway trust fund, whereby the Committee on Ways and Means must make a conforming, updating change to the trust fund expenditure provisions when new authorization bills are approved by the Committee on Public Works and Transportation.

Let me emphasize that no substantive change to the legislative jurisdiction of the Committee on Ways and Means or the Committee on Public Works and Transportation would be made or is intended. The Committee on Public Works and Transportation has, and would fully retain, the ability to authorize spending out of the highway trust fund for specified purposes and for specific sums. The Committee on Ways and Means has and would retain the ability to review the overall authorizations so that conforming changes to the trust fund provisions and any adjustments to the trust fund taxes could be made as are necessary to insure the trust fund's continued solvency. Clearly, if authorization levels were significantly increased by the Committee on Public Works and Transportation, it would be the responsibility of the Committee on Ways and Means to raise highway taxes or extend the present taxes for longer periods of time. Clearly, if new authorizations from the trust fund were approved by the Committee on Public Works and Transportation to expand its purposes beyond Federal-aid highways, such as for mass transit operating purposes, the Committee on Ways and Means should review this decision and consider the trust fund ramifications of such a change. Simply stated, the Committee on Ways and Means has no jurisdiction over or interest in specific aspects of highway authorizations reported by the Public Works Committee. We do need to review the overall package to insure that trust fund revenues are sufficient to cover the authorizations and that the broad purposes of the authorizations are consistent with the purposes for which the trust fund was established or has been extended to cover.

Finally, H.R. 7092, would extend for 2 years the present exemption from the fuels excise taxes for fuel used by certain taxicabs, the present expiration date of December 31, 1982, would be extended through December 31, 1984. The committee has not had an opportunity to examine this issue and accordingly agreed to a limited extension. The committee expects to consider this matter next year during a comprehensive review of the highway trust fund.

Since the gentleman's unanimous-consent request does not include the carefully crafted language unanimously developed by our committee, I am unfortunately constrained to object at this time to his request to consider the full year highway bill. I understand the gentleman will bring up a shorter term bill for which there are highway trust fund moneys still available. I hope he proceeds with that effort and that we can resolve the longer term issue when Congress returns on November 29. We share a common goal for continuing the highway program, particularly for refurbishing what needs to be done, but we must proceed not only with a commitment to the authorizations that this work requires but also with a willingness to support the taxes that are necessary to pay for this most important work.

Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

FEDERAL-AID HIGHWAY ACT OF 1982

Mr. HOWARD. Mr. Speaker, I call up the Senate bill (S. 2574) to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, and for other purposes, and ask unanimous consent for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. ROSTENKOWSKI. Mr. Speaker, reserving the right to object, I do this really, wondering whether or not there are any excise tax provisions in the present legislation the gentleman is offering.

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. ROSTENKOWSKI. I yield to the gentleman from New Jersey.

Mr. HOWARD. In the legislation I offer at this time there are no tax provisions whatsoever I say to the gentleman.

Mr. Speaker, I offer this highway extension, which in essence is an authorization version of a continuing resolution, as the only conceivable means

available to keep any sort of highway program going.

This authorization of the basic programs at or near current levels for fiscal year 1982, would tide the program over until the postelection session and the possibility of moving a regular authorization.

Why is this necessary, Mr. Speaker? It is necessary because it has been absolutely impossible to bring up a regular authorization, even a 1-year bill to which the Senate has agreed to take in conference or back to the Senate floor for final passage.

This in turn is due to our inability to obtain from the Committee on Ways and Means a simple extension of the highway trust find or 1 year, which is all that would be necessary to extend the program authorizations for 1 year.

We requested such an extension from the Committee on Ways and Means but were confronted instead with a 1-year extension that was accompanied by a substantial rewrite of the Highway Revenue Act. It would have made it impossible for the Committee on Public Works and Transportation to exercise its authorizing jurisdiction—with respect either to amounts or purposes—affecting expenditures of funds from the highway trust fund.

Any substantive amendment to the highway program would have required an amendment to the Internal Revenue Code, which naturally would have to originate in the Committee on Ways and Means.

This would have disrupted a partnership which has prevailed ever since enactment of the Highway Revenue Act of 1956 and in effect reconstituted the Committee on Ways and Means as the authorizing committee for the Federal-aid highway program.

We do not believe the House would intend such a radical restructuring of committee responsibilities; not without adequate notice, not without hearings, not without a vote of the full House under an open rule when alternatives could at least be considered.

We therefore requested the Rules Committee to grant a modified open rule on the Ways and Means Committee's proposal, making possible the offering of a genuine, simple, 1-year extension of the trust fund. This we requested in lieu of the closed rule sought by the Committee on Ways and Means. In the absence of a compromise between the two committees, the Committee on Rules declined to grant any rule whatever.

Since that time, we have attempted to work out a compromise, with the Committee on Ways and Means, which disclaims any designs on our jurisdiction. Its principal concern, we have been told, is over the aggregate amounts that could be authorized out of the highway trust fund. But, if you read the Ways and Means language—just read the language of H.R. 7092 as reported and for which a closed rule was formally requested—you'll quickly disabuse yourself of that notion.

We have been absolutely unable to reach a compromise with the Committee on Ways and Means, which has continued to insist on language which is unacceptable, and should be unacceptable, to supporters of the highway program in this House or out in the country.

Substantively and procedurally, such a measure has no place in a 1-year extension.

We have worked out an agreement on highway authorizations which the Senate has agreed to take instantly. But, we need an extension of the trust fund to do this. We offered such an extension, with language assuring that the trust fund will be protected, and there is objection. Therefore, there is no alternative to the measure we place before the House. All I can say for it is that it is better than nothing.

This provision extends authorizations for the interstate construction program for 1 year at a level of $3.225 billion. Interstate 4R is continued, also for 1 year, by existing law at $800 million.

We also approve the apportionment factors for the Interstate System, without which no funds can be apportioned for the new fiscal year.

Also in the bill are authorizations at current funding levels for the following programs: Primary, secondary, urban, forest highways, public lands highways, economic growth centers, great river road, and priority primary.

This measure also extends other programs at current funding levels through December 15, 1982: bridge replacement and rehabilitation, hazard elimination, rail-highway crossings, and discretionary bridges. Existing Buy America provisions also are extended.

It is to be regretted that the legislative process has been frustrated by this last minute problem with what should have been a simple, 1-year extension of the trust fund. Let us not compound the problem by allowing the program virtually to come to a halt on the spot.

I urge the enactment of the bill.

Mr. ROSTENKOWSKI. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2574

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal-Aid Highway Act of 1982".

REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR THE INTERSTATE SYSTEM

SEC. 102. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984," and inserting in lieu thereof the following: "the additional sum of $3,300,000,000 for the fiscal year ending September 30, 1984,".

APPROVAL OF INTERSTATE COST ESTIMATE

SEC. 103. The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1984, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 97-53 of the Committee on Public Works and Transportation of the House of Representatives.

OBLIGATION LIMITATION AND ALLOCATION FORMULA

SEC. 104. (a) Notwithstanding any other provision of law, the total of all obligations for Federal aid highways and highway safety construction programs for fiscal year 1983 shall not exceed $8,200,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, and section 9 of the Federal-Aid Highway Act of 1981, except chapter 3 of the Urgent Supplemental Appropriations Act of 1982 (Public Law 97-216), and obligations with respect to Union Station under Public Law 97-125. Obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code.

(b) For the fiscal year 1983, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1982, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and (c), the Secretary shall—

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code.

(2) after August 1, 1983, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

(e)(1) Section 1106(b) of the Omnibus Budget Reconciliation Act of 1981 is repealed.

(2) Section 1106(c) of the Omnibus Budget Reconciliation Act of 1981 is amended to read as follows:

"(c) For the fiscal year 1982, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal year.".

(3) Section 1106(d) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "periods" and inserting in lieu thereof "period" and by striking out "and October 1 through December 31, 1982,".

(4) Section 1106(c)(2) of the Omnibus Budget Reconciliation Act of 1981 is amended by striking out "and after August 1, 1983,".

AUTHORIZATIONS

SEC. 105. (a) For the purpose of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated:

(1) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban area, and the priority primary routes, out of the Highway Trust Fund, $1,500,000,000 for the fiscal year ending September 30, 1983. For the Federal-aid secondary system in rural areas, out of the Highway Trust Fund, $425,000,000 for the fiscal year ending September 30, 1983.

(2) For the Federal-aid urban system, out of the Highway Trust Fund, $775,000,000 for the fiscal year ending September 30, 1983.

(3) For Indian reservation roads and bridges, $83,000,000 for the fiscal year ending September 30, 1983.

(4) For carrying out section 215(a) of title 23, United States Code—

(A) for the Virgin Islands, not to exceed $5,000,000 for the fiscal year ending September 30, 1983;

(B) for Guam, not to exceed $5,000,000 for fiscal year ending September 30, 1983; and

(C) for American Samoa, not to exceed $1,000,000 for the fiscal year ending September 30, 1983.

Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States Code.

(5) For the Commonwealth of the Northern Mariana Islands, not to exceed $1,000,000 for the fiscal year ending September 30, 1983. Sums authorized by this paragraph shall be expended in the same manner as sums authorized to carry out section 215 of title 23, United States Code. Sums authorized by this paragraph shall be available for obligation at the beginning of the period for which authorized in the same manner and to the same extend as if such sums were apportioned under chapter 1 of title 23, United States Code.

(6) For the forest highways, out of the Highway Trust Fund, $33,000,000 for the fiscal year ending September 30, 1983.

(7) For public lands highways, out of the Highway Trust Fund, $16,000,000 for the fiscal year ending September 30, 1983.

(8) For economic growth center development highways under section 143 of title 23, United States Code, out of the Highway Trust Fund, $29,000,000 for the fiscal year ending September 30, 1983.

(9) For the Great River Road, out of the Highway Trust Fund, $19,000,000 for the fiscal year September 30, 1983, for construction or reconstruction of roads on a Federal-aid highway system.

(10) For access highways under section 155 of title 23, United States Code, $15,000,000 for the fiscal year ending September 30, 1983.

(b)(1) For each of the fiscal years 1984, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available undr this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(k) In the case of priority primary routes, $125,000,000 of the sums authorized for the fiscal year ending September 30, 1983, by subsection (a)(1) of this section for such routes, shall not be apportioned. Such $125,000,000 of such authorized sum shall be available for obligation on the date of apportionment of funds for such fiscal year, in the same manner and to the same extent as the sums apportioned on such date.

(d) Section 163(p) of the Federal-Aid Highway Act of 1973 is amended by inserting after "September 30, 1982," the following: "and $50,000,000 for the fiscal year ending September 30, 1983,".

INTERSTATE RESURFACING

SEC. 106. Section 105 of the Surface Transportation Assistance Act of 1978 is amended by striking out "and not to exceed $800,000,000 for the fiscal year ending September 30, 1984." and inserting in lieu thereof "not to exceed $1,000,000,000 for the fiscal year ending September 30, 1984.".

HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION

SEC. 107. (a) Subsection (e) of section 144 of title 23, United States Code, is amended by striking "and September 30, 1982," and inserting in lieu thereof "September 30, 1982, and September 30, 1983,";

(b) Subsection (g) of such section is amended by striking "and September 30, 1982," each place that it appears and inserting in lieu thereof "September 30, 1982 and September 30, 1983"; and

(c) Section 202(6) of the Surface Transportation Assistance Act of 1978 is amended by striking "and $900,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "$900,000,000 for the fiscal year ending September 30, 1982, and $1,000,000,000 for the fiscal year ending September 30, 1983.".

SAFETY CONSTRUCTION AUTHORIZATIONS

SEC. 108. Section 202(8) of the Surface Transportation Assistance Act of 1978 is amended by striking "and $200,000,000 for the fiscal year ending September 30, 1982." and inserting in lieu thereof "$200,000,000 for the fiscal year ending September 30, 1982, and $200,000,000 for the fiscal year ending September 30, 1983.".

RAIL-HIGHWAY CROSSINGS

SEC. 109. Subsection (b) of Section 203 of the Highway Safety Act of 1973 as amended by the Highway Safety Act of 1978 is amended by striking "and September 30, 1982." and inserting in lieu thereof, "September 30, 1982, and September 30, 1983.".

ENERGY IMPACTED ROADS

SEC. 110. (a) Section 105 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the State highway departments may give priority to projects for the reconstruction, resurfacing, restoration, or rehabilitation of highways which are incurring a substantial use as a result of transportation activities to meet national energy requirements and which will continue to incur such use, and in approving such programs the Secretary may give priority to such projects.".

(b) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(k) Notwithstanding any other provision of this section, the Federal share payable on account of any project under this title to reconstruct, resurface, restore, and rehabilitate any highway which the Secretary determines, at the request of any State, is incurring a substantial use as result of transportation activities to meet national energy requirements and will continue to incur such use is eighty-five per centum of the cost of such project.".

SEC. 111. Section 10526(a) of title 49, United States Code, is amended—

(1) by striking "or" at the end of paragraph (12);

(2) by striking the period at the end of paragraph (13), and inserting in lieu thereof "; or"; and

(3) by adding at the end thereof the following:

"(14) transportation of broken, crushed or powdered glass.".

SEC. 112. Section 508 of the Airport and Airway Improvement Act of 1982 is amended by adding at the end thereof the following new subsection:

"(e) Use of Certain Apportioned Funds for Discretionary Purposes.—(1) Subject to paragraphs (2) and (3), if the Secretary determines, based upon notice provided under section 509(e) or otherwise, that any of the amounts apportioned under section 507(a) will not be obligate during a fiscal year, the Secretary may obligated during such fiscal year an amount equal to such amounts at his discretion for any of the purposes for which funds are made available under section 505.

"(2) The Secretary may make obligations in accordance with paragraph (1) only if the Secretary determines that the total of obligations for such fiscal year for purposes of section 505 will not exceed the amount authorized for such fiscal year under section 505(a) and if the Secretary determines that sufficient amounts are authorized under section 505(a) for later fiscal years for obligation for such apportioned amounts which were not obligated during such fiscal year and which remain available under section 508(a).

"(3) For purposes of amounts apportioned for fiscal year 1982, the Secretary may make the determinations under paragraphs (1) and (2) on or before October 30, 1982. For purposes of any limitation on obligations imposed by law, amounts obligated in accordance with this subsection on or before October 30, 1982, shall be deemed to have been obligated during fiscal year 1982 to the extent that such amounts, when added to amounts obligated on or after October 1, 1981, and before October 1, 1982, for purposes of section 505, do not exceed $450,000,000.".

SEC. 113. (a) Section 127 of title 23, United States Code, is amended by adding at the end thereof the following: "Notwithstanding any other limitation relating to vehicle widths contained in this title, a State may permit trucks or combinations thereof having a width of not more than 102 inches to operate over interstate highways, National Defense Highways, or any other qualifying Federal-aid highway as designated by the Secretary of Transportation, with traffic lanes designed to be a width of 12 feet or more.".

(b) The width limitation described in the preceding subsection shall be exclusive of safety-related appendages, such as rear view mirrors, turn signal lamps, marker lamps, steps and handholds for entry and egress, flexible fender extensions, mud-flaps and splash and spray suppressant devices, load-induced tire bulge, energy conservation devices or designs, refrigeration units or air compressors, which the Secretary of Transortation may interpret as necessary for safe and efficient operation of commercial motor vehicles.

(c) No State may enact or enforce any law denying reasonable access to commercial motor vehicles subject to title 23, United States Code, to and from the Interstate Highway System and the Federal-aid primary system and terminals and facilities for food, fuel, repairs, and rest.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. HOWARD:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Federal-Aid Highway Act of 1982".

SEC. 2. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of $3,625,000,000 for the fiscal year ending September 30, 1984," and inserting in lieu thereof the following: "the additional sum of $3,225,000,000 for the fiscal year ending September 30, 1984,".

SEC. 3. The Secretary of Transportation shall apportion for the fiscal year ending September 30, 1984, the sums authorized to be apportioned for such year by section 108(b) of the Federal-Aid Highway Act of 1956, as amended, for expenditures on the National System of Interstate and Defense Highways, using the apportionment factors contained in revised table 5 of the committee print numbered 97-53 of the Committee on Public Works and Transportation of the House of Representatives.

SEC. 4. (a) For the purpose of carrying out the provisions of title 23, United States Code, the following sums (multiplied by a factor determined by dividing the maximum number of days in the fiscal year ending September 30, 1983, for which funds are appropriated by a joint resolution making continuing appropriations for such fiscal year, by 365 days) are hereby authorized to be appropriated:

(1) For the Federal-aid primary system in rural areas, including the extensions of the Federal-aid primary system in urban areas, and the priority primary routes, out of the Highway Trust Fund, $1,500,000,000 for the fiscal year ending September 30, 1983. For the Federal-aid secondary system in rural areas, out of the Highway Trust Fund, $400,000,000 for the fiscal year ending September 30, 1983.

(2) For the Federal-aid urban system, out of the Highway Trust Fund, $800,000,000 for the fiscal year ending September 30, 1983.

(3) For the forest highways, out of the Highway Trust Fund, $33,000,000 for the fiscal year ending September 30, 1983.

(4) For public lands highways, out of the Highway Trust Fund, $16,000,000 for the fiscal year ending September 30, 1983.

(5) For economic growth center development highways under section 143 of title 23, United States Code, out of the Highway Trust Fund, $50,000,000 for the fiscal year ending September 30, 1983.

(6) For the Great River Road, out of the Highway Trust Fund, $25,000,000 for the fiscal year ending September 30, 1983, for construction or reconstruction of roads on a Federal-aid highway system.

(b) For fiscal year 1984, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for expenditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended and shall also be available for expenditure to carry out section 152 of title 23, United States Code.

(c) In the case of priority primary routes, $125,000,000 (multiplied by the factor determined under subsection (a) of this section) of the sums authorized for the fiscal year ending September 30, 1983, by subsection (a)(1) of this section for such routes, shall not be apportioned. Such $125,000,000 (multiplied by such factor) shall be available for obligation on the date of apportionment of funds for such fiscal year, in the same manner and to the same extent as the sums apportioned on such date, except that such $125,000,000 (multiplied by such factor) shall be available for obligation at the discretion of the Secretary of Transportation only for projects of unusually high cost or which require long periods of time for their construction. Any part of such $125,000,000 (multiplied by such factor) not obligated by such Secretary on or before the last day of such fiscal year shall be immediately apportioned in the same manner as funds apportioned for the next succeeding fiscal year for primary system routes, and available for obligation for the same periods as such apportionment.

SEC. 5. (a) The following sums are hereby authorized to be appropriated:

(1) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, out of the Highway Trust Fund, $900,000,000 (multiplied by the factor determined under section 4(a) of this Act) for the fiscal year ending September 30, 1983.

(2) For projects for elimination of hazards under section 152 of title 23, United States Code, out of the Highway Trust Fund, $200,000,000 (multiplied by the factor determined under section 4(a) of this Act) for the fiscal year ending September 30, 1983.

(b) Section 203(b) of the Highway Safety Act of 1973, as amended, is amended by striking out "and $190,000,000" and inserting in lieu thereof "$190,000,000" and by inserting after "September 30, 1982" the following: ", and $190,000,000 (multiplied by the factor determined under section 4(a) of the Federal-Aid Highway Act of 1982) for the fiscal year ending September 30, 1983".

(c)(1) Section 144(e) of title 23, United States Code, is amended by striking out "and September 30, 1982" and inserting in lieu thereof "September 30, 1982, and September 30, 1983".

(2) Section 144(g) of title 23, United States Code, is amended by inserting after the third sentence the following new sentences: "Of the amount authorized for the fiscal year ending September 30, 1983, by paragraph (1) of section 5(a) of the Federal-Aid Highway Act of 1982, all but $200,000,000 (multiplied by the factor determined under section 4(a) of such Act) shall be apportioned as provided in subsection (e) of this section. $200,000,000 (multiplied by such factor) of the amount authorized for such fiscal year shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such $200,000,000 (multiplied by such factor) shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement or rehabilitation cost of each of which is more than $10,000,000, and for any project for a highway bridge the replacement or rehabilitation costs of which is less than $10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge.".

SEC. 6. Section 401(a) of the Surface Transportation Assistance Act of 1978 is amended by inserting after "or by any Act amended by this Act" the following: "or, after the date of enactment of this Act, any funds authorized to be appropriated to carry out this Act, title 23, United States Code, or the Urban Mass Transportation Act of 1964".

Mr. HOWARD (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, was this a unanimous-consent request made to bring up this bill?

The SPEAKER pro tempore. There was a unanimous-consent request made, and no objection was heard.

Mr. FRENZEL. And that is the procedure we are operating under now?

The SPEAKER pro tempore. That is correct.

Mr. FRENZEL. Further reserving the right to object, may I inquire as to the chairman's intentions?

Mr. HOWARD. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman.

Mr. HOWARD. I will state to the gentleman, as you may know, we had a 1-year extension of the highway bill. We have gone to the Ways and Means Committee asking, as is routine and normal, a 1-year extension of the highway trust fund to be able to cover the amount of money in this legislation.

As you know, the Ways and Means Committee passed a resolution and went to the Rules Committee with it which would not only extend the trust fund for 1 year but would take the entire jurisdiction of authorizing highway legislation away from the Public Works and Transportation Committee and vest it in the Ways and Means Committee.

This caused an impasse because the Public Works and Transportation Committee, which has been working this program very well, fiscally responsibly, never having a dollar due when a dollar was not there to pay for it, felt we should not, by an amendment from the Ways and Means Committee, give our jurisdiction up to the Ways and Means Committee.

I previously asked unanimous consent to be able to bring up a 1-year bill because, as you know, there was no highway money in the continuing resolution just passed and this caused a great deal of difficulty around the Nation because the program died this morning.

We find that as of this morning 31 States in this Nation are without funding for various items such as interstate, primary, secondary, urban, or bridge programs in their States.

So the chairman of the Ways and Means Committee just objected to us having a 1-year bill. So what I am attempting to bring before the House now is what amounts to perhaps a 6-month bill or a 3-month bill, depending upon the payout, which does not require the Ways and Means Committee to extend the trust fund at all, which again shows how fiscally responsible we have been in Public Works, because we have gone 3 to 6 months now without any additional increase and have enough money in the funding to take care of it.

So all we are attempting to do now is to try and get by for a few more months because what the Ways and Means Committee did has caused a tremendous disruption in the highway programs of at least 31 States. So this is the second bill, a short-term measure.

□ 2050

Mr. FRENZEL. I thank the gentleman.

Further reserving the right to object, I am overwhelmed by the financial responsibility. I wonder if the gentleman would tell me about section 6. You are extending current "buy America" requirements that are now in the law, without extension or addition?

Mr. HOWARD. The gentleman is correct. That is in section 6.

Mr. FRENZEL. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey (Mr. HOWARD) that the amendment in the nature of a substitute be considered or read and printed in the RECORD?

Mr. WALKER. Mr. Speaker, reserving the right to object, can we have some description as to what this amendment does?

Mr. HOWARD. If the gentleman will yield, this is a short-term continuation of the basic elements of the highway program, interstate, primary, secondary, bridge, urban, for a short time, to stay within the funding that will be available, without any extension of the highway trust fund, so that when we come back in the lameduck session, perhaps, we will then have to address this problem once more. But it at least will permit the programs to go on during this interim period for the States.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey (Mr. HOWARD) that the amendment in the nature of a substitute be considered as read and printed in the RECORD?

Mr. SHAW. Mr. Speaker, reserving the right to object, I would like to inquire of the chairman concerning the highway beautification provision.

Mr. HOWARD. Gone.

Mr. SHAW. Particularly the provision as to billboards and the compensation by the States?

Mr. HOWARD. Absolutely gone. This is a basic, barebones bill. The other policy changes that our committee had voted out are gone. There were 40-some Members who had special needs in their districts for special projects, justifiable needs that were in the legislation, most of which would have been in the 1-year bill that was just objected to. They are all gone also. We are going to have to come back to this at some other time. This is just the barebones continued funding for the major portions of this legislation.

Mr. SHAW. I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey (Mr. HOWARD) that the amendment in the nature of a substitute be considered as read and printed in the RECORD?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from New Jersey (Mr. HOWARD).

The amendment in the nature of a substitute was agreed to.

Mr. CLAUSEN. Mr. Speaker, I rise in support of this extension and urge its prompt adoption. Like the bill we had hoped to offer along with trust fund extension but were prevented from offering by objection, this one can be taken up quickly by the Senate and passed.

It is absolutely vital that we authorize the basic, noninterstate programs funded by the trust fund, and I would emphasize that these can be funded from existing resources without any extension of the fund. It is also essential that we approve the table V apportionment factors for the interstate program to permit this important construction work to go forward.

Also provided in this measure is extension of the bridge replacement, hazard elimination, rail-highway crossing, and discretionary bridge programs.

The only further comment I would have at this late hour on the last day of the session is this: My fellow members of the committee leadership, Chairman HOWARD of the full committee, Chairman ANDERSON of the Surface Transportation Subcommittee, and the gentleman from Pennsylvania, Mr. SHUSTER, the ranking minority member of the subcommittee, have been unsparing in their efforts to get at least a 1-year highway bill with a 1-year extension of the highway trust fund enacted into law.

This was not to be and it should be no mystery to any Member of this body where the problem lies. Partisanship aside, the November elections aside, if any of these gentlemen is subjected to criticism for the outcome of the trust fund fiasco, he will find me in this corner. I want the record to show that there could not have been a greater demonstration of good faith, diligence, reason, and responsibility in the handling of this difficult matter than was exhibited by my colleagues from New Jersey, Pennsylvania, and California. I will be standing with them when we come back for the lame-duck session—and I very much hope in the next Congress—to renew and continue the fight for a highway program worthy of this Nation and in

keeping with the problems it faces. The issue is not the defense of narrow committee interests but the viability of the program itself.

I urge enactment of the bill.

Mr. ANDERSON. Mr. Speaker how nice it would have been if I could have stood here and enthusiastically asked our colleagues to support us in passing a 1-year highway bill. But now, I cannot do that. I cannot say that the Public Works Committee is bringing you a good bill that you can be proud of. I cannot say that we are responsibly helping to fulfill this Nation's highways needs.

I can say, that given the circumstances, we have no choice but to approve a bill that continues our vital highway programs for a few months. If we do not do this, of course, the programs expire. That would be tragic. That is something we absolutely must not do.

We will not leave here tonight knowing that we have done something good for our constituents. In truth, we are doing nothing to address the deteriorating highways in our districts.

But we must not hasten their deterioration by doing nothing tonight. We must pass this bill.

I am not a medical doctor, Mr. Speaker. But I understand that members of that profession have a motto. If you can do no good, at least do no harm.

Our patient is the Nation's highway system. We will do no good for it tonight. But we must not kill it.

I urge support for this legislation.

● Mr. SHUSTER. Mr. Speaker, I rise in support of this simple 3-month extension of the Federal-aid highway program, but I am deeply disappointed that obstacles were laid in our way to prevent a 1-year authorization of this legislation. It is bad policy and bad precedent to fund this program for only 3 months because during the lameduck session, we will have to come back for another authorization. The States have enough serious problems with Congress issuing different signals every year, let alone every 3 months.

Let me inform my colleagues that this 3-month extension was the absolute last course we wanted to take. The 1-year extension, which we were prepared to offer, had been cleared by the Senate and could now be on its way to the White House. That 1-year bill was a barebones measure that deferred all major policy decisions until next year but provided increased funding for maintenance of our interstate system and for bridges, critical areas of concern.

I am disappointed that significant roadblocks kept us from taking the best course for the highway program in this country. However, I urge my colleagues to support this simple extension of existing law and call for your support in the lameduck session for a further authorization to get the program through fiscal year 1983.●

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4441) entitled "An act to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1018) entitled "An act to protect and conserve fish and wildlife resources, and for other purposes."

CONFERENCE REPORT ON H.R. 6267, NET WORTH GUARANTEE ACT

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 603 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 603

Resolved, That upon the adoption of this resolution it shall be in order, clause 2 of rule XXVIII to the contrary notwithstanding, to consider the conference report on the bill (H.R. 6267) to revitalize the housing industry by strengthening the financial stability of home mortgate lending institutions and ensuring the availability of home mortgage loans, said conference report shall be considered as having been read when called up for consideration, and all points of order against said conference report for failure to comply with the provisions of clauses 3 and 4 of rule XXVIII are hereby waived.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, the resolution (H. Res. 603) is the rule providing for the consideration of the conference report on the bill (H.R. 6267) to revitalize the housing industry by strengthening the financial stability of home mortgage lending institutions and insuring the availability of home mortgage loans.

This is extraordinarily important legislation and the rule provides the only method by which the House can deal with this matter within the difficult time contraints we face at this moment.

The rule provides waivers of points-of-order under certain rules of the House which otherwise would lie against the conference report (H. Rept. No. 97-899).

It waives clause 2 of rule XXVIII, the 3-day layover requirement, which would prevent consideration of this conference report until December, under the present schedule. It also waives clause 3 of rule XXVIII, relating to scope of conference reports, which would prevent consideration of the conference report at all. To the best of my knowledge, there is no controversy over these two waivers.

However, there is some controversy over the waiver of clause 4 of rule XXVIII. This general waiver, applied to a conference report, is similar to a closed rule, and there is a body of thought within the House that there should be separate votes in the House on some provisions.

The Committee on Rules recommends that the rule be waived based on the difficult political and parliamentary situation.

To explain the situation, I would note that the Senate took the original Net Worth Guarantee Act, which had overwhelmingly passed the House May 20th by a vote of 272 to 91, and added substantial new matter. Although there has been some criticism of this procedure, it is the constitutional prerogative of each House to determine the form in which it will act, and go to conference, on bills from the other House.

The managers on the part of the House included the able and knowledgeable gentleman from Rhode Island (Mr. ST GERMAIN), the gentleman from Wisconsin (Mr. REUSS), the gentleman from Illinois (Mr. ANNUNZIO), the gentleman from Ohio (Mr. STANTON), and the gentleman from Ohio (Mr. WYLIE). Our managers acted with caution, skill, and integrity to present to the House a conference report which is limited substantially to propositions which were either contained in the original House bill or in related bills on which the House has acted in recent sessions.

I think there is general agreement that this bill addresses, creatively and responsibly, the most pressing issues threatening the viability of depository institutions.

The opposition to this rule centers on the desire to obtain a separate vote on a provision of the bill which is central to the survival of thrift institutions. The opposition is not to the provision itself but to its applicability in conjunction with problems in the laws of certain States.

These problems, Mr. Speaker, are better addressed in those State capitols than by endangering the enactment of one of the most important bills before this Congress.

The opponents of the rule will argue that they only want a separate vote on this one little provision. But I would like to make clear that a vote on the provision would kill the conference agreement, a measure of vital importance to preserving a crucial segment of our economy.

Mr. Speaker, the conference report will permit the Federal Government to assist small thrift institutions in maintaining their capital viability through the net worth guarantee program.

There is some criticism of provisions which permit thrift institutions to divert a small portion of their loan portfolio in shorter term investments. The survival of the housing industries depends of the viability of the thrifts and this modest flexibility will greatly strengthen the stability of these institutions.

The conference agreement will make it possible to create a banking instrument competitive with money market funds. This will permit money now benefiting private investment interests to return to the banking community where it will be available to strengthen housing, small business expansion, and consumer purchasing.

There are a wide number of minor provisions of vital importance to improving the flexibility, management, and strength of all banking institutions and supervisory authorities.

The conference agreement is a sound and reasonable approach to one of the greatest problems now facing the country. The rule provides the only method by which the House can deal with this matter and I urge the adoption of the resolution.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me say right up front that I have no objections to this rule. This rule makes in order the consideration of the conference report on H.R. 6267, the depository institutions bill. It waives clause 2 of rule 28, which requires a 3-day waiting period before a conference report can be considered. In 3 legislative days, we would be gone and this legislation is needed now. The rule also waives clauses 3 and 4 of rule 28, which is necessary because the conference report is beyond the scope of the legislation committed to conference and the conferees agreed to provisions which would not have been germane to the House bill.

Mr. Speaker, I realize some of the issues have not been debated by this House. But these are not new issues. They have been debated before Congress for decades. The difference is that now there is a need as there has never been before. This need is felt by all, including the administration which strongly supports expeditious passage of this legislation.

Mr. Speaker, without such a rule, this badly needed legislation could not be considered. Why is this legislation badly needed? That can be summed up in three words—Penn Square Bank. Not only was its failure felt in Oklahoma, but also right here in Washington in the House of Representative's own Federal credit union. This "ripple effect" was felt to some degree in every State in the Union. This cannot be allowed to happen again.

Mr. Speaker, we promised this country after the Depression of the 1930's that they would never again have to live through the terror-filled days of bank failure. This bill would help us keep that promise.

Mr. Speaker, I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I take this time very sadly and with great regret. It certainly has never been my posture to oppose a rule. Moreover, I certainly think all Members want to do something to assist the ailing thrift industry, the savings and loans. But this rule is an outrage.

We passed a bill which would have saved the savings and loans. But our bill did not invite the takeover of small banks throughout the United States by big banks. It did not promote monopolies. It went over to the Senate, and title III, an entirely different bill that had passed the Senate, a monopolistic bill which invades the rights of States, invites big banks to do branch banking across State lines, was embodied as title III of this bill, without any consideration on the part of the House—no consideration whatever.

Normally, Mr. Speaker, I would be sorely constrained against opposing a rule. Unfortunately, those of us to whom this grave problem had been called by small individual bankers throughout the United States tried our earnest best to implore the Rules Committee to separate these issues. Let us take action on the vitally needed rescue work for the savings and loans, but not leave the small independent banks victims to the greedy takeover of the biggest.

I want to ask every one of you to look around your States. Are you not familiar with the rapid rate at which local independently owned banks are being gobbled up today?

What has built America? What has built the small towns of America? What has permitted young Americans to go into business for themselves? It has been the locally owned banks, it has been somebody in that bank who knows you, somebody who understands you as a human being. That is going to go out the window. It is rapidly going out the window today. It is not the small banks who need any help that would be provided in this bill. They are not the ones who have loaned money to Mexico. They are not the ones who have loaned money to foreign countries that cannot repay.

Now, if you want a bailout for the big banks, that is one thing—and I might support it. But I do not think we are doing the right thing, coming in here at the last minute, asking Members of the House to swallow a proposition that is monopolistic by its very nature, and it swallows up small independent banks at an ever-accelerating pace throughout the United States.

□ 2100

I wish it had been possible for us to have come in here united, to support that bill which was passed by the House, to help the savings and loans. They need that help. But I cannot in good conscience sit idly by and swallow this kind of a raid upon the very basis of free enterprise as it has existed in towns and small cities throughout America.

For that reason, Mr. Speaker, I am constrained to ask for a vote against the previous question and the rule.

Mr. MINISH. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from New Jersey.

Mr. MINISH. I thank the majority leader for yielding.

If I understood what the majority leader said, he believes that the big banks are gobbling up small banks today. And if they are doing that, what is the difference whether we pass the bill or not. They are still doing it. And I do not stand here as a proponent of the large banks. I think the majority leader knows that. But I am interested in the future health and viability of the Nation's savings and loans.

Mr. WRIGHT. Well, I am too. And I think the difference is that this Garn bill as it passed the Senate, and I do not think its provisions are well known here.

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. WRIGHT) has expired.

Mr. MOAKLEY. Mr. Speaker, I yield 3 additional minutes to the gentleman from Texas.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Michigan.

Mr. DINGELL. I thank the distinguished majority leader.

I have served in this body for a few years. I have observed a lot of things. One of the things I have observed has been that on the night of adjournment a lot of curious things tend to happen, because everybody is in a hurry, they want to get out of here, there are matters of concern at home, elections pending. And I am not aware of any reason why this matter has to be decided tonight. I am not aware of any strong reason why the bill has to be considered essentially under a closed rule, why all of its parts cannot be voted on and considered in an orderly fashion, why the debate cannot take place in a forum, in a climate where it can be more serenely and properly considered.

And I am not aware of any urgent reason why the House should be denied an opportunity to consider all the parts of this bill separately, and why the House should be denied the opportunity to consider language which has come from the Senate, which was not adopted in the House, and which is at wide variance with the actions which were taken by the House.

And I think that simply putting the rule over would perhaps obviate that. I am aware my good friend, the gentleman from Massachusetts, has presented the rule. I am satisfied he wants a vote on it. It always pains me to differ with him, because he is a valuable Member of the body. But I do think this is a matter that could be voted down and a more carefully crafted rule brought forward to afford the House an opportunity to consider this matter at a more appropriate time.

Mr. MOAKLEY. Mr. Speaker, I yield 4 minutes to the gentleman from Rhode Island (Mr. ST GERMAIN), the chairman of the Committee on Banking, Finance and Urban Affairs.

Mr. ST GERMAIN. Mr. Speaker, I listened very attentively to the gentleman from Texas, our respected majority leader. I cannot, would not ever dare to trade with or to attempt to oppose him oratorically. He is the master.

However, just as I would not compare myself to him oratorically, at this point I would not accede to him when it comes to knowledge of legislation that I bring to the floor.

He and I have been friends for many years, and he is still my friend and will be after this evening. I am rather disappointed, however, that in many instances in the past, when he needed help, he came to me and we discussed the legislation, and how I could help him with legislation in my committee.

This time not word one until I asked him to chat a few moments earlier today, when I heard he would oppose the rule.

Frankly, what he said is absolutely accurate as to the conclusion. But unfortunately, his premise does not exist. Nothing in title III of this bill does anything like he stated. Title III of the bill basically gives to the savings and loans and the mutuals, the thrift industry of this country, commercial lending powers.

The Congress of the United States over the years mandated that the thrifts do nothing but real estate lending, and so they lent short and they built America, built housing. They were responsible for the realization of the American dream.

In so doing, they now stand with long-term mortgages in their portfolios, 5, 6, 9½ percent.

We all know what the interest rates are that you have to pay today in order to attract money into an institution. They are all in trouble. We passed legislation earlier in the House—net worth guarantee and the regulators bill. The regulators bill is the one that has to do with mergers, and we have strengthened that. If we had had the legislation that we will vote on tonight, adopted 3, 4, 6 months ago, Citicorp would not have been able to go to California and take over the California Fidelity.

And unless we adopt this legislation tonight, everything the gentleman from Texas said would happen will happen, because absent this legislation thrifts are going bankrupt by the dozens per week, and they will be acquired by the commercials, and if we do not adopt this legislation, that which he says will happen, will happen.

So I say to the Members of this House, this rule is essential to save the thrift industry of this country. It is not a big bank bill. It is not a small bank bill. It is a bill for the future of the financial industry of this country. And if those small banks in Texas want to keep their heads in the sand, they are going to see Sears and Roebuck, Prudential, and others roll over them. There will not be a one of them left.

This bill is the only salvation for the thrift industry, for the independent banker, and for the people of this country. And for that reason, I ask that we do indeed adopt this rule by an overwhelming vote.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from North Dakota (Mr. DORGAN).

Mr. DORGAN of North Dakota. Mr. Speaker, I think it is important to point out that all of us share a common goal of wanting to help the thrift institutions in this country.

Our No. 1 goal is to help the thrifts. But No. 2, we ought to make certain we are not tearing down interstate banking prohibitions that now exist in some States in this country.

□ 2110

The fact is a State like North Dakota that has a network of community banks will be disadvantaged by this kind of legislation. I'm not opposed to the provisions that help the thrifts, but this bill goes much further.

The fact is that Citicorp, a money center bank, recently purchased a chain of savings and loans in the State of California. That purchase was approved by the Federal Reserve Board.

It is a further fact that expanding the authorities of savings and loans in this country and allowing them to be purchased by money center banks allows money center banks to avoid interstate branch banking prohibitions and operate in States like North Dakota.

Again, I am for saving the thrifts. I want to pass legislation to help the thrifts in this country, but I do not want this kind of legislation to pass in this form if it poses any threat at all to the independent banks of America.

Mr. AUCOIN. Mr. Speaker, will the gentleman yield?

Mr. DORGAN of North Dakota. I am happy to yield to the gentleman from Oregon.

Mr. AUCOIN. Mr. Speaker, I appreciate the gentleman yielding and I respect him on his positions almost all the time; but I must say to the gentleman, my understanding of the bill is not at all what the gentleman has described.

My understanding is that if you have a failing institution in Oregon, for example, and you cannot find a bank within that State to merge with it in order to keep that institution alive, that it would be possible under the terms of this bill to allow a prosperous bank in Washington State to make a merger and only in those conditions. The alternative would be failure.

Mr. DORGAN of North Dakota. Mr. Speaker, reclaiming my time, we are not talking about the banks in Oregon. We are talking about saving the savings and loan organizations in this country and the question whether money center banks can operate banking operations through savings and loans that they might purchase in States like North Dakota.

I listened to the debate in the Rules Committee yesterday. The gentleman from Texas (Mr. GONZALEZ) made a good presentation, but it was ignored by the committee decision.

Majority Leader WRIGHT made an excellent presentation tonight. They are right on point.

I think the danger does exist and I think this rule should be defeated.

Mr. LOTT. Mr. Speaker, I just would like to inquire at this point, I thought this was going to be a rule that we could handle in 2 or 3 minutes.

Does the gentleman have more requests for time?

Mr. MOAKLEY. Actually, I discovered that all the time I have is allotted.

Mr. LOTT. Well, we are enjoying the debate over here.

Mr. MOAKLEY. I wonder if the gentleman from Mississippi could make some of his time available to this side?

Mr. LOTT. Well, let us just see how the debate goes. Maybe we can wrap this up pretty quickly.

Mr. MOAKLEY. Mr. Speaker, I yield one minute to the gentleman from California (Mr. PHILLIP BURTON).

Mr. PHILLIP BURTON. Mr. Speaker, one of the advantages of meeting at this late hour of the evening and this late time in the session is that those of us who have a very clear view of how we want to cast our votes have some difficulty being able to apply that philosophical concern to the fact circumstances.

Now, my question initially stated is this: If this legislation becomes law, would it permit Citicorp to take over the Fidelity Savings & Loan in our State? If so, I am opposed to it.

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. PHILLIP BURTON. Yes.

Mr. ST GERMAIN. Mr. Speaker, had this legislation been adopted 4 or 5 months ago, we probably would not have had Fidelity in the condition it was in. There would have been a different pecking order established by statute, not by the regulatory agencies, and I feel very strongly that Citicorp would not have gotten that approval 2 days ago by the Federal Reserve to take over.

Mr. PHILLIP BURTON. The gentleman was not responsive. I respect my distinguished colleague, the gentleman from Rhode Island, very much, but in the absence of me being convinced, if we do not countervene State banking laws and we permit the massive eastern seaboard conglomerates from taking over the financial institutions in the rest of the country, I am going to vote against this rule. I want to help the savings and loans, but I am not going to permit what I fear may be the consequences of this rule.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. Mr. Speaker, I hope the rule is adopted. I do not usually like closed rules, but Members ought to understand that we are dealing here with an interconnected set of propositions. We are being asked, I think correctly, to provide a net worth guarantee to the thrift institutions. I think it would be foolhardy to guarantee them if we were not also prepared to broaden their powers. To guarantee institutions which would be doomed to fail by a constricted lending authority would not be a proper use of our funds; so to give them the one without the other does not seem to me sensible.

Second, let me address the question of interstate banking, as I understand it still.

I would ask the gentleman from California and others if I could respond this way. This bill does not add one iota to the power now existing to order interstate banking. In cases of banks failing right now, the regulators have allowed interstate mergers. If the bill passes, it will be the same thing legally, only if a bank is failing and the FDIC or somebody has to step in will they be able to consider an interstate merger. They are doing that now.

As the chairman of the committee points out, what this bill does is impose some order on that and asks that priority be given, not to interstate mergers of the sort the gentleman from North Dakota was opposed to.

So in summary, under existing law, the regulators are ordering the kind of interstate mergers that people are worried about.

This bill does not create that power. It leaves in existence the situation where only a failing bank in another State could be acquired and then only if there was no similar bank in that State willing and able to take it over.

Finally, I think the closed rule is justified because this is an interconnected set of propositions. To offer a net worth guarantee to the thrift institutions without simultaneously allowing them broader lending power is to tie our guarantee power to a set of institutions which will not be able to earn their way out of their current problems.

Mr. LOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. STANTON).

Mr. STANTON of Ohio. Mr. Speaker, this might be a good time to put in perspective this bill and perhaps lay to rest any objections outside perhaps the State of Texas to the rule.

In this great country of ours in round figures, if you consider the credit unions, the savings and loans, the commercial banking industry, fundamentally you have roughly 40,000 separate financial institutions in this country. It is a fair assumption to say that of the 40,000 institutions, in my humble opinion, probably about 38,500 are for this legislation.

In addition, there are in this country approximately 4,500 savings and loan institutions. Of these institutions, approximately 1,200 of the 4,500 have net worth of less than 3 percent.

The Federal regulators and the Home Loan Bank Board have been pleading for this legislation for 2 years and if you do not have in your district, including the State of Texas, a savings and loan institution that does not need relief under this particular bill, then you vote against the rule.

The second point I would like to make is that our chairman was absolutely right. The opposition to this rule has come primarily from the three main speakers from the State of Texas. Let me explain that.

The independent bankers, which are the majority of the small bankers in Texas, are totally opposed to the idea of giving additional power to the savings and loans.

Now, what do you have in the State of Texas? A rather unique situation. You have a State in which 70 percent of the savings and loans in the State of Texas are State chartered. The objection to this bill from the State of Texas is that it gives commercial lending power to the savings and loans up to a maximum of 10 percent of their assets. The 70 percent of the savings and loans that are chartered in the State of Texas already have the 10-percent commercial lending power. So that is where the main objection is.

I respect the national leader that the majority leader is, but I also respect the fact that he protects the small interests in the State of Texas.

Mr. BARNARD. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I am happy to yield to my friend.

Mr. BARNARD. Well, Mr. Speaker, you know, unfortunately tonight a smoke screen has been put before us. This matter of acquisition by banks and by big savings and loans is taking place today. It is taking place without this law. Who is it being done by? It is being done by the regulators.

It is my opinion that I would rather see this House and this Congress make the laws as we want them made, and this is what this law does, it regulates how these mergers and these acquisitions will take place and this House has already passed that bill.

Mr. STANTON of Ohio. Mr. Speaker, I thank the gentleman for his contribution.

Let me just clear up one thing. This certainly has nothing to do with title III, as the chairman says. Down in title II, the regulators asked for a system upon which they could count in law to solve the problem of failing institutions. This is not a question of branching across State lines, the Douglas Act or the McFadden Act.

Let me say what this bill does. First of all, it applies to thrift institutions and banks that are in a failing condition. They have to certify, No. 1, that they are failing.

Second, for all this worry about mergers across State lines and so forth, this bill applies only to banks of $500 million or more.

□ 2120

It is limited to approximately about 100 banks in our country.

So fundamentally that argument is not right. Let me say what we do have here in this rule, though. We have crafted an agreement fundamentally by the savings and loan industry of our country, 95 percent of the commercial banking interests in our country, and 100 percent of the credit unions—and do not forget there are a lot of authorities and powers for the credit unions in our country that are adamantly waiting for this legislation.

The SPEAKER pro tempore. The time of the gentleman from Ohio (Mr. STANTON) has expired.

Mr. LOTT. Mr. Speaker, I yield 2 additional minutes to the gentleman from Ohio (Mr. STANTON).

Mr. STANTON of Ohio. I thank the gentleman for yielding this additional time to me.

Mr. Speaker, if we wait, we hurt the failing savings and loan institutions. Second, what we do is give the banks and savings and loans a competitive instrument in order to compete with the money market funds.

This is an extremely important thing, and I am telling my colleagues in my little town of Painesville, Ohio, I do not know of a banker, an S&L or anyone else that has not begged for years either to do away with money market funds or to put reserve requirements on them or to do something to the securities interests. But no, we have done the positive thing, and that is to give to the commercial banking industry and the S&L's a competitive money market instrument and we have ordered the depository institutions deregulation committee to give this new instrument to these institutions within 60 days.

Mr. Speaker, I really and truly think I will be really personally disappointed if this is not an overwhelming "aye" vote on this rule.

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I will be glad to yield to the chairman.

Mr. ST GERMAIN. Mr. Speaker, I know the gentleman would not mention this, but there is a title VI in this bill that the insurance agents of America have been waiting for, for years and years and years. I know he would not mention it, but they want that as well.

Mr. STANTON of Ohio. I am sorry, but I fought for one bank holding company against the independent insurance agents, but if you have not heard from your independent insurance agents 100 percent to vote for this rule and this bill, then you had better go back and check on him, because he is not a member of the association.

Mr. LEACH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. I would be glad to yield to the gentleman from Iowa.

Mr. LEACH of Iowa. I thank the gentleman for yielding.

Mr. Speaker, I would like to stress this point about the money market mutual fund certificate which does imply the ability of small banks to keep their money at home instead of having it swept into money center banks that are squandering it so rapidly in this country today.

Second, from the small bank perspective, there is an ending of the differential within 15 months, something small bankers desperately aspire to.

Third, there is greater power.

Fourth, I would like to ask the gentleman: Does the administration support this bill?

Mr. STANTON of Ohio. The administration strongly supports this bill.

Mr. LEACH of Iowa. Fifth, would the gentleman say that our financial structure is in such tremendously difficult straits today that we should not be playing around with our financial authority?

The SPEAKER pro tempore. The time of the gentleman from Ohio (Mr. STANTON) has again expired.

Mr. LOTT. Mr. Speaker, I yield 1 additional minute to the gentleman from Ohio in order that he may respond to the question.

Mr. STANTON of Ohio. I thank the gentleman for yielding.

Mr. Speaker, let me say in conclusion, the gentleman is absolutely right.

As the gentleman from Iowa pointed out, it was a point that none of us alluded to, and that is for the additional powers that we give to the S&L's, these small independent banks have argued, at least to this Congressman, and more, and I am sure to every one of my colleagues, that the most unfair thing in the world is this ¼ percent differential that the S&L's enjoy over the commercial banks.

What this bill does for giving the S&L's that additional power, and this is why it is a package deal, it works so that differential on January 1, 1984 is eliminated. Do not make a mistake. The Garn-St Germain bill is a tremendously major piece of legislation that is going to affect favorably, as I say, at least 40,000 depository institutions.

Mr. AUCOIN. Mr. Speaker, will the gentleman yield to me?

Mr. STANTON of Ohio. I yield to the gentleman from Oregon.

Mr. AUCOIN. I thank the gentleman for yielding.

Is it not true that as of December 31 of this year, many of the community banks are going to lose a large number of deposits because of the expiration of the all-savers certificate? And if they do lose them, are we not going to see a further drain of resources out of community banks, which we are trying to help, into the money market mutual funds—because we will be denying our local banks, if we do not pass the legislation, a competitive depository instrument? Is that not true?

Mr. STANTON of Ohio. The gentleman is absolutely correct.

Mr. AUCOIN. And is not that why we have a large degree of urgency here?

Mr. STANTON of Ohio. Just read today's paper, the full-page ads from the S&L's are asking for these deposits.

The SPEAKER pro tempore. The time of the gentleman from Ohio (Mr. STANTON) has again expired.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. I thank the gentleman from Mississippi for yielding to me.

Mr. Speaker, I think it is unfortunate that there have been some misrepresentations as to what this bill provides, and I think those misrepresentations were not intentional, certainly not on the part of the majority leader. But it is a fact that the Independent Bankers Assocation has been against this bill from the outset or has been against any change in the law, as we now find it.

Now, one would say why would the Independent Bankers Association be against it? They get money market fund powers under this bill, there is going to be a deregulation of regulation Q, which ought to satisfy them.

But the independent bankers, the small banks, the only bank in a one-bank town, has done very well in the high interest rate regulated atmosphere in which we find ourselves today. They have been able to charge as high interest rates as they want. They have been able to say, "We cannot pay any more than 5¼ percent because of regulation Q."

Now let us see this bill does, to summarize.

First of all, it does provide for orderly mergers to assist troubled financial institutions. It is in this respect similar, very similar, to a bill passed in this House early last year. The net worth assistance is identical in concept to a substitute which I offered and which the chairman of the committee has now agreed with.

Banks are given authority to issue money market-type certificates to compete with nondepository institutions, a power which they have sought and wanted and needed and should have had a long time ago.

Thrifts get commercial lending powers, which they have wanted for some time, and which will help them to compete in the marketplace.

The credit unions get broadened mortgage lending powers. The independent insurance agents, as the gentleman from Ohio, (Mr. STANTON),

mentioned a little earlier, got their way on restricting bank holding companies from selling insurance.

College students got their way on student loans vis-a-vis the truth-in-lending-laws.

The realtors are happy about the due-on-sale language. The homebuilders and mortgage bankers are happy.

In short, we crafted a very good piece of legislation which satisfied everybody except the members of the Independent Bankers Association, and I do not understand why they were not satisfied. This is a great piece of legislation, I submit, which will benefit financial institutions and consumers alike, and I encourage adoption of the rule and suggest that we ought to adopt the legislation.

Mr. COUGHLIN. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. I thank the gentleman for yielding to me.

Mr. Speaker, I associate myself with the remarks of the gentleman from Ohio (Mr. WYLIE).

Mr. Speaker, the hour is late not only for this season but for the thrift industry which has waited for many difficult months for Congress to provide it with some much-needed assistance.

H.R. 6267, the Garn-St Germain Depository Institutions Act of 1982, is not perfect but I believe it represents an important step toward shoring up financially troubled savings and loans while at the same marking progress toward deregulation that will allow depository institutions to compete with each other on a more competitive basis than in the past.

This legislation stands as a package with carefully balanced benefits for different sectors of the banking industry. For beleaguered thrift institutions, there are net worth guarantees, provisions for orderly mergers, and new authority to make some commercial loans and offer money market-type accounts. For banks, there is also the authority to offer money market-type accounts and the elimination of regulation Q. For credit unions, there is expanded mortgage lending authority.

Mr. Speaker, no change in our complex and interrelated banking system is going to please everyone and the many changes by H.R. 6267 are no exception. However, on balance, I believe it is a good bill that will result in strengthening our banking system, making depository institutions more competitive and responsive to the needs of the public they serve.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I have not had occasion to read the bill and know very little about what is in the bill. But it does seem to me to be very strange to have a bill where we are trying to restructure the whole banking system on the floor on the last evening of the session, calling for a closed rule.

□ 2130

We are all interested in doing away with the higher interest rates, but it seems to me we are very likely perpetuating higher interest rates in this legislation. Higher interest rates are stifling our economy. Traditionally bankers have been content to charge interest a point a two above the rate of inflation, for some years, however, bankers have been charging 4, 6, 8, 10 percent above the rate of inflation. Farmers are unable to pay these rates. They cannot afford to borrow the money needed to buy the machinery and supplies to operate their farms. Small businesses cannot borrow money for working capital and merchandise. Industry cannot get the money to modernize plant and equipment. Consumers resist buying autos and other large items because of the heavy burden of interest. Home mortgage rates of 17 and 18 percent have literally killed the home building industry. Unemployment is rising and the economy is skidding into a depression. The U.S. economic situation and high interest rates are driving the world economy into a depression.

But we are not addressing these issues tonight. We are restructuring the banking system. We are apparently encouraging more mergers—big banks gobbling up small banks—and interstate mergers and banking.

But we cannot be sure because there is total disagreement as to what is in this bill. Very likely it perpetuates high interest rates—but we don't know, because we don't know what is in this bill.

We ought to vote down this rule until we can take a good look at this legislation, none of us knows what it does.

Mr. MOAKLEY. Mr. Speaker, I yield 1 minute to the gentleman from Texas (Mr. MATTOX).

Mr. MATTOX. Mr. Speaker, I am pleased to get to this point about this. There are some very important things I think the Members ought to know. When we pressed the Net Worth Guarantee Act, H.R. 6267, at that time I was deeply afraid that this exact thing was going to happen, so I took the floor and Mr. GONZALEZ took the floor, and we got an unequivocal commitment from the chairman of this committee that he would not bring back a bill from conference that had been Christmas treed with this sort of provision. Members can look at the record, to the unequivocal commitment, because we knew this was going to happen.

It is wrong just to come in here and restructure the whole banking industry of this country in the closing hours of this session under a closed rule. I would ask the Members to go back and look at the record, and ask the membership to take time to study these provisions. They will see that it is wrong to restructure the banking system of this country in the closing hours of the session. It is wrong, and I say it again, it is wrong.

I would ask the Members to vote down this rule.

Mr. MOAKLEY. Mr. Speaker, I yield 2 minutes to the gentleman from Colorado (Mr. WIRTH).

Mr. WIRTH. Mr. Speaker, I thank the distinguished member of the Rules Committee for yielding. We have, as has been explained by the gentleman from Kentucky and many others, a real procedural problem here; much more than just what is being done here in the last minutes of the session. The public interest is not being served when we do not have a report on the bill, and we have not seen the legislation, title 3 on.

This is not a Texas issue or a California issue or a Colorado issue; it is an issue of what we want our financial institutions to be.

Do we want a decentralized system as we have in the past? Do we want to have a very centralized financial system? Do we want interstate banking? What is the relationship between the securities industry and the banking industry? These are the issues that are underlying this discussion, and have never been addressed at all.

All we have done on the House side is to vote on a relatively narrow piece of legislation focused on something that most people share, that we have to save the S&L's. Yes, we do, but where have we gone from there? Nobody has any idea.

Who was involved in the conference? Not members of the Banking Committee overall—two or three people. Not members of the Commerce Committee involved in the securities industry. What are the implications of that? There is no discussion of what it is that we want our financial system overall in the country to be, and that industry is changing dramatically.

Here we are in the closing hours, making an extraordinarily important set of decisions. What we have to do is vote down this rule so that Members can go back and understand what is in the bill, and what the implications of legislation are going to be to their small banks back home to all of our financial institutions, and to the securities industry. This is a tangle, and we should not get into it tonight.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. WIRTH. I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, I thank my friend. I commend him. There is

nothing so pressing that we should write legislation with a bag on our heads tonight. Let us find out what is involved in here. Let us bring this forward under a sensible rule at a sensible time and consider the manner in a sensible fashion. Let us not foreclose ourselves.

The SPEAKER. The gentleman from Mississippi (Mr. LOTT) has 18 minutes remaining.

Mr. LOTT. Mr. Speaker, I yield 5 minutes to the gentleman from Connecticut (Mr. MCKINNEY).

Mr. MCKINNEY. I certainly did not expect to speak on this rule, Mr. Speaker. I have prided myself on never having wasted the time of this House in speaking on a rule in 12 long years in this House, but I have never in 12 years in this House heard so much misinformation, so many misstatements, and I quite frankly would like to address one subject.

Are we dealing with this subject in the last moment? Nonsense. We have sat in this House and watched the banking business of this Nation and the thrift industry fall apart for the last 6 years. I remember that on this very floor we stayed up for 38 hours, and I walked around to many Members that are here with a first attempt to try and straighten out the catastrophe that was coming, and everybody had an objection to point 1, an objection to point 2, an objection to point 3, and we ended up with about 4 out of 40 issues, and nothing happened, again the last moment.

With all due respect to my good friend from Texas, a man who I have worked with and will always admire and respect, I would urge that the independent bankers have been against every single thing we have tried to do to straighten out the banking industry since I got on the committee. What are we doing? Why is there a crisis? There is a crisis because the judges and the regulators are running the financial institutions of the United States of America. Not you and I, the Representatives of the people.

Where did NOW accounts come from? They came from a judge in Massachusetts because a clever lawyer found out that he could go to court. So, then we had the great New England experiment—and that is no insult to the State of Massachusetts, by the way—but to change the entire banking industry of the United States because of one judge's action in one State is a mistake, be he the brightest judge in the entire world.

Why did Fidelity get taken over? Because there was not an orderly system in law of how a financial institution going into collapse should be taken over. What does the bill say? The bill says that a similar institution in that State—intrastate—should have the first right to take over if it can, then, it says, No. 2, a dissimilar institution in that State should have the right to take over; again, intrastate. Then it moves on and goes out, it gets pretty broad. Similar institutions outside, dissimilar institutions outside. The fact of the matter is the institution is broke and outside this is only the taxpayer and the full faith and credit of the United States.

The fact of the matter is that thrifts are in terrible trouble, and I have heard a lot about how the small banks are not in trouble, and it just gives the big banks an option to gobble them up. I would suggest that if a bank is not in trouble, nobody is really going to bother to buy it, and they may not be in trouble, I say to my good friend, if in fact they are in oil leases or gas or something else, but in my part of the country where small banks in small cities have huge mortgage portfolios which commercial banks normally do not have, they are in every bit as much trouble as the thrift institutions.

Why? The small bank in the small town in the Midwest or Northeast or almost anywhere has had a long history of family service, has had a long history of being friendly, has had a long history of helping small business. They are well overextended in their mortgage portfolios for a commerical bank. They do not have a terrible lot of room to roam.

□ 2141

I have looked at seven of them very recently and found out that 50-odd percent of each one of the seven mortgage portfolios were paying less than 7 percent.

The SPEAKER pro tempore. Time of the gentleman from Connecticut has expired.

Mr. LOTT. Mr. Speaker, I will yield the gentleman 1 more minute but we have been discussing the substance here for almost an hour. I wonder if we could not vote favorably for the resolution and then talk about the substance.

Mr. MCKINNEY. I would wrap up that they have a commitment to the hardware stores, the grocery stores in hard times and they are making bad loans after bad loans that followed the good loans over the history.

If we do not do something about a unified industry and do it all together you are going to see chaos brought about by the regulators, by the judges, and not by the representatives of the people of this country.

Mr. GRAMM. Mr. Speaker, will the gentleman yield?

Mr. MCKINNEY. I yield to the gentleman from Texas.

Mr. GRAMM. I do not disagree with what the gentleman is saying. I know the gentleman to be a very thoughtful individual who cares deeply about legislation.

I think the thing that many of us are deeply concerned about is looking at the clock here it is 15 minutes to 10 o'clock at night. It seems to me to be rather shortsighted in the closing hours of the session to be considering a bill that is going to restructure the whole industry.

I think many of the changes that are in this bill should be made. But do you not think that we should have time to look at it and perhaps offer some amendments on it, and a closed rule, do you not think that is wrong?

Mr. LOTT. Mr. Speaker, I just yield myself a little more time just to say that as far as how long this is being considered, this has been around here for at least 2 years and probably 6 years, this subject and related subjects and the various parts of the bill that have been considerd.

So I would hope that somebody would clear that up maybe from the committee.

I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I yield such time as he may consume to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, the conference report before us today is a major bill on banking and financial institutions and, therefore, is particularly distressing to me because of what it does not do.

In Arkansas, indeed in 16 States of the Nation, we have a crisis with regard to the usury issue. The committees that have dealt with this legislation are aware of this critical usury problem. They have been aware of this for months, indeed for years. Yet, in this bill before us, they have done nothing to help our retail merchants; our automobile dealer; our banks, particularly our small banks; or our savings and loans to overcome this usury problem. This bill is totally inadequate in this respect.

It is my understanding that in Arkansas, alone, 260 of our 262 banks oppose passage of this legislation because it is so inadequate in the area of usury.

A study by the University of Arkansas estimates that between $600 million to $700 million has flowed out of our State of Arkansas because of the usury problem. This money is not available to our people for purchases at our retail stores, our automobile dealers, our building contractors, our residential areas, and on and on. This money is lost to us, at least under existing usury conditions insofar as investing in Arkansas' present and future is concerned.

Further, it is my understanding that with regard to the first three sections of this bill its provisions are fatally flawed because while it may aid the giants among the saving and loan industry, it does not—in realistic, real

world terms—provide the aid to the smaller savings and loan associations that it appears, on its face, to promise to make available.

Although I had wanted to vote for this conference report, the flaws in this proposition before us are such that I have been forced to rethink my position in the interests of the majority of our people in Arkansas.

Mr. MOAKLEY. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. MINISH.)

Mr. MINISH. Mr. Speaker, I have listened to people come up here and speak and say the hour is late.

The hour really is late for the savings and loans. A year ago we had about 4,500 thrifts. Today we have 3,700 and 1,200 have severe net worth problems.

And I want to remind you that there are the institutions that built the homes for the little people in America. So what are we talking about here?

Do you want to help business? Do you want to help the carpenters? Do you want to help people own a home?

The savings and loans are in deep trouble, 1,200 are problems. That is why we are here at this hour.

If you do not do this, that must mean you are spending too much here and not enough time listening to the people who cannot find a mortgage, the builder who cannot find construction funds.

Mr. MOAKLEY. Mr. Speaker, the opponents of this rule will tell the House that they only seek a separate vote on one of the provisions of the bill. I wish to respond that the Committee on Rules has recommended a general waiver because the parliamentary situation would otherwise provide for votes on any provision, no matter how small. The rejection of even a single word of this conference report would have a catastrophic effect on the eve of an adjournment.

Mr. Speaker, I wish to quote from clause 4(d) of rule XXVIII, so that every Member will be aware of just what would happen in such a case, "If any such motion to reject has been adopted * * * the conference report shall be considered as rejected."

At that stage, the House would have to request a new conference, the other body would have to set aside their action yesterday in passing the conference report and agree to the new conference, and conferees would have to be appointed in each House. Then the managers would have to meet, agree to, write, and file a new conference report. The new conference report would again be subject to a 3-day layover and to separate votes on any single provision of six of the eight titles.

The rule prevents this and allows to stand on its merits a bill of vital and immediate importance to commercial banks, thrift institutions, and credit unions. But the bill is of equal importance to home buyers, builders, realtors and all segments of the economy dependent on the survival and viability of our depository institutions.

Indeed, Mr. Speaker, I would note the comments of my able friend from New Jersey (Mr. MINISH) and warn the House that a "no" vote on the rule would delay enactment of this vital legislation and doom a number of smaller financial institutions to failure before the Congress returns.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WRIGHT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 294, nays 59, not voting 79, as follows:

[Roll No. 391]

□ 2200

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. ST GERMAIN. Mr. Speaker, pursuant to the provisions of House Resolution 603, I call up the conference report on the bill (H.R. 6267) to revitalize the housing industry by strengthening the financial stability of home mortgage lending institutions and insuring the availability of home mortgage loans.

The Clerk read the title of the bill.

The SPEAKER. Pursuant to House Resolution 603, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of September 30, 1982.)

The SPEAKER. The gentleman from Rhode Island (Mr. ST GERMAIN) will be recognized for 30 minutes, and the gentleman from Ohio (Mr. STANTON) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Rhode Island (Mr. ST GERMAIN).

Mr. ST GERMAIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the report on this legislation was printed in the CONGRESSIONAL RECORD that was delivered to everybody's office this morning. We have had substantial debate on the substance of the legislation during consideration of the rule.

The hour is late. The legislation is important.

I trust that the membership will allow me to expedite consideration of this legislation.

Mr. Speaker, today, the House is considering a conference report on legislation which represents another milestone in the development of our financial system. For almost two decades the Congress and the public have been debating and studying the statutory and regulatory framework of the Nation's financial system. The Hunt Commission report and the Commission on Money and Credit each recommended major changes in the framework within which our depository institutions should operate. The House Banking Committee's extensive hearings and report on the "FINE (Financial Institutions in the Nation's Economy) Discussion Principles" helped to shape developments which have occurred in the last several Congresses.

In the 96th Congress legislation providing a major first step in the process of deregulating the operations of our depository institutions began. That legislation recognized that competition and freedom from governmentally imposed restraints on the amount of interest depository institutions could pay to their customers was necessary. In doing so, that legislation also provided some flexibility for banks, savings and loans, savings banks, and credit unions to operate with more flexibility on the asset side of their balance sheets as well. This bill is a further step in that process.

During this Congress the House and Senate Banking Committees have held extensive hearings on the matters contained in this legislation. The House has passed several separate bills which are contained in the conference report. These are the Net Worth Guarantee Act (H.R. 6267), The Deposit Insurance Flexibility Act (H.R. 4603) and the Reserve Requirements Reform Act of 1982. In addition, the committee during hearings on these bills, on monetary policy, on competition in the marketplace for deposits, heard witnesses from the executive departments, the agencies, and the public testify on the need for and description of the powers that depository institutions and the depository institution regulatory agencies need for the years to come.

Coming away from those hearings and from our work in producing the bills which came to the House, I am convinced that we must provide the FDIC and the FSLIC with better tools to handle the problems so clearly evident in the financial system today; we must provide banks and thrifts with a deposit instrument which will allow them to compete with unregulated financial institutions and to offer the consumer, the small saver, with a further opportunity to receive a market rate on his deposits. In addition depository institutions must also have more flexibility to generate earnings on the assets side of their balance sheets to be able to pay higher rates on their deposits. This conference reported bill addresses each of these concerns.

The House and Senate conferees have met and considered the differences between the two bills and have developed legislation which addresses the real needs of our insuring agencies and of depository institutions both in the short and the long term. The product is a bill supported by the vast majority of the members of the House and Senate Banking Committees. It is a bill supported by the Federal Reserve Board, the FHLBB, the FDIC, the Comptroller of the Currency, the Department of the Treasury, NCUA, and every trade group affected except the Independent Bankers Association. The administration is fully supportive of this legislation and considers it to be a priority item.

The IBAA opposition centers primarily on the granting of commercial and agricultural lending authority to savings and loan associations and to the establishment of a deposit instrument for depository institutions which will allow them to compete effectively against nonregulated financial intermediaries. The conferees believe that the fears expressed by the IBAA are unfounded. This legislation addresses directly the major problems our depository institutions face in today's adverse economic climate. The compromise reached in the legislation is the product of months of work involving the insuring agencies and the affected industries. Extensive legislative consideration by both Banking Committees and the Congress have thoroughly explored all of the items in this bill. The FINE study, an exhaustive study of depository institution activities which was conducted in 1976, thoroughly explored the concept of providing thrifts with commercial lending authority and with liberalization of commercial bank operations. Numerous reports by executive agencies and administrations have recommended liberalization of thrift investment powers, creation of truly competitive deposit instruments, and deregulation of commercial bank authorities. Depository institution legislation on many of these subjects was considered in the 94th, 95th, 96th, and present Congresses. During numerous hearings conducted by the committee during this Congress witnesses including the Federal Home Loan Bank Board, the Treasury Department, FDIC, and various public witnesses all discussed rather thoroughly and made recommendations regarding this legislation. Other examples of the thorough consideration of these issues come to mind. Title 6 of the bill, for example, was passed by the House in the 95th and 96th Congresses. Most recently, the reserve requirement provisions passed the House on the Suspension Calendar.

If enacted this bill will help to stabilize our financial system; it will provide our insuring agencies with the flexibility they need to address the very real problems that they have; and it will strike a balance between the banking and thrift industries in this country.

All depository institutions have to have more flexibility in their operations. The bill provides this for banks and for thrifts. For the thrifts, new lending authority, including a limited basket of commercial lending authority, will provide them with the tools they need to restore their earnings and to weather business cycles. With respect to commercial authority, let us put this in perspective. Commercial banks have unlimited commercial lending authority. In terms of portfolio characteristics, many banks have 40 percent or more of their loans in commercial loans. This bill only provides thrifts with a 10-percent basket. Banks and thrifts alike will have a deposit instrument they need to compete in today's marketplace. Banks are given more flexibility in their operations to meet the needs of their customers.

The bill contains several titles including:

TITLE I—DEPOSIT INSURANCE FLEXIBILITY ACT

This title expands FDIC and FSLIC powers to assist troubled depository institutions and, when appropriate, to arrange interstate and cross-industry acquisitions of such institutions. At this point I would like to clarify one point concerning the bill approved in conference. When H.R. 4603, the predecessor to Title I of the conference-approved bill, was passed by the House, it contained a provision clarifying that for purposes of the thrift merger provisions, mutual and stock savings banks were to be considered as the same type of institutions as savings and loans under the provision's priority arrangement. During conference we were advised by counsel that such a clarification of the status of savings banks was unnecessary, and the conference-approved bill does not contain the language that had been in the House-passed version. Out of caution, however, I take this opportunity to reiterate that for purposes of the thrift merger priorities in Title I of the bill approved in conference, savings banks are considered to be the same type of institution as savings and loans. It also broadens the National Credit Union Administration's authority regarding the merger of financially distressed credit unions. This title also authorizes a savings bank to convert from State to Federal charter and continue to be FDIC insured.

TITLE II—NET WORTH CERTIFICATES

This title establishes a program whereby the FDIC and FSLIC may purchase net worth certificates from troubled depository institutions in exchange for promissory notes. The certificates will be considered capital and therefore increase the net worth of the assisted institutions.

TITLE III—THRIFT INSTITUTIONS RESTRUCTURING

This title broadens the lending and investment powers of thrift institutions and facilitates the conversion of thrifts from State to Federal charter and from mutual to stock form. This title also includes a provision directing the Depository Institutions Deregulation Committee to authorize depository institutions to offer a new deposit account within 60 days of the bill's enactment that would be "directly equivalent with money market mutual funds * * *".

TITLE IV—PROVISIONS RELATING TO NATIONAL AND MEMBER BANKS

This title amends various statutory provisions primarily affecting commercial banks to revise certain lending and borrowing limits, and, revise lending limits on transactions affecting bank holding companies and their subsidiaries. The title also exempts from reserve requirements the first $2 million in reservable deposits for all depository institutions thereby exempting small institutions with total deposits of around $5 million.

TITLE V—AMENDMENTS TO THE FEDERAL CREDIT UNION ACT

This title amends the act to simplify the organization process for credit unions, broaden their mortgage lending powers, and clairfy and make technical modifications to numerous provisions of the act.

TITLE VI—INSURANCE ACTIVITIES OF BANK HOLDING COMPANIES

This title restricts the insurance selling activities of bank holding companies.

TITLE VII—MISCELLANEOUS

This title amends the Truth-in-Lending Act relating to student loans and real estate agents, amends various provisions affecting commercial bands and bank holding companies, and extends a 6-year phase-in for certain commercial banks that withdrew from the Federal Reserve during the period while Congress was considering the Monetary Control Act of 1980.

TITLE VIII—ALTERNATIVE MORTGAGES

This title preempts State law for all non-federally chartered housing lenders to authorize them to make alternative mortgages pursuant to Federal regulations. The States have 3 years to reestablish State law in this area.

Several provisions of the legislation I have just summarized establish effectives by referring to the Depository Institutions Amendments of 1982. The short title of the bill has been changed to the "Garn-St Germain Depository Institutions Act of 1982", though the various cross-references in the legislation were not changed to conform. I would like to make clear that references in the bill to the "Depository Institutions Amendments of 1982" should be considered as references to the "Garn-St Germain Depository Institutions Act of 1982".

Mr. Speaker this bill is needed and it is needed now. The Senate has approved the conference report, and I urge each of my colleagues to vote for this report. The Nation's financial structure needs the changes which this legislation provides in order for it to provide the services that the public—business and individuals alike-demand today.

Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. VENTO).

Mr. VENTO. Mr. Speaker, I rise in support of the conference report.

Mr. Speaker, there are many very important provisions in this legislation. Especially important is the regulators legislation and the Net Worth Guarantee Act. At the same time, I am troubled about a trend evident in this legislation which I fear may lead to less residential mortgage lending by thrift institutions. However, on balance, this is a workable piece of legislation and it demonstrates the legislative skill of the Banking Committee chairman, Mr. ST GERMAIN.

I am especially pleased to note the inclusion of section 410 in H.R. 6267, the Banking Affiliates Act of 1982. This act is substantially the same as H.R. 5198 which I introduced on December 11, 1981. The bill liberalizes certain provisions which unduly restrict transactions between banks and their affiliates while still protecting a bank from adverse transactions with affiliates. Currently, section 23A of the Federal Reserve Act requires that bank loans or extensions of credit to affiliates be secured by stock, bonds, debentures and other such obligations. This collateral must equal at least 100 percent of the loan made by the bank to its affiliate. This narrow class of assets which can be used as collateral severely limits the flexibility of the operations of bank affiliates which leads to inefficient use of resources.

Section 410 widens the class of assets that can be used as collateral to include such assets as U.S. Government securities and real and personal property. As a result, bank affiliates will be able to operate more freely. However, the banks depositors will not be at risk, because the loans will still be fully collateralized.

Mr. Speaker, I am confident that the revisions to section 23A of the Federal Reserve Act will contribute to the growth of our Nation's economy. I urge my colleagues to support H.R. 6267 which has so many worthwhile, yet little noticed provisions.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. LAFALCE), a member of the committee.

Mr. LAFALCE. Mr. Speaker, I rise in support of the legislation.

Mr. Speaker, as a member of the House Banking Committee and a participant in the Financial Institutions Subcommittee review of the financial aid package that is now before us, let me first commend the efforts of the members and staff who have devoted themselves untiringly to the work of this legislation. We are all aware of the unprecedented losses experienced by mortgage lending institutions in this country—losses that have been a byproduct of restrictive regulation and an economy beset with the ills brought on by recordbreaking deficits and high interest rates. As a Member of Congress from the State of New York, I have seen the necessity of mergers and acquisitions entered into to protect the assets of depositors. I have seen the failure of the housing industry and the dislocation and distress that has resulted. And I have been actively working to promote action to address these problems.

In our efforts to come to terms with the problems at hand we sometimes become overzealous—we turn to quick fixes and instant answers. I am happy to say that today, with this legislative

package, we are attempting to solve both the current difficulties faced by our financial institutions and the more fundamental problems within the system itself. We are providing emergency powers to the regulators and deposit insurers to address the short-term crisis in the thrift industry. At the same time, we are providing the tools of expanded asset powers so that the industry can grow and compete in what we have come to regard as the new financial marketplace. We are continuing and abetting the process of deregulation begun in this Congress 2 years ago. By insisting on an early phaseout of the differential and the creation of a fund to be competitive with money market mutual funds we are insuring that the new financial marketplace will be open to the benefits of competition—equal competition between the participants in the marketplace.

The Congress is dealing with a multifaceted bill. We have considered a number of issues and we are addressing a wide range of concerns and possibilities. Several other important issues have been set aside for later consideration, and it is my intent to bring those questions up immediately upon the convening of the new Congress.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia (Mr. BARNARD), a prominent member of the committee.

Mr. BARNARD. Mr. Speaker, before I begin, I would like to express my appreciation to both my distinguished chairman, and to Mr. STANTON, the ranking member, for their hard work on this legislation.

They have made the hard decisions that had to be made, and without their leadership, we would not have been able to come up with this compromise package.

Mr. Speaker, this conference report is more than just a restructuring of the thrift industry. It is also a major step toward the preservation of small and community banks.

For the past several years, I have heard from institution after institution that has told me of their loss of deposits to money market mutual funds. Bankers have repeatedly told me about how their best and biggest customers have been emptying their accounts into Merrill Lynch or another of the nonbank financial institutions.

These funds from their area have been swept up by big city institutions and taken to the money centers and overseas. As a result, money for small businesses and farmers is not as available as it was.

The problem has been that the smaller institutions simply could not compete. They could not match the interest the money funds could pay because of regulatory handcuffs put on them by Congress. Their plea has been to let them compete. They were not afraid to compete with anyone, these bankers told me, but with the law as it was, small banks simply could not match the rates or services of the giants.

This legislation corrects this problem. It will give small banks a new account without interest restrictions or other limits so that, for the first time they can compete. What is more, this account will be fully insured by the FDIC up to $100,000. This is a feature the mutual funds cannot match.

With this legislation, we will begin to reverse the flow of money away from our smaller communities and pull it back to be used for the needs of the community—for the farmers, small businessmen and others.

Mr. Speaker, I was a banker in a State chartered bank for many years, and I have no fears that small banks will be hurt by this legislation.

Small banks have known how to compete for decades. They have strong ties with their communities that no equal competitor can break. With this bill, they will be able to compete with money market mutual funds head on, and I have no doubt that they will be able to more than hold their own.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Ohio (Ms. OAKAR), a member of our committee, and a very valuable one at that.

Ms. OAKAR. Mr. Speaker, I rise in support of the conference report.

I would like to pay special tribute to our chairman and also to the minority leader of our Committee on Banking, Finance and Urban Affairs, who has had such a distinguished career in this House, and since this is one of the last banking bills of which he has been one of the molders and shapers, I think all of us ought to acknowledge the very excellent work of the gentleman from Ohio, Mr. BILL STANTON. Truly he has been one of the finest public servants from northeast Ohio and indeed the country.

The SPEAKER. The Chair wants to publicly acknowledge the remarks of the gentlewoman from Ohio (Ms. OAKAR) and he subscribes to them in the fullest.

One of the greatest and finest gentleman that I have ever met in the 30 years I have been in the Congress of the United States. As he commences a new life with his beautiful wife, Peggy, we want to wish him happiness.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Hawaii (Mr. AKAKA).

Mr. AKAKA. Mr. Speaker, I rise in support of the conference report on H.R. 6267, the Depository Institutions Amendments of 1982. There can be no doubt that this legislation to assist the ailing savings and loan industry is absolutely crucial. Of course this legislation will not provide a miraculous cure for the industry. But it represents a positive step toward putting the entire industry on a more solid basis.

I am particularly pleased that the House conferees included several provisions to grant banks greater powers in order that they may compete with the nonregulated financial organizations. It is the threat from these nonregulated financial conglomerates that we should be most concerned with. These nonregulated financial corporations pose a very real threat to our decentralized banking system. I am unwilling to see the demise of our small banks and savings and loans. It is these institutions which have provided loans for the people to build homes and start new businesses.

Mr. Speaker I urge the Members to support this much needed legislation.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Maryland (Mr. MITCHELL), a member of the committee.

Mr. MITCHELL of Maryland. Mr. Speaker, I commend the members of the committee and the House for passing a piece of legislation that is desperately needed. S&L's have to be saved. This does help them.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. GONZALEZ).

Mr. GONZALEZ. Mr. Speaker, there is much in this bill that I can support. I can support measures to assist institutions that have fallen into difficulty because of unforeseen and unforeseeable economic events. What I cannot support is legislation that vastly changes banking, legislation that has had no genuine debate or consideration either in the House or in its Banking Committee.

Earlier this year, the House was assured that there would not be comprehensive banking law tacked onto its original and very limited bill to strengthen failing institutions. This conference agreement, however, is precisely the kind of broad legislation that we were assured would not be added to our bill. I can understand that circumstances may change, but I do not believe that conditions now prevailing warrant the kind of extraordinary procedure that has been the case with this bill.

As it happens, the changes embodied in this bill have a special impact on the financial community of my State. For example, it grants vast new powers to savings institutions. In Texas, savings institutions have branching powers, but banks do not. The consequence of the bill is almost certainly that the State will have to abandon its unit banking rule. The concentration of bank resources in

Texas is already very great, but this bill will accelerate that concentration, in ways and with consequences that no one can really predict.

The bill further changes the financial landscape by making savings institutions very close to commercial banks, insofar as their powers go. Yet those institutions do not operate under the same kinds of tax and reserve rules, do not operate under the same kind of regulatory framework, and serve in every case, markets that overlap. No one can predict what the result of the coming competition will be, but one thing is certain: Institutions that had for decades served distinct and specialized functions now operate in the same arena. Savings institutions will no longer exist just to provide mortgage money; they will henceforth concentrate on other areas. No one can really say where mortgage money will come from.

I understand that the shape of the financial world has changed markedly, as a result of the seeming permanence of astronomic interest rates. Yet we should not so lightly and with so little debate, and with so little real understanding, abandon the concept of specialized financial institutions. We are abandoning a structure, without any idea of how to provide for the services that it was erected to deliver.

This bill will open the way for interstate megabanks. We can already see the outlines of these institutions. American Express operates everything from credit cards to realty companies. Sears operates in real estate, insurance, and a whole range of financial services. Citibank has already acquired a major savings and loan a continent away from its headquarters. Savings and loans are converting to banks, and other savings and loans are coming under interstate ownership. Who can say what all the consequences of this will be? What is distressing is that hardly anyone seems to have tried to discover the answer. For myself, the pyramiding of financial power is something to fear. The interest of megabanks will be quick and maximum profit, not service. We have already seen how industrial conglomerates, with their emphasis on quick profit, have been responsible for the loss of innovative capacity and ultimately the loss of American markets to foreign firms that are able to show patience, able to play the long and more rewarding game. Surely this is not an example to follow. Yet this bill lays the ground for a vast acceleration of the growing concentration of this Nation's financial powers.

It can truthfully be said that this conference report embodies the most important banking law in decades. Yet there are not a dozen Members of the House who will have had time to read the conference report that was printed in the RECORD only today, let alone digest it. There are not a dozen who will have had more than a few minutes, or even more than a few seconds, to judge its merits. The bill satisfies, for the moment, the powerful interests that control the major financial lobbies in town and so it appears to be without much controversy. That is unfortunate, because even I, as a senior member of the Banking Committee, have had no real opportunity to study this report. I would like to have that opportunity, and thought that the House had been assured of it.

There are, as I said at the outset, parts of this bill that I have supported, and continue to support. But there is more in it that I have strong doubts about, and I do not believe it is wise for the House to adopt a bill that so profoundly changes banking law, with no opportunity for debate and none for consideration of the many serious issues covered. Nor do I believe that we should act in such great haste when we know so little of the likely results. The results are likely to be good for the already powerful financial institutions, but not good for people who seek home mortgages, hope for assistance at a locally owned bank, or would like to see the survival of a diverse financial industry that is not dominated by a few remote and omnipotent—perhaps omnivorous—megabanks. I cannot support this bill.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. PATTERSON), a member of the committee.

Mr. PATTERSON. Mr. Speaker, I rise in support of the conference report.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. ANNUNZIO), the ranking member of the subcommittee.

Mr. ANNUNZIO. Mr. Speaker, I would like to have the gentleman answer a question.

In considering the Senate amendment to the definition of creditor, we weighed the value of truth-in-lending disclosures against the need to take action that might facilitate home sales in a terribly depressed housing market. We do not want to take any action that might discourage real estate brokers from attempting to assist home buyers in locating or arranging financing for the purchase of a home. With real estate sales at record low levels, we do not want to do anything that might prevent a single home purchasers from buying a home that they desire. The intent of the legislation is to protect persons who help home buyers and home sellers arrange mutually satisfactory financing of the home sales.

It is my understanding that this amendment will not prohibit the Federal Reserve Board from enforcing the Truth in Lending Act in regard to persons who locate or extend credit in connection with home improvements of the consumer's dwelling independent of financial institutions. Is that understanding correct?

Mr. ST GERMAIN. Mr. Speaker, if the gentleman will yield. The gentleman is absolutely correct. The intent is to facilitate home sales. Loan brokering not connected to home sales would not be exempted from disclosures under the Truth in Lending Act.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. MINISH).

Mr. MINISH. Mr. Speaker, I rise in strong support of the bill and the conference report.

Mr. AuCOIN. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Oregon.

Mr. AuCOIN. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the bill. The survival of the savings and loan associations of America is at stake here. The ability of our local banks to attract deposits to in turn be invested in local business and economic growth is at stake here.

If my colleagues want to prevent a massive wave of banking and savings and loan failures, there is only one vote of this bill—an "aye" vote.

I disagree with those tonight who have said the House has no business bringing this bill up tonight. The problem is immediate, it is urgent, and it would be irresponsible for the Congress to adjourn without passing this bill right now.

□ 2210

Mr. ST GERMAIN. Mr. Speaker, I yield to the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I would like to ask the distinguished chairman if there are any interstate banking provisions that will permit interstate banking in this bill?

Mr. ST GERMAIN. The provisions in this bill are designed to provide procedures and standards developed by the Congress to determine when and how mergers involving failing institutions will be allowed. These standards will go far toward establishing order in our financial system.

Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. LOWRY).

Mr. LOWRY of Washington. Mr. Speaker, I thank the gentleman for yielding. I rise in support of the conference report and congratulate the chairman and the ranking minority member on a fine job.

I would ask if the chairman would yield for a short colloquy.

Mr. Chairman, am I correct in assuming that under the provisions of the bill giving the FDIC more flexible authority to approve mergers of distressed institutions and resolving the question of insurance responsibility for Federal savings banks, the conferees expect the FDIC to act in an expeditious and orderly manner in carrying out its responsibilities under title I, and in particular under section 112(D) in cases involving mergers of distressed savings banks?

Mr. ST GERMAIN. Mr. Speaker, the gentleman's assumption is correct. We expect the FDIC, indeed, to act in an expeditious and orderly manner in those cases.

Mr. LOWRY of Washington. Mr. Speaker, I thank the gentleman.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Louisiana (Mrs. BOGGS).

Mrs. BOGGS. Mr. Speaker, I rise to recognize the impressive efforts of Chairman ST GERMAIN and the members of the committee to develop legislation which would extend a helping hand to the ailing savings and loan industry and which would be responsive to the new challenges facing financial institutions in our country. As a former member of the House Banking Committee and a participant in the FINE study conducted by the committee in 1975 and 1976, I see this legislation as an important part of the process of adapting our financial institutions to present day realities—a process which has both national and international implications. Although I admit to sharing the concerns of the independent bankers about some items in the package, I recognize the achievement that this package represents in bringing together the divergent interests of the various financial institutions in an effort to address the current crisis situation.

I am particularly pleased to note that the conference report contains the text of H.R. 6477, a bill I had introduced with Congressmen LIVINGSTON, MONTGOMERY, LOTT, BARNARD, BOWEN, and DOWDY to authorize national banks to hold certain real estate consistent with the law applicable to State-chartered banks in the State where the national bank is located. The need for the legislation was explained last year when the Congress included in Public Law 97-25 a moratorium on enforcement of a provision of the National Bank Act of 1864 which limited national banks to a 5-year holding period for real estate which had been acquired, but not used in the conduct of normal banking operations. After some 50 years of nonenforcement, the Office of the Comptroller of the Currency began several years ago to require national banks to divest themselves of such holdings—regardless of market conditions and of the ability of many State-chartered institutions to continue to hold such real estate. Senator TOWER had introduced the same bill in the Senate. It was included in the Senate-passed version of this banking legislation and accepted by Chairman ST GERMAIN in Conference. I would like to express to the chairman my appreciation for his leadership in the inclusion of this important provision in the conference report.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, I am in strong support of the conference report on H.R. 6267.

I am proud to the House that the House conferees were successful in removing from the Senate version of the legislation a provision that would have cost American farmers and businessmen billions of dollars in extra interest rates.

The Senate version would have continued to remove State-imposed loan ceilings on business and agricultural loans until April 1, 1984. That loan ceiling removal was scheduled to expire on April 1, 1983.

In place of the loan ceiling, farmers and businessmen would have to pay a sliding-scale rate based on the Federal Reserve's discount rate plus 3 percent plus any surcharges which are leveled on the discount rate. That formula saw farmers and businessmen paying interest rates as high as 22 percent earlier this year.

The House conferees were insistent that they would not stand still for any additional mandated high-interest rates, and that provision was stricken from the bill. That means that on April 1 of next year, farmers and businessmen will once again be governed by State loan ceilings rather than artificially high federally imposed ceilings.

I want every Member of this House to know that when you go back to your districts and you are asked what you have done to bring down those interest rates, you can cite this conference report as an example of what the House of the people has done to protect the pocketbooks of the people.

Mr. ST GERMAIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I rise in support of this legislation. It means a great deal to the different institutions in banking and savings in Mississippi.

Also, Mr. Speaker, for years some of us have been trying to pass legislation that would protect insurance agents from large bank holding companies writing controlled insurance through their holdings.

Under this conference report one title gives the insurance agents this protection.

I ask my colleagues to support this conference report.

Mr. STANTON of Ohio. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I believe that the minority can finish this bill within about 4 minutes.

Mr. Speaker, I rise in strong support of the conference report on H.R. 6267.

This legislation represents several, significant steps forward on the evolutionary path of banking legislation. Originally, H.R. 6267—Chairman ST GERMAIN's Net Worth Guarantee Act—began its legislative journey in our own Committee on Banking, Finance and Urban Affairs, and was sent on its way by the House earlier this year. It is noteworthy that we return to this Chamber today at the end of that journey to give the conference report on H.R. 6267 our final stamp of approval.

The Garn-St Germain bill ranks as one of the top two or three acts—with the Bank Holding Company Act Amendments of 1970 and the Depository Institutions Deregulation and Monetary Control Act of 1980—reported by the Banking Committee during my congressional career. Briefly, this legislation does the following:

Titles I and II give the regulatory agencies the flexibility, the tools, and the capital instruments necessary to "preserve the safety, soundness and continued viability of financial institutions in this country," to quote Chairman Bill Isaac of the FDIC.

Title III grants thrift institutions limited commercial lending authority, a small increase in consumer lending powers, and augmented investment capabilities. This will allow thrifts to diversify their portfolios, strengthen their institutions and maintain their traditional commitment to home mortgage lending.

Title IV provides commercial banks, large and small, with truly competitive instrument to challenge the $200 billion money fund industry. Broad new authorities contained in the bank service corporation section and the revised lending and borrowing limits should be of particular benefit to small banks.

Finally, credit unions gain almost a total exemption from reserve requirements under the Monetary Control Act in addition to broader mortgage lending powers.

Mr. Speaker, the legislative package before the House today passed the Senate yesterday by a voice vote. It represents a balanced, bipartisan effort in the best interest of our depository institutions.

The Garn-St Germain bill is the product of several years worth of work by Congress. For example, the fore-

runner of title I—the so-called regulators' bill—was first introduced by former Chairman REUSS, Chairman ST GERMAIN, CHALMERS, WYLIE, and myself on April 16, 1980. Since then, we have worked closely with Federal Reserve Chairman Volcker, FDIC Chairman Isaac, Federal Home Loan Bank Board Chairman Pratt, all of the affected industries, and the members of the Banking Committee to mold this provision. Similarly, title II represents a blended version of the capital assistance programs of my friend from Rhode Island, Mr. ST GERMAIN, and my friend from my home State of Ohio, Mr. WYLIE, the ranking Republican member of the Financial Institutions Subcommittee. The resulting net worth certificate program is a promising compromise to materially aid troubled institutions.

If my predictions come true—that we have taken several steps forward today—then I must also state my strong conviction that we are taking an unfortunate step backward at the same time. Title VI—restricting the already limited insurance activities of bank holding companies—is this backward step. It is anticompetitive. It is anticonsumer. It will only increase the cost which our constituents will have to pay for these financial services.

More importantly, this is the first time that Congress has stepped into the Federal Reserve's decisionmaking process to determine what financial services are "closely related to banking" as far as section 4(c)(8) of the Bank Holding Company Act is concerned. In 1970, Congress wisely decided not to define those financial services which are closely related to banking and those that are not. We did this so the Federal Reserve would exercise the necessary flexibility to keep bank holding companies competitive as financial markets mature and expand. The reversal of our 1970 decision which is contained in title VI is a serious mistake. At best, this is an incongruous step for us to take when we profess to want to deregulate our depository institutions to compete more effectively and better serve the public interest.

Mr. Speaker, I do not begrudge nondepository financial institutions—the money funds, Sears Roebuck, American Express, and all the others—their competitive powers. But, where does it stop? In the great State of Ohio, Kroger Foods has set up Kroger Financial Center, a one-stop shopping place for home, auto, or life insurance, money funds, IRA's, and check cashing. If this is not encroaching upon the business which traditionally has been considered to be banking, then I have wasted a great deal of my time serving on the Banking Committee.

Let me stop at this point and clarify several provisions before I conclude. First, during the conference, I proposed that the holders of the new money market deposit in section 327 be permitted "three transfers to third parties" per month, as well as three preauthorized or telephonic transfers per month. It is my intention that these three transfers will allow account holders, either individuals or businesses, to write three checks per month. Such accounts for individuals will, of course, be reservable at the level for personal time deposits, that is, zero percent, while such business accounts will be reservable at the 3-percent level for nonpersonal time deposits.

Second, in our conference with the Senate on Wednesday, we agreed to accept the Senate's provision preempting state due-on-sale restrictions with two amendments. One of the reasons for congressional action on this matter was the recent Supreme Court decision in Fidelity Federal Savings and Loan Association against De La Cuesta, upholding the right of Federal savings and loan associations to enforce due-on-sale clauses, which significantly disadvantages State-chartered institutions, national banks, and other lenders, and created uncertainty among home buyers and sellers regarding the enforceability of due on sale. The preemption of State due-on-sale restrictions contained in this bill is, therefore, primarily aimed at placing all lenders on a more competitive footing, and eliminating the confusion surrounding enforceabililty of due-on-sale clauses.

In light of our desire to achieve clarity on this matter, I thought that the language of the conference report was quite straightforward on this matter.

In agreeing to recede to the Senate, it was our judgment, Mr. Speaker, that the Senate's statutory language and its accompanying report were clear in their intention and scope of legislative relief. We should have a concern for enacting laws that will, to the maximum degree possible, eliminate confusion. Toward this objective, Senate Report 97-536 contained particularly instructive language from the Supreme Court's De La Cuesta case as to the threshold date of the window period. Specifically, the Supreme Court in De La Cuesta stated that—

> For the purpose of identifying the beginning date of the window period, especially where numerous court cases address the due-on-sale issue, the Committee finds instructive the following analysis by the Supreme Court on California law: Not until Wellenkamp was decided in 1978 was a lender's right under California law to accelerate a loan in response to an outright transfer limited to cases where the security was impaired. The California Supreme Court's prior cases, which forbade the automatic enforcement of due-on-sale provisions when the borrower further encumbered the property securing the loan, *La Sala v. American Savings & Loan Association*, 5 Cal. 3d 864, 489 P. 2d 1113 (1971), and when the borrower entered into an installment land contract covering all or part of the security property, *Tucker v. Lassen Savings & Loan Association*, 12 Cal. 3d 629, 526 P. 2d 1169 (1974), permitted the unrestricted exercise of due-on-sale clauses in cases of outright transfers of the security. See 5 Cal. 3d, at 880, 489 P. 2d, at 1123; 12 Cal. 3d, at 637-638, 526 P. 2d, at 1174-1175.

Clearly, the courts are always the final arbiters of our laws. But, Congress does not serve the public or the judiciary by not being as clear and forthright as we possibly can as to our legislative intent, and since the Supreme Court has already given us some judicial guidance in this matter, I suggest that our body, in agreeing to the Senate provision, felt bound not only by the conference report, but also by the Senate report explaining due on sale.

Having said this, Mr. Speaker, let me reiterate my support for the Garn-St Germain Depository Institutions Amendments of 1982. Titles I and II will help get troubled institutions through their current difficulties. Titles III, IV, and V should poise depository institutions in a somewhat more favorable position to meet the challenges of the financial marketplace in the decade ahead. I commend the members and committee staff who have devoted so much of their time and their thought in the past weeks and months in trying to preserve and strengthen our depository institutions. I encourage all of my colleagues to support this much needed legislation.●

Mr. Speaker, we do have to have a colloquy with the chairman on four or five questions that have been worked out. The staff has asked us to clarify these things, so I would appreciate the attention of the chairman as I go down these very quickly.

First, I understand the conferees' directive to the DIDC is that it establish within 60 days of enactment an account which is "directly equivalent to and competitive with money market mutual funds." Obviously, it is of tremendous importance to our Nation's depository institutions that the DIDC create such an account as expeditiously as possible.

So as to assure myself and others that this new account is to be truly competitive with money market mutual funds, I would like to direct a question to the Chairman, if I may.

Mr. Chairman, people fortunate enough today to have deposited funds in money market mutual funds have access to their funds any time they wish by simply drawing an ordinary everyday check against their account. In turn, they may issue this check to any third party for the payment of goods or services. Is this not correct?

Mr. ST GERMAIN. The gentleman is indeed correct. That is the reason why the conferees have directed the DIDC to allow such accounts to have up to three preauthorized or automat-

ic transfers and three third-party transfers per month.

Mr. STANTON of Ohio. So, when the chairman states that such an account will allow three preauthorized or automatic transfers and three third-party transfers per month, does he mean that the account holder could draw ordinary checks against this account and issue them to third parties the same as money market mutual fund account holders can do today?

Mr. ST GERMAIN. Absolutely. A new account without this feature would clearly not be "directly equivalent to and competitive with money market mutual funds" and for DIDC to create such an account without this feature would be totally inconsistent with the conferees' explicit directive to the Committee.

Mr. STANTON of Ohio. Thank you very much Mr. Chairman. Now, if I may, Mr. Chairman, follow up with one additional question concerning those eligible to open this new account to be created by DIDC.

We are aware that anyone—private individuals, partnerships, corporations, business organizations, public units, and so on—are eligible to open a money market mutual fund account.

There are no limitations or restraints imposed as to who can own a money market mutual fund account. In light of this, Mr. Chairman, I would again presume that it is the intent of the conferees that the DIDC, in authorizing this new account which is to be "directly equivalent to and competitive with money market mutual funds," should recognize that there are not to be any restrictions, limitations, or prohibitions imposed as to who is eligible to hold this new account.

Mr. ST GERMAIN. Once again, the gentleman is precisely right. It is the conferees' clear intent that the DIDC is not to impose any limitations as to who is eligible to open this new account.

Mr. STANTON of Ohio. Finally, Mr. Chairman, with respect to the reserve level for this account, it is my understanding that the account for individuals will be reservable at the level for personal time deposits, that is zero percent; while the business accounts will be reserveable at the level for nonpersonal time deposits, that is 3 percent. Am I correct on that?

Mr. ST GERMAIN. Again, the gentleman is correct. The nonpersonal reserve level applies only to business accounts.

Mr. STANTON of Ohio. Lastly, Mr. Chairman, I will appreciate the chairman's taking the time to clarify a point concerning title II of this bill. I have heard that there is some question concerning the effect of enactment on merger agreements which some troubled thrift institutions may have signed. Do you share my understanding that this legislation will have no effect on the validity of these agreements?

Mr. ST GERMAIN. The gentlemen is correct in his interpretation. A thrift institution which, before this legislation becomes law, agreed to a merger resolution or in some other way entered into a binding agreement concerning its continued operations must abide by the terms of its agreement. A merger resolution or other binding agreement is a contract enforceable under the terms of applicable law and H.R. 6267 will not change the enforceability of such a contract. Officials of the Federal Home Loan Bank Board inform me that the availability of net worth assistance under title II will not terminate the effectiveness of outstanding agreements. I thank the gentleman for raising this question.

Mr. STANTON of Ohio. Mr. Speaker, I thank the gentleman.

I yield such time as he may consume to my colleague from the committee, the gentleman from Florida (Mr. MCCOLLUM).

Mr. McCOLLUM. Mr. Speaker, I would like to ask a question for point of clarification.

In the conference report in title I, section 123, paragraph 2(b) is a discussion of the priorities of merger in the potential merger considerations. It states in there the need to minimize the cost of financial assistance to the maintenance of the funds in the corporation is a consideration, and also indicates that the priorities are a consideration.

In our initial House version, there was language which said that the two would be given equal consideration, the priorities and the need to maintain the financial status of the corporations.

Am I to understand, am I correct, that the change in language here is not significant, that the priorities are not to be given any lesser consideration in this bill, in the conference report, than the need to minimize financial loss to the corporation; am I correct in that?

Mr. STANTON of Ohio. I would say to my friend, we could elaborate on this point, but the chairman has taught me to say, that is correct.

Mr. McCOLLUM. Is that a correct interpretation of the gentleman from Rhode Island, may I ask?

Mr. ST GERMAIN. I concur in the correctness.

Mr. McCOLLUM. Mr. Speaker, I thank the gentleman.

Mr. PERKINS. Mr. Speaker, will the gentleman yield?

Mr. STANTON of Ohio. Certainly.

Mr. PERKINS. I would like to ask the gentleman from Ohio if we have any open doors to interstate banking in this bill?

Mr. STANTON of Ohio. My answer to that would be to the chairman that there is written into the language of the report that there is nothing in this legislation that would mean to misinterpret the present rules and regulations of the Glass-Steagall Act or the McFadden Act. The McDouglas Act would control across interstate merger lines; so my answer to that question is there is nothing.

What it does do in title I is spell out the procedure for order, where there are institutions in trouble, and it sets up a procedure to follow.

Mr. PERKINS. Mr. Speaker, I thank the gentleman.

Mr. STANTON of Ohio. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Speaker, I rise in opposition to this conference report.

I wish to call to the attention of my colleagues a larger picture; that is, the relationship of this conference report to the future soundness of the dollar.

It was mentioned in the debate on the rule by the gentleman from Kentucky that this bill could cause high interest rates. It certainly will indirectly, because this bill is inflationary. It is based on the creation of new money to bail out old investments and bad investments in the system.

The problem is inflation. We cannot solve our problem with inflation.

We have a massive amount of malinvestment in the system and a massive amount of debt sitting there to be liquidated one way or the other, either by deflation or massive inflation.

We are choosing today the massive inflation.

We have a sick economy based on the false hopes and the false dreams of inflation.

Samuel Johnson in the Rambler many years ago said that the reigning error of mankind is that we are not content with the conditions on which the goods of life are granted. That is what inflation is all about. It is a false hope and a false dream.

This conference report is an open-ended guarantee of hyperinflation. Its first paragraph zeads:

> The [FDIC] is authorized, in its sole discretion and upon such terms and conditions as the Board of Directors may prescribe, to make loans to, to make deposits in, to purchase the assets of, or to make contributions to, any insured bank. . . .

Not only is the FDIC given unlimited power to act unilaterally, its actions may include loans, deposits, exchanges, and gifts to any of the 15,000 insured banks that the FDIC chooses. The bailouts of Chrysler and Lockheed were mere gratuities compared to what this legislation would permit.

But I have quoted only the first paragraph of title I. The later para-

graphs compound the potential for hyperinflation. For example:

The FDIC is authorized, in its sole discretion and upon such terms and conditions as the Board of Directors may prescribe to purchase any such assets [of insured institutions] or assume any such liabilities, to make loans or contributions to, or deposits in, or purchase the securities of, such insured institution or the company which controls or will acquire control of such insured institution; to guarantee such insured institution or the company which controls or will acquire control of such insured institution against loss. . . .

This paragraph obviously expands the universe of institutions which the FDIC may subsidize to include not only insured banks, but companies that control those banks in the future. It also allows the FDIC, in addition to making gifts and loans indiscriminately, to assume liabilities, and to guarantee against loss. This conference report makes clear exactly what "lender of the last resort" means. It means that the Government stands ready to print any amount of paper money or create credit for anyone, at anytime, in order to keep a financial institution open.

Some may object that the insurance reserves of the FDIC are only 1 percent of the insured deposits, which is, of course, accurate. The FDIC has about $11 billion in reserves and insures deposits totaling over $1 trillion. But that is not really important any longer.

Last March, the Congress passed House Concurrent Resolution 290, pledging the full faith and credit of the U.S. Government to deposits in insured institutions. It is not any longer simply a matter of using up $11 or $12 billion. The Government has made a moral obligation to bail out everyone, everywhere, to the tune of $1 trillion. Long before that sum is reached, our economy will be in total collapse, caused by our policy of subsidizing everyone with paper dollars.

There is far more at stake here than insuring depositors against all losses, as important as that type of insurance is to any policy of inflation. This conference report bails out owners, stockholders, and managers, regardless of their stupidity or greed in the making of bad loans to bankrupt enterprises and governments. By this conference report, we are shielding a whole sector of the economy from the effects of its folly.

The banking system in this country due to our present inflation has long been encouraged to make dubious loans to shady characters and even shadier governments, and the financial chickens are now coming home to roost. The press reports that Third World and Communist external debt totals $850 billion, at least five nations are already in default, and a dozen more are threatening default. In this interdependent world, those bad international loans affect many domestic banks. This conference report will result not only in bailing out the makers of these bad loans, but also the foreign governments that have been enriched by them.

In one stroke, the American taxpayer will be sheared in order to save our banks from their folly and to reward foreign dictators who are quickly changing loans into gifts. It was Herbert Spencer who said that the ultimate effect of shielding men from their folly is to fill the world with fools. This legislation guarantees the ascendancy of fools as well as the inevitability of hyperinflation.

As if all the above were not enough, title I of this conference report further exempts all subsidized insured banks from State and local taxes based on deposits held or interest paid, so long as the subsidies continue.

But the ways in which the taxpayers will be subsidizing these institutions are far from exhausted. Title II provides that—

The FDIC, in its sole discretion and on such terms and conditions as it may prescribe, is authorized to increase or maintain the capital of a qualified institution by making periodic purchases of capital instruments to be known as net worth certifi cates. . . .

These net worth certificates, which are, in fact, debt instruments, will be regarded as capital instruments, reflecting a new twist in creative financing. The desperate efforts of the bureaucrats to patch together a paper system lead to all kinds of creativity.

There are, of course, good points about the conference report. The same could be said of virtually any bill that comes before this Congress. The Monetary Control Act of 1980 is a good analogy. There was deregulation in that bill, as there is in this one. But for the past year the Banking Committee has been considering several bills designed to correct a few of the defects of the monetary Control Act. In that case also we legislated in haste, and now are correcting our mistakes at leisure. With this conference report, though, I am not sure we will have enough time to correct all the mistakes before they cause chaos in our monetary system.

Mr. STANTON of Ohio. Mr. Speaker, I yield 1 minute to our distinguished colleague, the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. Mr. Speaker, I rise in enthusiastic support of this bill.

It is my firm belief that this legislation will do a great deal to bolster public confidence in the future of our depository institutions.

H.R. 6267 expands and more clearly defines the powers of the Federal regulators of depository institutions, in consultation with the State regulators, to arrange mergers of troubled thrift institutions and of troubled commercial banks larger than $500 million, and to provide assistance to facilitate them. Mergers are expected to be a last resort. However, when mergers must be arranged, every effort will be made to preserve the specialized character of these institutions as providers of credit to housing and to the local economy.

The likelihood that mergers will be necessary is drastically reduced by the net worth assistance provisions for depository institutions which have encountered difficulties as a result of their efforts on behalf of housing. The program is modeled after the alternative to the House bill which the Federal Home Loan Bank Board developed and which I offered on the floor with the support of the administration. Institutions with net worth of 3 percent of assets or below will receive "net worth certificates" from the FDIC or FSLIC in exchange for promissory notes. Consistent with the objectives which I sought to achieve when the House considered this legislation, the net worth certificates may be treated as net worth, consistent with generally accepted accounting principles. Moreover, since the extent of coverage of an institution's losses varies according to its net worth—70 percent for institutions with net worth of 0-1 percent, 60 percent for institutions with net worth of 1-2 percent, and 50 percent for institutions with net worth of 2-3 percent. This preserves an incentive for managements to control losses and to return to profitability. Institutions will not be required to sign merger agreements or to replace management if they have net worth greater than 0.5 percent after receiving assistance and have reasonable prospects for long-term viability.

The recent decline in interest rates has been of tremendous value to thrift institutions struggling to survive. The likelihood that institutions will ever have to be merged or have to avail themselves of net worth assistance is further reduced as a result of the array of new powers which the bill provides to depository institutions, both on the liabilities side and on the assets side. As a representative of Columbus, Ohio, which has been in the forefront of changes in the financial services market, with the introduction of the cash management account by Merrill Lynch and Bank One and with the recent introduction of financial services in a Kroger supermarket in Grove City, I have been acutely aware of the need for depository institutions to have a depository instrument with which to compete. Under this bill, both commercial banks and thrift institutions will be permitted to offer a new deposit instrument designed to enable them to compete with money market mutual funds and with the other competitors I mentioned. Although the full details must be deter-

mined by the Depository Institutions Deregulation Committee, the bill calls for an instrument which could have a maturity as long as 5 years, with a minimum denomination no higher than $5,000 and no interest rate ceiling or differential. Reserves would be set at only 3 percent, and liquidity would be assured by permitting up to three preauthorized payments and up to three checks each month. In addition, the bill authorizes thrift institutions to offer checking accounts to customers with whom they have business relationships and permits depository institutions to offer NOW accounts to State and local governments.

On the assets side, thrift institutions will be permitted for the first time to have up to 10 percent of their assets in commercial loans by January 1, 1984. Numerous other new asset powers are provided, and management is given authority to arrange portfolios to suit the needs of individual institutions, rather than forced to maintain specific "baskets" with severe restrictions. These new powers are designed to give thrift institutions the opportunity to improve their earnings and solidify their market positions in order to continue to provide financing for housing. In addition, the bill clarifies the status of "due-on-sale" provisions in residential mortgages, by establishing cutoff dates after which institutions may enforce these clauses and a "window period" during which it will be up to the States to determine enforceability. Thus, a major source of uncertainty has been removed from the mortgage market, and commercial banks, thrift institutions, and realtors should be poised to resume lending when housing demand and long-term interest rates improve further. The bill also contains an amendment which I offered extending from April 1 to July 1, 1983, the period during which the Federal Home Loan Mortgage Corporation will refrain from requiring institutions to enforce due-on-sale clauses on mortgages sold to it.

It is also noteworthy that the bill significantly augments the authority of commercial banks to invest in service corporations, by permitting them to conduct any activities through service corporations which they may conduct either through the banks themselves or through subsidiaries of bank holding companies. I believe it is important to note that the administration has expressed great concern over the prospect that this particular new authority may permit banks to engage in activities, such as underwriting and dealing in securities, which would blur the traditional distinctions between banking and commerce established under the Glass-Steagall Act. I share the administration's concern that this development should not occur until Congress has had an opportunity to examine fully the public policy issues raised by the continuing erosion of the separation between banking and commerce. This same concern is reflected in the statement of managers, which calls upon the Federal Home Loan Bank Board to "withdraw and take no further action on" its proposed regulations which would authorize savings and loan service corporations to engage in the securities business and in other heretofore prohibited activities. Perhaps the study of deposit insurance provided under this bill will provide a forum for early consideration of appropriate means to assure the continued safety and soundness of depository institutions and to provide protections for consumers against conflicts of interest which are inherent in the engagement of a single entity in both banking and commerce. I am also gratified that the bill also contains a provision designed to restrict the further expansion of property and casualty insurance activities by bank holding companies.

H.R. 6267 also provides credit union managers with needed authority to modernize their operations and provides relief for officials of commercial banks from onerous and unrealistic restrictions upon their ability to borrow from their own institutions to meet personal needs.

May I say while I am on my feet, Mr. Speaker, it has been a real privilege to have worked on this legislation with the very able chairman of our Banking Committee and with my distinguished colleague, the gentleman from Ohio, my very good friend and the ranking minority member of the House Banking Committee, Hon. WILLIAM STANTON.

BILL has apparently participated in his last House-Senate conference. I regret this deeply, because BILL has provided outstanding leadership to the Banking Committee and BILL has made a lasting mark in the annals of our Nation which will be favorably noted in the years to come.

I thank the gentleman for the time.

● Mrs. HECKLER. Mr. Speaker, thrift institutions in our Nation are in trouble. These institutions need all the help we in Congress can provide—to enable them to survive while they undergo restructuring to approach total deregulation. H.R. 6267, the Depository Institutions Amendments of 1982, provides this help.

This bill would provide capital assistance and expended lending powers for the Nation's thrift institutions. For the commercial banks, it would authorize the issuance of insured accounts that are fully competitive with moneymarket funds. H.R. 6267 represents a consensus effort of depository institutions and real estate interests to provide comprehensive financial reform. But perhaps the most important respect of this legislation is its potential impact on the ailing housing industry. A resurgence of housing finance could be an important first step toward a total economic recovery. Expanding the powers of the thrifts will allow them to become profitable again, and this profitability will insure the availability of home mortgage money.

This is the appropriate time to act—this bill is the appropriate vehicle for congressional action. I fully support this bill.●

● Mr. WORTLEY. Mr. Speaker, I rise in support of the conference report to accompany the bill H.R. 6267, the Depository Institutions Amendments of 1982.

In every respect, the legislation is a compromise. No one setment of the financial services industry is entirely happy with the conference report, yet under the circumstances, I believe it addresses many of the pressing concerns confronting the industry.

The most urgent problem, of course, is the health of the thrifts. Titles I and II of the bill are close to what the House approved as separate legislation. It is imperative that we act now to grant the regulators of these financial institutions the additional powers they need to provide the necessary capital infusion and merger authority on a clearly defined basis.

The conference report we are asked to approve is not meant to solve all the problems facing either the thrift industry or other segments of the financial community. In fact, there are glaring omissions in this legislation.

The conference report is curiously silent about Glass-Steagall, the landmark law separating the banking and securities business. Surely the time has come to review the 1933 act with an eye for bringing it up to date. I hope that by approving the conference report today we will be in a less pressured position and one that will lead to the eventual reassessment of Glass-Steagall in the 98th Congress. I hope that my colleagues on the Banking Committee share that view and will be willing to proceed with dispatch as soon as possible on that issue so that the course begun in 1980 toward eventual deregulation of the banking industry may be completed.●

□ 2220

Mr. ST GERMAIN. Mr. Speaker, I yield myself such time as I might consume—and it will be brief. However, if I may have the attention of the membership, we are about to dispose of this legislation.

We have no further requests for time on our side, but I think it is necessary to take a few moments to pay tribute to a gentleman that I have known for 18 years, whom I have worked with, who sat by my side for these 18 years.

In the area of housing, in the area of assistance to our communites, in the

area of financial institutions, he has been a moderating force and a great contributor.

His 18 years here have been productive ones for our Nation and for our Nation's economy and for our monetary system.

I regret his departure, because these past 2 years we have worked together so well to discharge the duties conferred upon our committee.

So I say to you, BILL, thanks for you friendship, thanks for your help, and tonight's legislation is a tribute, once again, to the manner in which you were able to work in a bipartisan manner, and for that I am most greatful to you.

Mr. STANTON of Ohio. Mr. Speaker, I know it is a habit around here to kill a lot of time waiting for a conference report in this House, but this is getting ridiculous.

When I came to this body, my grandmother died shortly thereafter, and before she died, she said the biggest thrill of her life was, having come over from Ireland in steerage and having worked as a maid for a very wealthy family on the outskirts of Cleveland for 38 years, to see her grandson come to the Congress of the United States.

I think of her, Mr. Speaker, because of my Irish background in which I think we respect, as all Americans do, the independence of thought that the world envies.

I do not have the eloquence—and I have often sat in the back watching so many who do—but I think of the outstanding people we have served with and I would like to express from the bottom of my heart the privilege that is ours to serve the people of this Nation and the world.

I cannot help but think that I should leave one word of warning, and that is, when I see the sense of partisanship become so strong, so needlessly.

As we have observed tonight with the passage of this historic legislation, it only comes about through grudgingly, perhaps, but willingly, on the other hand, the compromise of the majority with the minority, that we have the best of legislation.

I also, Mr. Speaker, want to speak of you and your predecessor, John McCormack, our beloved former Speaker. He wielded this House with such fairness and in all matters he had the ability, when things seemed to get out of hand, to wield that power that was necessary to make each individual Member, including the newest freshmen on our side of the aisle, feel that he was indeed a Member of the House of Representatives.

You have carried on so eloquently that great tradition of your chair.

Lastly, let me express to all of you that as you go home to campaign, I know you are all human and the last week or two you hate the person you are running against—it is part of the business; you have to do that, I guess—but win or lose, we will always maintain the rich traditions that have been in this House, that it has been my privilege to share for 18 years, and that is that above all else, there is one final goal, and that is what is best for the majority of our fellow citizens.

That is what I have observed in the final analysis that this House has acted upon in the majority of cases.

I would say in conclusion that I thank you all for the great privilege that has been mine to work with all of you.

And, Mr. Speaker, the chairman has allowed me to say that we yield back all the balance of our time.

The SPEAKER. Peggy would be so proud, BILL.

Mr. ST GERMAIN. Mr. Speaker, the gentleman yielded on behalf of both of us.

Mr. FRENZEL. Mr. Speaker, This bill has been a long time in coming. A couple of weeks ago, it was dead. Now it has been reborn with the benediction of nearly all associations representing financial institutions with the notable exception of independent bankers' groups.

In addition it has gained support of such other groups as the insurance agents.

It is an emergency bill. It is a closing central effort aimed at saving thrift institutions now in trouble without unnecessary rearrangement of competitive relationships.

I would have preferred a longer term solution, but, as noted earlier, I am really surprised to get any kind of a solution. I look with some hope, and some trepidation, the creation of the new money market accounts.

I wish the bill could have been made to satisfy the independents. The bill is sufficiently important, however, that it must be passed notwithstanding more objections.

The SPEAKER. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

REQUEST FOR CONSIDERATION OF S. 2375, DEFENSE PRODUCTION ACT AMENDMENTS OF 1982

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2375) to extend the Defense Production Act of 1950; to amend section 719 of such act to transfer the authorities and functions of the Cost Accounting Standards Board; to establish a Commission on Strategic and Critical Materials Stockpiling Needs; and to establish a White House Conference on Productivity, and ask for its immediate consideration with an amendment which I will offer.

The Clerk read the title of the Senate bill.

The Clerk read the Senate bill, as follows:

S. 2375

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

SEC. 101. The first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out "September 30, 1982" and inserting in lieu thereof "December 31, 1982".

TITLE II—COST ACCOUNTING STANDARDS

SHORT TITLE; TABLE OF CONTENTS

SEC. 201. This title may be cited as the "Defense Production Act Amendments of 1982".

TABLE OF CONTENTS

Sec. 201. Short title; table of contents.
Sec. 202. Findings and purpose.
Sec. 203. Transfer of Cost Accounting Standards Board functions.

FINDINGS AND PURPOSE

SEC. 202. (a) The Congress hereby finds that—

(1) the Cost Accounting Standards Board has fulfilled its mandate to establish cost accounting standards for defense contractors;

(2) there are continuing functions required to be performed in maintaining the standards, including the amendment or modification of standards, granting of waivers for individual contracts, and establishing exemptions; and

(3) it is necessary to transfer the authority to exercise these functions and the authority to maintain, interpret, and administer these standards.

(b) Therefore, it is the purpose of this title to transfer the authorities and functions of the Cost Accounting Standards Board which are necessary to maintain, interpret, and administer the standards to the Director of the Office of Management and Budget.

TRANSFER OF COST ACCOUNTING STANDARDS BOARD FUNCTIONS

SEC. 203. Section 719 of the Defense Production Act of 1950 (50 U.S.C. App. 2168) is amended to read as follows:

"COST ACCOUNTING STANDARDS

"SEC. 719. (a) Cost accounting standards shall be used by all relevant Federal agencies and by defense contractors and their subcontractors in estimating, accumulating, and reporting costs in connection with the pricing, administration, and settlement of all negotiated prime contract and first-tier subcontract national defense contracts with

the United States in excess of $500,000, other than contracts or subcontracts where the award is based on (1) established catalog or market prices of commercial products, (2) prices set by law or regulation, or (3) adequate competition.

"(b) All standards, rules, and regulations issued by the Cost Accounting Standards Board, and in effect on the day prior to the effective date of the Defense Production Act Amendments of 1982, shall remain in effect and be subject to the provisions of this section. These standards, rules, and regulations shall have the force and effect of duly promulgated regulations.

"(c) All exemptions, waivers, and other actions by the Cost Accounting Standards Board in connection with any function transferred by this section, and in effect at the time of the transfer, shall remain in effect to the same extent as if such transfer has not occurred, until amended or rescinded by the Director of the Office of Management and Budget.

"(d) The Director of the Office of Management and Budget (hereinafter referred to as the 'Director') shall have the authority to take such action as the Director determines necessary to ensure—

"(1) that the standards, rules, regulations, and interpretations issued by the Cost Accounting Standards Board are consistent with sound accounting principles and provide for accurate, fair, and equitable cost determinations; and

"(2) that such standards, rules, regulations, and interpretations conform to procurement policies, regulations, procedures, or forms promulgated pursuant to the Office of Federal Procurement Policy Act and other Government procurement authorities. In performing such function, the Director is authorized to amend or rescind the standards, rules, regulations, or interpretations issued by the Cost Accounting Standards Board.

"(e)(1) Prior to the amendment or rescission of any standard, rule, or regulation under this section, the Director shall publish in the Federal Register notice of the action proposed to be taken, together with a report concerning such proposal. All parties affected thereby shall be afforded a period of not less than ninety days after such publication in which to submit their views and comments with respect to the proposed action.

"(2) The Director shall give full consideration to the views and comments submitted before making any final amendment or rescission. A final amendment or rescission may not become effective prior to the expiration of ninety days after final publication in the Federal Register.

"(f) The publication required by subsection (e)(1) shall contain, with respect to the proposal—

"(1) a full description of such proposal;

"(2) a summary of the reasons for such proposal; and

"(3) an assessment of the probable costs of implementation relative to the probable benefits of such proposal, including an analysis of—

"(A) the effects of such proposal on inflation;

"(B) the advantages and improvements in the pricing, administration, and settlement of contracts which will result from such proposal; and

"(C) the effect of such proposal on contract prices.

"(g) The Director is authorized to exempt from the requirements of this section such classes or categories of defense contractors or subcontractors under contracts negotiated in connection with national defense procurements as the Director determines, or the basis of the size of the contracts involved, nature of the contractor's business, or otherwise, are appropriate, consistent with the purposes sought to be achieved by this section.

"(h) The Director is authorized to waive the requirements of this section.

"(i) For the purpose of determining whether a defense contractor or subcontractor has complied with duly promulgated cost accounting standards and has followed consistently his disclosed cost accounting practices, any authorized representative of the head of the agency concerned or of the Comptroller General of the United States shall have the right to examine and make copies of any documents, papers, or records of such contractor or subcontractor relating to compliance with such cost accounting standards and principles.

"(j) With respect to any function that may be transferred by this section and exercised after the effective date of this section, reference in any other Federal law or regulation to the Cost Accounting Standards Board shall be deemed to mean the Director.

"(k) The assets, liabilities, contracts, property, and records of the Cost Accounting Standards Board are hereby transferred to the Director.

"(l) The standards, rules, and regulations made effective under this section shall be incorporated into a single, Governmentwide procurement regulation not later than September 30, 1984. When such regulation becomes effective, the provisions of this section shall terminate.".

TITLE III—WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SHORT TITLE

SEC. 301. This title may be cited as the "White House Conference on Productivity Act".

FINDINGS

SEC. 302. The Congress finds that—

(1) the United States traditional annual productivity improvement rate of approximately 3 per centum has fallen drastically in recent years to a negative one-half of 1 per centum;

(2) if our traditional productivity improvement rate has been maintained, the average household would have received nearly $5,500 in additional real income each year;

(3) the decline in productivity has inflated the cost of goods and services produced in the United States relative to the goods and services of nations with higher productivity rates;

(4) improved productivity will enhance our international competitiveness, which will expand foreign market opportunities and jobs;

(5) productivity improvement can be restored in the United States through the application of policies and management techniques which have brought substantial productivity gains on a broad scale in other countries and in some businesses within the United States;

(6) when adequate protections are provided, productivity improvement techniques can bring great benefits to labor as well as management; and

(7) the United States must act immediately to reverse our productivity decline and to restore our annual productivity improvement.

DEFINITIONS

SEC. 303. For purposes of this title—

(1) the term "conference" means the White House Conference on Productivity;

(2) the term "Director" means a Director of the White House Conference on productivity who shall be appointed by the Secretary of Commerce and who shall be paid at the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code.

(3) the term "productivity" means output per paid employee hour of all employees in the private sector; and

(4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ESTABLISHMENT AND DUTIES OF THE WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SEC. 304. (a) The President shall conduct a White House Conference on Productivity (hereinafter referred to as the "Conference") not later than one year after the date of enactment of this title in order to develop recommendations to stimulate the Nation's productivity improvement rate.

(b) For the purpose of ascertaining facts and developing recommendations concerning the improvement of productivity, the Conference shall bring together individuals who are experts in the field of productivity, employees, and representatives of business, associations, labor organizations, academic institutions, and Federal, State, and local government.

(c) The Conference shall consider the following policy options with regard to their role in improving national productivity:

(1) reorganization of the Federal Government so that it can best promote productivity improvement in the private and public sectors;

(2) bringing to the attention of American businesses, labor organizations, and Government officials the benefits which result from implementing productivity improvement techniques;

(3) improving the general training and skill level of American labor;

(4) redirecting Government efforts to inform American businesses of foreign technological developments;

(5) encouraging Government agencies to share with industry new discoveries and processes that improve productivity;

(6) establishing annual Presidential awards of recognition for those businesses and industries which accomplish outstanding improvement in productivity and establishing similar awards at the State and district levels;

(7) revising the tax laws to encourage companies to take actions to improve productivity;

(8) reviewing the effect of the antitrust laws on efforts to improve productivity;

(9) reviewing the patent laws to determine if changes are needed to encourage more productive use of American patents;

(10) improving the accuracy and reliability of data gathered by the Bureau of the Census and other Government statistical collection centers which measure American productivity; and

(11) revising Federal civil service laws to improve the productivity of Government workers and encouraging similar action at State and local levels.

REPORT OF THE CONFERENCE

SEC. 305. A final, report of the Conference on Productivity shall be submitted to the President not later than one hundred and twenty days following the date on which the Conference is called and the findings and recommendations included therein shall be immediately made available to the public. The President shall, within one hundred and twenty days after submission of such final report, transmit to the Congress his recommendations for the administrative action and legislation necessary to implement recommendations contained in such report with which he concurs.

ADMINISTRATION

SEC. 306. (a) In administering this title the Director shall—

(1) request the cooperation and assistance of the Office of Management and Budget and the Departments of Labor and the Treasury and such other Federal departments and agencies as may be appropriate in carrying out the provisions of this title;

(2) render all reasonable assistance, including financial assistance to groups and organizations which are conducting district, State, or regional productivity conferences in preparation for the Conference;

(3) prepare and make available background materials for the use of delegates to the Conference which are deemed necessary, and prepare and distribute any report of the Conference as may be necessary and appropriate;

(4) engage such additional personnel as may be necessary to carry out the provisions of this title without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

(5) enter into contracts only to such extent and in such amounts as are provided in appropriation Acts, with organizations with particular expertise in productivity to conduct preparatory and followup work for the Conference.

(b) Personnel engaged under subsection (a)(4) shall be compensated at a rate not to exceed the rate equal to the maximum rate for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

TITLE IV—COMMISSION ON STRATEGIC AND CRITICAL MATERIALS STOCK PILING NEEDS

SEC. 401. This title may be cited as the "Strategic and Critical Materials Stock Piling Study Act of 1982".

SEC. 402. The Congress hereby finds that—

(1) the availability of adequate supplies of strategic and critical industrial materials continues to be essential for national security, economic well being, and industrial production;

(2) research, development, and technological innovation are important factors which contribute to and affect the availability and use of such materials;

(3) there is concern that the Federal Government may not fully possess, or is not adequately exercising, the authority and responsibility for establishing critical policies on such materials and for coordinating and implementing those policies; and

(4) the importance of strategic and critical industrial materials to many national policies requires review of the organizational means for the coordination of policies on strategic and critical materials within the Federal Government.

SEC. 403. (a) There is established a commission to be known as the Commission on Strategic and Critical Materials Stockpiling Needs (hereafter referred to in this title as the "Commission") to study the management, needs, and operations of current national strategic stockpiles.

(b) The Commission shall be composed of five members who shall be appointed by the President from among persons who, as a result of training, experience, and achievement, are exceptionally qualified to carry out the duties and functions of the Commission. In selecting persons for appointment to the Commission, the President shall give particular consideration to persons whose training, experience, and achievement is in fields relating to materials policy, defense policy, or materials science and engineering. The members of the Commission shall serve at the pleasure of the President. The President shall appoint the members of the Commission within 60 days after the date of enactment of this Act.

(c) The President shall designate one of the members of the Commission to serve as Chairman.

SEC. 404. (a) Within six months after the date of appointment of the members of the Commission, the Commission shall transmit to the President and to interested Committees of the Congress a report on the findings, conclusions, and recommendations of the Commission on the needs, management, and operations of the National Defense Stockpile and the system of stockpiling strategic and critical materials. The report shall include—

(1) recommendations for improvement of the current system of management of strategic and critical materials programs and stockpiles of strategic and critical materials and for development and implementation of research and development policies relating to strategic and critical materials, including recommendations on the advisability of centralizing such management, development, and implementation in one new agency and on the structure and control of such agency;

(2) recommendations regarding the funding and funding structure needed to implement a sound strategic and critical materials program and policy;

(3) recommendations for a coherent national policy on strategic and critical materials consistent with other Federal Government policies and recommendations on the actions necessary to implement such a policy;

(4) a discussion of the actions necessary to develop coordinated Federal Government policies, programs, and research and development activities on materials, including strategic and critical materials;

(5) a review and evaluation of the various programs and activities of the Federal Government carried out in accordance with the policy and directions set forth in the National Materials and Minerals Policy, Research and Development Act of 1980 (94 Stat. 2305; 30 U.S.C. 1601 et seq.), and a determination of the extent to which such programs and activities are contributing to the achievement of such policy and directions;

(6) recommendations of policies designed to improve conditions affecting the minerals and materials needs and resources of the United States and to meet the social, economic, and national security goals of the United States; and

(7) a description of domestic and foreign trends in the availability of strategic and critical materials and the quality of the available materials, the implications of such trends for the economies of the United States and the world and for national security, and the probable effects of such trends on domestic industries.

SEC. 405 (a) The Commission shall adopt such rules and regulations as may be necessary to establish its procedures and to govern the manner of its operations and its organization.

(b) Three members of the Commission shall constitute a quorum.

(c) Any vacancy in the Commission shall not affect its powers, but shall be filled in the manner in which the original appointment was made.

(d) Each member of the Commission who is from private life, while serving on the business of the Commission away from such member's home or regular place of business, shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons intermittently employed in the Government service.

(e)(1) The Commission or any member authorized by the Commission may, for the purpose of carrying out this section, hold such hearings and sit and act at such times and places, take such testimony, have such printing and binding done, enter into such contracts and other arrangements (with or without consideration or bond, to such extent or in such amounts as are provided in appropriation Acts, and without regard to section 3709 of the Revised Statutes (41 U.S.C. 5)), make such expenditures, and take such other actions as the Commission or such member may consider advisable. Any member of the Commission may administer oaths or affirmations to witnesses appearing before the Commission or before such member.

(2) The Commission is authorized to secure directly from any officer, department, agency, establishment, or instrumentality of the Government such information, suggestions, estimates, and statistics as the Commission may require to carry out this title. Each such officer, Department, agency, establishment, or instrumentality is authorized and directed to furnish, to the extent permitted by law, such information, suggestions, estimates, and statistics directly to the Commission, upon request made by the Chairman.

(3) Upon request of the Commission, the head of any Federal agency is authorized to make any of the facilities and services of such agency available to the Commission or to detail any of the personnel of such agency to the Commission, on a reimbursable basis, to asssit the Commission in carrying out its duties under this section, unless the head of such agency determines that urgent overriding reasons will not permit the agency to make such facilities, services or personnel available to the Commission and so notifies the Chairman in writing.

(4) The Commission may use the United States mails in the same manner and under the same conditions as other departments and agencies of the United States.

(5) No offices or agency of the United States shall require the Commission to submit any report, recommendation, or other matter to any such officer or agency for approval, comment, or review before submitting such report, recommendation, or other matter to the Congress or to the President.

The SPEAKER. Does the gentleman from Rhode Island (Mr. ST GERMAIN) have an amendment?

Mr. ST GERMAIN. I do, Mr. Speaker.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. ST GERMAIN.

Mr. ST GERMAIN. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. ST GERMAIN: Strike out all after the enacting clause and insert in lieu thereof the following:

"TITLE I—EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

"SEC. 101. The first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out 'September 30, 1982' and inserting in lieu thereof 'June 30, 1983'."

TITLE II—WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SHORT TITLE

SEC. 201. This title may be cited as the "White House Conference on Productivity Act".

FINDINGS

SEC. 202. The Congress finds that—

(1) the United States traditional annual productivity improvement rate of approximately 3 per centum has fallen drastically in recent years to a negative one-half of 1 per centum;

(2) if our traditional productivity improvement rate has been maintained, the average household would have received nearly $5,500 in additional real income each year;

(3) the decline in productivity has inflated the cost of goods and services produced in the United States relative to the goods and services of nations with higher productivity rates;

(4) improved productivity will enhance our international competitiveness, which will expand foreign market opportunities and jobs;

(5) productivity improvement can be restored in the United States through the application of policies and management techniques which have brought substantial productivity gains on a broad scale in other countries and in some businesses within the United States;

(6) when adequate protections are provided, productivity improvement techniques can bring great benefits to labor as well as management; and

(7) the United States must act immediately to reverse our productivity decline and to restore our annual productivity improvement.

DEFINITIONS

SEC. 203. For purposes of this title—

(1) the term "conference" means the White House Conference on Productivity;

(2) the term "Director" means a Director of the White House Conference on Productivity who shall be appointed by the Secretary of Commerce and who shall be paid at the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code.

(3) the term "productivity" means output per paid employee hour of all employees in the private sector; and

(4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ESTABLISHMENT AND DUTIES OF THE WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SEC. 204. (a) The President shall conduct a White House Conference on Productivity (hereinafter referred to as the "Conference") not later than one year after the date of enactment of this title in order to develop recommendations to stimulate the Nations's productivity improvement rate.

(b) For the purpose of ascertaining facts and developing recommendations concerning the improvement of productivity, the Conference shall bring together individuals who are experts in the field of productivity, employees, and representatives of business, associations, labor organizations, academic institutions, and Federal, State, and local government.

(c) The Conference shall consider the following policy options with regard to their role in improving national productivity:

(1) reorganization of the Federal Government so that it can best promote productivity improvement in the private and public sectors;

(2) bringing to the attention of American businesses, labor organizations, and Government officials the benefits which result from implementing productivity improvement techniques;

(3) improving the general training and skill level of American labor;

(4) redirecting Government efforts to inform American businesses of foreign technological developments;

(5) encouraging Government agencies to share with industry new discoveries and processes that improve productivity;

(6) establishing annual Presidential awards of recognition for those businesses and industries which accomplish outstanding improvement in productivity and establishing similar awards at the State and district levels;

(7) revising the tax laws to encourage companies to take actions to improve productivity;

(8) reviewing the effect of the antitrust laws on efforts to improve productivity;

(9) reviewing the patent laws to determine if changes are needed to encourage more productive use of American patents;

(10) improving the accuracy and reliability of data gathered by the Bureau of the Census and other Government statistical collection centers which measure American productivity; and

(11) revising Federal civil service laws to improve the productivity of Government workers and encouraging similar action at State and local levels.

REPORT OF THE CONFERENCE

SEC. 205. A final report of the Conference on Productivity shall be submitted to the President not later than one hundred and twenty days following the date on which the Conference is called and the findings and recommendations included therein shall be immediately made available to the public. The President shall, within one hundred and twenty days after submission of such final report, transmit to the Congress his recommendations for the administrative action and legislation necessary to implement recommendations contained in such report with which he concurs.

ADMINISTRATION

SEC. 206. (a) In administering this title, the Director shall—

(1) request the cooperation and assistance of the Office of Management and Budget and the Departments of Labor and the Treasury and such other Federal departments and agencies as may be appropriate in carrying out the provisions of this title;

(2) render all reasonable assistance, including financial assistance to groups and organizations which are conducting district, State, or regional productivity conferences in preparation for the Conference;

(3) prepare and make available background materials for the use of delegates to the Conference which are deemed necessary, and prepare and distribute any report of the Conference as may be necessary and appropriate;

(4) engage such additional personnel as may be necessary to carry out the provisions of this title without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

(5) enter into contracts only to such extent and in such amounts as are provided in appropriation Acts, with organizations with particular expertise in productivity to conduct preparatory and followup work for the Conference.

(b) Personnel engaged under subsection (a)(4) shall be compensated at a rate not to exceed the rate equal to the maximum rate for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

Mr. BETHUNE. Mr. Speaker, I reserve the right to object.

The SPEAKER. The gentleman reserves the right to object.

PARLIAMENTARY INQUIRIES

Mr. BETHUNE. I would state a parliamentary inquiry: Does the gentleman's unanimous consent request mean that if his unanimous-consent request is agreed to that his amendment would be pending?

The SPEAKER. The gentleman is correct.

Mr. BETHUNE. Mr. Speaker, further reserving the right to object, I would ask the chairman if he would state what the amendment would do.

Mr. ST GERMAIN. Mr. Speaker, the amendment, No. 1, would extend for 9 months, and in addition would include the productivity amendment that we discussed that I think was authored by the gentleman from New York (Mr. LAFALCE) to which I believe the gentleman had agreed.

□ 2230

Mr. LAFALCE. Mr. Speaker, if the gentleman will yield, the amendment is not the exact same as the amendment I have drafted on the White House Conference on Productivity, but it is very, very close, and certainly is most acceptable to me.

PARLIAMENTARY INQUIRY

Mr. BETHUNE. Mr. Speaker, further reserving the right to object, I would address another parliamentary inquiry.

Does the gentleman's unanimous-consent request involve the offering of just the amendment that the gentleman has described?

The SPEAKER. It is just considered with the one amendment.

Mr. BETHUNE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

Mr. BRODHEAD. Mr. Speaker, reserving the right to object, I reserve the right to object in order to propound a question to the chairman of the committee.

We have on the House calendar H.R. 5540, which contains a large number of amendments to the Defense Production Act. This bill has been debated and discussed and voted on, amendments thereto, on the House floor, and it is eligible for consideration and could be considered during the lameduck session. I fail to understand why at this time it is necessary to consider some new amendments when we have a piece of legislation pending before us. I fail to understand why it is necessary to do other than what the other body did, which is to extend it for 90 days only to give the Congress time to consider this other piece of legislation.

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. BRODHEAD. I yield.

Mr. ST GERMAIN. My understanding is that the other body extended it for 90 days, but that the amendments they were to consider were not the amendments that were being considered in the House. I have a little concern about whether or not the House can indeed complete the legislation that has to be done in the lameduck session. I think it is important we not let the act expire. This is why the request for the 9-month extension, because I have been told that the minority would indeed object to a 90-day extension, so I am sort of caught in a dilemma.

Mr. BRODHEAD. Well, I am sympathetic to the problem that the gentleman has and would like to be cooperative with him, but it seems to me that if we extend the thing beyond 90 days we are effectively precluding the option of considering this other piece of legislation, and I fail to see why, at this late hour of the night, in the waning hours of the session, we should have some new amendments and new legislation before us when it certainly is necessary to extend this legislation because it has expired, and I certainly want to be cooperative with the gentleman in that respect.

But, I am not inclined to believe we ought to extend the act for 9 months since we have H.R. 5540 on the House calendar.

Mr. ST GERMAIN. If the gentleman will yield further, all I can say is that there is only one amendment, the productivity amendment, that goes along with the 9-month extension. If there is objection, then we can only try for 90 days. If that is objected to, it is just up in the air, and we can hope something happens in the lameduck session.

Could the gentleman yield to a member of the Subcommittee on Economic Stabilization, the gentleman from New York?

Mr. BRODHEAD. I yield.

Mr. LUNDINE. Mr. Speaker, I appreciate the gentleman yielding. I have been involved in rather extensive discussions with Members on both sides of the aisle with regard to the absolute, essential extension of the Defense Production Act. Let me briefly say that two-thirds of all the contracts of the Defense Department are made subject to this act, and if someone should object tonight and this legislation is terminated, it would have a severe adverse effect on the liability of the United States for defense contracts.

I would like to further point out that the other body has attached three amendments, including very complicated matters on cost accounting and that, to this extension. Now, I would not personally in any way object to a 90-day extension, but I know there are others in this body who would.

I would request that the gentleman from Michigan consider the fact that a 9-month extension of the Defense Production Act does not preclude reconsideration of H.R. 5540 or any other legislation. It simply authorizes this act to continue until the end of next June in the event that it is unamended.

I thank the gentleman for yielding.

Mr. BRODHEAD. Further reserving the right to object, Mr. Speaker, I am sympathetic to what the gentleman says and certainly do not want to take any action that would force the Defense Production Act to expire, but I think we can all understand that the reasoning, the purpose behind the amendment, I think, to extend the act for 9 months is to do exactly that, to preclude the consideration of H.R. 5540. If the concern here is the extension of the Defense Production Act, I am perfectly prepared to go along with that, and would not object, but I would be constrained to object to any extension of the act beyond 90 days, and will object.

Mr. LAFALCE. Mr. Speaker, will the gentleman yield?

Mr. BRODHEAD. I yield.

Mr. LAFALCE. We are really on the horns of a dilemma here. The act expires tonight. We have got to extend it. What are we going to do? We have got two different groups of people, those who really dislike the bill that Congressman BLANCHARD brought forth and want to see it defeated at all costs, and I also think the overwhelming majority of the Senate falls into that category, and the President of the United States. We have to face up to that fact whether we like it or not.

There are individuals here who would simply like to see it extended with no additional amendments much longer than 9 months, maybe a 2-year extension, but just as is. We are ready to go with either the 9-month extension, which would be acceptable to forces I think clearly stated, led by Mr. BETHUNE. We are also willing to go with a 90-day extension or a 3-month extension, yet forces sympathetic with the point of view of Congressman BLANCHARD are ready to object to that.

If we do not iron this out, we are just going to have an absolute collapse of the contract system within the Department of Defense, and I think it is fair to say that the members of the subcommittee and full committee are ready to go with either extension, but we have got two different groups of objectors and we have got to resolve this.

We have come to the conclusion here that it is best to cooperate with the prevailing sentiment as we perceive it throughout the entire Congress, and that includes the Senate and also the White House; and therefore we have decided to go forth now with a 9-month extension, and we hope that we can prevail upon those with whom we are most sympathetic to come with us, and then we will have a better chance in the 98th Congress, I think we can all agree, in the year 1983 to achieve our mutual goals.

Mr. BRODHEAD. Further reserving the right to object, I am again willing to be cooperative in any amendments the committee wants to adopt with the sole exception that I will object to any extension beyond 90 days.

Mr. ST GERMAIN. Mr. Speaker, I would ask unanimous consent to change the request from a 9-month to a 90-day extension, with the same amendment.

The SPEAKER. Will the gentleman withdraw the request and protect the amendment in a new resolution?

Will the gentleman from Rhode Island withdraw his request?

Mr. ST GERMAIN. Mr. Speaker, I withdraw the request just made for 9 months, and we have an alternate with the same amendment for 90 days.

Mr. BETHUNE. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman.

Mr. BETHUNE. I thank the gentleman for yielding. I just wanted to indicate to the gentleman that for several days, as he knows, and as has already been expressed here, we have worked carefully to try to come up with something that would get through the House, and that something we settled on, at least most of us I think around

here, was a 9-month extension of the act and the Productivity Council that Mr. LAFALCE has worked on very hard, and which I congratulate him for, and to delete the other items the other body had put in, the cost accounting standards which are so complex as to defy description in less than a week, and a stockpiling study.

□ 2240

So far as I know there is only a minimum of objection to that. I would hope that that position would prevail. I think it is important that it do prevail.

I cannot see the wisdom in extending beyond, I cannot see the wisdom in making a 90-day extension so that we have to come back and deal with this again in a lameduck session. If it is that important it could be dealt with in the lameduck session by an amendment to what we would do here tonight under an agreement that I have just described.

So I am going to be constrained to object.

The SPEAKER. If we can move along, as I understand, the gentleman from Arkansas (Mr. BETHUNE) is objecting to the gentleman withdrawing his request.

Does the Chair understand that the gentleman from Michigan (Mr. BRODHEAD) objects to the original request of the gentleman from Rhode Island?

Mr. BRODHEAD. Mr. Speaker, I reserve the right to object. I have not yet objected.

The SPEAKER. If the gentleman will state, does the gentleman object?

Mr. BRODHEAD. I will object, Mr. Speaker.

The SPEAKER. Objection is heard.

Will the gentleman kindly present a new request?

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. ST GERMAIN

Mr. ST GERMAIN. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. ST GERMAIN: Strike out all after the enacting clause and insert in lieu thereof the following:

"TITLE I—EXTENSION OF DEFENSE PRODUCTION ACT OF 1950

"SEC. 101. The first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking out 'September 30, 1982' and inserting in lieu thereof 'December 31, 1982.'"

TITLE II—WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SHORT TITLE

SEC. 201. This title may be cited as the "White House Conference on Productivity Act".

FINDINGS

SEC. 202. The Congress finds that—

(1) the United States traditional annual productivity improvement rate of approximately 3 per centum has fallen drastically in recent years to a negative one-half of 1 per centum;

(2) if our traditional productivity improvement rate had been maintained, the average household would have received nearly $5,500 in additional real income each year;

(3) the decline in productivity has inflated the cost of goods and services produced in the United States relative to the goods and services of nations with higher productivity rates;

(4) improved productivity will enhance our international competitiveness, which will expand foreign market opportunities and jobs;

(5) productivity improvement can be restored in the United States through the application of policies and management techniques which have brought substantial productivity gains on a broad scale in other countries and in some businesses within the United States;

(6) when adequate protections are provided, productivity improvement techniques can bring great benefits to labor as well as management; and

(7) the United States must act immediately to reverse our productivity decline and to restore our annual productivity improvement.

DEFINITIONS

SEC. 203. For purposes of this title—

(1) the term "conference" means the White House Conference on Productivity;

(2) the term "Director" means a Director of the White House Conference on Productivity who shall be appointed by the Secretary of Commerce and who shall be paid at the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code.

(3) the term "productivity" means output per paid employee hour of all employees in the private sector; and

(4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ESTABLISHMENT AND DUTIES OF THE WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SEC. 204. (a) The President shall conduct a White House Conference on Productivity (hereinafter referred to as the "Conference") not later than one year after the date of enactment of this title in order to develop recommendations to stimulate the Nation's productivity improvement rate.

(b) For the purpose of ascertaining facts and developing recommendations concerning the improvement of productivity, the Conference shall bring together individuals who are experts in the field of productivity, employees, and representatives of business, associations, labor organizations, academic institutions, and Federal, State, and local government.

(C) The Conference shall consider the following policy options with regard to their role in improving national productivity:

(1) reorganization of the Federal Government so that it can best promote productivity improvement in the private and public sectors:

(2) bringing to the attention of American businesses, labor organizations, and Government officials the benefits which result from implementing productivity improvement techniques;

(3) improving the general training and skill level of American labor;

(4) redirecting Government efforts to inform American businesses of foreign technological developments;

(5) encouraging Government agencies to share with industry new discoveries and processes that improve productivity;

(6) establishing annual Presidential awards of recognition for those businesses and industries which accomplish outstanding improvement in productivity and establishing similar awards at the State and district levels;

(7) revising the tax laws to encourage companies to take actions to improve productivity;

(8) reviewing the effect of the antitrust laws on efforts to improve productivity;

(9) reviewing the patent laws to determine if changes are needed to encourage more productive use of American patents;

(10) improving the accuracy and reliability of data gathered by the Bureau of the Census and other Government statistical collection centers which measure American productivity; and

(11) revising Federal civil service laws to improve the productivity of Government workers and encouraging similar action at State and local levels.

REPORT OF THE CONFERENCE

SEC. 105. A final report of the Conference on productivity shall be submitted to the President not later than one hundred and twenty days following the date on which the Conference is called and the findings and recommendations included therein shall be immediately made available to the public. The President shall, within one hundred and twenty days after submission of such final report, transmit to the Congress his recommendations for the administrative action and legislation necessary to implement recommendations contained in such report with which he concurs.

ADMINISTRATION

SEC. 106. (a) In administering this title, the Director shall—

(1) request the cooperation and assistance of the Office of Management and Budget and the Departments of Labor and the Treasury and such other Federal departments and agencies as may be appropriate in carrying out the provisions of this title;

(2) render all reasonable assistance, including financial assistance to groups and organizations which are conducting district, State, or regional productivity conferences in preparation for the Conference;

(3) prepare and make available background materials for the use of delegates to the Conference which are deemed necessary, and prepare and distribute any report of the Conference as may be necessary and appropriate;

(4) engage such additional personnel as may be necessary to carry out the provisions of this title without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

(5) enter into contracts only to such extent and in such amounts as are provided in appropriation Acts, with organizations with particular expertise in productivity to conduct preparatory and followup work for the Conference.

(b) Personnel engaged under subsection (a)(4) shall be compensated at a rate not to exceed the rate equal to the maximum rate for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

Mr. ST GERMAIN (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Rhode Island?

Mr. BETHUNE. Mr. Speaker, reserving the right to object, I wonder if this matter could be resolved by something in between the two points of contention. For instance, a 6-month extension.

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. Mr. Speaker, I think perhaps if the gentleman objects to this we ought not do anything.

Mr. BETHUNE. I am constrained to object, Mr. Speaker.

Mr. ST GERMAIN. With an objection to the 9 months, I think we will just have to go without a Defense Production Act until the lameduck session.

The SPEAKER. Objection is heard.

The Chair would advise the gentleman as chairman of the committee to see if he can expedite the matter, if he can get all parties together and bring it back later on.

Mr. ST GERMAIN. I thank the Speaker.

EARTHQUAKE HAZARDS REDUCTION ACT AMENDMENTS

Mr. BROWN of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2273) to amend section 7 of the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7706) to extend authorizations for appropriations, and for other purposes, with Senate amendments to the House amendments thereto, concur in the Senate amendments numbered 1 and 3 through 8, and concur in Senate amendment numbered 2 with an amendment.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendments to the House amendments and the House amendment to Senate amendment numbered 2, as follows:

Page 1, lines 10 and 11, of the House engrossed amendment, strike out ", and such sums as may be necessary for the fiscal year ending September 30, 1984".

Page 1, line 13, of the House engrossed amendment, after "inserting ";" insert "and".

Page 1, lines 14, 15, and 16, of the House engrossed amendment, strike out "; and such sums as may be necessary for the fiscal year ending September 30, 1984".

Page 2, line 2, of the House engrossed amendment, after "inserting ";" insert "and".

Page 2, lines 3, 4, and 5, of the House engrossed amendment, strike out "; and such sums as may be necessary for the fiscal year ending September 30, 1984".

Page 2, line 7, of the House engrossed amendment, after "inserting ";" insert "and".

Page 2, lines 8, 9, and 10, of the House engrossed amendment, strike out "; and such sums as may be necessary for the fiscal year ending September 30, 1984".

Page 2, line 14, of the House engrossed amendment, strike out ", September 30, 1983, and September 30, 1984". ". and insert "and September 30, 1983".".

House amendment to Senate amendment No. 2: At the end of the Senate amendment, insert the following: "; and on page 1, line 13 of the House engrossed amendment, strike out '$33,843,000' and insert in lieu thereof '$31,843,000' ".

Mr. BROWN of California (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BROWN of California. Mr. Speaker, S. 2273 extends authorizations of appropriations for the Earthquake Hazards Reduction Act of 1977 and for the multihazard research, planning and mitigation program. The bill passed the House on September 14, 1982, under Suspension of the Rules. On October 1, 1982, the Senate amended the House version of the bill. The Senate amendments change the authorization for the earthquake program from 2 years to 1 year.

In total, the amount of funding authorized by the House bill was $3,939,000 above the President's request, whereas the original Senate bill was right at the President's request.

In this amendment, which is a House-Senate compromise, it is proposed to keep less than half of the House add-on, $1,939,000, to be exact. This add-on includes $1 million of the $3 million proposed to be added on for an operational earthquake prediction system in southern California and all of the $939,000 proposed to be added on for the emergency first response program at the U.S. Fire Administration.

The SPEAKER. Is there objection to the original request of the gentleman from California?

There was no objection.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 2036, JOBS TRAINING PARTNERSHIP ACT

Mr. HAWKINS. Mr. Speaker, I call up the conference report on the Senate bill (S. 2036) to provide for a job training program and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of September 28, 1982.)

The SPEAKER. The gentleman from California (Mr. HAWKINS) will be recognized for 30 minutes, and the gentleman from Vermont (Mr. JEFFORDS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield for a question?

Mr. HAWKINS. I yield to the gentleman from Ohio for the purpose of asking a question.

Mr. SEIBERLING. Does this bill contain any Senate amendments dealing with other subject matter than the subject matter of the bill?

Mr. HAWKINS. No, the bill does not.

Mr. SEIBERLING. Mr. Speaker, I thank the gentleman.

Mr. HAWKINS. Mr. Speaker, I yield 5 minutes to the distinguished chairman of the Education and Labor Committee, the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. Mr. Speaker, I rise in support of the conference report on S. 2036.

It has been 20 years since this body began to deal comprehensively with the problem of disappearing job opportunities.

Twenty years ago the concern of this body was the displacement of thousands of farmers by larger and more mechanized farm operations.

It was of concern that the automatic elevator, automatic mining equipment, and newly developed construction and excavating equipment were taking the place of thousands of people who looked to work in these fields as a lifelong means of supporting themselves and their families.

At that time, this body dealt with the need to retrain and thus provide new opportunities for workers displaced by automation by the enactment of MDTA, the Manpower Development and Training Act, which was signed by President John F. Kennedy March 15, 1962.

Since its enactment by the 87th Congress, the Manpower Development and Training Act has been reviewed and updated from time to time, having a name change in 1973 to the now wrongfully discredited acronym of CETA, the Comprehensive Employment and Training Act. The basic concern to Congress in the late fifties and early sixties in the congressional studies, which led up to the enactment of MDTA, was the devastating effect that automation was having on jobs.

In the accelerated pace of technological development in the seventies and eighties, the character of the work-

place, whether it be on the farm or factory, in processing, in transportation or in the office, is undergoing dramatic change.

These changes make it absolutely essential that there be provided not only training for the economically disadvantaged who otherwise have no chance to compete for jobs, but also retraining programs for persons whose education, experience, and skill no longer fit into the jobs that are available today.

The seriousness of the current deep recession dictates a much stronger approach to the problems of rising and continuing unemployment than S. 2036 provides.

Even though this conference report represents a barebones approach to the needs of the unemployed, to the retraining needs of millions of Americans, I urge its adoption, because it is the best that we can secure, given the posture of the present administration and the differences we encountered in the House-Senate conference and the lateness of the hour.

This 1982 jobs bill is more than just a name change for CETA. This is largely the case because it does not have a jobs creation program. Public service employment will no longer be provided for the unemployed who cannot be placed in the private sector.

Many frowned upon the public service employment program as a subsidy to local government or a concealed form of revenue sharing.

I disagree. Neither of these objections outweigh the need to give a man a job in providing essential local public services, local conservation, or local public facilities maintenance when there is no job for him in the private sector.

With exception of the Job Corps, the final language of the bill as contained in the conference report is silent with respect to levels of funding which the conferees and ultimately the Congress expects in these training programs—training programs which are at this time the only bridge between the unemployed and a job.

The national unemployment rate is now approaching 10 percent. In my State, the unemployment rate had already reached 11.2 percent in July. But national figures, even State figures, do not provide a complete picture of the depth of the economic deprivation with which many people are now confronted.

In most of the counties of the congressional district which I am privileged to represent in the Congress, unemployment rates are much higher than the State or national figures.

At this point, Mr. Speaker, I ask unanimous consent that the Kentucky Labor Force Estimates for July 1982, the most recent month that county data has become available, be inserted in the RECORD:

KENTUCKY LABOR FORCE ESTIMATES—PRELIMINARY JULY 1982

County	Civilian labor force	Employment	Unemployment	Unemployment rate
Total	1,647,609	1,463,628	183,981	11.2
1. Adair	7,582	6,751	831	11.0
2. Allen	7,224	6,434	790	10.9
3. Anderson	6,323	5,664	659	10.4

Note: U.S. Comparable Rate—9.8, Sept. 7, 1982.

My colleagues will note from the previously referred table that Bath County, Ky., has an unemployment rate of 17.2 percent; Bracken, 18.5 percent; Carter, 19.4 percent; Greenup, 19 percent; Knott, 24 percent; and Letcher 27 percent.

These stark figures not only reflect the impact on the coal mining industry, the railroad industry and small manufacturing, but also reflect the serious depression of the farm economy.

Mr. Speaker, I have indicated that the language of the bill in the conference report does not reflect the conferees and, of course, ultimately the Congress anticipated levels of funding for this most important program.

I would hope, therefore, that in the budgetary and appropriations processes for the fiscal year 1983 and the years beyond, that we appropriate sufficient funds so that this legislation does not become a simple token but will be meaningful in bridging the gap between unemployment and jobs.

In this regard, the Congress appropriated for predecessor training programs $10 billion, 378 million in fiscal year 1979; $7 billion, 807 million in 1980; $7 billion, 637 million in 1981. In 1982, we drastically reduced the Federal support for job training to $3 billion, 27 million as a result of the Gramm-Latta substitute.

The conference agreement avoids the disruption of our most effective program for training the hardest-to-employ youth by extending the authority for the Job Corps without major amendments.

The conference report makes clear that the Job Corps is to continue as a distinct national program, and preserves its essential residential character by requiring that nonresidential enrollment not exceed 10 percent of total enrollment in any year.

The conference report also mandates the payment of allowances to Corps members to meet their needs during participation in the program.

New activities are authorized which would encourage the broader dissemination of information gained from successful Job Corps experience to other training and related programs. Also, jointly developed Department of Defense/Job Corps pilot projects are authorized to help youth who so desire to qualify for military service.

In addition, with respect to the Job Corps, the conference report extends most technical provisions which are contained in current law. For example, the existing provisions which exempt the transactions of Job Corps contractors who are carrying out Federal functions on behalf of the Secretary of Labor from State gross receipts, sales, excise and similar taxes is extended in this conference agreement.

I do think that the legislation preserves some of the fundamental elements needed for job training programs. Among these are:

First, that the training opportunities are meaningless unless the unemployed worker is provided some sort of allowance and supplemental services that will enable attendance and participation in the program;

Second, a fund allocation formula which fairly and equitably provides funds for all service delivery areas in all States;

Third, continues special status of rural concentrated employment programs established to meet the needs of special rural populations;

Fourth, contains recognition of the importance of work experience in those areas where the ratio of the work force to private sector employment is disadvantageous to the unemployed;

Fifth, maintains national scope and policy direction and accountability;

Sixth, preserves local discretion in program development;

Seventh, preserves experience and expertise developed at local levels in predecessor training programs;

Eighth, preserves the longstanding role of public education and vocational education institutions in the provision of training;

Ninth, provides separate authority for Job Corps and summer youth programs without significant modification; and

Tenth, places special emphasis on the provision of training to unemployed youth.

Mr. Speaker, the bill brought back from conference differs from existing training legislation in the following respects.

A new performance-based focus for the employment and training system to replace the burdensome process requirements of past programs. Programs meeting or exceeding performance goals will receive incentive funding and those which fail without justification will be replaced;

A new dislocated worker program run by the States to train those who have lost their jobs permanently as the result of structural and technological changes in the economy or foreign competition for new jobs in stable or emerging industries;

A broader role for the States in coordinating training programs with related activities in each State and in monitoring local programs;

An expanded role for the private sector at the local level to bring the local business community into a partnership with chief elected officials so as to insure that training programs meet local skill needs; and

A restructured grant process, based on a single grant, uniform eligibility criteria and a simplified plan, which will reduce paperwork requirements and administrative overhead.

Mr. Speaker, before I conclude, I particularly want to thank GUS HAWKINS, chairman of the Subcommittee on Employment Opportunities, and JIM JEFFORDS, ranking minority member of that subcommittee, for their tireless efforts in designing this legislation and piloting it through a very difficult process this year. I also want to recognize the ranking minority member of the Education and Labor Committee, JOHN EHRLENBORN, for his considerable efforts in support of this bill. I can say without hesitation, that without the work of these men and their dedicated staffs, this conference report would not be before us today.

Mr. Speaker, I urge my colleagues to adopt the conference report on S. 2036.

The SPEAKER pro tempore (Mr. BROWN of California). The Chair recognizes the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. SPEAKER. I speak in strong support of the Job Training Partnership Act S. 2036, and its conference report.

I want to commend the chairman of the conference committee, Mr. PERKINS, for his leadership during the hours of discussion between the House and the Senate regarding the differences between the two bills. Mr. HAWKINS, the chairman of the Employment Opportunities Subcommittee, deserves substantial praise for his dedication to the concepts embodied in a job training bill. He was willing to accommodate varying opinion to assure that a new job training bill becomes a reality. The ranking Republican member of the Education and Labor Committee, Mr. ERLENBORN has increased his credibility throughout the employment and training community by his ability to isolate the issues and deal with them directly. His efforts both during floor debate and conference enabled us to bridge the differences between the two bills.

The efforts on the part of the Senate conferees were equally laudable. Mr. HATCH, Mr. QUAYLE, Mrs. HAWKINS, Mr. KENNEDY, and Mr. METZENBAUM represented their colleagues with wisdom and vigor.

The bill we have before us symbolizes a decade of learning, development, evolution and demonstration surrounding the previous employment and training programs. For at least the past 18 months, Members of both the House and the Senate have been reviewing and analyzing the employment and training policy of this Nation in an attempt to bring together a rational system for job training. We have heard from experts and practitioners in the field and we have made onsite visits to operating programs. With this base of experience, each legislative body introduced separate authorizing legislation and successfully passed job training bills that in their own right were well-developed, sound pieces of legislation.

S. 2036 as it appears before us is the merging of these two proposals. In resolving the differences between our two bills, the Senate and the House, the Republicans and the Democrats, joined in a single purpose. The effort was, and continues to be, bipartisan. The question of turf does not exist. We drew from what we learned had worked in the past; modified what did not necessarily work well, but held potential to work better; and discarded what we knew did not work at all. Our guide was to derive a bill that addressed the training needs of millions of Americans. We had to overcome many obstacles, but the overall need of the unemployed, untrained, and under-employed kept us on course.

This bill is not a compilation of individual programs, but a statement of national policy, a reinforcement of a Federal role in employment and training programs. This is legislation that taken as a whole, is better than either of the two bills taken separately.

There are three basic functions that this legislation must fulfull:

First, occupational skill training for those who desire to work but lack specific job skills;

Second, job search assistance for those who possess occupational skills and are willing to work, but do not know how to obtain a job; and

Third, basic skills training for those who need remedial education assistance in order to obtain a job.

These functions vary in the amount of responsibility that the private sector or governmental agencies should assume. Each would be accomplished more efficiently through cooperation of the two. S. 2036 strives to bring the private sector into a policy-partnership role with local and State governments.

This bill additionally addresses specific issues that I have stressed in the past as essential to a job training bill. These issues include, a clear definition of the Federal, State, and local governmental roles; establishment of specific performance goals, that drive the system rather than being a system controlled by process; creation of a balance between adult and youth programs, and between programs for the disadvantaged and the dislocated; coordination with other training programs for a more effective use of scarce resources; coordination of job training programs with established education programs; and the emphasis of the provision of training rather than income maintenance.

A few provisions in the bill need some clarification regarding their legislative intent. One is the issue of defining what portion of the funds will be devoted to the direct provision of training services. This division of funds was one of the most difficult issues that the conferees had to resolve. S. 2036 provides that within certain limitations, 70 percent of the funds that are allocated to service delivery areas will be for training. The remaining 30 percent is restricted to administrative costs, costs associated with supportive services, and costs attributed to wages and allowances.

During debate in the House, examples of the types of services provided under each of the categories was presented. Such clarification is useful again. Training is defined as those services that are designed to increase or enhance a participant's ability to attain and/or retain employment including such services as intake, testing, job development, and vocational exploration. If the purpose of job training is to move participants into unsubsidized jobs, the cost of services that facilitate this transition should be included as training.

Supportive services are well defined in the bill as those costs without which the participant could not take part in the program, such as transportation, meals and child care. Except under certain circumstances, these costs are not included in the definition of training costs.

Administrative costs are those that are linked to activities which are necessary to comply with the act, such as auditing and financial management. Administrative costs are not directly related to training. Cost attributable to the provisions of direct training services to participants should be considered as training costs including evaluation and assessment, if such evaluation or assessment is of the participant not of the program.

What must be kept in mind regarding the 70-30 split of funds is the tremendous pressure we are placing on the 30 percent. First, S. 2036 allows for up to 15 percent of the funds to be used for administrative costs. That is, up to half of the 30 percent can be used for administrative costs. Currently, approximately 20 percent is being spent for administration of job training programs. As a result of the 30-percent limitation, we are immediately requiring a 25-percent reduction in administrative costs.

The costs for wages, allowances and support services costs, which account for about 50 percent of the costs under the current job training program, are limited to the remaining 15 percent. It may be unrealistic for us to expect that a reduction of this magnitude is possible. Given these restrictions, I encourage that if during the development of regulations there is a question about the placement of a cost category into either the 70- or 30-percent limitations, the benefit of the doubt be given to placing it under the 70 percent or training category. The debate surrounding these costs accounted for a significant portion of the time spent during the conference. I am sure that this debate will continue.

A further issue that I would like to highlight is the inclusion of language to clarify legislative intent regarding States that serve as the sole service delivery area. Because the Governor is both the chief elected official of the service delivery area and is authorized to approve program plans for all service delivery areas within a State, it was necessary to assure that there would be no conflict of authority within the bill. I believe that the resolution reached regarding this concern maximizes flexibility, retains the integrity of the bill structure and minimizes duplication of council membership and paperwork in States that are typically small in population, and often rural.

Finally, I would like to discuss an issue that has been a concern of mine for years. That is, programs for unemployed youth and the coordination between job training and education. Youth unemployment provides the most serious long-term consequences for our economy. The most recent unemployment rate for youth was 24 percent with that for black youth exceeding 50 percent. To allow these high rates of unemployment to continue for our youth relegates an entire generation to low productivity and dependency on the Federal Government. If people remain largely unemployed for the first 10 years of their working life, it is exceedingly difficult for them to develop stable employment patterns. Early joblessness is associated with permanent labor market difficulties, including lower probability of employment in the short term and lower wages throughout the individual's working life resulting frequently in high social costs.

S. 2036 includes provisions that recognize the extraordinary needs of our youth. Although in the strictest sense, the minimum percentage of funds that the bill directs toward youth under the age of 22 has been reduced from 50 percent in the House bill to 40 percent in the conference agreement, the separate authorization of the summer youth program assures that unemployed youth will nevertheless be afforded meaningful employment and skill training opportunities. That is, by limiting the age to 22 and separating the authorization for the summer youth program from the general youth activities, this structure actually provides for at least the current funding level for youth programs, if appropriations remain constant. There is no intent on the part of the conferees to reduce support for youth programs; instead we believe that the balance struck reflects the varying needs of the total population.

There has been much discussion over the descriptiveness of the youth programs as they are included in this bill. For at least 4 years, demonstration programs for youth have been operated with documented results. The programs included within this legislation build upon what we know to be successful methods of intervention with youth. These programs have yet to become institutionalized within the employment and training system, therefore requiring a greater legislative detail than is included in other portions of the bill. I must emphasize that these provisions are not mandated, but rather should serve as a guide in the development of such services for youth.

Further, this bill continues to forge coordination between education and training programs. I continue to hope that through legislation such as this that we can leverage the education system in this country to work more closely with the dropouts and to recognize its responsibility to meet the needs of these youth. We must find a means by which young people are encouraged to stay in school, develop the basic skills, acquire employability skills, and gain their initial experience in the labor market. I believe that this bill makes strides in those directions, particularly through inclusion of youth tryout employment.

One of the requirements of tryout employment is that the employer hire the youth upon completion of the tryout period. The expectation is that the youth will be hired for a significant and comparable period of time. Merely to hire the youth for a brief period upon completion of the tryout period does not fulfill the intent of this legislation.

I consider this bill to be a significant legislative achievement in the evolution of a national employment and training policy. It contains many of the reforms that I have worked for over the past 8 years as a member of

the Education and Labor Committee. I predict that these reforms will be greeted as vast improvements over the problem-plagued programs of the past. I urge the Members of this body to support this legislation and to vote affirmatively for the conference report.

□ 2250

Mr. Speaker, I yield such time as she may consume to the gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. Mr. Speaker, I rise in support of the conference report on the Job Training Partnership Act. The need has never been greater for a comprehensive training program. Today more than 1 million of this country's citizens are unemployed. The tragic costs of unemployment are numerous, including poverty, divorce, and despair. With this piece of legislation, we take a significant step toward providing the unemployed with the skills that will allow them to obtain employment in the developing industries of this country.

During the past week, I have been in touch with many of New Jersey's dedicated citizens with personal involvement in employment training programs. These citizens represent a wide variety of interests, including local government, State government, and private industry. They all have one thing in common—they are excited about this piece of legislation. They are excited because we have succeeded in developing a program that promotes the efficient delivery of services yet retains local initiative and flexibility. Most importantly this legislation provides for the substantive role of the private sector so that we train people for jobs where there are jobs. In addition, this legislation specifically targets training toward three groups of citizens who especially need it; youths, the economically disadvantaged, and displaced workers—an increasing number of whom have recently lost their jobs due to overall trends in certain declining industries.

I would be remiss in my praise if I did not mention the efforts of my colleagues on the conference committee. In particular, Mr. PERKINS, Mr. HAWKINS, Mr. ERLENBORN, and Mr. JEFFORDS have contributed a tremendous amount of time and energy toward this legislation. I am impressed with their knowledge and expertise in employment training, their open mindedness, and their ability to compromise. There were many diverging proposals concerning the funding distribution for this program. All members of the conference had hoped for more for their individual States; New Jersey, for example, did not fare as well as I had wanted. However, I am pleased that the conference report provides more funds for New Jersey than the original House bill.

Passage of this conference report proves that Congress cares about the unemployed of this country. Just as importantly, it proves that Congress can learn from the mistakes of programs of the past, and use that knowledge to develop efficient programs for the future. The Job Training Partnership Act is a most significant step on the road to full employment and economic recovery.

Mr. JEFFORDS. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. SOLOMON).

Mr. SOLOMON. Mr. Speaker, I have a question for either the gentleman from Vermont (Mr. JEFFORDS) or the chairman of the committee.

When this bill left this House, the House had successfully adopted my amendment which prohibited any young man who was in violation of the Draft Registration Act from participating in any of these job training programs, and we subsequently instructed the conferees. My question is: I have not come across the conference report, and I want to know if the amendment was upheld in this legislation.

Mr. JEFFORDS. Mr. Speaker, I can assure the gentleman that his amendment was contained in the bill as it came out of the conference committee. I believe that word is sufficient. It is word for word as put forth by the gentleman from New York.

Mr. SOLOMON. I thank the gentleman.

Mr. JEFFORDS. Mr. Speaker, if I could indulge the chairman of the committee in a colloquy, the gentleman from Kentucky (Mr. PERKINS), it is my understanding that the permissible types of job activities in this bill include vocational student organizations. Am I correct in this interpretation?

Mr. PERKINS. That is my understanding. The gentleman is correct.

Mr. JEFFORDS. I thank the gentleman.

Mr. Speaker, I intend to ask for a vote on this because I have had a request from a number of Members for that. I just want to warn the body of that.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Chairman, I rise in strong support of S. 2036, the Job Training Partnership Act. This legislation is desperately needed by our Nation for our current and future economic competitiveness and well-being.

While the conference report is not as strong as the original House passed bill, H.R. 5320, it is significantly improved over the Senate version. I would like to commend the chairman and the members of the conference committee for their fine work on this measure.

Mr. Chairman, the administration has only recently come to realize the role of the Government in job training and job stimulus programs and the value of a strong Federal voice. Unfortunately this realization comes after the implementation of policies which have led to record high unemployment rates rapidly approaching 10 percent and a dismantling of the Federal commitment to vocational education and job training.

The conference agreement which we are now considering goes a long way to reinvigorating our job training efforts. My colleagues are all aware of the problems associated with the previous program. It was clear to us all that midcourse corrections were needed. But what was not needed and what must be avoided is a full-scale retreat by the Federal Government away from this important educational function.

Mr. Chairman, this bill is an important first step. But I must underline the fact that it is only a first step. While the bill does provide Federal assistance for job training and does provide for up to 250 hours of on-the-job training for youth, we must look at it as a long-term investment. This bill will not bring a dramatic drop in the unemployment rate tomorrow.

Indeed, this bill, if we are sincere in its intent, must be part of a comprehensive, commonsense economic policy designed to reinvigorate our economy and provide private sector jobs for the Americans we will train through passage of this legislation.

Components of this package must include prompt passage of the Defense Production Act, the Young Adult Conservation Corps, fair trade policies, and a housing/jobs stimulus program.

Mr. Chairman, I commend the committee for their leadership on this issue and for producing the best possible product under severe constraints. I am pleased that the administration has been converted on this issue but I still must ask, "What good are trained Americans, if there is no work?"

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Job Training Partnership Act before you for final action today is the product of extensive negotiations and compromise between the House and the Senate. I would like to commend my colleagues on both the House and Senate sides for their tireless efforts to reach agreement and to develop a workable and effective job training program. This final product is not the bill I would have preferred, nor, I believe, does it meet the Senate's first choice. But, I believe it is a workable compromise which preserves the basic tenets embodied in the House bill.

First, the bill preserves the essential role of local governments in the plan-

ning and implementing of job training policy in their areas. While the Governor is given increased administrative responsibility for assuring compliance with the act and for improving coordination among employment-related programs in the State, the Governor cannot impose policy requirements on local communities, nor does the Governor run local programs or have discretion on how funds are to be distributed within the State.

Second, the conference agreement keeps the equal partnership between business and local government and allows the parties to work out at the local level what form the partnership will take. The conference agreement requires that both the private industry council and local elected officials in the service delivery areas approve the local job training plan and agree on how the plan will be developed, and what entity will administer the program and be the grant recipient.

Third, the conference agreement preserves the Federal Government's responsibility for setting overall policy and for establishing performance standards for the program. The Secretary of Labor has the responsibility for imposing sanctions on local programs found in violation of the act. The Secretary is also given appeal authority for plan disapproval as well as any findings of noncompliance.

Finally, the conference agreement preserves the House bill's flexibility to provide wages in connection with training activities and to give participants allowance payments and supportive services necessary for participation. Local communities may waive the limitation on supportive services, wages, and allowances if they can demonstrate that they meet certain criteria, such as areas of high unemployment or service to participants in need of exceptional supportive services such as handicapped individuals or single heads of household with dependent children.

Mr. Speaker, there has been considerable confusion over the past week on just what this bill provides and how it relates to other vitally needed employment legislation. I would like to set the record straight on these matters. Although I am pleased that the President has finally endorsed this measure in spite of the Labor Department's recommendation to veto the compromise agreement, it is important to point out the differences between the conference agreement and the administration's initial proposal. The administration would have restricted eligibility for job training to welfare recipients and school dropouts. The conferees wisely recognized that the need for training and retraining is not limited to these groups and provided authority to serve a broad range of participants including older workers, veterans, in-school youth, dislocated workers, handicapped persons and many other categories of individuals in need of training who would not have been served under the administration's proposal.

The administration gave a block grant to the Governor to determine what areas would be served and how local job training needs would be met. As I have already stated, the conference agreement preserves the local communities right to receive funds and to operate its programs according to local needs. The administration would have limited local government involvement to those areas over 500,000 population disqualifying 85 percent of those communities currently eligible to operate job training programs. The conference agreement would retain eligibility for two-thirds of those communities.

The administration's proposal would have given private industry total authority to make decisions on the use of public funds. Local elected officials would have had only a token say in these decisions. The compromise preserves an equal partnership between the public and private sector.

The administration's proposal would have prohibited the use of funds for wages, allowances or subsistence payments to low-income individuals in training programs. The conferees wisely recognized that many individuals may be prevented from participation in a training program due to the additional expenses incurred as a result of that participation. The conferees provided broad authority to permit the payment of allowances and supportive services and also allowed the payment of wages in connection with training.

The administration's proposal would have provided training for less than 600,000 persons not the 1 million the President is now claiming credit for. In fact, fewer persons would have been served because in reality the administration was planning to spend less than half the amount requested in the President's budget for fiscal year 1983.

Finally, I believe it is essential to differentiate between the purposes of this job training proposal and the need to respond to the devastating levels of unemployment existing in the Nation today. While this job training program is vitally needed to provide job skills necessary to compete in a changing economy, it is not the solution to the 11 million jobless in the Nation today. The provisions of this proposal will not even go into effect until fiscal year 1984. Not one job will be created as a result of this job training proposal's enactment. Thus, it is essential we begin now on job creation programs. The House-passed public works jobs bill which the President opposes would have created a modest 200,000 jobs in needed repair and rehabilitation of essential public facilities. Much more than this must be done and done in the private sector. Both training and jobs are necessary to get us out of this unemployment quagmire. Even the President's own people recognize this. A New York Times article on September 24 quoted one Reagan aide as saying, "We have got to talk about creating jobs, especially if we go above 10 percent unemployment next month." The President is either misinformed about the purposes of this job training bill or he is misleading the American public about its impact on present unemployment. This, however, is a critical challenge to the President's own views on the need to create jobs.

Since his inauguration, the President has consistently used jobs as an issue and a main argument to obtain approval of his tax concessions to business enterprises, his deregulation efforts and his upside down budget priorities. None of which has created jobs; only unemployment.

At the same time, however, he has opposed every single jobs program without exception: Whether private or public, permanent or temporary, emergency or long range. The harmful effects have fallen on every structural group: The youth and our senior citizens, rural and urban inhabitants, veterans and draft evaders, minorities and displaced workers, and scientists as well as laborers.

The President discontinued job programs successfully operating when he took office without offering a single replacement incorporating improvements he claimed to support. Since then he has reduced or eliminated every one he could reach including the Job Corps, WIN, and senior citizens programs under the Older Americans Act.

Some, such as the housing jobs bill and the senior citizens jobs he vetoed after the Congress approved them with bipartisan support.

Others, such as the recently House-passed supplemental appropriations for emergency jobs he opposed as being "only temporary jobs, make work, and too few"—only 200,000 jobs—ignoring the fact he did not support any other jobs either and regardless of number.

The explanation for this bizarre performance is rooted in a blind allegiance to the discredited tradeoff theory that unemployment is the way to decrease inflation. Therefore, it logically follows from this false base, that increasing unemployment is good in the President's economics, which ignores the empirical evidence, the social consequences, and the moral implications. It is this dogma of the twenties that created the Great Depression to which he would have us return to face the technological age of the eighties.

I call on the President to support our efforts to put millions of Americans back to work with the same enthusiasm as he is now supporting our efforts to train the work force. We have met him half way; let him now take a few steps in our direction. Mr. Speaker, a summary of the provisions of the conference agreement follows:

SUMMARY OF CONFERENCE AGREEMENT ON S. 2036, THE JOB TRAINING PARTNERSHIP ACT

I. AUTHORIZATION

Authorizes such sums as are necessary for fiscal year 1983 and thereafter except that $618 million is authorized for the Job Corps for 1983 and such sums as are necessary thereafter.

II. TRANSITION

The provisions of the Comprehensive Employment and Training Act apply through fiscal year 1983. Provisions of the Job Training Partnership Act become effective fiscal year 1984. After June 30, 1984, funds will be available on a program year basis—July 1-June 30—to facilitate coordination with education and other state and local employment-related programs.

III. SERVICE DELIVERY STRUCTURE

Funds are allotted to the States by a formula providing one-third on the basis of areas of substantial unemployment (areas above 6.5%), one-third excess unemployment (above 4.5%) and one-third on the basis of number of economically disadvantaged persons.

Funds are allocated to service delivery areas within the State on the same basis.

Service delivery area designation

The Governor designates service delivery areas within the state based on recommendations of the State Job Training Coordinating Council. The Council also establishes criteria for coordinating job training programs with other employment-related programs in the state. Areas which are automatically entitled to be designated service delivery areas are:

(1) units of general local government with population of 200,000 or more;

(2) voluntary consortia of contiguous units of local government with aggregate population of 200,000 or more;

(3) Concentrated Employment Programs operating in rural areas under the Comprehensive Employment and Training Act.

Private industry councils

Private Industry Councils are established in each service delivery area. The chief elected official or officials in the area select the members of the Council. A majority of the council must be representative of business and industry in the areas and the Chairperson of the council must be a business representative. The remaining members are representative of education, labor, community based organizations, rehabilitation agencies, economic development agencies and the public employment service. In partnership with local government, the Private Industry Council has the responsibility to provide policy guidance for, and exercise oversight with respect to, job training activities in the areas.

IV. LOCAL JOB TRAINING PLAN DEVELOPMENT AND APPROVAL

Private industry council/local government role

The PIC and local government must reach agreement on how the plan will be developed, on the entity to administer the program, and on the grant recipient for local job training funds. The Private Industry Council and the chief elected official(s) must jointly approve the job training plan and submit the plan to the governor.

Governor's role

The Governor may disapprove a local job training plan only if it is not in compliance with a specific provision of the Act or Department of Labor regulations or if it is not in compliance with the state's coordination criteria. The coordination criteria may not limit local discretion in the selection of service providers or the selection of eligible participants. The Governor's disapproval of any job training plan may be appealed to the Secretary.

Monitoring, compliance and sanctions

The Govenor monitors local program compliance with the Act and may issue notice of intent to revoke approval for all or a portion of the plan in the event of noncompliance. A Governor's notice of intent to revoke all or part of the plan may be appealed to the Secretary and shall not become effective until time for appeal has expired.

Performance standards

The Secretary establishes performance standards based on increased employment and earnings of participants and reductions in welfare dependency. The Governor may prescribe variations in the standards within parameters established by the Secretary based upon specific economic, geographic and demographic factors in the State. If a local program fails to meet its performance goals for two consecutive years, the Governor imposes a reorganization plan which may include selection of an alternate entity to administer the program for the service delivery area. The Governor's action is appealable to the Secretary.

V. PROGRAM AUTHORITY

Disadvantaged adult and youth programs

The Conference agreement authorizes a broad range of training activities including on-the-job training, institutional and classroom training, remedial education and basic skills training, exemplary youth programs and other activities to prepare economically disadvantaged adults and youths for unsubsidized employment. At least 40% of the funds, adjusted according to the proportion of youth in the eligible population, must be used to serve youth. A separate part authorizes summer youth employment and training programs.

Eligibility—(1) 90% of the participants must be economically disadvantaged; up to 10% of the participants may not be economically disadvantaged if they have other barriers to employment such as displaced homemakers, offenders, teenage parents, older workers, etc.

(2) Eligible youth are aged 16 through 21, except that youth aged 14 or 15 may be served in summer youth programs.

Employment and training assistance for dislocated workers

The conference agreement authorizes a program of assistance to long-term unemployed workers or those who have been terminated or have received a notice of termination as a result of a permanent closure of a plant or facility. Such assistance includes job search assistance, retraining, relocation assistance, and supportive services to such dislocated workers.

Funds under this program must be matched with non-federal funds including the direct cost of services provided under non-federal programs. The program is administered by the state, but requires review by local private industry councils and local governments for programs operated in a service delivery area and requires consultation with affected labor organizations. The matching requirement is adjusted downward in accordance with the State's rate of unemployment relative to the national unemployment rate.

Job Corps

The Conference agreement preserves and strengthens the Job Corps program authorized under CETA essentially without change of the major provisions. The Conference agreement places a 10% limit on non-residential programs and requires the Secretary to pay allowances to corps-members while in the program.

Native American and migrant programs

Authority for nationally-run employment and training programs for Native Americans and Migrant and Seasonal Farmworkers is retained with minimal change.

Other national programs

The Conference agreement also authorizes 5% of the national program funds (excluding Job Corps) for veterans programs, and authorizes multi-state programs, research and demonstration, pilot projects, evaluation and Labor Market Information. The National Commission for Employment Policy is reconstituted as a non-governmental commission.

VI. LIMITATION ON CERTAIN COSTS

The Conference agreement requires 70% of the funds to be spent on training which may include 50% of the cost of work experience meeting certain criteria and try-out employment for youth. Not more than 15% can be spent for the cost of administration; and not more than 15% may be spent for the costs of supportive services, allowances or wages not included in the 70% category.

Waiver

The Governor shall waive the 15% limitation on nonadministrative costs if the request for excess costs is initiated by the PIC and the justification for such excess is included in the job training plan, if the administrative cost limitation is met and if one or more of the following conditions are met:

Unemployment 3 percent higher than the national average in the service delivery area or area within which services are to be provided;

The plan proposes to serve a disproportionately high number of participants in need of supportive services;

The cost of providing necessary child care exceeds one-half the 15% limit;

The cost of providing necessary transportation exceeds one-third the 15% limit;

A substantial portion of participants are in training programs of 9 months duration or more.

Excess costs may not be allowed to the extent that supportive services duplicate services available without cost in the area.

The cost limitations do not apply to rural CEP's.

VII. AMENDMENTS TO OTHER STATUTES

The Conference agreements amends the Wagner-Peyser Act authorizing the public employment service by (1) establishing a formula for distribution of funds, two-thirds on the basis of civilian labor force and one-third on the basis of unemployment; (2) providing for funding on a program year basis and (3) providing for local coordination with job training programs.

The Conference agreements amends Part C of Title IV of the Social Security Act (WIN) to authorize job search assistance and require coordination of WIN activities with activities provided in a service delivery area under the Job Training Partnership Act.

The Conference agreement amends the Social Security Act to provide for a limited disregard of the income of any dependent child for calculation of family eligibility and the amount of benefits for AFDC.

□ 2300

Mr. PEYSER. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from New York.

Mr. PEYSER. I thank the gentleman for yielding.

I want to reemphasize the importance of what the gentleman said on the misunderstanding that has been created in the country today.

Just last night, in addressing a group, talking about the job situation, a member of the audience said, "Well, I heard the President say last Saturday that he was supporting and that the Congress was passing a new jobs program to attack the unemployment problem."

And that is exactly the message really that the President conveyed to the public last Saturday.

I think it is very important that the point the gentleman has made, that to the best of my knowledge there is not one new job in this bill. And this is not going to put anybody to work. But it is an excellent training program.

Now, one question I would like to ask: Does this conference report include the provision for a stipend payment while training?

Mr. HAWKINS. Yes; as the gentleman knows, the original request of the President was to prohibit stipends, allowances, and wages being paid in connection with this program. That was eliminated in the conference.

We do provide for such payments. There is some limitation on it. But we do have liberal waiver provisions so that I think it is workable, and such allowances can and will be paid under certain protected conditions.

Mr. PEYSER. I thank the chairman.

Mr. HAWKINS. In connection with the question, however, may I repeat again that under this bill, the provisions of this bill will not become effective until October of 1983.

Now, assuming that there is a training period, then it is pretty obvious that this program will not provide a single job nor even the training until October of 1983. So that there is a long period of time in which we have got to devote to the problem of job creation, because this is not a program that is going to be immediately instituted.

Mr. JEFFORDS. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. KEMP).

Mr. KEMP. I thank the gentleman for yielding.

I strongly support this bill. I want to commend the gentleman from Vermont and the gentleman from California. I hope we do not make it so partisan. There was a real strong effort by both parties, both on the Senate side and on the House side, to work out a job training bill that all of us could support or most of us.

And I want to compliment again the gentleman from Vermont, our colleagues in the Senate, particularly Mr. QUAYLE, who had so much to do with this, and the gentleman from California (Mr. HAWKINS). I hope that the partisanship does not sublimate the very important statement that the gentleman made earlier, that unemployment is indeed no answer to inflation. We also learned in the seventies that inflation is no solution to unemployment. Indeed, inflation causes unemployment.

But as the gentleman pointed out, unemployment indeed is inflationary, because it reduces the potential of people to contribute, not only to the economy of the country, but to their own economy.

And I want to compliment the gentleman for helping work this compromise out. And again I only rise because I thought it was turning into a little more partisan than it really should because there has been tremendous cooperation from both sides of the aisle.

I want to compliment the gentleman and ask it be unanimously supported.

Mr. JEFFORDS. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. ERLENBORN), the ranking Republican on the full committee.

Mr. ERLENBORN. Mr. Speaker, not quite 2 months ago this body was debating the merits of a job training bill. I said then that the bill was one of the most important pieces of legislation of the 97th Congress. I believe that that statement still holds true.

Mr. Speaker, I want to take this opportunity to commend the House conferees for their persistence and concern in the development of their legislation. The House has been fortunate to have enjoyed throughout bipartisan support of the bill. This support and spirit of cooperation continued during the conference.

Of particular note must be the roles of the gentleman from California (Mr. HAWKINS), and the gentleman from Vermont (Mr. JEFFORDS). They were able to resolve many of the basic differences early in the process, so that our efforts were not spent in arguing desparate positions but rather in closing the narrow differences of view.

Mr. Speaker, the chairman of our committee, the gentleman from Kentucky (Mr. PERKINS), as usual, was instrumental in working toward the resolution of the differences between the House and the Senate. His direction as chairman of the conference was welcomed and appreciated.

Also our counterparts in the Senate, Mr. HATCH, Mr. QUAYLE, Mrs. HAWKINS, Mr. KENNEDY, and Mr. METZENBAUM, deserve recognition for their hard work.

Mr. Speaker, we have been waiting all day for this conference report to be called up. We thought it would be called up yesterday. We were advised it would be called up earlier today. It has been delayed and delayed and delayed. And I wondered why. I observed to some of my colleagues earlier that there must be no committee in the House with less influence than ours, that our conference report would be put off so late.

I finally discovered why this is. I did not understand that the gentleman from California (Mr. HAWKINS) was waiting for prime time television on the west coast to make the political speech that he made a moment ago.

So now we understand why the delay. I thought he did not have any influence and obviously he had a good deal more than I believed.

Mr. Speaker, I am sorry that we had this political speech here tonight. We have had a good spirit of bipartisanship in our committee, on the floor, in the conference, and that seems to have been broken with this political speech.

Mr. Speaker, I think there is obviously a basic difference of opinion between the gentleman from California (Mr. HAWKINS) and those of us on this side. We on this side believe that you attack unemployment by finding real meaningful jobs in the private sector, long-term jobs, not dead end makework short-time jobs in public service employment.

Now, I guess the gentleman from California (Mr. HAWKINS) is right when he says we have not attacked unemployment. If he considers the only way you can attack unemployment is to have people in these 6-month jobs, to qualify them for more unemployment compensation when they are fined—we do not think that is enough.

We would like to have them in training for 6 months, so they can work for a lifetime.

Mr. Speaker, I think this bill does exactly that. I am proud of the bipartisan spirit in which we fashioned it, and the bipartisan spirit in which it will be adopted tonight.

Mr. JEFFORDS. Mr. Speaker, I yield back the balance of my time.

Mr. HAWKINS. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. LAFALCE).

Mr. LAFALCE. Mr. Speaker, I rise in support of this legislation, but I do not think it goes nearly far enough. I think we have to realize that we are going through a revolution here in the

United States. It is a technological revolution. We are becoming a technological society as opposed to an industrial society. We are becoming a service society as opposed to an industrial society.

Over the next 10 to 15 years or so, we probably will lose about 10 to 15 million jobs in the manufacturing sector. Some people can argue with that fact. But I think most experts would say that.

We have to engage in a massive job retraining program. This bill is a start in that direction, but it does not go nearly far enough.

Further, the educational system that we have in the United States today in the primary and the secondary level is not equipped to train our young people for the jobs of the future.

□ 2310

We must begin to address ourselves to the educational curricula.

Mr. HAWKINS. Mr. Speaker, I will take only 1 minute in closing, but I would like to at least make the record clear that I have never advocated solving the unemployment problem by temporary part-time make-work jobs. I think to even insinuate or to imply that is a disservice certainly to the cause of trying to work in a bipartisan manner.

Certainly there are those of us who believe and I think it is strongly imbedded in the training proposal and in many of the jobs programs we have passed that we believe in the private sector, that we believe in private jobs in the private sector.

I think that certain radio addresses made by those in high places that the jobs we advocate are only temporary, that they are make work and that they are dead end, is a poor excuse for those whose records indicate that in 2 years of operation they have produced 3 million unemployed persons.

Now, certainly if I were advocating temporary part-time jobs it would be far better than being unemployed. I think what we should challenge and what we should fight against is the consistent record of those in public office who have not supported any type of jobs program. They have not produced one. They have not offered one. They have not supported one.

I think the time has come for them to either put up or simply to say that they are supporting unemployment.

I think it is a sad day in the tragic efforts of this administration that that is the only policy that seems to dominate.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I do thank my chairman for yielding.

I really think we ought to draw the attention of the House to a simple fact. A lot of things have caused the tragic unemployment that we see, but we have unemployment, in fact, in every industrialized Western country in this world.

Mr. Reagan and his policies are not responsible for 13-percent unemployment in Britain or 16 percent in Ireland. This is a worldwide problem and there is no use blaming it perhaps even on the Democrats.

Mr. PETRI. Mr. Speaker, I rise to support the conference committee report on job training legislation. With this bill, Congress finally comes to grips with our long-term unemployment problems by developing new and vital job training legislation.

We are in a situation where more Americans want to work than ever before. Employment is at a record high. Yet, since a higher percentage of Americans are in the work force than at any time in the past, we do have a serious unemployment problem.

Our problem is not simply a lack of jobs. It is also a mismatch between our unemployed citizens, and the jobs which are out there but which are going begging due to a shortage of qualified applicants.

This is why the current job training legislation is so important. This bill will help train over 1 million unemployed workers each year for permanent, meaningful jobs in the private sector.

It is no secret that because of rapid advances in technology, the job market is undergoing fundamental changes. As time passes, it will become more and more evident that a decent job is a skilled job. To maintain an average, American standard of living it will No longer be possible to rely simply on hard work. Smart work will also be necessary. And that means education.

If we really want to help the unemployed, then we should do more for them than offer them a temporary, deadend position. We should hold out opportunity to them and give them a chance to meet the challenges of the future.

This bill will be a major stride in the right direction. It will provide 70 cents of each dollar spent for job training, compared to the 20 cents out of each dollar which we have spent for training previously.

Also, this bill will strengthen the role of local officials and local business representatives in the management of the program. This will help to guarantee that more people will be trained for jobs which actually do exist locally. In giving local people more flexibility as to the types of training they will offer, we will be doing far more for the unemployed than we would if we tried to mandate all the details from Washington.

Admittedly, this is expensive legislation. But rather than throwing money down the make-work rathole, Congress will be making an investment in the future through its support of this bill.

This investment is necessary.

It is worth it.

I am proud to be a part of it.

And I ask for your support.

● Mr. BIAGGI. Mr. Speaker, I rise to join with my colleagues to express my full and favorable support for the conference report before us today, the Jobs Training Partnership Act—critical legislation to replace our expiring CETA program after this year.

As New York's senior member of the House Education and Labor Committee and a member of the conference committee which fashioned this legislation, I believe that this bill represents a true compromise between the variety of interests which shaped the initial versions of this legislation in the House and in the Senate. I first wish to commend my colleague, GUS HAWKINS, chairman of the subcommittee, for his tireless dedication to seeing this bill through its completion. Our chairman, CARL PERKINS, must also be hailed for his commitment to this compromise bill and his long-standing leadership in our employment and training programs for the disadvantaged.

Passage of this legislation comes at a critical time when unemployment nationwide is peaking at 10 percent—meaning that 1 out of every 10 workers does not have a job. It further means that economic recovery for our Nation is stagnating—and that the ravages of budget cuts in Federal programs are making themselves felt, in a very real way, in cities and towns across this country as unemployment lines are not getting any shorter and industry is not able to expand in a fashion to combat these lines and provide more jobs.

In my own city of New York, the unemployment rate is especially critical. As a result of massive budget cuts in public sector programs under CETA during the past 2 years, we have lost a total of $178 million—or 11,500 jobs. This is a tragic testimony to the lack of compassion in the Reagan economic agenda and further demonstrates the pressing need to pass a job training bill today before we adjourn.

While I applaud the bipartisan support which this legislation has received, including the support of President Reagan, it is my sincere hope that this bipartisan effort can be carried through into the appropriations process so that this bill can adequately meet the real need that is out there. At the current funding level of $3.7 billion, this bill will provide New York City with $109.6 million to train 70,450 workers. These workers will be provided training opportunities that will give them marketable skills that will allow

them to compete for jobs in a rapdily changing labor market.

The major provisions in this legislation which I believe merit mention include the establishment of service delivery areas for population areas above 200,000 or corsortia that serve the same size population;

The establishment of a private industry council—a true partner in the development and the implementation of the job training plan within States. This council will serve as a critical and important link with private industry—a link which must be established and maintained if we are to provide meaningful and substantial job training opportunities for disadvantaged workers that will lead to real jobs in both the private and the public sectors;

The targeting of 70 cents of every $1 for actual training—a vast improvement over the current program which provides a mere 20 cents per dollar for these same types of activities—and the retention of stipends and allowances for trainees;

The retention of the role of the local elected official in the training programs, sharing joint power with the PIC while also expanding the role of the Governor, as the recipient of funds and as the primary coordinator for training activities throughout the State. Such a role will provide an important system of service delivery which will address legitimate local needs. The Governor will also facilitate coordination between programs authorized under this legislation and other Federal, State, and local programs.

I am also supportive of the all-important Job Corps programs, which we have retained in this legislation as well as the strong labor standards provisions under the Davis Bacon Act and the Fair Labor Standards Act, which were not included in the Senate bill. In addition, we retained the employment service program authorized under the Wagner-Peyser Act, so we can achieve close coordination between the service and job training programs authorized under this bill.

Finally, I would be remiss if I did not mention the first-time acknowledgment of a need for special employment opportunities for those populations which have experienced severe problems in finding employment and training opportunities. Under this legislation, our veterans are given special emphasis by the provision under title IV which directs the Secretary to set up programs to meet their employment and training needs. These programs are administered by the Assistant Secretary for Veterans' Employment, in coordination with the Administrator of Veterans' Affairs.

I am especially pleased that the conferees accepted the provision in the Senate bill which retains the 3-percent set-aside for older worker programs. This clearly is a long-overdue acknowledgment of the fact that older worker unemployment is a growing issue. By providing these dollars—which the Congressional Budget Office estimates will be $70 million nationwide—we will begin to sensitize officials to the fact that the needs of this group differ from youth and differ from other displaced workers. As an original member of the Select Committee on Aging, I have maintained an active and ongoing interest in this area and intend to monitor the implementation of this provision very closely to insure that this well-intentioned commitment is carried out to its fullest.

In sum, Mr. Speaker, this is a bill which deserves our support. I commend it to my colleagues and urge its adoption.●

● Mr. CORRADA. Mr. Speaker, I rise in support of the conference agreement on S. 2036, the Job Training Partnership Act, and urge my colleagues to join me in approving this modest approach to Federal employment training policy.

I want to commend my colleagues GUS HAWKINS for his hard work and persistence in nurturing this bill through extended hearings and complicated negotiations. I also want to say that Chairman PERKINS played an instrumental role in defending the House opposition in our conference with the Senate and that without his leadership this conference agreement would reflect a much weaker policy.

Mr. Speaker, I fully support S. 2036, as amended, although I feel it does not go far enough. When employment rates are reaching 9.8 percent it seems logical that provisions be made to give workers jobs, not just training for jobs that do not exist. I do expect, however, that this legislation will provide skills training and job search assistance to a substantial number of disadvantaged individuals, and urge my colleagues to support its provisions.●

● Mr. RITTER. Mr. Speaker, I rise in strong support of the conference report to S. 2036, the Job Training Partnership Act. Employment is the cornerstone of a healthy society. Over the past several years, the CETA program placed a great deal of manpower and money into public-service job program which were often poorly administered and died when the funds ran out. This program simply did not achieve the results for which all of us had hoped. Too often under the old CETA program, our youth and unemployed did not develop marketable skills that provided long-term employment opportunities.

This legislation emphasizes private sector employment by setting up a partnership with our local governments, business communities, and labor organizations. That is the kind of partnezship that will work for my Lehigh Valley Congressional District. By promoting local involvement in training, communities and area businesses can begin to establish the kind of job training structure most suitable to their needs.

It is this type of approach that will be helpful to industrial areas with heavy manufacturing, such as the 15th District of Pennsylvania with steel, autos, cement, and other industries not only somewhat older but also hard hit by foreign imports. And this approach will provide individuals with new hope for long-term employment in challenging areas. This legislation benefits not only those unemployed who need training, but also expanding businesses seeking qualified employees. It will help make our Nation a more productive one that can meet the growing challenges of competition form abroad. I urge all my colleagues to support this legislation.●

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. JEFFORDS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 339, nays 12, not voting 81, as follows:

□ 2330

Mr. FIELDS changed his vote from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report on S. 2036.

The SPEAKER pro tempore (Mr. BROWN of California). Is there objection to the request of the gentleman from California?

There was no objection.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 420. Concurrent resolution authorizing that a certain correction be made in the enrollment of House Joint Resolution 599, making continuing appropriations for the fiscal year 1983.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 599) entitled "Joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 15, 30, 33, 57, 59, 69, 73, 75, 76, 78, 88, 89, 90, 93, and 100 to the above-entitled bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2457) entitled "An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 5470. An act to amend the Internal Revenue Code of 1954 with respect to the tax treatment of periodic payments for damages received on account of personal injury or sickness;

H.R. 5536. An act to authorize the Secretary of the Interior to engage in a feasibility study of water resource development and for other purposes in the Central Platte Valley, Nebraska;

H.R. 6458. An act to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes; and

H.R. 7140. An act to amend the Controlled Substances Act and the Controlled Substances Import and Export Act to improve forfeiture provisions and strengthen penalties for controlled substances offenses, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 7140) entitled "An act to amend the Controlled Substances Act and the Controlled Substances Import and Export Act to improve forfeiture provisions and strengthen penalties for controlled offenses, and for other purposes," assigned to by the House, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. THURMOND, Mr. LAXALT, Mr. HATCH, Mr. BIDEN, and Mr. DECONCINI to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 6458) entitled "An act to amend the Public Health Service Act and related laws to consolidate the laws relating to the Alcohol, Drug Abuse, and Mental Health Administration, the National Institute of Mental Health, the National Institute of Alcohol Abuse and Alcoholism, and the National Institute on Drug Abuse, and for other purposes," disagreed to by the House, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HUMPHREY, Mr. HATCH, Mr. DENTON, Mr. MATSUNAGA, and Mr. RIEGLE to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 534. An act for the relief of Frank L. Hulsey;

S. 1088. An act to promote the goal of economic and social self-sufficiency for American Indians, Hawaiian Natives, and Alaskan Natives;

S. 1510. An act for the relief of Apolonio P. Tumamao and others;

S. 2297. An act to amend title 11, United States Code, to improve the protections for shopping centers and their tenants under the Bankruptcy Code;

S. 2552. An act to protect the safety of intelligence personnel and certain other persons; and

S.J. Res. 257. Joint resolution to designate the month of November 1982, as "National Diabetes Month."

DIRECTING SECRETARY OF SENATE TO MAKE CORRECTIONS IN ENROLLMENT OF S. 2036

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 127) directing the Secretary of the Senate to make corrections in the enrollment of S. 2036, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. JEFFORDS. Mr. Speaker, reserving the right to object, I do so solely for the purpose of allowing the chairman to explain the nature of the Senate concurrent resolution.

Mr. HAWKINS. Mr. Speaker, if the gentleman will yield, this is merely to correct the cross references that are in the two bills. It does nothing other. It is just a technical correction to correct cross references so that they will made compatible.

Mr. JEFFORDS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. KAZEN. Mr. Speaker, reserving the right to object, as I understand the gentleman's motion, it is to take the Senate bill, S. 2036, off the table. Is that what it is?

Mr. HAWKINS. No; that is not. This is merely a method of correcting cross references that are in the bill.

Mr. KAZEN. Does the gentleman have reference to S. 2036?

Mr. HAWKINS. Yes; we do.

Mr. KAZEN. Well, further reserving the right to object, Mr. Speaker, I am told that under the formula in that bill and the one that just passed, the conference report that we just agreed to, that there are certain States that will lose quite a few positions under the training bill, Texas losing 115 positions, while other States are gaining; and further, that performance factors were eliminated from funding formulas; is that correct?

Mr. BROOKS. Yes.

Mr. HAWKINS. No; there is hold harmless of 90 percent in the bill to protect the States the gentleman speaks of.

Mr. KAZEN. Further reserving the right to object, Mr. Speaker, I am told that, for instance my State now, Texas, receives 37 cents in return for each employer-paid FUTA tax dollar, with the remainder going to other States, and the conference report on these two bills reduces that figure even further; is that correct?

Mr. HAWKINS. The formula is based on unemployment and the civilian labor force, and under that formula it is my understanding, plus the hold harmless clause, that no State will be disadvantaged.

Mr. KAZEN. Well, is the chairman telling me that no State is going to lose jobs under the conference report?

Mr. HAWKINS. Well, there is a possibility of losing some, but we are talking about a 90-percent hold harmless, so that consequently there is a possibility that some States will lose some, that is true. Now, may I further answer the gentleman by stating that it relies heavily on the appropriation that is made.

Assuming that we get the appropriation that is anticipated, it is highly possible that no loss will be incurred. It is only if there is an inadequate appropriation, less than what is anticipated.

Mr. KAZEN. Further reserving the right to object, does the chairman recall whether the International Association of Personnel in Employment Security endorsed the gentleman's bills?

Mr. HAWKINS. It is the gentleman's understanding that the executive board of the association referred to does support the bill.

Mr. KAZEN. Mr. Speaker, I thank the distinguished chairman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 127

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the bill (S. 2036), to provide for a job training program and for other purposes, the Secretary of the Senate shall make the following corrections:

(1) In section 121(a)(1), strike out "section 7(a)" and insert in lieu thereof "section 8".

(2) In section 122(b)(2), strike out "State job training report" and insert in lieu thereof "Governor's coordination and special services plan".

(3) In section 125(a), after "section 202(b)(4)" insert "and section 461(b)".

(4) In section 141(c), insert "unless" immediately before "such relocation".

(5) In section 141(p), strike out "a job training plan" and insert in lieu thereof "part B of this title or part A of title II".

(6) In section 164(d), strike out "subsection (d)" and insert in lieu thereof "subsection (e)".

(7) In section 202(a)(2)(A), strike out "excess".

(8) In section 203(b)(1), strike out "paragraphs (2) and (3)" and insert in lieu thereof "paragraph (2)".

(9) In section 205(e)(3), insert "be" after "may".

(10) In section 305, strike out "therefore" and insert in lieu thereof "therefor".

(11) In section 481(a), strike out "sections 105(c)(1), 202(a)(1), and 212(a)(1)" and insert in lieu thereof "sections 203(a)(1), 401, and 402".

(12) In section 481(b)(1), strike out "section 103" and insert in lieu thereof "section 102".

(13) In the second sentence of section 462(e), insert "soon as" after "as".

(14) In section 402(e), strike out "Native Americans" and insert in lieu thereof "migrant and seasonal farmworker's".

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

PROVIDING FOR ADJOURNMENT OF THE TWO HOUSES FROM FRIDAY, OCTOBER 1, 1982, OR SATURDAY, OCTOBER 2, 1982, TO MONDAY, NOVEMBER 29, 1982

Mr. WRIGHT. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 421) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows;

H. CON. RES. 421

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Friday, October 1, 1982, or on Saturday, October 2, 1982, pursuant to motions made by their majority leaders, or their designees, in accordance with this resolution, they stand adjourned until 12 o'clock meridian on Monday, November 29, 1982.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING THE SPEAKER TO ACCEPT RESIGNATIONS AND APPOINT COMMISSIONS, BOARDS, AND COMMITTEES NOTWITHSTANDING ANY ADJOURNMENT OF THE HOUSE

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Monday, November 29, 1982, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON DECEMBER 1, 1982

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday, December 1, 1982, may be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

ARMS CONTROL AND DISARMAMENT AMENDMENTS ACT OF 1981

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3467) to authorize appropriations under the Arms Control and Disarmament Act, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Arms Control and Disarmament Amendments Act of 1982".

SEC. 2. (a) Section 49(a) of the Arms Control and Disarmament Act (22 U.S.C. 2589(a)) is amended to read as follows:

"SEC. 49. (a) To carry out the purposes of this Act, there are authorized to be appropriated—

"(1) for the fiscal year 1982, $18,268,000,

"(2) for the fiscal year 1983, $19,893,852, and

"(3) such additional amounts, for each such fiscal year, as may be necessary for increases in salary, pay, retirement, other employee benefits authorized by law,

Amounts appropriated under this subsection are authorized to remain available until expended.".

SEC. 3. Section 45(a) of the Arms Control and Disarmament Act (22 U.S.C. 2535(a)) is amended by inserting the following new sentence after the second sentence thereof: "In the case of persons detailed from other Government agencies, the Director may accept the results of fullfield background security and loyalty investigations conducted by the Department of Defense or the Department of State as the basis for the determination required by this subsection that the person is not a security risk or of doubtful loyalty."

SEC. 4. Section 31(c) of the Arms Control and Disarmament Act (22 U.S.C. 2571) is amended by inserting "and of all aspects of antisatellite activities" immediately before the semicolon.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

Mr. LOTT. Mr. Speaker, reserving the right to object, I just want to inquire of the gentleman if a member of the minority has approved this.

Mr. ZABLOCKI. Mr. Speaker, if the gentleman will yield, the minority is in total agreement. The House passed the bill last year by unanimous consent. There is no controversy, and as I say, the minority is in total agreement.

Mr. Speaker, I rise in support of H.R. 3467, as amended by the Senate.

H.R. 3467, as amended, represents a fair compromise and authorizes very modest sums for the agency with the monumental task of coordinating U.S. arms control policy.

The major elements of the House bill as amended are as follows: The House bill as amended provides an authorization of $18,268,000 for fiscal year 1982 as passed by both Houses. The bill also provides $19,893,852 in authorization for fiscal year 1983 as originally passed by the House, instead of the open-ended Senate language of "such sums as may be necessary." The $19,893,852 is a modest authorization to provide funds to sustain the complex ongoing START, INF, and MBFR negotiations which are in progress.

The money should also be spent in support of the agency's verification and monitoring activities which the President has stated are essential to supplement current reliance on national technical means of verifying arms control treaties. In addition, the authorization is in support of external research in nuclear nonproliferation and in the maintenance of a personnel ceiling of 175 staff. Adequate personnel is critical to support the complicated work of backstopping these important arms control initiatives. Adequate funding must be provided to the agency to continue these vital efforts.

Initially, the executive branch had requested that the $19 million authorization for the agency include the transfer of a $4.8 million Department of Energy program. The House Foreign Affairs Committee and the Senate Foreign Relations Committee fully support the DOE reduced enrichment in research and test reactor (RERTR) program as the research conducted under this program to search for new ways to develop low enriched uranium is vital to sustain our nuclear nonproliferation objectives. However, the committee believes that at this time the program should remain in the Department of Energy. The committee has been given assurances that the program will continue to enjoy the full support and funding of its traditional authorization and appropriation committees. If the Congress should concur with the dismantling of the Department of Energy, this committee will conduct full and complete oversight hearings on this program and will carefully evaluate the transfer of the RERTR program at that time to ACDA.

The amended bill deleted a provision in the House bill which would have changed the name of the agency to the "Arms Control Agency." The members of both committees felt that this was not a propitious time to change the name of the agency and concurred with the Senate on this program.

Finally, H.R. 3467 as amended, included a Senate provision which encourages the Director of ACDA to pursue research, development, and other studies in anticipation of negotiations on antisatellite activities. This is a highly desirable inclusion to the House bill and was fully supported by my colleagues.

In conclusion, Mr. Speaker, each Member should carefully consider the ACDA authorization in the context of the increased attention and public interest in arms control matters. The bill before us, H.R. 3467 as amended, enables the Arms Control Agency to carry out its responsibilities over the next 2 fiscal years in a fiscally responsible and effective manner. At a time when the President has finally resumed negotiations on limiting strategic arms, this Congress must wholeheartedly endorse the authorization for the agency responsible for such a complex and difficult task.

In brief, Mr. Speaker, I would like to reemphasize that this bill is noncontroversial and was passed by the House on June 8, 1981, by a unanimous voice vote. Furthermore, it has enjoyed complete bipartisan support. I would like to also pay tribute to the ranking minority member of the committee, my colleague and very good friend, the gentleman from Michigan (Mr. BROOMFIELD) for his continued support for this measure and my deep appreciation to him for his assistance.

● Mr. BROOMFIELD. Mr. Speaker, the legislation we have before us today provides the Arms Control Agency with an authorization of appropriations which will allow the Agency to improve nuclear safeguard programs, support verification and monitoring activities, provide research in nuclear nonproliferation, and, most importantly, sustain critical arms control negotiations. Now that the President and his negotiators are involved in the limitation of strategic nuclear weapons, it is my hope, as well as Chairman ZABLOCKI's that the Congress would especially support this authorization.

In particular, the bill, as amended by the Senate, encourages the Director of the Arms Control Agency to pursue research and development in regard to possible arms control negotiations concerning antisatellite activities. Also, the legislation recommends that money be spent in support of the Agency's verification and monitoring activities which are crucial to verifying arms control treaties.

In this regard, I believe that the bill contributes to our national and international security, especially in the areas of arms control verification and nuclear nonproliferation, and I urge my colleagues to support the legislation.●

Mr. LOTT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent to revise and extend my own remarks, and that all Members may have 5 legislative days within which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

□ 2340

APPPOINTMENT OF CONFEREES ON H.R. 6946, FALSE IDENTIFICATION CRIME CONTROL ACT OF 1982

Mr. HUGHES. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6946) to amend title 18 of the United States Code to provide penalties for certain false identification related crimes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey? The Chair hears none and, without objection, appoints the following conferees: Messrs. RODINO, HUGHES, KASTENMEIER, CONYERS, GLICKMAN, SAWYER, FISH, KINDNESS, and HYDE.

There was no objection.

CONFERENCE REPORT ON S. 734, EXPORT TRADING COMPANY ACT OF 1982

Mr. BROOKS. Mr. Speaker, I call up the conference report on the Senate bill (S. 734) to encourage exports by facilitating the formation and operation of export trading companies, export trade associations, and the expansion of export trade services generally, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of today October 1, 1982.)

Mr. BROOKS (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The gentleman from Texas (Mr. BROOKS) will be recognized for 30 minutes, and the gentleman from Illinois (Mr. MCCLORY) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

Mr. BROOKS. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of the conference report on S. 734, the Export Trading Company Act.

I am pleased that the conferees agreed to include in this legislation most of the provisions of H.R. 5235, the Foreign Trade Antitrust Improvements Act. These provisions are, I believe, far more important to providing exporters certainty with respect to the antitrust laws than any certification procedure.

I also am pleased that the certification procedure agreed to by the conferees is a balanced one. It includes protection for the certified exporter—no treble damage suits may be brought against an exporter for conduct within the terms and conditions of a certificate—but it also protects competitors and consumers from injury caused by anticompetitive conduct.

The Attorney General retains his right to investigate conduct of certified exporters. The Attorney General may also require the Secretary of Commerce to revoke the certificate when the Attorney General determines that the conduct of the export association is not consistent with the standards set forth in the act. And when certified conduct threatens clear and irreparable harm to the national interest, the Attorney General may bring suit under section 15 of the Clayton Act to enjoin the conduct. Finally, a certified exporter remains fully subject to public or private suit for any conduct that falls outside the terms and conditions of the certificate.

Mr. Speaker, I urge my colleagues to support the conference report.

Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the Foreign Affairs Committee, the gentleman from Wisconsin (Mr. ZABLOCKI).

Mr. ZABLOCKI. Mr. Speaker, I would first like to commend my fellow committee chairmen—Mr. RODINO of the Judiciary Committee and Mr. ST GERMAIN of the Banking Committee—for their diligence in moving this legislation through their committees and through the conference committee. I should also recognize the efforts of the House author of the legislation, Representative DON BONKER, and of Representative JONATHAN BINGHAM, who has shepherded the legislation through his subcommittee and through the full Foreign Affairs Committee.

The Export Trading Company Act takes important steps toward giving the appropriate priority to encouraging exports through clarifying the antitrust laws with respect to export trade associations and by permitting bank participation in export trading companies.

This legislation will not solve the unemployment problem in the United States. In the short run it will not even make a dent in our 10 percent unemployment rate. But, in the long run, if the business community takes advantage of the opportunities offered by this act, it could play a significant role in increasing U.S. exports and thereby contributing to the U.S. balance of trade and to domestic employment.

The State of Wisconsin sees this legislation as a useful mechanism to bring small- and medium-sized firms in my State into the exporting field; the same potential exists in many other States.

I urge the Members to support this conference report which represents a reasonable approach to encouraging the formation of export trading companies and associations.

Mr. BROOKS. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. LAFALCE) on behalf of the Committee on Banking, Housing and Urban Affairs.

Mr. LAFALCE. Mr. Speaker, I rise in support of the conference report on S. 734, the Export Trading Company Act of 1982. In the interest of time, I will limit my remarks to title II of the conference report. This title sets out the involvement of banking institutions in export trading company activities.

Mr. Speaker, as adopted by the conferees, title II is virtually identical to the House backed bill, which after extensive hearings and full participation by committee members, was reported out by a vote of 40 to 0 and passed the House on July 27, by voice vote. I am pleased that the conferees accepted the provisions of the House passed act virtually without change.

A primary concern of the House Banking Committee was how the traditional separation of banking from commerce could be breached without undue risk to participating banking institutions and at the same time provide a reasonable incentive for either bank investment in or ownership of export trading companies. The conferees adopted the concept of H.R. 6016 by insulating the risk to banks by the use of the bank holding company structure. In this way we insured a continuing regulatory presence through the Federal Reserve Board, minimal but fully adequate.

Mr. Speaker, on May 8, 1980, I introduced the first export trading compa-

ny legislation. My goal then was, as it is now, to see legislation signed by the President that would make a healthy start at addressing the problems of our trade imbalance. This legislation is designed to provide new export opportunities for small- and medium-sized businesses and in so doing create new jobs for communities across the Nation. The magnitude of the possibilities of this bill are reflected in a study conducted by Chase Econometrics that estimates that by 1985, export trading companies could increase GNP by $27 to $55 billion, increase employment by 320,000 to 640,000 workers, and reduce the Federal deficit by $11 to $22 billion. These figures take on an additional dimension with the report this week that August figures show a record $7.1 billion deficit in our merchandise trade balance. The deficit reflects a 20.2-percent increase in imports and a 2.9-percent drop in exports. While the ETC bill is not meant as a panacea for this country's formidable export problems, it is a very important step toward formulating and implementing a comprehensive export promotion policy.

In order to meet the goals of this legislation it is essential that the newly formed trading companies are truly export trading companies. As author of the original export trading company legislation, I stressed the meaning of export by requiring companies formed under the provisions of the bill to operate "principally," for purposes of exporting goods or services produced in the United States or for purposes of facilitating the export of goods or services produced in the United States. By "principally" I meant that trading companies refrain from importing except when essential to a particular contract for export. Use of the word "principally" recognizes that ETC's will have to, on occasion, engage in importing, barter, third party trade, and related activities in order to gain access to export opportunities. In most instances, this occasional importing shall be incidental to and necessary to effectuate the primary export transition.

I want to make it very clear that my intent in introducing and supporting the ETC bill is that companies are formed in such a way as to promote the exclusive purpose of the legislation: Export promotion. It is intended that the great preponderance of ETC activity will not require importation of goods and services, and that the total annual dollar volume of U.S. exports arranged by ETC's will vastly exceed the total annual dollar volume of imports so arranged. An export company is not one that receives 49 percent of its revenues from import activities; it is not one that receives 30 percent or 20 percent or even 10 percent of its revenues from importing. An export company is one that imports only when importing is incidental to and necessary for an export effort.

Mr. Speaker, I plan to make it my mission to follow the formation of ETC's, to study the results of their operation, and to analyze the relationships that develop between the export and import of goods or services by ETC's. There is no question that should I find that trading companies are promoting importing or import services, I will be back on this floor demanding a revocation of the privileges contained in the bill now before us. Too much rests on efforts in this country to improve our export performance—too much to allow the creation of a vehicle to allow individual profiteers to ignore the intent of this legislation.

As a longtime supporter of the concept of trading companies, I am happy to see the fruition of the efforts of many people spending many hours to bring us to the point of final approval of this legislation. I am privileged and grateful to have been able to work with so many, as we have, in a strong spirit of bipartisan cooperation. We are all looking forward to the purpose and fruit of this legislation—enhancement of national exports and jobs for American workers.

Mr. BROOKS. Mr. Speaker, I yield such time as he may consume to the gentleman from New York (Mr. BINGHAM).

Mr. BINGHAM. Mr. Speaker, the Export Trading Company Act of 1982, which at last is before us for final approval, is a worthwhile piece of legislation which should be helpful both to industry and labor by improving our ability to export. With exports, of course, come jobs, and so this legislation can contribute in a small way at least to the economic recovery for which we all are striving.

Companies which produce no goods themselves but which specialize in marketing goods and services in foreign markets are essential to effective exporting, and exports in turn are essential to a strong U.S. economy. The fact is that foreign markets—particularly those in the developing countries—are generally growing and expanding more rapidly than our own. To the extent that we fail fully to take advantage of those markets we restrict our own economic growth and employment. These markets are varied and complex. They require imaginative marketing, financing, and other services to penetrate. Even many large and well-staffed firms do not have sufficient expertise to penetrate the wide variety of foreign markets. Other firms are too pressed and preoccupied with meeting domestic demand to concentrate attention and resources on foreign markets.

Effective export trading companies are a useful stimulant to the export side of the economy. They can provide a real service to American manufacturers and distributors who are not otherwise able fully to explore and meet foreign market demands.

To be effective, export trading companies particularly need financing, both to meet their own overhead, which in this age of computers and telecommunications can be considerable, and to finance inventories and sales. The major contribution of this legislation, I believe, is in making it easier for export trading companies to obtain bank financing through actual bank investment in such companies. Through the very careful efforts of the members of the congressional Banking Committees, that result has been achieved very effectively in this bill without endangering the financial stability of the banks themselves, and therefore with minimum risk to depositors. Investment is limited to bank holding companies, bankers' banks, and the Edge Act corporations which are subsidiaries of banking holding companies. Such entities, however, have the kind of capital that is needed to better finance trading company operations, and this legislation provides both the legal authority and the encouragement in the form of congressional endorsement of such bank investments. I hope that the banking community will take full advantage of the possibilities provided here.

It is important to point out, too, Mr. Speaker, that other firms with access to large amounts of capital, like insurance firms and manufacturers themselves, may be in a good position to invest in trading companies. This legislation does not deal with that because there are not the kinds of legal prohibitions to such investments as there have been with respect to bank investment.

This bill, Mr. Speaker, is not a panacea for our export trade deficit. It cannot overcome the effects of unwise U.S. Government policies which lead to recession and a near depression in the U.S. economy and, in turn, to much of the rest of the world. When the U.S. economy is as severely depressed as it is today, foreign markets become as slack as our own, and other developed countries with whom we compete in international markets are pressed to offer subsidies and other export incentives which we are reluctant to provide to U.S. firms. In such circumstances, it takes much more than effective trading companies to improve our export balance. It will take fundamental changes in our national economic policies—changes that will bring interest rates down, stimulate consumer confidence, and generally restore jobs and business expansion in our own economy. Only then will world markets revive and offer needed

opportunities for sales which trading companies can be effective in meeting.

Mr. Speaker, I take some pride in the fact that the subcommittee which I have the honor to chair, the Subcommittee on International Economic Policy and Trade of the House Foreign Affairs Committee, was the first committee in the House to take favorable action on this legislation in both the 96th and 97th Congresses. Several members of the subcommittee took a strong interest in the legislation, but particularly the gentleman from Washington (Mr. BONKER) who has worked tirelessly to bring this legislation to enactment. I urge the House to adopt this conference report. It represents a workable compromise between the Senate and House bills, which has been worked out among several committees, and is fully supported by the Committees on Banking, Judiciary, and Foreign Affairs. I urge adoption of the conference report on the Export Trading Company Act of 1982.

Mr. BROOKS. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. Mr. Speaker, I am pleased to rise in strong support of the Export Trading Company Act of 1982.

This has been one of my highest legislative priorities in this Congress. We need to keep American exports competitive in a world economy which has changed drastically in the last few years. Small businesses, in particular, have been placed at competitive disadvantage by new international trade realities.

This is a very sensible and practical measure which will allow, in a very reasonable way, businesses to work together to promote and enhance American export trade. It is a very wise use, I believe, of our antitrust laws. It is very sound legisation which, I hope, will spur new economic growth and with it, business activity and jobs.

I urge my colleagues to support this vital legislation.

Mr. BROOKS. Mr. Speaker, I yield such time as he may consume to the gentleman from Washington (Mr. BONKER.).

Mr. BONKER. Mr. Speaker, I rise in support of this legislation.

The Export Trading Company Act will allow the formation of Japanese-style export trading companies.

The Department of Commerce has estimated that there are 20,000 firms in this country that are prepared to export products and that they have a facility to do so.

Chase Econometrics has estimated that this bill will create anywhere between 320,000 to 640,000 new jobs. If we are going to experience economic recovery, we have to have a more aggressive export program. This bill will help accommodate that goal.

I would like to commend the chairman of the full Committee on the Judiciary, Mr. RODINO, for his cooperation, and the chairman of the Subcommittee on Foreign Affairs, Mr. BINGHAM, and the others who have had a great role in bringing this conference report to the floor today.

Mr. BROOKS. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia (Mr. BARNARD).

Mr. BARNARD. Mr. Speaker, I would like to engage in a colloquy with the gentleman from New York (Mr. LAFALCE) pertaining to some of the language in the conference report.

The Export Trading Company Act amends the Bank Holding Company Act, but mention is made in the bill of bankers' banks and Edge Act corporations also. Is my understanding accurate that bankers' banks, Edge Act corporations, and bank holding companies are all subjected to identical approval, examination, supervision, and regulatory treatment for purposes of export trading company investments?

Mr. LAFALCE. Mr. Speaker, will the gentleman yield?

Mr. BARNARD. I yield to the gentleman from New York.

Mr. LAFALCE. That understanding is absolutely and completely correct.

Mr. BARNARD. Mr. Speaker, today we are completing action on a landmark legislative effort that will both provide hundreds of thousands of new jobs, and begin to adapt financial institutions to the changing marketplace.

The credit for this advance must go to the chairman of the Banking Committee, Mr. ST GERMAIN, who took a stalled effort and guided it to completion. Through his leadership, we are here today to allow American companies to compete in export markets on an equal footing with foreign companies.

Export trading companies will be major vehicles for presenting American goods and services to the world markets. Although American companies have always exported, we have not had any real policy to encourage exports. Instead, we have often inadvertently made it more difficult to export. As a result, our overseas sales, while significant, have not been as great as they should be. Many commercial opportunities that would have provided jobs for the unemployed, new industries for blighted areas, and incentives to innovate because there was no vehicle for smaller firms to use to increase foreign sales.

Export trading companies will fill this void. They will be able to provide services to the smaller and medium-sized exporter that are currently available only to huge corporations. Utilizing the expertise and foreign presence of banks, they will be able to package export services ranging from marketing surveys to finding buyers, from arranging shipping to product modification, and from financing payment to arranging barter transactions. In all cases, these are services that presently are available only to those exporters who are able to devote the time and money to search them out.

I am proud to say that S. 734 contains a provision that I originally introduced, expanding the limitations on bankers acceptances. Since Congress created the U.S. acceptance market in 1913, they have become an essential part of financing trade. However, the law this body passed almost 70 years ago has not been significantly revised since then.

One of the major revisions has been to place all banks, foreign and domestic, on an equal footing and under the same legal requirements. This means that a foreign-owned bank doing business in this country will not have an unfair advantage in this market, as they too will be covered by this law. For the first time, they will also be subject to the limitations of this act, which will be based on their worldwide capital and surplus, just as it is for a domestic bank.

Under the language of this bill, acceptances will for the first time be available to smaller and medium-sized exporters. In the past, the restrictions on the amount of acceptances that could be outstanding limited them to only the largest exporters, but in this legislation, we have increased the amount that can be outstanding. As a result, smaller firms will, for the first time, have access to this low-cost form of export finance.

Even more importantly, for the first time, we are allowing smaller banks to offer their customers access to export financing. They will be able to both purchase shares of any acceptances issued in behalf of their larger customers, and to originate them for their smaller customers through the mechanism of acceptances.

This committee has worked long and hard to come up with the best way to give these banks and exporters access to this type of trade financing, and has allowed them to be participated through other banks. We have been very specific about how these acceptances should be written, and have come to the conclusion that only the name of the issuing bank needs to be placed on the acceptance.

As this conference report states, we did not do this to impinge or restrict the inherent powers of the Federal Reserve to prevent circumvention of these requirements through imprudent use of acceptances. However, we have also made it very clear that we will not accept either regulatory or other restrictions that would unduly limit the use of bankers acceptances

and participations by the widest number of American banks.

This means that we expect the method detailed in the House report on H.R. 6016 to be implemented without major regulatory interference. We make note of the study being conducted by the Federal Financial Institutions Regulatory Council, and if, after a period of actual use, there are problems with this method, we expect them to report to us any individual regulatory action that would affect the general use of participations before it is taken, except for major emergencies.

In my own personal view, this expansion of acceptance financing will prove a major advance for thousands of small- and medium-sized exporters. By making them available through smaller banks, we are confident that the cost of exporting will be lowered, and that exporters will be able to increase sales and employment.

Mr. Speaker, this legislation is a major beginning not only in expanding foreign trade, but in modernizing our system of financial institutions. However, much else remains to be done next year. For far too long, banks and thrifts have been unable to give their customers the services they need and desire because of outdated laws of another era. We took another major step already today by providing assistance to thrift institutions.

However, we cannot afford to sit back now and think that we have completed our work. There is still a great deal to do in the next Congress. We still need to reexamine outdated legislation such as the Glass-Steagall Act. This bill is a major step along a road that we still have many miles to travel on.

This act, S. 734, is a major step to both increasing foreign trade and to allowing financial institutions to compete, and I urge my colleagues to support it.

Mr. BROOKS. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. I thank the gentleman.

I would like to say first of all that this is a very important bill and, what is more, it represents a major departure from the scheme of the antitrust laws that have been in effect now since 1890.

While I will support this legislation, I think Members ought to understand what it does. It may well be that it will help our export trade and on that basis the Judiciary Committee reported it out and we are now considering the conference report.

However, the other body made some changes in it which I think need to be explained and basically what we have done is to say that a group that wants to form a trading company for export trade must apply to the Secretary of Commerce who must, with the concurrence of the Attorney General, certify that that company meets four standards that are set forth in section 303 of the bill.

The problem I have with this is that those four standards are not the same as the antitrust laws; namely, the Sherman Act, the Clayton Act, and the Federal Trade Commission Act. Therefore, there might be some construction that maybe a trading company does not need to get a ruling that the antitrust laws, as amended by other provisions of this bill, actually apply but merely that these four standards must be met.

Those may be somewhat different in particular situations than the antitrust laws and might produce injury to other businesses that are in the export trade.

The bill goes on to say that if a person is injured but the injury is within the scope of the certificate which must conform with the four standards then, instead of being able to collect treble damages under the antitrust laws for the injury sustained, that competitor can only obtain single damages plus attorneys' fees and court costs.

So this is a very significant departure from the scheme of antitrust laws that has stood us in good effect for over three-quarters of a century.

I just want everyone to understand that.

I would now like to engage in a colloquy with the acting chairman in order to clarify what I think is a needed clarification in this legislation. If you will bear with me for just a minute I will do that.

Will the gentleman continue to yield for that purpose additionally?

Mr. BROOKS. I certainly yield to my friend from Ohio.

Mr. SEIBERLING. I would like to ask the acting chairman about the intent of section 306(b)(1) of the bill which reads as follows:

> Any person who has been injured as a result of conduct engaged in under a certificate of review may bring a civil action for injunctive relief, actual damages, the loss of interest on actual damages and the cost of suit, including a reasonable attorney's fee for the failure to comply with the standards of section 303(a). Any act commenced under this title shall proceed as if it were an action commenced under section 4 or section 16 of the Clayton Act except that the standards of section 303(a) of this title and the remedies provided in that paragraph shall be the exclusive standards and remedies applicable to such action.

Mr. Speaker, as I understand it, this language would give a right to sue under this bill but not under the antitrust laws, so long as the conduct which is the basis of the suit was in accordance with the certificate. The certificate, of course, must be based on the standards set forth in section 303(a).

I also understand the conferees intend that the standards of section 303(a) be as broad as the existing antitrust laws. However, if and to the extent that they are not, it would appear that the existing antitrust laws would still apply.

Is that correct?

Mr. BROOKS. Yes.

Mr. SIEBERLING. So conduct that is not within the scope of the certificate would still be subject to the antitrust laws, is that correct?

Mr. SIEBERLING. What if the Secretary of Commerce and the Attorney General have issued a certificate that erroneoulsy covers conduct that is in violation of the antitrust laws. Would such conduct still be subject to suit?

Mr. BROOKS. Such conduct would still be subject to suit under section 306(b)(1) for injunction and actual damages. The Attorney General could also require the Secretary to revoke the certificate.

□ 2350

Mr. SEIBERLING. I thank the gentleman.

Mr. BROOKS. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. SHAMANSKY).

Mr. SHAMANSKY. Mr. Speaker, I would like to follow up with the remarks made by the gentleman from Ohio and point out that when the Secretary of Commerce testified before our International Policy and Trade Subcommittee of the House Foreign Affairs Committee I asked him if the law was intended to exempt a certificate holder from the operation of the antitrust laws within this country, if they should happen, shall we say, slop over some overseas activities, and he said, oh, that was not the intent at all. His general counsel also said the same thing.

In fact, it seems to me we have a major revision. And if there are other lawyers in this House besides me, you have a prescription for getting around the antitrust laws—get one of these certificates. And what you do internally, within the United States, is down to single damages instead of treble damages.

I think we have to understand that this really is not vital or necessary to the export trading aspect. The pretext for the bill is to permit these companies to operate overseas without having our domestic antitrust laws apply to them overseas.

Unfortunately, what we have here is a license to violate the antitrust laws within the United States, and the penalty would only be single damages.

Mr. BROOKS. Mr. Speaker, I reserve the balance of my time.

Mr. McCLORY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as is typical in most House-Senate conference agreements, there is some give and some take. This is true of the antitrust provisions of S. 734. the Members of this body will be pleased to hear that most of the provisions of H.R. 5235, the Foreign Trade Antitrust Improvements Act, were included in the very form passed by the House on August 3, 1982. The one fatality was the provision exempting joint ventures limited to export trade and foreign trade from coverage of section 7 of the Clayton Act. I regret the loss of this provision, which I attribute more to our hurried conference negotiations than to insuperable substantive objections on the part of the Senate. I hope that this issue can be addressed at some future time.

But we can be pleased that we did win provisions directly amending the Sherman Act and the Federal Trade Commission Act to place jurisdictional limits on these laws so that they will not apply to our export trade or to purely foreign trade unless the conduct in question has a "direct, substantial, and reasonably foreseeable" anticompetitive effect on our domestic commerce or on the commerce of exporters in the United States. These provisions will benefit all American exporters whether or not they apply for certification.

The compromise certification procedure contained in the conference agreement is good legislation. While the House had placed this procedure in the Department of Justice, the compromise agreement places the procedure in the Department of Commerce but retains veto authority in the Department of Justice. This veto authority was very important to the House since the matters to be decided when an exporter applies for a certificate of review are essentially antitrust matters. The arrangement agreed upon in conference thus gives the primary administrative responsibility to the Department of Commerce without interfering with the mission of the Department of Justice to enforce the antitrust laws.

The most important issue regarding the antitrust title of S. 734 concerned remedies to be accorded persons injured by certified conduct. The normal rule is that victims of antitrust violations are accorded treble damages. The Senate version would have accorded zero damages to an injured party—even to a U.S. exporter, even to a U.S. exporter holding a certificate of review. The House version itself was a compromise, according the injured party single damages plus interest in lieu of treble damages for a violation of the antitrust laws.

The conference agreement retains the House version on single damages but does not retain the standard of the "antitrust laws" as such. Instead, it adops the Senate approach of substituting specific standards for the general "antitrust laws" standard. But I wish to assure the Members of the House that these specific standards, four in number, which are contained in section 303(a), in no way compromise the purpose of the House version.

First of all, the joint statement of managers makes clear that the general "antitrust laws" standard of the House version is contained within the four specific standards agreed to. The difference is that the specific standards are easier to understand and—this is important—they are broader than the general "antitrust laws" standard. Thus under the conference agreement, single damages could be assessed against a certificate holder for the reintroduction in this country of exported goods. While such reintroduction may, in fact, be procompetitive and, thus consistent with our antitrust laws, a court could find that this violates the fourth standard of section 303(a) and could subject the violator to single-damage liability.

Also, it should be noted that the third standard embraces unfair methods of competition. Today, damages cannot be awarded for violations of this standard—a standard generally agreed by antitrust experts to be broader than the provisions of the Sherman Act, for violations of which damages do lie. Under the conference agreement, certificate holders are subjected to this broader standard.

Finally, it should be noted that the first and second standard may also be broader than antitrust prohibitions. For prices may be enhanced and competition may be lessened, even substantially, without necessarily violating the antitrust laws. The terms of these two standards are not exact antitrust terminology and thus some period of refinement will be necessary. But with respect to all four of them, the House should be assured that they are at least as broad in their coverage as the antitrust laws. How much broader, the Antitrust Division, the Commerce Department, and the courts will have to hammer out over time.

Since the conferees agreed to adopt these four specific standards in lieu of the general "antitrust laws" standard, it was necessary to adopt other provisions to make clear that the disposition of these cases, which will otherwise be antitrust cases, proceed on the same procedural basis as antitrust cases. It was also necessary to make clear the applicability of the Antitrust Civil Process Act to possible antitrust violations of the section 303(a) standards.

Other minor changes were made. But, in general, the compromise agreement follows the format of the House version. The House position has been ably defended in conference. The four antitrust conferees voted for the House bill signed the conference report. I recommend that this report be adopted. I am confident that this legislation will greatly facilitate the growth of U.S. export trade.

Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I wish to emphasize my strong support for this legislation, S. 734.

The Congress has been studying the concept of export trading companies for years. It is a momentous occasion to finally have legislation to make it a reality.

I believe export trading companies, as promoted by this legislation, will greatly encourage small and medium-sized businesses to pool their resources and expertise to take advantage of the thousands of overseas markets where there is demand for American products. Since these firms would not be able to export on their own, or have been reluctant to do so, the incentives offered in this bill of banking participation and greater certainty in being able to act under U.S. antitrust laws should increase America's export capability and, at the same time, increase the number of jobs available for Americans.

I strongly support the provisions of S. 734 which are designed to promote the development of exports of American goods and services. I am pleased we have finally concluded the lengthy and arduous process of consideration of this legislation and can now get on with the actual realization of its merits. I withdraw my objection.

Mr. McCLORY. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. CLAUSEN).

Mr. CLAUSEN. Mr. Speaker, I rise in strong support of this Export Trading Act legislation now pending before this House. It is timely. It is comprehensive and I believe it could be one of the more significant pieces of legislation we will pass in this Congress.

The basic thrust of this legislation is to increase the job potential for all Americans through the promotion of exports.

For those of us who represent coastal communities and have harbor and port facilities, we have been advocating a more dynamic export policy as a means of promoting and enhancing our economic and social well-being.

Being from California, we are most anxious to promote exports and take advantage of the overseas markets of the Pacific Basin community.

The potential for bank participation in trading companies and the basic structure for groups desiring to form an export trading company is a major step forward and I am personally very excited about the ultimate free enterprise potential of this bill.

The President and the administration, the Secretary of Commerce strongly support this measure because, as I do, they see an unprecedented opportunity for the export of our farm products and also some of our small business entrepreneurs that have heretofore not been able to effectively participate or compete in the developing countries expanding markets.

This is a great day for America and I commend my colleagues on the committee for their efforts and thank them for the time and consideration they have given to me and my input.

I hope the legislation passes overwhelmingly.

Mr. McCLORY. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. Mr. Speaker, I want to join my colleagues in strong support for this important measure. The chairman of our committee deserves a great deal of credit for devising a more workable approach to bank ownership of export trading companies than that devised by the Senate. It is a testimony to his hard work and understanding of this issue that the Senate accepted 90 percent of the House language for the bank ownership provisions.

I am very pleased that we are taking final action on this bill before we adjourn. This bill provides solutions to two of the most vexing problems facing our economy. On the one hand, it should lead to a dramatic increase in U.S. exports. Everyone should be aware that our trade imbalance reached an economic high only last month. On the other hand, this bill should provide important new job opportunities to American workers. The Commerce Department projects that every additional billion dollars in exports generates between 40,000 and 60,000 new jobs. The Department of Commerce estimates it could create 500,000 new jobs. All this at no cost to the taxpayer. This is the American free enterprise system to Government-subsidized export trade from other countries.

I commend the leaders from both sides of the aisle in our three House committees involved for their spirit of compromise and their hard work on this issue. I urge my colleagues to support the bill.

Mr. McCLORY. Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. Mr. Speaker, I rise in strong support of this act, particularly for its help for small business and for farmers.

● Mr. BROOMFIELD. Mr. Speaker, I wish to call to the attention of my colleagues the significant accomplishment represented by final approval of the export trading companies bill.

At a time when unemployment is a major concern for the Nation, this legislation is a welcome contribution toward increasing the number of jobs for Americans by increasing America's export capability.

Thousands of small- and medium-sized businesses have products and services which are in demand in overseas markets. But these American firms often do not have the capital or the experience to undertake export trade on their own. The export trading company legislation offers a solution to that problem.

Export trading companies will enhance the competitiveness of U.S. firms by providing a full range of export services, such as developing comprehensive market surveys, experience in developing new markets, established distribution networks and broadening of export risk due to the volume of business and the number of products. Moreover, U.S. exporters will now be able to draw on the resources and experience of the U.S. banking system.

With all the advantages export trading companies offer, I am confident America's export performance will improve and thousands of new jobs will be created for Americans. I am proud to support this legislation.●

Mr. McCLORY. Mr. Speaker, I reserve the balance of my time.

Mr. BROOKS. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

VICTIM AND WITNESS PROTECTION ACT OF 1982

Mr. BROOKS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2420) to protect victims of crime, with a Senate amendment to the House amendments, and concur in the Senate amendment to the House amendments.

The Clerk read the title of the Senate bill.

The Clerk read the Senate amendment to the House amendments, as follows:

In lieu of the matter proposed to be inserted by the House amendment to the text of the bill, insert:

That this Act may be cited as the "Victim and Witness Protection Act of 1982".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds and declares that:

(1) Without the cooperation of victims and witnesses, the criminal justice system would cease to function; yet with few exceptions these individuals are either ignored by the criminal justice system or simply used as tools to identify and punish offenders.

(2) All too often the victim of a serious crime is forced to suffer physical, psychological, or financial hardship first as a result of the criminal act and then as a result of contact with a criminal justice system unresponsive to the real needs of such victim.

(3) Although the majority of serious crimes falls under the jurisdiction of State and local law enforcement agencies, the Federal Government, and in particular the Attorney General, has an important leadership role to assume in ensuring that victims of crime, whether at the Federal, State, or local level, are given proper treatment by agencies administering the criminal justice system.

(4) Under current law, law enforcement agencies must have cooperation from a victim of crime and yet neither the agencies nor the legal system can offer adequate protection or assistance when the victim, as a result of such cooperation, is threatened or intimidated.

(5) While the defendant is provided with counsel who can explain both the criminal justice process and the rights of the defendant, the victim or witness has no counterpart and is usually not even notified when the defendant is released on bail, the case is dismissed, a plea to a lesser charge is accepted, or a court date is changed.

(6) The victim and witness who cooperate with the prosecutor often find that the transportation, parking facilities, and child care services at the court are unsatisfactory and they must often share the pretrial waiting room with the defendant or his family and friends.

(7) The victim may lose valuable property to a criminal only to lose it again for long periods of time to Federal law enforcement officials, until the trial and sometimes the appeals are over; many times that property is damaged or lost, which is particularly stressful for the elderly or poor.

(b) The Congress declares that the purposes of this Act are—

(1) to enhance and protect the necessary role of crime victims and witnesses in the criminal justice process;

(2) to ensure that the Federal Government does all that is possible within limits of available resources to assist victims and witnesses of crime without infringing on the constitutional rights of the defendant; and

(3) to provide a model for legislation for State and local governments.

VICTIM IMPACT STATEMENT

SEC. 3. Paragraph (2) of rule 32(c) of the Federal Rules of Criminal Procedure is amended to read as follows:

"(2) REPORT.—The presentence report shall contain—

"(A) any prior criminal record of the defendant;

"(B) a statement of the circumstances of the commission of the offense and circumstances affecting the defendant's behavior;

"(C) information concerning any harm, including financial, social, psychological, and physical harm, done to or loss suffered by any victim of the offense; and

"(D) any other information that may aid the court in sentencing, including the restitution needs of any victim of the offense.".

PROTECTION OF VICTIMS AND WITNESSES FROM INTIMIDATION

SEC. 4. (a) Chapter 73 of title 18 of the United States Code is amended by adding at the end the following new sections:

"§ 1512. Tampering with a witness, victim, or an informant

"(a) Whoever knowingly uses intimidation or physical force, or threatens another person, or attempts to do so, or engages in misleading conduct towards another person, with intent to—

"(1) influence the testimony of any person in an official proceeding;

"(2) cause or induce any person to—

"(A) withhold testimony, or withhold a record, document, or other object, from an official proceeding;

"(B) alter, destroy, mutilate, or conceal an object with intent to impair the object's integrity or availability for use in an official proceeding;

"(C) evade legal process summoning that person to appear as a witness, or to produce a record, document, or other object, in an official proceeding; or

"(D) be absent from an official proceeding to which such person has been summoned by legal process; or

"(3) hinder, delay, or prevent the communication to a law enforcement officer or judge of the United States of information relating to the commission or possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceedings;

shall be fined not more than $250,000 or imprisoned not more than ten years, or both.

"(b) whoever intentionally harasses another person and thereby hinders, delays, prevents, or dissuades any person from—

"(1) attending or testifying in an official proceeding;

"(2) reporting to a law enforcement officer of judge of the United States the commission or possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceedings;

"(3) arresting or seeking the arrest of another person in connection with a Federal offense; or

"(4) causing a criminal prosecution, or a parole or probation revocation proceeding, to be sought or instituted, or assisting in such prosecution or proceeding; or attempts to do so, shall be fined not more than $25,000 or imprisoned not more than one yer, or both.

"(c) In a prosecution for an offense under this section, it is an affirmative defense, as to which the defendant has the burden of proof by a preponderance of the evidence, that the conduct consisted solely of lawful conduct and that the defendant's sole intention was to encourage, induce, or cause the other person to testify truthfully.

"(d) For the purposes of this section—

"(1) an official proceeding need not be pending or about to be instituted at the time of the offense; and

"(2) the testimony, or the record, document, or other object need not be admissible in evidence or free of a claim of privilege.

"(e) In a prosecution for an offense under this section, no state of mind need be proved with respect to the circumstance—

"(1) that the official proceeding before a judge, court, magistrate, grand jury, or government agency is before a judge or court of the United States, a United States magistrate, a bankruptcy judge, a Federal grand jury, or a Federal Government agency; or

"(2) that the judge is a judge of the United States or that the law enforcement officer is an officer or employee of the Federal Government or a person authorized to act for or on behalf of the Federal Government or serving the Federal Government as an adviser or consultant.

"(f) There is extraterritorial Federal jurisdiction over an offense under this section.

"§ 1513. Retaliating against a witness, victim, or an informant

"(a) Whoever knowingly engages in any conduct and thereby causes bodily injury to another person or damages the tangible property of another person, or threatens to do so, with intent to retaliate against any person for—

"(1) the attendance of a witness or party at an official proceeding, or any testimony given or any record, document, or other object produced by a witness in an official proceeding; or

"(2) any information relating to the commission or possible commission of a Federal offense or a violation of conditions of probation, parole, or release pending judicial proceeding given by a person to a law enforcement officer;

or attempts to do so, shall be fined not more than $250,000 or imprisoned not more than ten years, or both.

"(b) There is extraterritorial Federal Jurisdiction over an offense under this section.

"§ 1514. Civil action to restrain harassment of a victim or witness

"(a)(1) A United States district court, upon application of the attorney for the Government, shall issue a temporary restraining order prohibiting harassment of a victim or witness in a Federal criminal case if the court finds, from specific facts shown by affidavit or by verified complaint, that there are reasonable grounds to believe that harassment of an identified victim or witness in a Federal criminal case exists or that such order is necessary to prevent and restrain an offense under section 1512 of this title, other than an offense consisting of misleading conduct, or under section 1513 of this title.

"(2)(A) A temporary restraining order may be issued under this section without written or oral notice to the adverse party or such party's attorney in a civil action under this section if the court finds, upon written certification of facts by the attorney for the Government, that such notice should not be required and that there is a reasonable probability that the Government will prevail on the merits.

"(B) A temporary restraining order issued without notice under this section shall be endorsed with the date and hour of issuance and be filed forthwith in the office of the clerk of the court issuing the order.

"(C) A temporary restraining order issued under this section shall expire at such time, not to exceed 10 days from issuance, as the court directs; the court, for good cause shown before expiration of such order, may extend the expiration date of the order for up to 10 days or for such longer period agreed to by the adverse party.

"(D) When a temporary restraining order is issued without notice, the motion for a protective order shall be set down for hearing at the earliest possible time and takes precedence over all matters except older matters of the same character, and when such motion comes on for hearing, if the attorney for the Government does not proceed with the application for a protective order, the court shall dissolve the temporary restraining order.

"(E) If on two days notice to the attorney for the Government or on such shorter notice as the court may prescribe, the adverse party appears and moves to dissolve or modify the temporary restraining order, the court shall proceed to hear and determine such motion as expeditiously as the ends of justice require.

"(F) A temporary restraining order shall set forth the reasons for the issuance of such order, be specific in terms, and describe in reasonable detail (and not by reference to the complaint or other document) the act or acts being restrained.

"(b)(1) A United States district court, upon motion of the attorney for the Government, shall issue a protective order prohibiting harassment of a victim or witness in a Federal criminal case if the court, after a hearing, finds by a preponderance of the evidence that harassment of an identified victim or witness in a Federal criminal case exists or that such order is necessary to prevent and restrain an offense under section 1512 of this title, other than an offense consisting of misleading conduct, or under section 1513 of this title.

"(2) At the hearing referred to in paragraph (1) of this subsection, any adverse party named in the complaint shall have the right to present evidence and cross-examine witnesses.

"(3) A protective order shall set forth the reasons for the issuance of such order, be specific in terms, describe in reasonable detail (and not by reference to the complaint or other document) the act or acts being restrained.

"(4) The court shall set the duration of effect of the protective order for such period as the court determines necessary to prevent harassment of the victim or witness but in no case for a period in excess of three years from the date of such order's issuance. The attorney for the Government may, at any time within 90 days before the expiration of such order, apply for a new protective order under this section.

"(c) As used in this section—

"(1) the term 'harassment' means a course of conduct directed at a specific person that—

"(A) causes substantial emotional distress in such person; and

"(B) serves no legitimate purpose; and

"(2) the term 'course of conduct' means a series of acts over a period of time, however short, indicating a continuity of purpose.

"§ 1515. Definitions for certain provisions

"As used in sections 1512 and 1513 of this title and in this section—

"(1) the term 'official proceeding' means—

"(A) a proceeding before a judge or court of the United States, a United States magistrate, a bankruptcy judge, or a Federal grand jury;

"(B) a proceeding before the Congress; or

"(C) a proceeding before a Federal Government agency which is authorized by law;

"(2) the term 'physical force' means physical action against another, and includes confinement;

"(3) the term 'misleading conduct' means—

"(A) knowingly making a false statement;

"(B) intentionally omitting information from a statement and thereby causing a portion of such statement to be misleading, or intentionally concealing a material fact, and

thereby creating a false impression by such statement;

"(C) with intent to mislead, knowingly submitting or inviting reliance on a writing or recording that is false, forged, altered, or otherwise lacking in authenticity;

"(D) with intent to mislead, knowingly submitting or inviting reliance on a sample, specimen, map, photograph, boundary mark, or other object that is misleading in a material respect; or

"(E) knowingly using a trick, scheme, or device with intent to mislead;

"(4) the term 'law enforcement officer' means an officer or employee of the Federal Government, or a person authorized to act for or on behalf of the Federal Government or serving the Federal Government as an adviser or consultant—

"(A) authorized under law to engage in or supervise the prevention, detection, investigation, or prosectuion of an offense; or

"(B) serving as a probation or pretrial services officer under this title; and

"(5) the term 'bodily injury' means—

"(A) a cut, abrasion, bruise, burn, or disfigurement;

"(B) physical pain;

"(C) illness;

"(D) impairment of the function of a bodily member, organ, or mental faculty; or

"(E) any other injury to the body, no matter how temporary.".

(b) The table of sections at the beginning of chapter 73 of title 18 of the United States Code is amended—

(1) so that the item relating to section 1503 reads as follows:

"1503. Influencing or injuring officer or juror generally."; and

(2) by adding at the end the following:

"1512. Tampering with a witness, victim, or an informant.

"1513. Retaliating against a witness, victim, or an informant.

"1514. Civil action to restrain harassment of a victim or witness.

"1515. Definitions for certain provisions.".

(1) in the heading of such section, by striking out ", juror or witness" and inserting of lieu thereof "or juror";

(2) by striking out "witness" the first place it appears after "impede any" and all that follows through "or any grand" and inserting "grand" in lieu thereof; and

(3) by striking out "injures any party or witness" and all that follows through "matter pending therein, or".

(d) Section 1505 of title 18 of the United States Code is amended by—

(1) striking out paragraphs (1) and (2);

(2) striking out "such" the first place it appears in the fourth paragraph and inserting in lieu thereof "any pending";

(3) striking out "such" the second place it appears in the fourth paragraph and inserting in lieu thereof "any"; and

(4) striking out "such inquiry" in the fourth paragraph and inserting in lieu thereof "any inquiry".

(e) Section 1510(a) of title 18 of the United States Code is amended—

(1) by striking out the comma immediately following "bribery" and all that follows through "thereof";

(2) by striking out the semicolon immediately following "investigator" the first place it appears and all that follows through "Shall be fined" and inserting "shall be fined" in lieu thereof.

RESTITUTION

SEC. 4. (a) Chapter 227 of title 18 of the United States Code is amended by adding at the end the following:

"§ 3579. Order of restitution

"(a)(1) The court, when sentencing a defendant convicted of an offense under this title or under subsection (h), (i), (j), or (n) of section 902 of the Federal Aviation Act of 1958 (49 U.S.C. 1472), may order, in addition to or in lieu of any other penalty authorized by law, that the defendant make restitution to any victim of the offense.

"(2) If the court does not order restitution, or orders only partial restitution, under this section, the court shall state on the record the reasons therefor.

"(b) The order may require that such defendant—

"(1) in the case of an offense resulting in damage to or loss or destruction of property of a victim of the offense—

"(A) return the property to the owner of the property or someone designated by the owner; or

"(B) if return of the property under subparagraph (A) is impossible, impractical, or inadequate, pay an amount equal to the greater of—

"(i) the value of the property on the date of the damage, loss, or destruction, or

"(ii) the value of the property on the date of sentencing,

less the value (as of the date the date the property is returned) of any part of the property that is returned;

"(2) in the case of an offense resulting in bodily injury to a victim—

"(A) pay an amount equal to the cost of necessary medical and related professional services and devices relating to physical, psychiatric, and psychological care, including nonmedical care and treatment rendered in accordance with a method of healing recognized by the law of the place of treatment;

"(B) pay an amount equal to the cost of necessary physical and occupational therapy and rehabilitation; and

"(C) reimburse the victim for income lost by such victim as a result of such offense;

"(3) in the case of an offense resulting in bodily injury also results in the death of a victim, pay an amount equal to the cost of necessary funeral and related services; and

"(4) in any case, if the victim (or if the victim is deceased, the victim's estate) consents, make restitution in services in lieu of money, or make restitution to a person or organization designated by the victim or the estate.

"(c) If the court decides to order restitution under this section, the court shall, if the victim is deceased, order that the restitution be made to the victim's estate.

"(d) The court shall impose an order of restitution to the extent that such order is as fair as possible to the victim and the imposition of such order will not unduly complicate or prolong the sentencing process.

"(e)(1) The court shall not impose restitution with respect to a loss for which the victim has received or is to receive compensation, except that the court may, in the interest of justice, order restitution to any person who has compensated the victim for such loss to the extent that such person paid the compensation. An order of restitution shall require that all restitution to victims under such order be made before any restitution to any other person under such order is made.

"(2) Any amount paid to a victim under an order of restitution shall be set off against any amount later recovered as compensatory damages by such victim in—

"(A) any Federal civil proceeding; and

"(B) any State civil proceeding, to the extent provided by the law of that State.

"(f)(1) The court may require that such defendant make restitution under this section within a specified period or in specified installments.

"(2) The end of such period or the last such installment shall not be later than—

"(A) the end of the period of probation, if probation is ordered;

"(B) five years after the end of the term of imprisonment imposed, if the court does not order probation; and

"(C) five years after the date of sentencing in any other case.

"(3) If not otherwise provided by the court under this subsection, restitution shall be made immediately.

"(g) If such defendant is placed on probation or paroled under this title, any restitution ordered under this section shall be a condition of such probation or parole. The court may revoke probation and the Parole Commission may revoke parole if the defendant fails to comply with such order. In determining whether to revoke probation or parole, the court or Parole Commission shall consider the defendant's employment status, earning ability, financial resources, the willfulness of the defendant's failure to pay, and any other special circumstances that may have a bearing on the defendant's ability to pay.

"(h) An order of restitution may be enforced by the United States or a victim named in the order to receive the restitution in the same manner as a judgment in a civil action.

"§ 3580. Procedure for issuing order of restitution

"(a) The court, in determining whether to order restitution under section 3579 of this title and the amount of such restitution, shall consider the amount of the loss sustained by any victim as a result of the offense, the financial resources of the defendant, the financial needs and earning ability of the defendant and the defendant's dependents, and such other factors as the court deems appropriate.

"(b) The court may order the probation service of the court to obtain information pertaining to the factors set forth in subsection (a) of this section. The probation service of the court shall include the information collected in the report of presentence investigation or in a separate report, as the court directs.

"(c) The court shall disclose to both the defendant and the attorney for the Government all portions of the presentence or other report pertaining to the matters described in subsection (a) of this section.

"(d) Any dispute as to the proper amount or type of restitution shall be resolved by the court by the preponderance of the evidence. The burden of demonstrating the amount of the loss sustained by a victim as a result of the offense shall be on the attorney for the Government. The burden of demonstrating the financial resources of the defendant and the financial needs of the defendant and such defendant's dependents shall be on the defendant. The burden of demonstrating such other matters as the court deems appropriate shall be upon the party designated by the court as justice requires.

"(e) A conviction of a defendant for an offense involving the act giving rise to restitution under this section shall estop the defendant from denying the essential allegations of that offense in any subsequent Federal civil proceeding or State civil proceed-

ing, to the extent consistent with State law, brought by the victim.".

(b) The table of sections at the beginning of chapter 227 of title 18 of the United States Code is amended by adding at the end the following new items:

"3579. Nature of order of restitution.
"3580. Procedure for issuing order of restitution.".

FEDERAL GUIDELINES FOR FAIR TREATMENT OF CRIME VICTIMS AND WITNESSES IN THE CRIMINAL JUSTICE SYSTEM

SEC. 5. (a) Within 270 days after the date of enactment of this Act, the Attorney General shall develop and implement guidelines for the Department of Justice consistent with the purposes of this Act. In preparing the guidelines the Attorney General shall consider the following objectives:

(1) SERVICES TO VICTIMS OF CRIME.—Law enforcement personnel should ensure that victims routinely receive emergency social and medical services as soon as possible and are given information on the following—

(A) availability of crime victim compensation (where applicable);

(B) community-based victim treatment programs;

(C) the role of the victim in the criminal justice process, including what they can expect from the system as well as what the system expects from them; and

(D) stages in the criminal justice process of significance to a crime victim, and the manner in which information about such stages can be obtained.

(2) NOTIFICATION OF AVAILABILITY OF PROTECTION.—A victim or witness should routinely receive information on steps that law enforcement officers and attorneys for the Government can take to protect victims and witnesses from intimidation.

(3) SCHEDULING CHANGES.—All victims and witnesses who have been scheduled to attend criminal justice proceedings should either be notified as soon as possible of any scheduling changes which will affect their appearances or have available a system for alerting witnesses promptly by telephone or otherwise.

(4) PROMPT NOTIFICATION TO VICTIMS OF MAJOR SERIOUS CRIMES.—Victims, witnesses, relatives of those victims and witnesses who are minors, and relatives of homicide victims should, if such persons provide the appropriate official with a current address and telephone number, receive prompt advance notification, if possible, of judicial proceedings relating to their case, including—

(A) the arrest of an accused;

(B) the initial appearance of an accused before a judicial officer;

(C) the release of the accused pending judicial proceedings; and

(D) proceedings in the prosecution of the accused (including entry of a plea of guilty, trial, sentencing, and, where a term of imprisonment is imposed, the release of the accused from such imprisonment).

(5) CONSULTATION WITH VICTIM.—The victim of a serious crime, or in the case of a minor child or a homicide, the family of the victim, should be consulted by the attorney for the Government in order to obtain the views of the victim or family about the disposition of any Federal criminal case brought as a result of such crime, including the views of the victim or family about—

(A) dismissal;

(B) release of the accused pending judicial proceedings;

(C) plea negotiations; and

(D) pretrial diversion program.

(6) SEPARATE WAITING AREA.—Victims and other prosecution witnesses should be provided prior to court appearance a waiting area that is separate from all other witnesses.

(7) PROPERTY RETURN.—Law enforcement agencies and prosecutors should promptly return victim's property held for evidentiary purposes unless there is a compelling law enforcement reason for retaining it.

(8) NOTIFICATION TO EMPLOYER.—A victim or witness who so requests should be assisted by law enforcement agencies and attorneys for the Government in informing employers that the need for victim and witness cooperation in the prosecution of the case may necessitate absence of that victim or witness from work. A victim or witness who, as a direct result of a crime or of cooperation with law enforcement agencies or attorneys for the Government, is subjected to serious financial strain, should be assisted by such agencies and attorneys in explaining to creditors the reason for such serious financial strain.

(9) TRAINING BY FEDERAL LAW ENFORCEMENT TRAINING FACILITIES.—Victim assistance education and training should be offered to persons taking courses at Federal law enforcement training facilities and attorneys for the Government so that victims may be promptly, properly, and completely assisted.

(10) GENERAL VICTIM ASSISTANCE.—The guidelines should also ensure that any other important assistance to victims and witnesses, such as the adoption of transportation, parking, and translator services for victims in court be provided.

(b) Nothing is this title shall be construed as creating a cause of action against the United States.

(c) The Attorney General shall assure that all Federal law enforcement agencies outside of the Department of Justice adopt guidelines consistent with subsection (a) of this section.

PROFIT BY A CRIMINAL FROM SALE OF HIS STORY

SEC. 6. Within one year after the date of enactment of this Act, the Attorney General shall report to Congress regarding any laws that are necessary to ensure that no Federal felon derives any profit from the sale of the recollections, thoughts, and feelings of such felon with regards to the offense committed by the felon until any victim of the offense receives restitution.

BAIL

SEC. 7. Section 3146(a) of chapter 207 of title 18, United States Code, is amended in the matter preceding paragraph (1)—

(1) by inserting after "judicial officer," the second place it appears the following: "subject to the condition that such person not commit an offense under section 1503, 1512, or 1513 of this title,"; and

(2) by inserting after "impose" the following: "a condition of release that such person not commit an offense under section 1503, 1512, or 1513 of this title and impose".

EFFECTIVE DATE

SEC. 8. (a) Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect on the date of the enactment of this Act.

(b)(1) The amendment made by section 2 of this Act shall apply to presentence reports ordered to be made on or after March 1, 1983.

(2) The amendments made by section 4 of this Act shall apply with respect to offenses occurring on or after January 1, 1983.

Mr. BROOKS (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to the House amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. McCOLLUM. Reserving the right to object.

Mr. Speaker, I support S. 2420 and urge its adoption by the House. The bill takes a variety of steps to improve the lot of the victims and witnesses within the Federal criminal justice system. The bill, in addition, emphasizes the availability of restitution as an option for the sentencing judge.

By clarifying current statutes on victim-witness protection and raising the penalties associated with those offenses, the bill encourages participation in the nationwide law enforcement effort.

In addition, the bill requires that the impact of a crime on the victim be assessed in the presentence report that every Federal judge receives before determining how to sentence the defendant. Resititution would become a sentence that could, in and of itself, be imposed. The judge would, in fact, have to explain on the record why he did not utilize it when sentencing the defendant.

The bill would institute a procedure whereby a victim or witness could be protected from harassment by means of a temporary restraining order.

S. 2420 would require the Attorney General to develop guidelines for the fair treatment of crime victims and witnesses and also to report to the Congress on the desirability of legislation to deprive criminals of literary profits they might gain from memoirs and recollections of their crime.

This legislation does not intend that restitution become a substitute for civil damages by directing sentencing courts to refrain from utilizing restitution in cases where it would unduly complicate the sentencing procedure. Restitution, under the bill, does not apply in the area of regulatory offenses which are really not appropriate considering the breadth of civil penalties and liabilities already available.

Mr. Speaker, the bill takes a short but sure step toward the ultimate goal of crime reduction and deserves our support.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. McCOLLUM. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I want to join the gentleman from Texas (Mr. BROOKS) and the gentleman from Florida (Mr. McCOLLUM) in strong support of S. 2420, the Victim and Witness Protection Act of 1982. As the ranking minority member of the full Judiciary Committee, I have long been of the

opinion that the Federal Government ought to address the needs of persons who have been victimized by the criminal element in this society. S. 2420 is a commendable effort to redress the grievances of crime victims, without imposing additional fiscal burdens on the innocent taxpayer.

As my colleagues are aware, the Reagan administration has provided outstanding leadership in this area. In August of last year, the Attorney General's Task Force on Violent Crime urged the Attorney General to "take a leadership role in insuring that the victims of crime are accorded proper status by the criminal justice system." The task force made several recommendations, including one relating to the adoption of Federal standards for the fair treatment of victims of serious crime. More recently, President Reagan himself appointed a Presidential Task Force on Victims of Crime which is currently in the process of holding hearings throughout the country. I understand that the Department of Justice recently gave a strong endorsement of H.R. 7191, the House version of the bill which is before us.

S. 2420 contains many improvements which ought to have been made long ago. Some were endorsed when our committee reported Criminal Code reform legislation 2 years ago, but that bill has been held hostage ever since. S. 2420 mandates victim-impact statements and authorizes restitution for all appropriate offenses. I commend the sponsors of S. 2420 for their wisdom in confirming restitution to title 18 and skyjacking offenses. Its application in connection with regulatory offenses would be most unwise because it would unduly complicate and prolong the sentencing process.

Mr. Speaker, I am also pleased to see that S. 2420 would impose a mandatory condition on the release of defendants prior to trial and pending sentencing or appeal that the defendant refrain from committing victim harassment offenses. Unfortunately, legislation which would correct the fundamental deficiencies in the Bail Reform Act of 1966, and thus provide for increased protection of crime victims and witnesses, has been bottled up in the Judiciary Committee despite strong support on the part of a vast majority of my colleagues and the administration. The limited provision contained in this bill will at least insure that defendants will be warned about the consequences of engaging in that type of activity and will provide a basis for the revocation of release if harassment takes place.

Mr. Speaker, again I commend the members of our committee who have put so much work and effort into the legislation which is before us today. The gentleman from New York (Mr. FISH) has demonstrated remarkable leadership on this issue. I congratulate them and my other colleagues who have cosponsored the bill and I hope the President will sign it so that these protections can take effect at the earliest possible date.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. KINDNESS. Mr. Speaker, reserving the right to object, and I shall not object at this point except to point out what a lousy way this is to legislate.

This bill provides for it to be an offense to make an attempt to use a threat to do harm to physical property. Not bodily harm; just damage to physical property.

This bill could have been more carefully crafted if it had gone through hearings and the usual markup procedures. The Justice Department wanted it in a hurry at the end of this session. It has been accommodated. I hope we can straighten it out in the future.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BROOKS. Mr. Speaker, The Senate amendment makes a number of changes that clarify and strengthen the House-passed bill but do not go into topics that the House-passed bill did not deal with.

The basic document is the House-passed bill, and most of it is unchanged or changed only in phrasing by the Senate amendment. In addition, however, the Senate amendment:

Adds a statement of findings and purposes that fairly and accurately describes the reasons for, and purposes of, the legislation.

Strengthens the provisions of the victim and witness intimidation and retaliation offenses by providing that persons who commit the most serious forms of those offenses—such as inflicting death or serious bodily injury—can receive greater punishment; and

Adds language to the restitution provision that will further encourage Federal courts to require convicted defendants to make restitution to any victims of their offenses.

The changes made by the Senate amendment were the result of consultation and negotiation with the managers of the legislation in the other body. In addition, victims groups, the Justice Department, and the American Civil Liberties Union were involved in working out the changes.

I find the Senate amendment completely acceptable. Its changes make this bill better legislation.

● Mr. RODINO. Mr. Speaker, the legislation before us constitutes a substantial step forward in improving the protection and treatment of Federal crime victims and witnesses. It will also be an example for State and local governments to refer to when preparing their own victim and witness legislation.

This legislation has been carefully worked out in a spirit of bipartisan cooperation by Members of both Houses. It has been drafted in consultation with victims groups—The National Organization for Victim Assistance and the National Coalition Against Sexual Assault—the Department of Justice, the American Bar Association and the American Civil Liberties Union. This, indeed, is legislation that all of us can be proud of supporting.

After substituting the text of H.R. 7191 for the text of S. 2420, the House sent S. 2420 back to the other body. The other body has returned S. 2420 with an amendment to the House amendment. The Senate amendment, although cast in the form of a substitute, actually makes only a limited number of changes in the House-passed version. Much of the House-passed version is carried forward intact, and many of the changes are changes in phrasing. I recommend concurring in the Senate amendment. The following is an analysis of the Senate amendment and the changes made in the House-passed bill:

SHORT TITLE

Section 1 of the Senate amendment provides that the short title of the legislation is the "Victim and Witness Protection Act of 1982". The short title of the House-passed version is the "Comprehensive Victim and Witness Protection and Assistance Act of 1982".

FINDINGS AND PURPOSE

Section 2 of the Senate amendment sets forth findings and purposes. Section (2)(a) sets forth the findings, which are drawn from S. 2420 as originally passed by the Senate with a few modifications in phrasing. Section (2)(b) sets forth the principal purposes of the legislation. They are (1) to enhance and protect the role of crime victims and witnesses in the criminal justice system; (2) to ensure that the Federal government makes a maximum effort (within the limits of available resources) to assist Federal crime victims and witnesses without infringing on constitutionally-protected rights of those accussed of crime; and (3) to serve as model legislation for State and local governments.

VICTIM IMPACT STATEMENT

Section 3 of the Senate amendment amends Rule 32 of the Federal Rules of Criminal Procedure to provide for a victim impact statement as a part of a presentence report. The Senate amendment makes two changes in the House-passed version, both of a clarifying nature. The House-passed version requires that the presentence report contain information concerning "any harm" done to the victim. The Senate amendment specifies that the phrase "any harm" includes "financial, social, psychological, and physical harm". Second, the House-passed version provides that the presentence report contain "any other information that may aid the court in sentencing." The Senate amendment specifies that "any other infor-

mation" includes "the restitution needs of any victim of the offense."

PROTECTION OF VICTIMS AND WITNESSES FROM INTIMIDATION

The Senate amendment (like section 3 of the House-passed version) adds 4 new provisions to chapter 73 ("Obstruction of Justice") of title 18 of the United States Code.

New 18 U.S.C. 1512. The Senate amendment includes several changes in phrasing (such as adding "victim" to the section catchline). The offense in subsection (a)(2) of the House-passed version makes it an offense to interfere with another person with intent to cause or induce any person to do any of 3 things. The Senate amendment adds a fourth—"be absent from an official proceeding to which such person has been summoned by legal process". The House-passed version would reach such conduct through new section 1512(a)(2)(A) because being absent from a proceeding will result in testimony (or a record, document, or other object) being withheld. The Senate amendment's change will remove any possible ambiguity on the matter.

There are 4 other noteworthy changes made by the Senate amendment. First, the maximum imprisonment for the offense described in subsection (a) is increased from 5 years (the level in the House-passed bill and in current law, 18 U.S.C. 1503, 1505, 1510) to 10 years. This will permit the court to impose a greater penalty when sentencing someone who has committed a particularly aggravated form of the offense (such as where the offense causes the death of, or serious bodily injury to, a witness).

Second, the Senate amendment adds a new subsection describing a misdemeanor offense of intentionally harassing another person and thereby intentionally preventing any person from attending or testifying in an official proceeding, reporting a possible Federal criminal violation to a law enforcement officer, seeking the arrest of another person for a Federal offense, or causing a Federal criminal prosecution or a Federal parole or probation revocation proceeding to be sought or instituted. The Senate language will reach thinly-veiled threats that create justifiable apprehension in a victim or witness. It does not reach mere annoyance, however, nor does it reach conduct, for example, that is not intended by the defendant to prevent the witness from testifying in an official proceeding.

Third, the Senate amendment adds a new subsection providing that an official proceeding need not be pending or about to be instituted at the time of the offense, and that the testimony, or the record, document or other object, need not be admissible in evidence or free of a claim of privilege. The same result was reached in the House-passed version inasmuch as description of the offense did not require that an official proceeding be pending or that the testimony or object be admissible.

Finally, the Senate amendment adds language that provides for extraterritorial jurisdiction over an offense under section 1512. See House Report No. 96-1396, at 21-22.

The language of the Senate amendment carries forward the format, conventions, and techniques used in the House-passed bill. See House Report No. 96-1396, at 12-13, 15-20, 30-36. Thus, for example, the convention that the state of mind applicable to conduct also applies (unless otherwise provided) to any circumstances or results required by the offense. See id. at 34.

New 18 U.S.C. 1513. The Senate amendment makes phrasing changes in the House-passed version (such as changing "punish" to "retaliate against"). The maximum prison term authorized is raised from 5 years in the House-passed version (and current law) to 10 years. The higher penalty will enable courts to impose greater punishment on persons convicted of particularly aggravated forms of the offense (such as where the offense causes the death of, or serious bodily injury to, the witness).

Finally, the Senate amendment adds language that provides for extraterritorial jurisdiction over an offense under section 1512. See House Report No. 96-1396, at 21-22.

The language of the Senate amendment carries forward the format, conventions, and techniques used in the House-passed bill. See House Report No. 96-1396, at 12-13, 15-20, 30-36. Thus, for example, the convention that the state of mind applicable to conduct also applies (unless otherwise provided) to any circumstances or results required by the offense. See id. at 34.

New 18 U.S.C. 1514. The Senate amendment makes only one change in the House-passed version. That change corrects a grammatical error.

New 18 U.S.C. 1515. The Senate amendment changes the House-passed version by deleting the definitions of the terms "intentional" and "knowing". The definitions were dropped because it was felt unnecessary explicitly to define "intentional" and "knowing". I am confident that the definitions of those terms in the House-passed bill will be adopted in applying sections 1512 and 1513, and the other definitions in section 1515.

RESTITUTION

The Senate amendment carries forward the restitution provisions of the House-passed version with mainly minor changes. There are, however, several noteworthy changes. The Senate amendment requires that the court state on the record the reasons for not ordering restitution or ordering only partial restitution. The House-passed version requires a statement of reasons only when the court declines to order restitution. The Senate change is an improvement.

The House-passed version of new 18 U.S.C. 3579(c) authorizes the court not to order restitution if the procedures necessary to determine whether to order restitution (or the amount of such restitution) would unduly complicate or prolong the sentencing process. The Senate amendment would require the court, when considering whether and to what extent to order restitution, to consider both fairness to the victim and whether the process will unduly complicate or prolong the sentencing process. Thus, a court may find that ordering full restitution would unduly prolong the sentencing process, but that ordering partial restitution would not. In such a situation, the court would be able, under the language of the Senate amendment, to order partial restitution. The Senate language improves the bill. The goal of the legislation is to ensure that Federal crime victims receive the fullest possible restitution from criminal wrongdoers. The Senate change will help achieve that goal.

The Senate amendment also authorizes the court to order restitution to a person or organization designated by the victim. The House-passed version had no similar provision. This change, too, improves the bill. A victim may not want to receive any money from the wrongdoer but would prefer that the money go, for example, to a charitable organization. Ordering that the restitution be paid to the charity is fully consistent with the purposes of restitution. See Huggett v. State, 266 N.W.2d 403, 407 (1978).

The Senate amendment provides that the court can order the convicted defendant to pay restitution to a third party who has paid all or part of the victim's loss. Thus, the court can, for example, order the defendant to make restitution to an insurance company that has reimbursed the victim for doctor and hospital bills paid by the victim. Likewise, the court can order the defendant to make restitution to the parents or a friend of the victim if the parents or the friend paid the doctor and hospital bills directly to the doctor and hospital on behalf of the victim. Similarly, the Senate amendment specifies that, where the victim is deceased, the court can order that restitution be made to the victim's estate. Both of these changes are fully consistent with the purposes of restitution. See id.

Finally, the Senate amendment requires that payment of restitution be a condition of probation whenever an order of restitution under 18 U.S.C. 3579 is a part of the sentence of probation. If the person ordered to make restitution fails to comply with the order, probation can be revoked. The House-passed version had a similar provision with respect to parole. (The Senate amendment also covers parole.) Because of the importance of restitution and the purposes it serves, this change is salutary.

Finally, the Senate amendment adds a provision that was not in the House-passed version dealing with the collateral effect of a conviction where restitution is ordered. The Senate language provides that a conviction of a defendant for an offense involving the act that gives rise to restitution under 18 U.S.C. 3579 estops the defendant from denying the essential allegations of that offense in (1) any subsequent Federal civil proceeding brought by the victim or (2) any subsequent State civil proceeding brought by the victim (to the extent that such estoppel is consistent with state law).

The Senate amendment carries forward, with only a conforming change, the provision of the House-passed version that amends the table of sections for chapter 227 of title 18 of the United States Code.

GUIDELINES FOR FAIR TREATMENT OF FEDERAL CRIME VICTIMS AND WITNESSES

Section 5 of the Senate amendment deals with guidelines for the fair treatment of Federal crime victims and witnesses. The changes made from the House-passed version are principally stylistic, with some changes in phrasing and emphasis. The Senate amendment adds language directing the Attorney General to assure that Federal law enforcement agencies other than the Department of Justice adopt such guidelines.

PROFIT BY A CRIMINAL

Section 6 of the Senate amendment is the same as the comparable provision of the House-passed bill, with only one technical change.

BAIL

Section 7 of the Senate amendment deals with bail and is identical to section 7 of the House-passed bill.

EFFECTIVE DATE

Section 8 of the Senate amendment sets forth the effective dates for the various sections of the bill and is identical to section 8 of the House-passed bill.

Mr. Speaker, as I mentioned previously this has been a cooperative effort involving Members of both Houses. I would particularly like to single out for special praise and recognition my colleague from New York, Mr. FISH, who has been a driving force behind the legislation in this House. The principal sponsors of the legislation in the other body, Mr. HEINZ and Mr. LAXALT, likewise deserve special commendation. Their staff people—Catherine Milton and Jock Nash—and staff from the Senate Judiciary Committee, particularly Paul Summitt, were most helpful in the work on the legislation.

In addition, Mr. Speaker, I would like to recognize the contributions to the drafting of the legislation that were made by the representatives of the Justice Department: Deputy Assistant Attorney General Ron Gainer and Roger Pauley; the American Bar Association, Laurie Robinson and Susan Hillenbrand; and the American Civil Liberties Union, John Shattuck, David Landau, and Marty Michaelson. Finally, I would like to commend John Stein of the National Organization for Victim Assistance and Mary Ann Largen of the National Coalition Against Sexual Assault for their extraordinary efforts on behalf of crime victims and this legislation.

This legislation, Mr. Speaker, is fair and balanced. It provides for additional protections for, and assistance to, Federal crime victims and witnesses without infringing upon the constitutional rights of persons accused of crime. It is deserving of support from each of us.●

● Mr. FISH. Mr. Speaker, I am proud to rise in support of S. 2420, the Victim and Witness Protection Act of 1982. As a victim of violent crime myself, I became painfully aware early in this Congress of the problems encountered by victims in our criminal justice system. Based on my own experience and the input which I have received in my own district and as president of the National Victims of Crime, I concluded long ago that the enactment of Federal legislation in this area must one of the highest priorities of the 97th Congress.

This legislation is identical in many respects to the bill introduced by the gentleman from New Jersey (Mr. RODINO) and myself, which was unanimously passed by the House last night. It contains several improvements based on our discussions with the other body, in which I strongly concur. It retains the essential elements relating to victim impact statements, improved harassment offenses, civil restraints against harassment, restitution, and fair treatment guidelines.

Mr. Speaker, I have said on this floor many times in the last year that it is time for this Congress to show the compassion to victims of Federal crime that they deserve and have a right to expect. I congratulate my colleagues for their assistance in this important undertaking and I urge the President of the United States to sign this legislation as soon as possible. This is a landmark first step toward redressing the imbalance in our criminal justice system which nearly ignores the rights of innocent victims. I am proud to be associated with it.

Mr. Speaker, S. 2420 contains many long-overdue improvements in current law which bear repeating at this point. These include the following:

First. Victim impact statement: Judges must receive information describing harm done to or loss suffered by the victim in the presentence report.

Second. Intimidation offenses: Witness tampering and retaliation offenses are clarified and expanded to cover activity directed at third parties, such as relatives of witnesses, and to cover retaliation for reports of violations of probation, parole, and release conditions. The fines are also increased.

Third. Civil restraint: The Government will be authorized to request from the court a temporary or permanent restraining order prohibiting harassment of a Federal victim or witness.

Fourth. Restitution: Federal courts will be authorized to order restitution to a victim as a penalty for an offense under title 18 or for a skyjacking-related offense. Restitution may include compensation for property loss, medical expenses, lost income, and funeral expenses.

Restitution must be as fair as possible to the victim, but may not unduly prolong or complicate the sentencing process, nor is it permitted where the victim receives compensation from another source. Compliance with a restitution order is a condition of parole.

Fifth. Guidelines for fair treatment of crime victims: The Attorney General is required to implement guidelines for the fair treatment of crime victims and witnesses after considering specified objectives, including:

Providing information about available victim assistance programs;

Notification of victims of proceedings that they must attend;

Obtaining victim views about the disposition of the case;

Prompt return of property held for evidence; and

Victim assistance education for law enforcement officers.

Sixth. Son-of-Sam report: The Attorney General must report to Congress on the desirability of legislation to insure that felons not profit from the sale of thoughts relating to the offense until victims receive compensation.

Seventh. Bail condition: Federal courts are required to impose as a condition of release prior to trial or pending sentencing or appeal the requirement that the person not commit a tampering or retaliation offense.●

The SPEAKER pro tempore. Is there objection to the original request of the gentleman from Texas?

There was no objection.

A motion to reconsider was laid on the table.

□ 2400

CONTRACT DISPUTES ACT OF 1978 AMENDMENTS

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 1371) to amend section 12 of the Contract Disputes Act of 1978, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 1, line 8, after "thereof" insert ", without regard to the date of certification of the contractor's claim pursuant to section 605(c)(1)".

Page 2, line 1, strike out "1981" and insert "1983".

Page 2, line 2, strike out "1981" and insert "1983".

Mr. SAM B. HALL, JR. (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. KINDNESS. Reserving the right to object, Mr. Speaker, and I shall not object, as a matter of fact, I am overjoyed that well after over a year the other body has finally acted on this legislation which comprises technical amendments to the Contract Disputes Act. It is sorely needed.

I would ask the gentleman to explain the amendment.

Mr. SAM B. HALL, JR. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Texas.

Mr. SAM B. HALL, JR. Mr. Speaker, the bill H.R. 1371, as it passed the House, provided for an amendment to the Contract Disputes Act to clarify the existing authority of the Secretary of the Treasury to fix the rate of interest applicable to contract claims. The Senate amendment merely inserts language which implements the explanation contained in the House report to the effect that the period for which interest is payable for an approved claim begins from the date that the contracting officer receives the claim and not from the time of certification. The original law as passed in 1978 provided for interest to begin from the date the claim was filed with the contracting officer because this filing con-

stituted notice to the Government of the existence of the claim. Of course this interest would only be payable after the claim is found to be valid after administrative review or in a judicial proceeding in the U.S Claims Court.

Mr. KINDNESS. Further reserving the right to object, Mr. Speaker, I would simply add not only is it about time the other body acted on this matter, but in this instance they actually improved the bill in so doing. I would urge approval of the motion to concur in the Senate amendments.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas (Mr. SAM B. HALL, JR.)?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Texas?

There was no objection.

A motion to reconsider was laid on the table.

NATIONAL CHRISTMAS SEAL MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 262) to designate the month of November 1982 as "National Christmas Seal Month," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 262

Whereas chronic diseases of the lung afflict well over 18 million Americans, cause more than 202,000 deaths annually, and cost the Nation more than $45 billion each year in lost wages, productivity, and in direct costs of medical care;

Whereas diseases such as emphysema, chronic bronchitis, and lung cancer are responsbile for 340,000 premature deaths a year;

Whereas lung cancer is shortly expected to surpass breast cancer as a cause of death in American women, emphysema and other chronic obstructive pulmonary diseases have been the fastest rising cause of death in the United States in the last 14 years, and over six million Americans, including 2 million children, suffer from asthma;

Whereas, the American Lung Asssociation, the Nation's first voluntary health organization providing services to communities with funds raised through private contributions, was founded in 1904 to combat tuberculosis when this lung disease was known in nearly every American family;

Whereas tuberculosis has been subdued, though not eradicated, and in this 100th anniversary year of the discovery of the tubercle bacillus, the American Lung Association, with other national and international health organizations, is pledged to eliminate tuberculosis from this country in the next decade; and

Whereas the American Lung Association now uses Christmas Seal dollars to support pulmonary research, advanced education of doctors and nurses in pulmonary medicine, and to provide services to thousands of Americans in their own communities: Now, therefore, be it *Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the month of November 1982 is designated as "National Christmas Seal Month" and the President of the United States is authorized and requested to issue a proclamation calling upon all government agencies and the people of the United States to observe the month with approprate activities supporting the Christmas Seal program.

Mr. GARCIA. Mr. Speaker, Senate Joint Resolution 262 proclaims November 1982 as "National Christmas Seal Month." Chronic diseases of the lung afflict well over 18 million Americans, cause more than 200,000 deaths annually, and cost the Nation more than $45 billion each year in lost wages, productivity, and in direct costs of medical care. Lung cancer is shortly expected to surpass breast cancer as a cause of death in American women; emphysema and other chronic obstructive pulmonary diseases have been the fastest rising cause of death in the United States in the last 14 years, and over 6 million Americans, including 2 million children, suffer from asthma. Christmas Seal dollars are used to support pulmonary research, advanced education of doctors and nurses in pulmonary medicine, and to provide services to thousands of Americans in their own communities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL DIABETES MONTH

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 257) to designate the month of November 1982, as "National Diabetes Month," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate Joint resolution, as follows:

S.J. RES. 257

Whereas diabetes kills more Americans than all other diseases except cancer and cardiovascular diseases;

Whereas eleven million Americans suffer from diabetes and five million seven hundred thousand of such Americans are not aware of their illness;

Whereas $9,700,000,000 annually are used for health care costs, disability payments, and premature mortality costs due to diabetes;

Whereas up to 85 per centum of all cases of non-insulin-dependent diabetes may be preventable through greater public understanding, awareness, and education; and

Whereas diabetes is a leading cause of blindness, kidney disease, heart disease, stroke, birth defects, and lower life expectancy, which complications may be reduced through greater patient and public understanding, awareness, and education: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1982 is designated as "National Diabetes Month", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL HOUSING WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 261) to designate "National Housing Week," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 261

Whereas Congress has repeatedly reaffirmed the national goal of a decent home and a suitable living environment for every American family;

Whereas millions of Americans, particularly young families, are finding the opportunity for homeownership and decent housing out of their reach;

Whereas excessive and duplicative government regulations at the Federal, State and local level have increased the cost of housing throughout the country;

Whereas the Nation's housing industry has been a major contributor to the national economy by creating jobs and generating revenue;

Whereas homeownership and decent housing promotes pride and contributes to the stability of the family in America;

Whereas it is appropriate to reaffirm our Nation's historic commitment to housing as a national priority to preserve the American dream: Now, therefore, be it

Resolved, That October 24-31, 1982, be declared "National Housing Week" and that the President of the United States be authorized and requested to issue a proclamation calling upon all people of the United

States to observe this week with appropriate ceremonies and activities.

Mr. GARCIA. Mr. Speaker, Senate Joint Resolution 261 designates October 24-31, 1982, as "National Housing Week." Millions of Americans, particularly young families, are finding the opportunity for homeownership and decent housing out of their reach. The Nation's housing industry has been a major contributor to the national economy by creating jobs and generating revenue. Homeownership and decent housing promotes pride and contributes to the stability of the family of America. It is appropriate to reaffirm our Nation's historic commitment to housing as a national priority to preserve the American dream.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the Senate joint resolutions just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

CONFERENCE REPORT ON S. 1018, COASTAL BARRIER RESOURCES ACT

Mr. BREAUX. Mr. Speaker, pursuant to the order of the House entered into earlier today, I call up the conference report on the Senate bill (S. 1018) to protect and conserve fish and wildlife resources, and for other purposes, and I ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The Clerk read the statement.

(For conference report and statement see proceedings of the House of October 1, 1982.)

Mr. BREAUX (during the reading). Mr. Speaker, I ask unanimous consent that the statement of the managers be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. BREAUX) will be recognized for 30 minutes, and the gentleman from Delaware (Mr. EVANS) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Louisiana (Mr. BREAUX).

Mr. BREAUX. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, S. 1018 is a relatively straightforward piece of legislation. It is aimed at preserving undeveloped coastal barrier beaches and islands by prohibiting Federal financial assistance for new development. Under this legislation, Federal assistance for roads, bridges, and sewer systems would not be available for areas that are identified as undeveloped coastal barriers on maps that are referenced in the legislation. Financial assistance in the form of VA and FHA loans would also be precluded. Finally, this legislation would continue the policy of restricting the issuance on new Federal flood insurance policies in these areas after October 1, 1983. This policy was adopted by Congress in section 341(d) of the Omnibus Budget Reconciliation Act of 1981.

The legislation contains exceptions that allow for Federal activities in support of energy development or for those activities relating to national defense or coast guard operations. Maintenance of channels and navigation facilities, enhancement of fish and wildlife habitat and shoreline stabilization activities in certain areas of extreme coastal erosions would also be allowed.

Coastal barriers buffer the mainland and associated wildlife-rich aquatic areas—such as lagoons, marshes, and estuaries—from the direct attack of ocean waves, storms, and hurricanes, and are generally among the most unstable of land forms.

Mr. Speaker, despite their value and unstable nature, these coastal barriers are being developed at a fantastic rate. The legislation before us is designed to cease Federal encouragement of such development. It will also have a major effect on private property owners along the Atlantic and gulf coasts. Because of this major impact, my committee proceeded with caution in considering this legislation. It was considered in hearings by two subcommittees over a period of a year. Our staff worked with the Interior Department in their development of maps under the Omnibus Budget Reconciliation Act provision dealing with flood insurance and they met with just about every person who expressed an interest in any of the areas involved not once but several times, including the staffs and Members of Congress from these coastal areas. As a result of these meetings, additions and deletions were made to correct inequities that would result from a narrow reading of the legislation.

Mr. Speaker, after the House and Senate passed their individual bills, each area where there were differences—and in most instances these differences were not major—was thoroughly reconsidered. Every effort has been made to make this legislation fair and equitable. The maps adopted in the conference report maintain a strong barrier island bill while addressing the major concerns of the coastal residents. I believe S. 1018 represents a legitimate compromise which we can all support.

The major differences between the House amendment and the conference substitute are as follows:

First, the conferees agreed to amend the definition of "financial assistance" to clarify that the restrictions on Federal expenditures on undeveloped coastal barriers are entirely unrelated to those programs which do not pertain to development. In other words, Federal public assistance programs such as old age, survivors, or disability insurance, student loans, or other similar social programs would in no way be restricted in the coastal barrier resources system by passage of this legislation.

Second, the report includes a Senate provision which allows for the addition of new areas to the coastal barrier resources system at the request of those who own such areas. it permits landowners to join the system even though they may not technically qualify under the definition of undeveloped coastal barriers.

Third, the conferees adopted a Senate provision which gives a limited role to State coastal zone management agencies in making minor boundary modifications. Under this provision, State CZM agencies may submit proposals for such modifications. If the Secretary fails to adopt such proposals, he must give written justification to the agency.

Finally, the conference report has several changes to the maps designating "undeveloped coastal barriers" compared to the House amendment. The major additions to the House amendment are:

Rhode Island: Very small expansions to the House maps on: Little Compton Ponds; Card Ponds; Green Hill Beach; East Beach; and Quonochontaug Beach.

Delaware: Broadkill Beach (new area).

North Carolina: Hatteras Island (new area).

Florida: Coconut Point (New area); Casey Key (an expansion of the House map); and Moreno Point (an expansion of the House map).

Mississippi: A portion of Cat Island (new area).

Deletions from the House maps are:

Maine: Three units deleted (two are State parks, one a naval facility): Sprague Neck Bar; Grassy Point; and Rogue Bluffs Beach.

New York: Small boundary adjustments to: Southhampton Beach and Oldfield Beach.

South Carolina: Pawley's Inlet (boundary adjustment).

Alabama: Mobile Point (boundary adjustment to exclude existing development).

Mr. Speaker, our coastal barrier resources represent a wealth of natural resources which are disappearing at an alarming rate. Past efforts to preserve these valuable areas were aimed at placing them in Federal preserves and prohibiting private property. This is a more moderate approach. It does not prevent any private property owner from developing his property. It simply says the Federal Government will not be a financial partner in such development. It protects natural resources while saving the taxpayers money and I urge all of my colleagues to join me in supporting the conference report which will make this worthwhile effort a reality.

Mr. Speaker, I would like to say the gentleman from Delaware (Mr. EVANS) has been one of the leading sponsors in the House on this legislation and has worked tirelessly, and I would also say without his efforts in pushing the committee, I think the bill would not be brought up this evening. He is to be commended for his work.

Mr. EVANS of Delaware. Mr. Speaker, let me say that the first shall be last, and the last shall be first, and I guess that holds true tonight—one of the last pieces of legislation that we consider in this session. It is an excellent piece of legislation. It has been supported by an overwhelming majority of the House of Representatives.

The companion piece of legislation introduced by our good friend, Senator JOHN CHAFEE from Rhode Island in the Senate. I think we have a very balanced bill, balanced between developmental and environmental interests. Very rarely do we find a bill where a gentleman like the gentleman from Massachusetts (Mr. STUDDS), and the gentleman from Louisiana (Mr. BREAUX), myself, and the Secretary of the Interior, Mr. Watt, all have unanimity of opinion.

The reason they do is because this legislation does combine the twin objectives of fiscal responsibility and environmental concern. It does protect our environment. It does protect some vital wetland areas along the Atlantic and the gulf coast that are essential to the spawning of fish and shellfish, that are vital to our coastal States' economies, and to jobs.

It does protect and help narrow the budget deficit that we have sorely needed to do.

Mr. Speaker, I will take no further time except to say that I appreciate tremendously the support that this bill has been given by the National Wildlife Federation and those associated with the Barrier Islands Coalition, by the National Taxpayers Union, by the American Red Cross, and others who are concerned about saving the environment, saving lives, and narrowing the budget deficit.

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. BREAUX. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Speaker, I would like to commend the committee on its hard work and dedication in reaching an agreement on this legislation. However, it has come to my attention in the past few days that there are certain difficulties with the maps drafted by the Department of Interior for the Bolivar Peninsula in southeast Texas. Under the proposed rules issued August 16, 1982, by the Department, no area was to be designated as removed from eligibility for Federal flood insurance coverage unless it had at least one-quarter of a mile of shoreline. In addition, if there is large intrusive development in the area, the break in development line can be moved, thereby eliminating some areas with more than one-quarter of a mile shoreline. On certain portions of the Bolivar Peninsula neither of these criteria appears to have been met, and I believe that a closer examination of those areas designated as ineligible for flood insurance protection coverage is certainly warranted.

□ 2410

Mr. BREAUX. Mr. Speaker, I will be happy to respond to the gentleman from Texas. Our bill and maps were developed over a year's time and all our information led us to believe that the maps were correct and fair. However, in the last day or so, new information has come to light on this area described by the gentleman from Texas.

It is not the intent of the conferees to treat any area unfairly nor to penalize the citizens who live on an area which is in fact developed. I can assure the gentleman that the committee will immediately followup the questions raised on this area. If this area is treated unfairly or inequitably by the present maps, the committee leadership will seek to resolve that problem when we return in November by legislation, if that is the necessary remedy.

Mr. BROOKS. Mr. Speaker, I thank the gentleman.

● Mr. CLAUSEN. Mr. Speaker, I rise in strong support of the conference report on S. 1018, the Coastal Barrier Resources Act.

This important environmental legislation, the House version of which I am pleased to have coauthored, enjoys strong and widespread support. Only 3 days ago, the House barrier island bill, H.R. 3252, passed on this floor by the overwhelming vote of 399 to 4. Five days earlier, the Senate's counterpart bill was passed in a similarly resounding fashion.

There is good reason for this. Our Atlantic and gulf coast barrier islands provide invaluable environmental and resource protection functions. At the same time, these same barrier islands offer unique attraction to States and others who view these islands and their use in different terms than those who desire to keep them in an undeveloped State.

The conference report we bring to the floor today strikes a balance between the competing values underlying these positions. This legislation allows continued development of the islands which are a part of the new Coastal Barrier Resources System. However, it also establishes a significant new policy under which new Federal subsidies for development on these storm-vulnerable areas will be prohibited.

Mr. Speaker, this Coastal Barrier Resources Act is environmentally responsible because it provides for strong new protections for the undeveloped barrier islands covered in the legislation. It is fiscally responsible because it will save our taxpayers large sums of money—billions of dollars, potentially—by avoiding disaster relief and erosion control expenditures. And it allows those who desire to pursue developmental objectives to do so, but at their own risks.

Our conferees are to be complimented on the rapid and successful negotiations that they were able to enter into. As one of those conferees, it was a personal pleasure for me to see the reasonableness and dedication that my colleagues on both sides of the aisle and on both sides of the Capitol were led by in agreeing to the compromise that is embodied in this conference report. This is excellent legislation that we will take pride in for years to come, and I strongly urge my colleagues to join me in voting to send it to the President for his signature.●

● Mr. HOWARD. Mr. Speaker, I rise in support of the conference report on S. 1018, the Coastal Barrier Resources Act.

I wish to commend the conferees on this legislation for developing a bill which reflects the positions of both the House and Senate.

This bill is an important step forward in protecting our coastal barriers along the Atlantic and gulf coasts. Through the limitation of Federal financial assistance for certain programs, development of undeveloped coastal barriers will be discouraged. At the same time, the bill recognizes the need to maintain and repair existing beach erosion and navigation projects as well as roads, structures, and facilities that are essential links in a larger network or system.

Our coastal barriers provide important habitats for birds and other wildlife and are essential spawning, nurs-

89-059 O-86-22 (Pt. 20)

ery, nesting, and feeding areas for finfish, shellfish, and other aquatic organisms. It is important that these areas be protected and I urge support of the conference report.●

● Mr. ROE. Mr. Speaker, I rise in support of the conference report on S. 1018, the Coastal Barrier Resources Act.

The conferees on this bill have acted speedily and responsively to come up with legislation which represents a reasonable compromise between the Senate and House provisions. The bill, a similar version of which passed the House just a few days ago by an overwhelming margin, is designed to minimize the loss of human life, wasteful expenditure of certain revenues, and damage to fish, wildlife and other natural resources associated with the coastal barriers along the Atlantic and gulf coasts. It will do this through the restriction of future Federal expenditures and financial assistance which have the effect of encouraging development of presently undeveloped coastal barriers.

This is a significant piece of environmental legislation and I urge my colleagues to support it.

● Mr. HAMMERSCHMIDT. Mr. Speaker, I rise in full support of the conference report on S. 1018, the Coastal Barrier Resources Act. I want first to commend the conferees for their swift and thoughtful resolution of the numerous issues concerning this legislation. The compromise regarding both the maps and statutory requirements provide a workable program which will provide both fiscal and environmental benefits to the American people.

Federal investments have, in the past, helped encourage development on coastal barrier areas. Such sections of the Nation's Atlantic and gulf coasts are quite unstable and subject to severe storm damage. This creates the potential for significant Federal expenditures in Federal disaster relief, flood insurance, and other programs. There are important environmental values which are protected by leaving some of these areas in their natural state.

I would stress again that this legislation does not affect previously developed barrier islands. In addition, development on lands which are within the coastal barrier system will not be prohibited, but those developing will have to do so at their own risk. Those persons whose homes are already in these areas will also be provided the existing protections of the Federal Government. The legislation is aimed at new construction on the coastal barriers within the boundaries of the coastal barrier resources system.

Again, Mr. Speaker, I congratulate the conferees from the House Committees on Merchant Marine and Fisheries and Public Works and Transportation, as well as the Senate Committee on Environment and Public Works for so rapidly reaching a resolution on this important environmental legislation.●

Mr. EVANS of Delaware. Mr. Speaker, I yield back the balance of my time.

Mr. BREAUX. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BREAUX. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

MASHANTUCKET PEQUOT INDIAN CLAIMS SETTLEMENT ACT

Mr. UDALL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6612) to provide for the settlement of land claims of the Mashantucket Pequot Indian Tribe of Connecticut, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. MARRIOTT. Mr. Speaker, reserving the right to object, will the gentleman briefly tell us what is involved in the bill?

Mr. UDALL. Mr. Speaker, if the gentleman will yield, this legislation has been reported by the Committee on the Interior. It follows the general pattern of other legislation which resolved certain land claims in the eastern part of the United States. This measure will provide a reasonable settlement of the claims of the Mashantucket Pequot Indian Tribe of Connecticut.

Mr. GEJDENSON. Mr. Speaker, I am pleased to provide the Mashantucket Pequot Indian Claim Settlement Act of 1982 for the House of Representatives consideration. This bill settles the first outstanding Indian land claim in the State of Connecticut. The entire congressional delegation from Connecticut is cosponsoring this legislation as a reaffirmation of Connecticut's policy which upholds the constitutional rights of the Pequots to negotiate this settlement with the property owners of Ledyard, Conn. The delegation feels that this proposed settlement is equitable, amicable, and is a precedent for our State.

The Mashantucket Pequot Tribe has held title to their present State reservation of 220 acres for over 250 years. Before that, their control extended to a much greater domain. In the course of their recorded history, successive generations have derived their living from this reservation. It is not surprising that the present leadership of the tribe should seek to continue this policy of self-sufficiency and negotiate a land settlement that is least disruptive to all involved.

In 1976, the Mashantucket Pequot Tribe brought a suit against certain property owners in Ledyard, Conn. The basic claim raised by the tribe is that past transfers of land to private homesteaders were invalid because the U.S. Congress failed to approve these transfers in accordance with the nonintercourse provision of the Indian Trade and Intercourse Act of 1790. The essential element of this claim remains that allegation that the failure of the United States explicitly to approve the transfers renders the prior land transfers invalid.

The settlement reached between the property owners and the tribe is an agreement to transfer approximately 800 acres of undeveloped land to the Mashantucket Pequot Tribe. All the property owners have agreed to this arrangement, and they still reserve the right to not sell their property if they so choose. The Mashantucket Pequot Indian Claims Settlement Act establishes a Federal trust for the purpose of land acquisition by the tribe as agreed to in the settlement. As a federally recognized tribe, the Pequots would then be entitled to all the rights and privileges which accompany such recognition. This bill extinguishes all aboriginal title to land and subjects the tribe to the laws of the United States regarding Indians. This agreement, to be legal and valid, requires this implementing legislation by the Congress.

In my opinion, this legislation satisfies the four criteria by which settlements of this nature should be judged. First, is the claim credible? Yes, the courts agree that the claim is credible. The Pequots have been a State-recognized tribe since 1667 and their claim to prior land holdings is legitimate. Second, is the settlement reasonable? Yes, not one homeowner will be displaced. The 800-acre land transfer is a compromise figure that will satisfy the future needs of the Pequots and is a reasonable acreage size to the property owners. The cost remains well below that of other claims. Third, has the State of Connecticut contributed its fair share? Yes, Connecticut, as

well as Maine, is the only New England State to have consistently provided monetary aid and inkind services to its State tribes. Since 1935, the State of Connecticut estimates that $150,000 has been spent on tribal government administration, health and educational services and direct appropriations from the State general assembly to the tribe. In addition, the State recently has granted the Pequots 20 acres of their ancient burial ground as part of the negotiated settlement. This property, considered prime real estate, is currently valued at $50,000. The State has shown its commitment to the tribe in encouraging their economic development and in recognizing their contribution to the general community. Fourth, is there a consensus among all the parties? Yes, all the parties agree to and support the resolution of the settlement. The entire congressional delegation, the Governor, the attorney general, and the general assembly support the concept and the enactment of this bill. Most importantly, the Ledyard property owners agree to this settlement and still maintain the prerogative to not sell their landholdings. The tribe supports the approach of this legislation and looks forward to ending years of litigation.

The essential concept of this bill is that minorities must always be afforded their rights under the Constitution. Majorities will always rule the way in a democratic process, but the laws of the Constitution uphold and guarantee the rights of minorities to due process and the right to be treated as equals in any legal claims. This bill, as introduced with unanimous support by the congressional delegation, uphold the rights of the Mashantucket Pequots to receive land entitled to them, to negotiate a settlement with property owners, and to become a federally recognized tribe.

This legislation is a precedent for our State. Parties involved with similar claims in the State will be persuaded that the proper course toward resolution is an out of court negotiated settlement, not protracted litigation where all parties are potentially losers. Property owners have rights to their land too, though legal injustices befell them years before they purchased their land. Compromise is the key direction we would like to follow.

It is time to settle this matter once and for all. In the 1970's and 1980's, the Mashantucket Pequots took steps to continue their self-sufficiency. They developed a tribal center, a wood harvesting industry, a maple syrup industry, attractive housing and an agribusiness centering around a hydroponic greenhouse. The tribe has become one of the principle employers of its membership. In the future, plans call for an expansion of these and other activities which will enhance, not only tribal employment, but provide jobs for others. The Pequots present a dynamic example of an Indian tribe, self-reliant, autonomous over its internal affairs, and contributing to the general community.

I urge the adoption of the bill and thank the Members for their support.

Mr. MARRIOTT. Mr. Speaker, I withdrew my reservation of objection and support the approval of this legislation.

The SPEAKER pro tempore. Is there objection.

There was no objection.

The Clerk read the bill, as follows:

H.R. 6612

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Mashantucket Pequot Indian Claims Settlement Act".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(1) there is pending before the United States District court for the District of Connecticut a civil action which involves Indian claims to certain public and private lands within the town of Ledyard, Connecticut;

(2) the pendency of this lawsuit has placed a cloud on the titles to much of the land in the town of Ledyard, including lands not involved in the lawsuit, which has resulted in severe economic hardships for the residents of the town;

(3) the Congress shares with the State of Connecticut and the parties to the lawsuit a desire to remove all clouds on titles resulting from such Indian land claims; and

(4) the parties to the lawsuit and others interested in the settlement of Indian land claims within the State of Connecticut have executed a settlement agreement which requires implementing legislation by the Congress of the United States and the legislature of the State of Connecticut;

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) the term "Tribe" means the Mashantucket Pequot Tribe (also known as the Western Pequot Tribe) as identified by chapter 832 of the Connecticut General Statutes and represented, as of the date of the enactment of this Act, by the Mashantucket Pequot Tribal Council;

(2) the term "land or natural resources" means any real property or natural resources, or any interest in or right to any real property or natural resources, including minerals and mineral rights, timber and timber rights, water and water rights, and hunting and fishing rights;

(3) the term "private settlement lands" means (A) the eight hundred acres, more or less, of privately held land which are identified by a red outline on a map filed with the Secretary of State of the State of Connecticut in accordance with the settlement agreement referred to in section 2(4) of this Act, and (B) the lands known as the Cedar Swamp which are adjacent to the Mashantucket Pequot Reservation as it exists on the date of the enactment of this Act;

(4) the term "public settlement lands" means the lands described in sections 2(a) and 3 of the Act to Implement the Settlement of the Mashantucket Pequot Indian Land Claim as enacted by the State of Connecticut and approved on June 9, 1982;

(5) the term "settlement lands" means private settlement lands and public settlement lands;

(6) the term "Secretary" means the Secretary of the Interior;

(7) the term "transfer" means any transaction involving any change of title to or control of any land or natural resources or any right or interest in any land or natural resources, including any sale, grant, lease, allotment, partition, or conveyance, or any transaction or treaty, compact, or statute of any State which results in a change of possession or control of land or natural resources; and

(8) the term "reservation" means the reservation of the Tribe as defined by chapter 824 of the Connecticut General Statutes.

CONNECTICUT INDIAN CLAIMS SETTLEMENT FUND

SEC. 4. (a) As compensation to the Tribe for the extinguishment of any claim under section 5 of this Act, there is established in the United States Treasury a fund to be known as the Connecticut Indian Claims Settlement Fund. This fund shall be held in trust by the Secretary for the benefit of the Tribe and administered in accordance with this Act.

(b)(1) The Secretary shall spend, at the request of the Tribe, the principal of the fund and any income accruing to the fund to acquire land or natural resources for the Tribe or for similar purposes which promote the economic development of the Tribe.

(2) Lands or natural resources acquired under paragraph (1) which are located within the settlement lands shall be held in trust by the United States for the benefit of the Tribe.

(3) Lands or natural resources acquired under paragraph (1) which are located outside of the settlement lands shall be held in fee by the Mashantucket Pequot Tribe, and the United States shall have no further trust responsibility with respect to such lands and natural resources. Such lands or natural resources shall not be subject to any restriction against alienation under the laws of the United States or the State of Connecticut.

(c) For the purpose of subtitle A of the Internal Revenue Code of 1954, any transfer of private settlement lands to which subsection (b)(2) applies shall be deemed to be an involuntary conversion within the meaning of section 1033 of such code.

(d) There is authorized to be appropriated $900,000 to be deposited in the fund.

APPROVAL OF PRIOR TRANSFERS; EXTINGUISHMENT OF INDIAN ABORIGINAL TITLES AND INDIAN CLAIMS

SEC. 5. (a) Any transfer before the date of enactment of this Act from, by, or on behalf of the Tribe or any of its members of land or natural resources located anywhere within the United States and any transfer before the date of enactment of this Act from, by, or on behalf of any Indian or nation, tribe, or band of Indians of land or natural resources located anywhere within the town of Ledyard, Connecticut, shall be deemed to have been made in accordance with the Constitution and all laws of the United States specifically applicable to transfers of land or natural resources from, by, or on behalf of any Indian, or nation, tribe, or band of Indians. Any such transfer shall be deemed to have been made with the consent and approval of the Congress as of the date of such transfer.

(b) Any aboriginal title held by the Tribe or any member of the Tribe, or any other Indian or nation, tribe, or band of Indians, to

any land or natural resources the transfer of which was consented to and approved in subsection (a) shall be considered extinguished as of the date of such transfer.

(c) Any claim (including any claim for damages for trespass or for use and occupancy) by the Tribe or any member of the Tribe or by any other Indian or nation, tribe, or band of Indians (including any predecessor or successor in interest of any such Indian, or nation, tribe, or band of Indians) against the United States, any State or subdivision thereof, or any other person which is based on—

(1) any transfer of land or natural resources which was consented to and approved in subsection (a), or

(2) any aboriginal title to land or natural resources the transfer of which was consented to and approved in subsection (a),

shall be considered extinguished as of the date of any such transfer.

(d)(1) This section shall take effect upon the appropriation of $900,000 as authorized under section 4(d) of this Act.

(2) The Secetary shall publish notice of such appropriation in the Federal Register when the funds are deposited in the fund.

JURISDICTION OVER RESERVATION

SEC. 6. Notwithstanding the provision relating to a special election in section 406 of the Act approved April 11, 1968 (25 U.S.C. 1326), the reservation and the settlement lands are declared to be Indian country subject to State jurisdiction to the maximum extent provided in title IV of such Act.

LIMITATION OF ACTIONS; FEDERAL COURT JURISDICTION

SEC. 7. (a) Notwithstanding any other provision of law, the constitutionality of this Act may not be drawn into question in any action unless such question has been raised in—

(1) a pleading contained in a complaint filed before the end of the one-hundred-and-eighty-day period beginning on the date of enactment of this Act, or

(2) an answer contained in a reply to a complaint filed before the end of such period.

(b) Notwithstanding any other provision of law, exclusive original jurisdiction of any action in which the constitutionality of this Act is drawn into question is vested in the United States District Court for the District of Connecticut.

(c) Any action to which subsection (a) applies and which is brought in the court of any State may be removed by the defendant to the United States District Court for the District of Connecticut.

RESTRICTION AGAINST ALIENATION

SEC. 8. (a) Subject to subsection (b), lands within the reservation and any settlement lands which are held by the Secretary for the benefit of the Tribe at any time after the date of enactment of this Act shall be subject to the laws of the United States relating to Indian lands, including section 2116 of the Revised Statutes (25 U.S.C. 177).

(b) Notwithstanding subsection (a), the Tribe may lease lands for any term of years to the Mashantucket Pequot, Housing Authority or any successor in interest to such Authority.

EXTENSION OF FEDERAL RECOGNITION AND PRIVILEGES

SEC. 9. (a) Notwithstanding any other provision of law, Federal recognition is extended to the Tribe. Except as otherwise provided in this Act, all laws and regulations of the United States of general application to Indians or Indian nations, tribes, or bands of Indians which are not inconsistent with any specific provision of this Act shall be applicable to the Tribe.

(b) Notwithstanding any other provision of law, the Tribe and members of the Tribe shall be eligible for all Federal services and benefits furnished to federally recognized Indian tribes as of the date of enactment of this Act.

COMMITTEE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The SPEAKER pro tempore. The Clerk will report the committee amendment in the nature of a substitute.

The Clerk read as follows:

Committee amendment in the nature of a substitute: Strike our all after the enacting clause and insert:

SECTION 1. That this Act may be cited as the "Mashantucket Pequot Indian Claims Settlement Act."

CONGRESSIONAL FINDINGS

SEC. 2. The Congress finds that—

(1) there is pending before the United States District court for the District of Connecticut a civil action which involves Indian claims to certain public and private lands within the town of Ledyard, Connecticut;

(2) the pendency of this lawsuit has placed a cloud on the titles to much of the land in the town of Ledyard, including lands not involved in the lawsuit, which has resulted in severe economic hardships for the residents of the town;

(3) the Congress shares with the State of Connecticut and the parties to the lawsuit a desire to remove all clouds on the titles resulting from such Indian land claims;

(4) the parties to the lawsuit and others interested in the settlement of Indian land claims within the State of Connecticut have reached an agreement which requires implementing legislation by the Congress of the United States and the legislature of the State of Connecticut;

(5) the Western Pequot Tribe, as represented as of the time of the passage of this Act by the Mashantucket Pequot Tribal Council, is the sole successor in interest to the aboriginal entity generally known as the Western Pequot Tribe which years ago claimed aboriginal title to certain lands in the State of Connecticut; and

(6) The State of Connecticut is contributing 20 acres of land owned by the State of Connecticut to fulfill this Act. The State of Connecticut has provided special services to the members of the Western Pequot Tribe residing within its borders. The United States has provided few, if any, special services to the Western Pequot Tribe and has denied that it had jurisdiction over or responsibility for said tribe. In view of the provision of land by the State of Connecticut and the provision of special services by the State of Connecticut without being required to do so by federal law, it is the intent of Congress that the State of Connecticut not be required to further contribute directly to this claims settlement.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) the term "Tribe" means the Mashantucket Pequot Tribe (also known as the Western Pequot Tribe) as identified by chapter 832 of the Connecticut General Statutes. The Mashantucket Pequot Tribe is represented, as of the date of the enactment of this Act, by the Mashantucket Pequot Tribal Council;

(2) the term "land or natural resources" means any real property or natural resources, or any interest in or right to any real property, including minerals and mineral rights, timber and timber rights, water and water rights, and hunting and fishing rights;

(3) the term "private settlement lands" means (A) the eight hundred acres, more or less, of privately held land which are identified by a red outline on a map filed with the Secretary of the State of Connecticut in accordance with the agreement referred to in section 2(4) of this Act, and (B) the lands known as the Cedar Swamp which are adjacent to the Mashantucket Pequot Reservation as it exists on the date of the enactment of this Act. Within 30 days of the enactment of this Act, the Secretary of the State of Connecticut shall transmit to the Secretary a certificate copy of said map;

(4) the term "settlement lands" means the lands described in sections 2(a) and 3 of the Act to Implement the Settlement of the Mashantucket Pequot Indian Calim as enacted by the State of Connecticut and approved on June 9, 1982 and private settlement lands.

(5) the term "Secretary" means the Secretary of the Interior;

(6) the term "transfer" means any transaction involving a change of title to or control of any land or natural resources or any right or interest in any land or natural resources, and any act, event, or circumstance that resulted in a change in title to, possession of, dominion over, or control of land or natural resources including any sale, grant, lease, allotment, partition, or conveyance or any transaction, treaty, compact or statute of the State of Connecticut which results in a change of possession or control of land or natural resources; and

(7) the term "reservation" means the existing reservation of the Tribe as defined by chapter 824 of the Connecticut General Statutes and any settlement lands taken in trust by the United States for the Tribe.

APPROVAL OF PRIOR TRANSFERS; EXTINGUISHMENT OF ABORIGINAL TITLES AND INDIAN CLAIMS

SEC. 4. (a) Any transfer before the date of enactment of this Act from, by or on behalf of the Tribe or any of its members of land or natural resources, located anywhere within the United States, and any transfer before the date of enactment of this Act from, by, or on behalf of any Indian, Indian nation, or tribe or band of Indians of land or natural resources located anywhere within the town of Ledyard, Connecticut, shall be deemed to have been made in accordance with the Constitution and all laws of the United States specifically applicable to transfers of land or natural resources from, by, or on behalf of any Indian, Indian nation, or tribe or band of Indians including the Trade and Intercourse Act of 1790 Act of July 22, 1790 (ch. 33, Sec. 4, 1 Stat. 137, 138) and all amendments thereto and all subsequent reenactments and versions thereof, and Congress hereby does approve and ratify any such transfer effective as of the date of said transfer.

(b) Any aboriginal title held by the Tribe or any member of the Tribe or any other Indian, Indian nation, or tribe or band of Indians, to any land or natural resources the transfer of which was consented to and approved in subsection (a) shall be considered extinguished as of the date of such transfer.

(c) Any claim (including any claim for damages for trespass or for use and occu-

pancy) by, or on behalf of, the Tribe or any member of the Tribe or by any other Indian, Indian nation, or tribe or band of Indians, or any predecessor or successor in interest thereof, against the United States, any State or subdivision thereof or any other person which is based on

(1) any transfer of land or natural resources which was consented to and approved in subsection (a) or

(2) any aboriginal title to land or natural resources the transfer of which was consented to and approved in subseciton (b), shall be considered extinguished as of the date of any such transfer.

(d)(1) This section shall take effect upon the appropriation of $900,000 as authorized under subsection 5(e) of this Act.

(2) The Secretary shall publish notice of such appropriation in the Federal Register when the funds are deposited in the fund established under subsection 5(a) of this Act.

MASHANTUCKET PEQUOT SETTLEMENT FUND

SEC. 5. (a) As compensation to the Tribe for the extinguishment of any claim under section 4 of this Act, there is established in the United States Treasury a fund to be known as the Mashantucket Pequot Settlement Fund. This fund shall be held in trust by the Secretary for the benefit of the Tribe and administered in accordance with this Act.

(b)(1) The Secretary is authorized and directed to expend, at the request of the Tribe, the fund together with any and all income accruing to such fund for the purpose of acquiring land or natural resources for the Tribe.

(2) Not less than $600,000 of the fund shall be available until January 1, 1985, for the acquisition by the Secretary of private settlement lands. Subsequent to January 1, 1985, the Secretary shall determine whether and to what extent an amount less than $600,000 has been expended to acquire private settlement lands and shall make that amount available to the Tribe to be used in accordance with the economic development plan approved pursuant to section 5(b)(3).

(3) The Secretary shall disburse all or part of the fund together with any and all income accruing to such fund excepting the amount reserved in section 5(b)(2) according to a plan to promote the economic development of the Tribe. (A) The Tribe shall submit an economic development plan to the Secretary and the Secretary shall approve such plan within 60 days of its submission if he finds that it is reasonably related to the economic development of the Tribe. If the Secretary does not approve such plan, he shall, at the time of his decision, set forth in writing and with particularity, the reasons for his disapproval. (B) The Secretary may not agree to terms which provide for the investment of the fund in a manner not in accordance with section 1 of the Act of June 24, 1938 (52 Stat. 1037), unless the Tribe first submits a specific waiver of liability on the part of the United States for any loss which may result from such an investment. (C) The tribe may, with the approval of the Secretary, alter the economic development plan subject to the conditions set forth in subsection 5(B)(3)(A).

(4) Under no circumstances shall any part of the fund be distributed to any member of the Tribe unless pursuant to the economic development plan approved by the Secretary under section 5(b)(3).

(5) As the fund or any portion thereof is disbursed by the Secretary in accordance with this section, the United States shall have no further trust responsibility to the Tribe or its members with respect to the sums paid, any subsequent expenditures of these sums, or any property or services purchased with these sums.

(6) Until the Tribe has submitted and the Secretary has approved the terms of the use of the Fund, the Secretary shall fix the terms for the administration of the portion of the fund as to which there is no agreement.

(7) Lands or natural resources acquired under subsection (5)(b) which are located within the settlement lands shall be held in trust by the United States for the benefit of the Tribe.

(8) Land or natural resources acquired under subsection (b) which are located outside of the settlement lands shall be held in fee by the Mashantucket Pequot Tribe, and the United States shall have no further trust responsibility with respect to such land and natural resources. Such lands or natural resources shall not be subject to any restriction against alienation under the laws of the United States.

(9) Notwithstanding the provisions of section 1 of the Act of August 1, 1888 (25 Stat. 357), as amended, and section 1 of the Act of February 26, 1931 (46 Stat. 1421), the Secretary may acquire land or natural resources under this section from the ostensible owner of the land or natural resources only if the Secretary and the ostensible owner of the land or natural resources have agreed upon the identity of the land or natural resources to be sold and upon the purchase price and other terms of sale. Subject to the agreement required by the preceding sentence, the Secretary may institute condemnation proceedings in order to perfect title, satisfactory to the Attorney General, in the United States and condemn interests adverse to the ostensible owner.

(c) For purposes of subtitle A of the Internal Revenue Code of 1954, any transfer of private settlement lands to which subsection (b)(2) applies shall be deemed to be an involuntary conversion within the meaning of section 1033 of such code.

(d) The Secretary may not expend on behalf of the Tribe any sums deposited in the fund established pursuant to subsection (a) of this section unless and until he finds that authorized officials of the Tribe have executed appropriate documents relinquishing all claims to the extent provided by sections 4 and 10 of this Act including stipulations to the final judicial dismissal with prejudice of its claims.

(e) There is authorized to be appropriated $900,000 to be deposited in the fund.

JURISDICTION OVER RESERVATION

SEC. 6. Notwithstanding the provision relating to a special election in section 406 of the Act approved April 11, 1968 (25 U.S.C. 1326), the reservation of the Tribe is declared to be Indian country subject to state jurisdiction to the maximum extent provided in title IV of such Act.

LIMITATION OF ACTIONS: FEDERAL COURT JURISDICTION

SEC. 7. (a) Notwithstanding any other provision of law, the constitutionality of this Act may not be drawn into question in any action unless such question has been raised in—

(1) a pleading contained in a complaint filed before the end of the one-hundred-and-eighty-day period beginning on the date of the enactment of this Act, or

(2) an answer contained in a reply to a complaint before the end of such period.

(b) Notwithstanding any other provision law, exclusive jurisdiction of any action in which the constitutionality of this Act is drawn into question is vested in the United States District Court for the District of Connecticut.

(c) Any action to which subsection (a) applies and which is brought in the court of any state may be removed by the defendant to the United States District Court for the District of Connecticut.

(d) Except as provided in this Act, no provision of this Act shall be construed to constitute a jurisdictional act, to confer jurisdiction to sue, or to grant implied consent to any Indian, Indian nation, or tribe or band of Indians to sue the United States or any of its officers with respect to the claims extinguished by the operation of this Act.

RESTRICTION AGAINST ALIENATION

SEC. 8. (a) Subject to subsection (b), lands within the reservation which are held in trust by the Secretary for the benefit of the Tribe or which are subject to a federal restraint against alienation at any times after the date of the enactment of this Act shall be subject to the laws of the United States relating to Indian lands, including section 2116 of the Revised Statutes (25 U.S.C. 177).

(b) Notwithstanding subsection (a), the Tribe may lease lands for any term of years to the Mashantucket Pequot Housing Authority, or any successor in interest to such authority.

EXTENSION OF FEDERAL RECOGNITION AND PRIVILEGES

SEC. 9. (a) Notwithstanding any other provision of law, federal recognition is extended to the Tribe. Except as otherwise provided in this Act, all laws and regulations of the United States of general application to Indians or Indian nations, tribes or bands of Indians which are not inconsistent with any specific provision of this Act shall be applicable to the Tribe.

(b) The Tribe shall file with the Secretary a copy of its organic governing document and any amendment thereto. Such instrument must be consistent with the terms of this Act and the act to Implement the Settlement of the Mashantucket Pequot Indian Land Claim as enacted by the State of Connecticut and approved June 9, 1982.

(c) Notwithstanding any other provision of law, the Tribe and members of the Tribe shall be eligible for all federal services and benefits furnished to federally recognized Indian tribes as of the date of enactment of this Act.

OTHER CLAIMS DISCHARGED BY THIS ACT

SEC. 10. Except as expressly provided herein, this Act shall constitute a general discharge and release of all obligations of the State of Connecticut and all of its political subdivisions, agencies, departments, and of the officers or employees thereof arising from any treaty or agreement with, or on behalf of the Tribe or the United States as trustee therefore.

SEVERABILITY

SEC. 11. In the event that any provisions of section 4 of this Act is held invalid, it is the intent of Congress that the entire Act be invalidated. In the event that any other section of provision of this Act is held invalid, it is the intent of Congress that the remaining sections of this Act shall continue in full force and effect.

Mr. UDALL (during the reading). Mr. Speaker, I ask unanimous consent that the bill and the committee

amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The committee amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENDING LEASE TERMS OF CERTAIN FEDERAL OIL AND GAS LEASES

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on the Interior and Insular Affairs be discharged from further consideration of the Senate bill (S. 2146) to extend the lease terms of Federal oil and gas leases, W66245, W66246, W66247, and W66250, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, I wonder, are we sweeping out the broom closet here?

I certainly was not informed that all these things were coming up. Are these bills of great emergency which must be dealt with right now?

I yield to the gentleman from Arizona.

Mr. UDALL. Well, I suppose nothing is absolutely necessary, but these are bills that have been processed by the Interior Committee, cleared by the minority. It takes just a few minutes to handle them in this fashion. We are trying to legislate in an orderly way.

I must say, we are not the only committee that is here tonight trying to finish up a year's work on some of these matters.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I would like to take up that comment. Now, dadgummit, it is 12:15 and things keep appearing here. I do not want to drag this out, but I would like to know how many of these we are going to go through like this.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I yield to the distinguished minority whip to inquire how long we are going to be engaged here tonight?

We were given a list of things. We have exceeded that by severalfold.

I yield to the distinguished gentleman from Washington (Mr. FOLEY).

Mr. FOLEY. Mr. Speaker, a slight correction. The title is majority whip. I know the gentleman misspoke himself.

Mr. FRENZEL. It was a Freudian slip. I apologize.

Mr. FOLEY. I thank the gentleman. It is my understanding that there are very few matters that remain on the calendar.

Mr. UDALL. Mr. Speaker, if the gentleman will yield further, we have this and one other bill. This one is authored by the gentleman from Utah (Mr. MARRIOTT) who can explain it, I am sure, very well.

The gentleman from Ohio (Mr. SEIBERLING) from our committee has another three unanimous-consent requests that deal with our Interior Committee's business.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I am going to remove my reservation, but I have been very upset by the procedures throughout this whole week.

I find some committees never bring a bill to order under the normal procedures. I think most of the Members would prefer to handle things in the regular order.

At the conclusion of what has been described here, I think we should probably have no more.

Mr. FOLEY. Mr. Speaker, will the gentleman yield one more time?

Mr. FRENZEL. Further reserving the right to object, I yield to the gentleman from Washington.

Mr. FOLEY. I cannot speak in absolute terms, but I am sure, if the gentleman will yield further, that the matters that are slated to be taken up should be disposed of within 10 minutes.

I think the House is within 10 or 15 minutes of an adjournment.

Mr. FRENZEL. Mr. Speaker, I thank the gentleman for his explanation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2146

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is authorized and directed to extend United States oil and gas leases issued under section 17 of the Mineral Lands Leasing Act of 1920, as amended, designated "W66245, W66246, W66247, and W66250", and presently known as the Toledo Unit in Lincoln County in the State of Wyoming, and which would otherwise expire forty-eight days after the termination of United States Department of the Interior administrative suspension of operations and lease terms currently in effect, until two years after the effective date of this Act or the termination of the period of suspension, whichever comes later, and so long thereafter as oil or gas is produced in paying quantities as defined under the Mineral Lands Leasing Act: *Provided, however,* That except as specifically modified herein as to such leases, all other provisions of the Mineral Lands Leasing Act of 1920, as amended, shall be applicable as to such lease: *And provided further,* That the Secretary of the Interior is authorized, at the request of the Secretary of Agriculture, to modify the lease stipulations to insure the protection of enviromentally sensitive areas.

SEC. 2. The effective date of this Act shall be the date the leases specified in section 1 would have expired by operation of law, but for the passage of this Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR REINSTATEMENT AND VALIDATION OF U.S. OIL AND GAS LEASE NUMBERED W-24153

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on the Interior and Insular Affairs be discharged from further consideration of the bill (H.R. 5826) to provide for the reinstatement and validation of U.S. oil and gas lease numbered W-24153, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona?

Mr. MARRIOTT. Mr. Speaker, reserving the right to object, could the gentleman just give us a brief description of this legislation?

Mr. UDALL. Mr. Speaker, if the gentleman will yield, this bill is very similar to the one we just passed, authored by the gentleman from Utah (Mr. MARRIOTT). It was favorably reported by our committee. It involves an oil and gas lease terminated by operation of law for which an equitable remedy is in order. This situation is not covered by a broader bill, H.R. 5121, previously approved by the House.

This has been passed by the Senate and there is no objection from the administration.

Mr. MARRIOTT. Mr. Speaker, we have reviewed this bill. We agree with the explanation.

Mr. Speaker, I withdraw my reservation of objection and urge the House to pass the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arizona (Mr. UDALL)?

There was no objection.

The Clerk read the bill, as follows:

H.R. 5826

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law or regulation, United States oil and gas lease numbered W-24153 shall be held not to have terminated by operation of law or otherwise on or about May 31, 1980, but shall be deemed to have been duly communized on such date with United States oil and gas

lease numbered W-47820 and shall be deemed otherwise to continue in full force and effect in accordance with its terms so long as oil or gas is produced in paying quantities from the unit so constituted: *Provided,* That, within sixty days of the effective date of this Act, the last recordholder of lease numbered W-24153 and the recordholder of lease numbered W-47820 shall file an agreement in due form with the Secretary or his delegate evidencing the communitization of said leases which agreement shall be approved by the Secretary or his delegate retroactively to a date prior to May 31, 1980. *And provided further,* That within thirty days after the receipt of written notice from the Secretary or his delegate of the amount of any rental then accrued to the United States under lease numbered W-24153 and unpaid by the last recordholder of said lease, said recordholder shall tender payment of said amount of rental. Such notice shall be given by the Secretary within thirty days after the effective date of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4441, FEES SUBMITTED TO COPYRIGHT OFFICE IN THE LIBRARY OF CONGRESS

Mr. KASTENMEIER submitted the following conference report and statement on the bill (H.R. 4441) to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes.

CONFERENCE REPORT (H. REPT. NO. 97-930)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4441) to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SECTION 1. Section 708 of chapter 7 of title 17 of the United States Code is amended—

(1) by striking out subparagraphs (1) and (2) of paragraph (a) in their entirety and inserting in lieu thereof the following:

"(1) on filing each application for registration of a copyright claim or a supplementary registration under section 408, including the issuance of a certificate of registration if registration is made, $10;

"(2) on filing each application for registration of a claim to renewal of a subsisting copyright, in its first term under section 304(a), including the issuance of a certificate of registration if registration is made, $6;" and

(2) in paragraph (c), by striking out everything in the last sentence following the word "section" the first time it appears therein and inserting a period in lieu thereof.

SEC. 2. This Act shall take effect thirty days after its enactment and shall apply to claims to original, supplementary, and renewal copyright received for registration in the Copyright Office on or after the effective date. Claims to original, supplementary, and renewal copyright received for registration in acceptable form in the Copyright Office before the effective date shall be governed by the provisions of section 708(a) (1) and (2) in effect prior to this enactment.

SEC. 3. That section 110 of title 17 to the United States Code is amended; (1) by adding at the end thereof the following new paragraph: "(10) notwithstanding paragraph 4 above, the following is not an infringement of copyright: performance of a nondramatic literary or musical work in the course of a social function which is organized and promoted by a nonprofit veterans' organization or a nonprofit fraternal organization to which the general public is not invited, but not including the invitees of the organizations, if the proceeds from the performance, after deducting the reasonable costs of producing the performance, are used exclusively for charitable purposes and not for financial gain. For purposes of this section the social functions of any college or university fraternity or sorority shall not be included unless the social function is held solely to raise funds for a specific charitable purpose."

SEC. 4. Title 35, United States Code, Section 3 is amended by adding the following new subsection:

"(d) The Commissioner of Patents and Trademarks shall be an Assistant Secretary of Commerce and shall receive compensation at the rate prescribed by law for Assistant Secretaries of Commerce."

And the Senate agree to the same.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 4441) to amend section 110 of title 17 of the U.S. Code relating to copyright royalty payments, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommend in the accompanying conference report:

The House recedes from its disagreement to the amendment of the Senate.

The purpose of the amendment to section 110 of title 17 U.S. Code is to provide an exemption for nonprofit veteran's and fraternal organizations from the requirement of paying certain performance royalty fees for musical works which are used for charitable fundraising.

It is the feeling of the conferees that the invitees for the organizations are not to be considered the general public, if they are the guests of members.

It is the intention of the conferees to provide an exemption to copyright act to college and university fraternities and sororities only for those specific events that are held to raise funds for a specific charitable purpose. Events held by these groups that are merely social in nature are not intended to be covered.

The House bill did not contain any provision relating to the title of Commissioner of Patents and Trademarks. The Senate amendment upgraded the present position of Commissioner of Patents and Trademarks to the Assistant Secretary of Commerce. The House receded from its disagreement to the amendment of the Senate and agreed to the same. It is the intent of the conferees to upgrade this office at this time because the Commissioner of Patents and Trademarks is the chief governmental spokesman for the delegation representing the United States at the third Session of the Diplomatic Conference on the Revision of the Paris Convention for the protection of industrial property which will take place in Geneva, Switzerland in October 1982. Industries and intellectual property involves billions of dollars in exports and thousands of U.S. jobs. This session is of critical importance to the United States and the representatives from our government to this conference should come from the highest levels of our government. This will provide the President and the Secretary of Commerce with an authoritative advisor on a wide variety of intellectual property issues confronting the nation.

ROBERT W. KASTENMEIER,
JACK BROOKS,
PAT SCHROEDER,
BARNEY FRANK,
TOM RAILSBACK,
M. CALDWELL BUTLER,
HAROLD S. SAWYER,
Managers on the Part of the House.

STROM THURMOND,
CHARLES MCC. MATHIAS, JR.,
PAUL LAXALT,
DENNIS DECONCINI,
EDWARD ZORINSKY,
Managers on the Part of the Senate.

Mr. KASTENMEIER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (H.R. 4441) to amend title 17 of the United States Code with respect to the fees of the Copyright Office, and for other purposes, and that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of today, October 1, 1982.)

Mr. KASTENMEIER (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 30 minutes.

□ 2420

Mr. KASTENMEIER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a simple and uncontroversial matter. The original House-passed bill simply clarified an ambiguity in existing law with regard to the power of the Register of Copyrights to retain the $10 application fee in situations where an applicant for copyright registration failed to complete processing of an application. It will save the taxpayers about $400,000 per year.

The Senate passed the bill with an amendment similar to a bill, H.R. 2007, pending in the House. The amendment provided for an exemption form copyright liability for public performance of copyrighted music by veterans' and fraternal groups. Rather than process the House bill separately, we agreed to consider the issue of the copyright exemption for veterans' and fraternal groups in the context of a conference of H.R. 4441. After consultation with representatives of our Nation's veterans' and fraternal organizations as well as representatives of copyright owners we have reached a fair compromise. It is supported by the veterans' and fraternal groups involved.

In addition we have accepted a Senate amendment to upgrade the status of the Commissioner of Patents. All House and Senate conferees have agreed to the report. I know of no opposition.

Mr. BUTLER. Mr. Speaker, we on the minority side concur in all the remarks of the gentleman from Wisconsin and ask for the immediate adoption of the conference report.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 2457, AUTHORIZATION FOR INCREASED FEDERAL PAYMENTS TO THE DISTRICT OF COLUMBIA

Mr. DELLUMS submitted the following conference report and statement of managers on the Senate bill (S. 2457) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia:

CONFERENCE REPORT (H. REPT. No. 97-931)

The committtee of conference on the disagreeing votes of the two Houses on an amendment of the House to the bill, S. 2457, an act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendment.

RONALD V. DELLUMS,
WALTER E. FAUNTROY,
MICKEY LELAND,
STEWART B. MCKINNEY,
TOM BLILEY,
STAN PARRIS,
Managers on the Part of the House.

CHARLES MCC. MATHIAS, JR.,
WARREN B. RUDMAN,
TOM EAGLETON,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2457) submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Conference Committee has agreed to strike the provisions of the House amendment, hereinafter referred to as the Parris amendment, pursuant to an agreement between the District of Columbia and the District of Columbia Retirement Board.

S. 2457 authorizes an increase in the federal payment to the District of Columbia for fiscal year 1983 and beyond. In the House, the bill was amended to require that of any funds appropriated for the federal payment in fiscal year 1983, not less than $14.3 million were to be paid to the District of Columbia Retirement Board to eliminate deficits in the District of Columbia Teachers' Retirement Fund and the District of Columbia Police Officers and Fire Fighters' Retirement Fund.

In order to avoid the necessity of earmarking the federal payment in the manner contemplated by the Parris amendment, the Mayor of the District of Columbia and the Chairman of the District of Columbia Retirement Board (on the approval of the full Board) have come to an agreement regarding the funding of the retirement funds deficits. That agreement is contained in a letter sent to the chairman of the House District Committee.

The letter reads as follows:

THE DISTRICT OF COLUMBIA,
Washington, D.C., September 29, 1982.

Hon. RONALD V. DELLUMS,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN DELLUMS: Today, a House/Senate Conference Committee will consider Federal Payment authorization legislation for the District of Columbia. Both of the bills provide Federal Payment authorization of $361 million. The House version requires that $14.3 million of the $24.4 million increase in the Federal Payment be set aside to repay prior year pension shortfalls.

The Mayor met with the D.C. Retirement Board in an effort to avoid the Federal Payment earmarking. We are pleased to report to you that we have been able to reach agreement, and we jointly support the removal of the Federal Payment set aside for pensions. The agreement we have reached in substitution therefore is as follows:

(1) The District will pay to the pension funds, the FY 1981 shortfall of $14.3 million plus interest of $1.4 million. Principal payments of $4.75 million will be made in three successive fiscal years, beginning in FY 1983. Interest payments of $475,000 will be made in three successive years beginning in FY 1984;

(2) The District will pay the estimated FY 1982 shortfall of $6.8 million, without interest. Payments of $2.25 million will be made in three successive fiscal years beginning in FY 1984; and

(3) The District agrees to pay from the General Fund the sum of $425,000 toward administrative expenses of the Board and supports the Board's request for seven positions as part of the appropriated budget for FY 1983 now pending in Congress.

The parties request the Conferees to sustain the legislative provisions recommended by the House Committee on Appropriations contained in the Limitations and Legislative Provisions section of House Report 97-849.

The payments cited in this agreement will be made on October 1 or when the District receives its first quarter Federal Payment allocation whichever is later or as provided in a Joint Resolution continuing the District's Appropriations.

In reaching this agreement, the Executive Branch has committed itself to include the D.C. Retirement Board in the Amendment and Supplemental Budget review process of the District of Columbia beginning in FY 1983 and the parties have further agreed to take every reasonable step to avoid shortfalls in the future and to create a formal process for examination of any that do occur.

We are pleased to have been able to resolve this matter satisfactorily, and we request your ratification of our agreement as a substitute for the earmarked Federal Payment.

Sincerely yours,

MARION S. BARRY, Jr.,
Mayor.

FRANK HIGGINS,
Chairman, Retirement Board.

Pursuant to the agreement, as set forth in the above letter, the District of Columbia agrees to make the following payments to the District of Columbia Retirement Board:

In fiscal year 1983:

A principal payment of $4.75 million on the fiscal year 1981 shortfall.

In fiscal years 1984 and 1985:

A principal payment in each of the years of $4.75 million on the fiscal year 1981 shortfall;

An interest payment in each of the years of $475,000 on the fiscal year 1981 shortfall;

And a $2.25 million payment in each of the years on the fiscal year 1982 shortfall.

In fiscal year 1986:

An interest payment of $475,000 on the fiscal year 1981 shortfall;

And a $2.25 million payment on the fiscal year 1982 shortfall.

In addition, the City agrees to pay from the General Fund the sum of $425,000 toward the administrative expenses of the Board, and supports the Board's request for funding of seven administrative positions. The City agrees to pay all of the principal and interest payments on October 1 of each year, or when the District receives its first quarter federal payment allocation, whichever is later, or as provided in a Joint Resolution continuing the District of Columbia's appropriation.

In addition to the above payments to the Board the conferees support the legislative provisions addressing the D.C. Retirement Board recommended by the House Committee on Appropriations contained in the Limitations and Legislative Provisions section of House Report 97-849; to include the D.C. Retirement Board in the Amended and Supplemental Budget review process of the District of Columbia beginning in FY 1983; to take every reasonable step to avoid shortfalls in the future; and to create a formal process for the examination of any shortfall that might occur in the future.

The Mayor and the Chairman of the D.C. Retirement Board intend that the agreement contained in the above letter be an enforceable agreement, and that if one of the parties to the agreement breaches the agreement, the other party may bring suit against the breaching party to enforce the agreement.

In light of the foregoing, it is no longer necessary for the federal payment monies to be earmarked. Thus, the Committee of the Conference agrees to strike the Parris amendment.

RONALD V. DELLUMS,
WALTER E. FAUNTROY,
MICKEY LELAND,
STEWART B. MCKINNEY,
TOM BLILEY,
STAN PARRIS,
Managers on the Part of the House.

CHARLES MCC. MATHIAS, JR.,
WARREN B. RUDMAN,
TOM EAGLETON,
Managers on the Part of the Senate.

Mr. DELLUMS. Mr. Speaker, I call up the conference report on the Senate bill (S. 2457) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that the statement of the managers be read in lieu of the report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see prior proceedings of the House of today.)

Mr. DELLUMS (during the reading). Mr. Speaker, I ask unanimous consent that the statement be considered as read.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The gentleman from California (Mr. DELLUMS) is recognized for 30 minutes.

Mr. DELLUMS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conference committee on the bill S. 2457, a bill to increase the amount to be authorized to be appropriated as the annual Federal payment to the District of Columbia, has come to an agreement: That the House recede from its amendment.

The conference committee agreed to strike the provisions of the House amendment pursuant to an agreement between the District of Columbia and the District of Columbia Retirement Board. This agreement, which forms part of this conference report, includes a commitment on the part of the District to make up fiscal year 1981 and fiscal year 1982 shortfalls in payments to the District of Columbia Retirement Board over the fiscal year 1983-86 period. A total of $22.425 million is involved in the agreement.

This agreement addresses not only the fiscal year 1981 shortfall, the concern of the House amendment, but also includes the fiscal year 1982 shortfall and all relevant interest payments.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. DELLUMS. I yield to my distinguished colleague, the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. I thank the gentleman for yielding to me.

Mr. Speaker, I simply want to say to my colleagues that I would like to congratulate the Mayor and the Retirement Board for reaching a compromise essentially the equivalent of the action taken by overwhelming vote in the House previously.

I thank my chairman for his cooperation with regard to this legislation.

Mr. Speaker, I am delighted to report that in this conference report a great victory has been won for the District of Columbia police officers, firefighters, and teachers. Their retirement pensions, in jeopardy because of an unpaid District of Columbia government liability, are now more secure. As a result of passage of an amendment which I introduced on August 12 of this year the appropriate District of Columbia authorities have reviewed the existing problem which prior to congressional involvement had been inadequately addressed.

In a recent meeting with Mayor Marion Barry, the Disrict of Columbia Retirement Board worked out an agreement so that an existing 1981 pension fund deficit of $14.3 million be resolved. Negotiations between the Retirement Board and the District of Columbia administration have brought about a binding agreement amicable to all parties. That agreement has been signed by both the Mayor and the Chairman of the Retirement Board directing the District of Columbia government to pay principal and interest payments covering the $14.3 deficit and also enforcing additional payments to the board for shortages occurring in 1982.

I would like to bring to the attention of my colleagues certain terms of the agreement that provide that beginning in fiscal year 1983 the District of Columbia Retirement Board will be included in the budget review process of the District of Columbia; that every reasonable step will be taken to avoid shortfalls in the future; and that a formal process will be created to examine any possible shortfall that might occur in the future. I know this will be welcome news to my colleagues who overwhelmingly voted for my amendment in order to protect the future viability of retired firefighters, police officers, and teachers pension funds and to prevent a more serious financial crisis in the future by ultimately placing the burden on the American taxpayer.

I believe a number of positive, long-term solutions have been developed and I congratulate the District of Columbia Retirement Board and the District of Columbia on their resolution.

I hope my colleagues will support the conference report.

Mr. DELLUMS. I thank the gentleman from Virginia.

Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

WHITE HOUSE CONFERENCE ON PRODUCTIVITY

Mr. LAFALCE. Mr. Speaker, I ask unanimous consent that the Committee on Banking, Finance and Urban Affairs be discharged from further consideration of the bill (H.R. 7292) to establish a White House Conference on Productivity, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. BETHUNE. Mr. Speaker, reserving the right to object, I ask the gentleman to state the content of the bill that he would call up now.

I yield to the gentleman for that purpose.

Mr. LAFALCE. I thank the gentleman for yielding.

Mr. Speaker, earlier yesterday we had an attempt to bring up the De-

fense Production Act and there was one amendment to the Defense Production Act and that amendment would have created a White House Conference on Productivity. That passed the Senate. There was no objection to it in the House whatsoever. Everybody had signed off. OMB had signed off.

Because we had difficulties with the Defense Production Act, though, the primary dispute being whether it should be extended for 3 months or 9 months, and because we could not resolve that difficulty, the Defense Production Act expired yesterday, and it shall expire.

This does nothing at all with it. What I did was take the amendment that everybody had agreed upon in the Senate and in the House and also at OMB regarding the White House Conference on Productivity, and I am now calling that up as a separate bill.

In effect, what I am doing is calling up as a separate bill the amendment which everyone agreed to. It does nothing with the Defense Production Act. There is no money in this bill, either. Any money would either have to be appropriated or found by OMB.

Mr. BETHUNE. Mr. Speaker, I thank the gentleman for the explanation. He has worked hard on this measure and is to be complimented.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the bill, as follows:

H.R. 7292

WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SHORT TITLE

SEC. 101. This title may be cited as the "White House Conference on Productivity Act".

FINDINGS

SEC. 102. The Congress finds that—

(1) the United States traditional annual productivity improvement rate of approximately 3 per centum has fallen drastically in recent years to a negative one-half of 1 per centum;

(2) if our traditional productivity improvement rate has been maintained, the average household would have received nearly $5,500 in additional real income each year;

(3) the decline in productivity has inflated the cost of goods and services produced in the United States relative to the goods and services of nations with higher productivity rates;

(4) improved productivity will enhance our international competitiveness, which will expand foreign market opportunities and jobs;

(5) productivity improvement can be restored in the United States through the application of policies and management techniques which have brought substantial productivity gains on a broad scale in other countries and in some businesses within the United States;

(6) when adequate protections are provided, productivity improvement techniques can bring great benefits to labor as well as management; and

(7) the United States must act immediately to reverse our productivity decline and to restore our annual productivity improvement.

DEFINITIONS

SEC. 103. For purposes of this title—

(1) the term "conference" means the White House Conference on Productivity;

(2) the term "Director" means a Director of the White House Conference on Productivity who shall be appointed by the Secretary of Commerce and who shall be paid at the rate of basic pay provided for level V of the Executive Schedule pursuant to section 5316 of title 5, United States Code.

(3) the term "productivity" means output per paid employee hour of all employees in the private sector; and

(4) the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands.

ESTABLISHMENT AND DUTIES OF THE WHITE HOUSE CONFERENCE ON PRODUCTIVITY

SEC. 104. (a) The President shall conduct a White House Conference on Productivity (hereinafter referred to as the "Conference") not later than one year after the date of enactment of this title in order to develop recommendations to stimulate the Nation's productivity improvement rate.

(b) For the purpose of ascertaining facts and developing recommendations concerning the improvement of productivity, the Conference shall bring together individuals who are experts in the field of productivity, employees, and representatives of business, associations, labor organizations, academic institutions, and Federal, State, and local government.

(c) The Conference shall consider the following policy options with regard to their role in improving national productivity:

(1) reorganization of the Federal Government so that it can best promote productivity improvement in the private and public sectors;

(2) bringing to the attention of American businesses, labor organizations, and Government officials the benefits which result from implementing productivity improvement techniques;

(3) improving the general training and skill level of American labor;

(4) redirecting Government efforts to inform American businesses of foreign technological develoment;

(5) encouraging Government agencies to share with industry new discoveries and processes that improve productivity;

(6) establishing annual Presidential awards of recognition for those businesses and industries which accomplish outstanding improvement in productivity and establishing similar awards at the State and district levels;

(7) revising the tax laws to encourage companies to take actions to improve productivity;

(8) reviewing the effect of the antitrust laws on efforts to improve productivity;

(9) reviewing the patent laws to determine if changes are needed to encourage more productive use of American patents;

(10) improving the accuracy and reliability of data gathered by the Bureau of the Census and other Government statistical collection centers which measure American productivity; and

(11) revising Federal civil service laws to improve the productivity of Government workers and encouraging similar action at State and local levels.

REPORT OF THE CONFERENCE

SEC. 105. A final report of the Conference on Productivity shall be submitted to the President not later than one hundred and twenty days following the date on which the Conference is called and the findings and recommendations included therein shall be immediately made available to the public. The President shall, within one hundred and twenty days after submission of such final report, transmit to the Congress his recommendations for the administrative action and legislation necessary to implement recommendations contained in such report with which he concurs.

ADMINISTRATION

SEC. 106. (a) In administering this title, the Director shall—

(1) request the cooperation and assistance of the Office of Management and Budget and the Departments of Labor and the Treasury and such other Federal departments and agencies as may be appropriate in carrying out the provisions of this title;

(2) render all reasonable assistance, including financial assistance to groups and organizations which are conducting district, State, or regional productivity conferences in preparation for the Conference;

(3) prepare and make available background materials for the use of delegates to the Conference which are deemed necessary, and prepare and distribute any report of the Conference as may be necessary and appropriate;

(4) engage such additional personnel as may be necessary to carry out the provisions of this title without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates; and

(5) enter into contracts only to such extent and in such amounts as are provided in appropriation Acts, with organizations with particular expertise in productivity to conduct preparatory and followup work for the Conference.

(b) Personnel engaged under subsection (a)(4) shall be compensated at a rate not to exceed the rate equal to the maximum rate for GS-15 of the General Schedule under section 5332 of title 5, United States Code.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REQUEST FOR CONSIDERATION OF H.R. 6655, SMALL BUSINESS SALVAGE TIMBER SALES ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the bill (H.R. 6655) to require the Secretary of the Interior to offer to sell exclusively to small business concerns not less than 30 percent of the quantity of salvage timber which is harvested from land managed by the Bureau of Land Management and offered for sale in any fiscal year, and

for other purpose, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, we do not have anybody here from the Committee on Agriculture. We do not have any order here. We do not know what is going on here.

I yield to the gentleman from Ohio (Mr. SEIBERLING) to tell us what in heaven's name this is.

Mr. SEIBERLING. I thank the gentleman for yielding.

Mr. Speaker, this is a bill which has been reported out by the House Committee on Interior and Insular Affairs and released by the Committee on Agriculture.

I am informed by the gentleman from Oregon (Mr. WEAVER) who is the chairman of the subcommittee of the Committee on Agriculture, that there has been agreement on both sides of the aisle in the Committee on Agriculture. Otherwise, I would not be bringing it up.

Mr. FRENZEL. Further reserving the right to object, Mr. Speaker, I advise the gentleman that our side does not have a clearance on it. I would ask him to withdraw it.

Mr. WEAVER. Mr. Speaker, will the gentleman yield?

MR. FRENZEL. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Oregon.

Mr. WEAVER. I thank the gentleman for yielding.

Mr. Speaker, this has been agreed to unanimously by Congressman YOUNG of Alaska, Congressman MARLENEE of Montana, Congressman LUJAN of New Mexico, everyone, Congressman WAMPLER from the Committee on Agriculture. Everyone agrees to it.

Mr. FRENZEL. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

□ 2430

REQUEST FOR CONSIDERATION OF S. 1540, REVISING BOUNDARIES OF SARATOGA NATIONAL HISTORICAL PARK IN THE STATE OF NEW YORK

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the Senate bill (S. 1540) to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. WEAVER. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

REQUEST FOR CONSIDERATION OF H.R. 6882, REVISING BOUNDARIES OF CUMBERLAND ISLAND NATIONAL SEASHORE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 6882) to revise the boundaries of the Cumberland Island National Seashore and to provide compensation for certain facilities on the seashore, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, has this bill been reported from any known committee?

I yield to the gentleman.

Mr. SEIBERLING. It has been reported by the House Committee on Interior and Insular Affairs.

Mr. FRENZEL. May I further inquire as to whether that committee has ever passed a bill through here before under regular procedures?

Mr. SEIBERLING. Yes, we pass a lot of bills through here under regular procedures. We pass about 20 percent of the public bills passed in the House. However, this is a very minor bill. It is noncontroversial. It just seemed to me that this is an appropriate time to take it up.

Mr. FRENZEL. Mr. Speaker, reserving the right to object, I am advised that there is an objection, and I do object.

The SPEAKER. Objection is heard.

DEFERRALS OF FISCAL YEAR 1983 FUNDS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. 97-245)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

(For message, see proceedings of the Senate of today, October 1, 1982.)

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON VETERANS' AFFAIRS

The SPEAKER laid before the House the following communication from the chairman of the Committee on Veterans' Affairs, which was referred to the Committee on Appropriations:

COMMITTEE ON VETERANS' AFFAIRS,
Washington, D.C., September 28, 1982.

Hon. THOMAS P. O'NEILL,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On May 12, 1982, I forwarded to you the major construction resolution of the Committee on Veterans' Affairs for Fiscal Year 1983. This resolution is required by Section 5004, Title 38, United States Code.

The Administrator of Veterans' Affairs has recently advised the Committee of an additional major construction project for Fiscal Year 1983 at the VA Medical Center, Murfreesboro, Tennessee. The Administration has also requested that we add it to our previously adopted construction resolution.

In accordance with this request and pursuant to Section 5004, Title 38, United States Code, I transmitted the prospectus and cost estimate to the Members of the Committee on September 22, 1982. The majority of the Committee Members have approved the addition of this major construction project to the May 12, 1982 resolution transmitted to you. There is, therefore, attached a copy of the resolution of the Committee on Veterans' Affairs, the estimated cost by fiscal year, and the project prospectus.

Sincerely,
G.V. (SONNY) MONTGOMERY,
Chairman.

REQUEST FOR CONSIDERATION OF H.R. 6655, SMALL BUSINESS SALVAGE TIMBER SALES ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I again ask unanimous consent that the Committee on Agriculture be discharged from further consideration of the bill (H.R. 6655) to require the Secretary of the Interior to offer to sell exclusively to small business concerns not less than 30 percent of the quantity of salvage timber which is harvested from land managed by the Bureau of Land Mangement and offered for sale in any fiscal year, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. HARTNETT. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House with amendments to a bill of the Senate of the following title:

S. 625. An act to revise the boundary of Voyageurs National Park in the State of Minnesota, and for other purposes.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 3787. An act to amend sections 10 and 11 of the Act of October 21, 1970 (Public Law 91-479; 16 U.S.C. 460x), entitled "An Act to establish in the State of Michigan the Sleeping Bear Dunes National Lakeshore, and for other purposes";

H.R. 5238. An act to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes; and

H.R. 6758. An act to authorize the sale of defense articles, defense sevices, and unclassified defense service publications to U.S. companies for incorporation into end items to be sold to friendly foreign countries.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 5238) entitled "An act to amend the Federal Food, Drug, and Cosmetic Act to facilitate the development of drugs for rare diseases and conditions, and for other purposes," disagreed to by the House; requests a conference with the House on the disagreeing votes of the two Houses thereon; and appoints Mr. HATCH, Mr. QUAYLE, Mrs. HAWKINS, Mr. KENNEDY, and Mr. METZENBAUM to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 675. An act to establish a Federal Jurisdiction Review and Revision Commission;

S. 596. An act for the relief of Dennis L. Dalton and James Edward Dalton;

S. 1444. An act to authorize the Administrator of General Services to donate to State and local governments certain Federal personal property loaned to them for civil defense use, and for other purposes.

S. 2580. An act to establish the Christopher Columbus Quincentenary Jubilee Commission.

S. 3037. An act to amend the Bankruptcy laws regarding farm produce storage facilities, and for other purposes;

S.J. Res. 246. Joint resolution to authorize and request the President of the United States to issue a proclamation designating the week of October 3, 1982, through October 9, 1982, as "National Port Week"; and

S.J. Res. 249. Joint resolution to provide for the designation of the month of October 1982, as "National Spinal Cord Injury Month."

□ 0040

LEGISLATION ESTABLISHING COMMISSION TO ASSESS NATION'S PUBLIC FACILITIES

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. CLAUSEN) is recognized for 60 minutes.

● Mr. CLAUSEN. Mr. Speaker, next week we will be returning to our districts to exchange ideas with the people who elected us. They will be evaluating our contribution during this past Congress and helping us to establish national priorities for the future.

According to most polls the main issue on the minds of the American public today is the national economy. And their concern is justified, the basic facilities that underpin our economy are crumbling. Years of deferring the maintenance of vital public facilities—highways, bridges, ports, water, and sewer facilities and public transportation systems—have caught up with us.

One quarter of the Interstate Highway System is worn out and needs resurfacing. One-half of Conrail's rails and roadbeds are seriously decayed. Half of all American communities cannot expand because their water treatment systems are at or near capacity. One-fifth of the Nation's bridges are so dangerously deficient they are either restricted or closed.

Unless we squarely face these critical needs, national economic recovery which is still in its infancy, will be crippled. Right now between one-half and two-thirds of this Nation's communities cannot support modernized development because they lack the basic facilities necessary for growth.

Cover stories in such major news magazines as Newsweek and U.S. News & World Report are focusing on the "Decaying of America." (Newsweek, August 2, 1982) We owe it to our constituents to heed this warning and act in their behalf to stop the corrosion of America's potential for economic development.

The ultimate solution lies in shifting Federal spending away from counterproductive giveaway programs and toward job-creating programs which will rebuild America's deteriorating infrastructure. In order for the legislative changes of the magnitude necessary for such a policy shift to occur a series of well-coordinated and carefully planned interim measures must be enacted.

The first step is to take stock of our public facilities; next we must assess their condition. Finally, we must provide the local communities with information on what sort of Federal assistance and what level of Federal assistance they can expect, so that they can best use the resources at their disposal.

I am introducing legislation today which establishes a commission to inventory and assess our Nation's water and sewer systems, bridges, highways, and roads, public transit systems, airports and port facilities. With this information the Commission will prepare a plan for restoring the Nation's public facilities, including recommendations as to specific revisions in Federal laws, regulations, and policies to reverse the current pattern of disinvestment.

The Commission would have 2 years and a budget of $5 million, drawn from existing appropriations, to complete its work. No new spending would be required and no increase in the level of total Federal employment is permitted. Within 180 days of the submission of the Commission's recommendations, the Senate Environment and Public Works Committee and House Public Works and Transportation Committee must hold hearings and report legislative proposals to both bodies.

The concept of capital budgeting, which will be considered by the Commission, offers one possible approach to addressing the need for increased capital investment.

Recently the Committee on Public Works and Transportation held 4 days of hearings on the Federal Capital Investment Budget Act, H.R. 6591. During the course of those hearings strong support for some type of national capital budgeting was voiced by representatives of the business community as well as local, State, and Federal officials.

It has always been my strong belief that the local communities can best establish their own priorities and make their own decisions. For this reason I have grave reservations regarding the establishment of National priorities which could be construed as license for the Federal Government to dicate local policies. This aspect of the capital budget concept needs to be carefully considered and modified to assure that no erosion of local decision making could result from enactment of this legislation.

I have cosponsored H.R. 6591 with the intention of participating in the revision process which will take place as the Public Works and Transportation Committee, on which I serve as ranking Republican, further considers this legislation during the next Congress.

Because of the complexity and seriousness of the problem of deteriorating public facilities, the Public Works and Transportation Committee must carefully consider every possible approach to revitalize the Nation's capital investments. It has long been my feeling that this committee has the capacity to coordinate the various infrastructure components to form a cohesive and balanced approach to national economic development through a carefully coordinated plan of action that involves all the partners of our Federal system.

Concepts contained within the two bills I have referred to today, particularly the inventory and assessment of public facilities, when refined, can serve as a good first step in the development of a well-planned and well-coordinated approach to the task of building and rehabilitating our Nation's capacity to support a healthy, growing economy.●

PRODUCTS LIABILITY ACT OF 1982

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. SHUMWAY) is recognized for 30 minutes.

● Mr. SHUMWAY. Mr. Speaker, product liability is rapidly becoming a problem of acute concern to our Nation's businesses and the consuming public. Consider several cases.

For example, a man, while drunk on wine, raped his neighbor for which he was sentenced to 10 years in prison. The man's wife unsuccessfully sued the wine manufacturer, wholesaler, and retailer, seeking to recover $150,000 in compensatory damages and $10,000,000 in punitive damages. She had claimed that the wine had a deceptively sweet taste providing a false sense of sobriety, and accounted for the personality changes in her husband.

Or the case of the 16 year old who sued his school district for $500,000 incompensatory damages when hit in the eye by a circular cookie thrown in a school cafeteria. His three-count suit included a claim that by selling the cookie—which could be thrown in a manner similar to a discus and with great force and velocity—the school district had negligently sold hazardous materials. This count was dismissed at the preliminary stages, despite the cookie's aerodynamic properties.

Outrageous cases like these abound throughout the courts. While in most of these cases defendants ultimately prevail, it is only after spending countless hours of wasted time, and incurring substantial legal costs.

Moreover, in a few cases, plaintiff-lawyers have succeeded in arguing propositions that defy all notions of commonsense and fairness. For example, the highest court of New Jersey determined that a manufacturer may be liable because it failed to warn product users of a potential harm, notwithstanding the scientific impossibility of knowing that the product could cause that harm. Similarly, courts in several States have held that a manufacturer may be liable for injuries caused by a product despite the lack of proof that it actually made the product.

The defendants—virtually all of whom made or sold their products for profit—pass costs of defending these suits, the costs of product liability insurance, and costs of any claims and/or settlements paid out of pocket on to all of us as consumers. Thus, each of us is paying the price for the excesses currently prevailing in our product liability tort system.

But not all costs can be passed on. As a result, the law in its present form unreasonably threatens the continued existence of many manufacturers. Moreover, it places American businesses at a competitive disadvantage with foreign competitors who are not faced with the burdens of excessive product-liability exposure in their home markets. If unabated, product liability may potentially jeopardize the viability of a major portion of the American manufacturing community.

Mr. Speaker, it was to correct this increasingly pressing problem that, last December, I introduced H.R. 5214, the Products Liability Act of 1982. This bill would provide federally preemptive product liability rules that make sense, in place of the chaos that now exists. H.R. 5214 was drafted in large part by one of America's leading product liability experts, Prof. David Owen, from the University of South Carolina Law School.

While H.R. 5214 as written has sustantial support, I nonetheless believed that input into this remedial legislation should not be confined to the ivory towers of academia; rather, input from the constituencies most affected is necessary. Therefore, I requested one of the bill's principal proponents, the Coalition for Uniform Product Liability Law, to review the legislative proposal and to make recommendations to me on how it might be improved. The Coalition for Uniform Product Liability Law is an ad hoc group of almost 120 manufacturing companies.

In response, the coalition established a Technical Advisory Committee consisting of more than a dozen of its members. Over recent months, this committee has met five times and engaged in substantial correspondence and debate, wherein it carefully debated and reviewed the bill line by line. The Technical Advisory Committee included manufacturers of capital and consumer goods spanning the spectrum of manufacturing endeavors. As a result each of its members was able to bring to bear its unique perspectives in arriving at the committee's recommendations.

The resulting recommendations—which are reflected in the bill I am introducing today together with Messrs. BLILEY, GRAMM, FRENZEL, LAGOMARSINO, and PORTER—do not change the essential substance of H.R. 5214; nonetheless, while perhaps technical, these revisions substantially improve the earlier proposal.

I am thus delighted to reintroduce the Product Liability Act of 1982 with these technical amendments and request that a section-by-section analysis be printed at the conclusion of my remarks.

I would like to take a few moments to review several significant developments that have occurred since I introduced H.R. 5214 last December.

First and foremost, President Reagan has stated once and for all that his administration supports the adoption of a Federal product liability law. This welcome development signals the Reagan administration's recognition that the uncertainty and inequity in the existing product liability legal system are problems of acute concern to the American business community, and especially the small business sector.

The President's decision did not extend to specific support for any of the various approaches now pending in the House or in the other body. The determination of acceptable approaches was left to the Departments concerned.

Since that time, the Cabinet Council on Commerce and Trade, charged by the President with responsibility for the executive branch's review of product liability tort legislation, was requested to review S. 2631, the Product Liability Act—with revisions suggested by staff—now pending in the other body. In many respects, the Senate bill is similar to H.R. 5214, and that which I am introducing today.

On behalf of the Cabinet Council, the Secretary of Commerce stated with regard to S. 2631:

> On the whole, the draft thoroughly and equitably balances the rights and obligations of all interested parties and should contribute significantly to ending the product liability crisis currently facing so many companies. By establishing clear and uniform standards of responsibility and by placing liability on the party best able to protect against the harm, it shoud increase predictability, insure that injured persons receive fair compensation, promote safety and reduce transaction costs.

Nonetheless, the Cabinet Council "did identify a number of areas * * * which the administration believes should be clarified, modified, or deleted"; however, the Secretary of Commerce did not go into the particulars.

I too believe that clarification and modification of some of the approaches taken in S. 2631 are warranted and appropriate. These include the significance of Government regulatory standards and Government contract specifications; the statute of repose; punitive damages; and the proper anti-Sindell rule.

Mr. Speaker, if we are to fashion an appropriate solution to the complex product-liability problems which we are now facing, it must be done in the eye of the public, and it must provide both Members of Congress and their constituencies with an opportunity to provide input into the decisionmakeing.

I offer my bill today as such an attempt, which itself reflects input from the constitutents of many of the Members of this body.

I urge the support or my colleagues, and would in particular like to encourage Chairman WAXMAN of the House Energy and Commerce Subcommittee on Health and the Environment, which has juicadiction over product liability, to hold hearings early next session.

SECTION-BY-SECTION SUMMARY OF H.R. 5214 AS PROPOSED TO BE AMENDED

SECTION 1

The title of the Act is the "Products Liability Act of 1982."

Proposed amendments

The title has been restyled "Product Liability Act of 1982."

SECTION 2

This section provides findings and purposes underlying the need for this legislation.

Proposed amendments

These amendments would delete matter which was either difficult to substantiate empirically or which placed an undue emphasis on the insurance aspects of the problem.

Additionally, the purposes of the Act would be amended to include the equitable allocation of responsibility for harm among those responsible.

SECTION 3

This section defines certain terms used throughout the Act.

Subsection (1) defines "commerce" to comply with the Commerce Clause of the Constitution.

Subsection (2) defines "State" to include all possessions, territories of the United States.

Subsection (3) defines "person" very broadly (*e.g.*, individuals, corporations, partnerships) and includes any Federal, State or local governmental entity.

Subsection (4) defines "product" to mean any "object capable of delivery" including components. This definition expressly excludes human tissue, organs, or blood and its components.

Subsection (5) defines a "products liability action" to mean any claim or action brought by a claimant against a product seller for harm caused by a product. This expression is defined to include actions previously based on strict liability in tort, negligence, breach of warranty, misrepresentation, concealment, or nondisclosure (whether intentional, neglient or innocent), manufacturer's liability, products liability, or otherwise.

Subsection (6) defines "claimant" to include persons harmed and their legal representatives.

Subsection (7) defines "harm" to include damage to property (other than product itself), personal physical injuries (including death), and pain or mental harm resulting from personal physical injuries. It expressly excludes commercial loss.

Subsection (8) defines "manufacturer" to include any wholesaler, distributor or retailer who "plays a significant role" in designing, producing, making, assembling, fabricating, constructing, altering, modifying, or remanufacturing the aspect of the product which injures claimant. The definition of "manufacturer" excludes one who merely distributes a product, and who also assembles, services, or otherwise prepares the product as authorized by the person who manufactured it.

Subsection (9) defines "product seller" in broad terms. However, it excludes sellers of realty (except if the person is engaged in the mass production and sale of standarized dwellings), providers of professional services, and persons acting only in a financial capacity who are not manufacturers, wholesalers, distributors or retailers.

Subsection (10) defines "representation" to mean explicit statements, affirmations, promises or descriptions.

Subsection (11) defines "feasible" as practicable within available technical and scientific knowledge which has been adequately demonstrated and economically feasible, at the time of manufacture.

Subsection (12) defines "preponderance of the evidence" to require proof establishing that it is more probable than not that a fact occurred.

Subsection (13) defines "clear and convincing evidence" to require proof to produce a firm conviction as to the allegations sought to be established. This provision provides that the requisite proof is greater than that required by preponderance of the evidence, but is less than that required for proof beyond a reasonable doubt.

Proposed amendments

These amendments add two definitions. Subsection (14) defines the expression "unreasonable dangerous" to mean an unacceptable likelihood of causing harm; and subsection (15) defines the terms "know," "knowledge," and "notice," for persons other than individuals to mean that a natural person in a position to assess the significance of the information and to act on it was aware of the information. Other amendments technically clarify existing provisions.

SECTION 4

This section provides for the Act's preemption of state law and clarifies that Federal jurisdiction is not created.

Subsection (a) provides that the Act supersedes Federal and State law to the extent such law is inconsistent with Act.

Subsection (b) provides that the Act does not create a new Federal cause of action nor vest subject matter jurisdiction in any Federal district court where it does not already exist.

Proposed amendments

No susbstantive changes.

SECTION 5

This section provides for standards of responsibility for manufacturers.

Subsection (a) provides that for liability to obtain against a manufacturer, the claimant must prove by a preponderance of the evidence one of the following:

1. the product was unreasonably dangerous in construction;

2. the product was unreasonably dangerous in design;

3. the product was unreasonably dangerous because of a failure to provide adequate warnings, or instructions; or

4. the product was unreasonably dangerous because it did not conform to manufacturer's representation.

The subsequent subsections provide the principles to be used to determine whether a product was unreasonably dangerous. Additionally, claimant must prove that the unreasonably dangerous aspect of the product was the proximate cause of harm; and that the defendant manufactured the product. This subsection also provides that generally, any matter that must be established cannot be proved by showing the outcome of a previous lawsuit.

Subsection (b) provides that for a product to be unreasonably dangerous in construction, it must be shown to deviate from the manufacturer's design or performance standards or from otherwise identical units.

Subsection (c) provides that for a product to be unreasonably dangerous in design, it must be shown that an alternative design was available, which on balance would have been "better" than the chosen design (defined to mean safer, both as to the alleged hazard and as to overall safety; neither more expensive nor less useful or desirable unless warranted by the added safety benefits; and not in violation of statutes, regulations, or mandatory safety standards), and which would have been capable of preventing claimant's harm.

Subsection (d) provides that for a product to be unreasonably dangerous because of a failure to provide adequate warnings or instructions, it must be shown that danger or safety information was available to the manufacturer; was "reasonably necessary" (which is defined to refer to information concerning significant dangers which would be useful to persons likely to use the product other than information with respect to obvious or known dangers; trivial dangers; uses other than those that would be reasonably expected of an ordinary person; or uses associated with alterations or modifications that would not be expected of an ordinary person); or was not effectively provided to an "appropriate person" (defined to mean the product user, if feasible; a person reasonably expected to pass them on to the product user; in the case of certain products, an expert licensed to use them; in the case of products used in a work place, the employer or person having custody of the product; in the case of components, raw materials or bulk products, the manufacturer's immediate vendee); and if provided, the warnings would have prevented the claimant's harm.

Subsection (e) provides that for a product to be unreasonably dangerous because it did not conform to the manufacturer's representation, it must be shown that claimant relied on an untrue representation. Negligence or fraud need not be shown.

Proposed amendments

Subsection (a). These amendments add a provision, similar to that contained in the Kasten bill, requiring that expert scientific or technical testimony be corroborated by substantial objective evidence. The amendment also makes technical changes regarding limitations on the use of the doctrine of collateral estoppel.

Subsection (b). These amendments would require that, as a condition to establishing liability for a construction defect, the claimant also must prove that the deviation (from specifications, performance standards, or otherwise identical units of the manufacturer's same product line) created an unreasonable risk of harm.

Subsection (c). These amendments would provide that a manufacturer is not liable for an aspect of the product which is not feasible of being made safe without materially impairing the product's usefulness. Also, they clarify that a manufacturer should not be liable for an alteration or a modification which it could not reasonably prevent or control.

Subsection (d). These amendments clarify that the manufacturer's duty to warn or instruct pertains only to dangers which it knew, or, which based on substantial support in a scientific, technical or medical community, it should have known. Also, they would clarify that warnings or instructions are reasonably necessary only if they are useful in preventing injury of the type suffered by claimant. And finally, they include language adapted from the Kasten bill regarding the person to whom warnings must be provided if involving a product that can only be used by a class of supervising

experts. This last feature requires only that the manufacturers use a means "reasonably calculated to make the warnings or instructions available", rather than actual, personal notice to the expert.

Subsection (e). These amendments clarifying that for liability to ensue under this subsection, the representations must relate to some characteristic of the product or a lack thereof which would have prevented or significantly reduced the risk of claimant's injury.

SECTION 6

This section provides for standards of responsibility for product sellers other than manufacturers.

Subsection (a) provides that a product seller may be liable only if preponderance of evidence shows that the product was the proximate cause of the claimant's harm, and that the product seller failed to use reasonable care with respect the product. However, for liability to obtain, the product seller must have known of the danger that harmed claimant or have had reason and an opportunity to inspect the product, which inspection would have revealed the danger.

Subsection (b) provides that a product seller may be liable for its own representations if it is shown that claimant relied on an untrue representation.

Subsection (c) provides that a product seller will be strictly liable for defects arising in the product while under its control or under the control of a prior product seller other than a manufacturer.

Subsection (d) provides that a product seller may be liable if the manufacturer cannot be located or is probably not subject to process, or if the court determines that a judgment against the manufacturer will probably be unenforceable.

Subsection (e) provides that generally, any matter that must be established cannot be proved by showing the outcome of a previous lawsuit.

Proposed amendments

These amendments would include "anti-*Sindell*" language and a requirement that expert scientific or technical testimony be corroborated. Both of these provisions correspond to the treatment provided under Section 5.

Also, the amended bill deletes subsection (c).

SECTION 7

This section provides the effect of government standards and contract specifications on liability.

Paragraph (1) of subsection (a) provides that if a product seller did not comply with mandatory state or federal government standards, the product will be considered unreasonably dangerous unless it is proved by clear and convincing evidence that such failure was reasonably prudent conduct under the circumstances.

Paragraph (2) of subsection (a) provides that if a product seller proves compliance with mandatory state or federal government standards, the product will not be considered unreasonably dangerous unless the claimant proves by clear and convincing evidence that such standards were unsound.

Paragraph (1) of subsection (b) provides that if a product seller proves compliance with mandatory government contract specifications, the product shall not be deemed unreasonably dangerous; and paragraph (2) of this subsection provides that if claimant proves lack of compliance with such standards, the product shall be deemed unreasonably dangerous.

Subsection (c) provides that the principles set out in subparagraphs (a) and (b) are applicable to failures to warn or instruct.

If under this section a product is determined to be unreasonably dangerous, liability of the product seller will not ensue unless claimant established that the product was the proximate cause of the harm, and, in the case of a manufacturer, that it manufactured the product.

Proposed amendments

These amendments limit the application of this section to mandatory federal safety standards, rather than mandatory federal or state safety standards as had previously been the case.

Additionally, since non-compliance with a government contract specification does not necessarily indicate that the product was defective, the amendments delete paragraph (1) of subsection (b).

Finally, the amendments add language to paragraph (2) of subsection (b) which parallels that contained in the second Kasten draft. This excludes products that are manufactured commercially from the ameliorative provisions of compliance with government contracts specifications.

SECTION 8

This section provides that evidence of actions taken after the date of manufacture are not admissible as evidence, except to impeach a witness who denies the feasibility of precautionary measures.

Proposed amendments

This Section would be technically rewritten so as not to preclude a manufacturer from introducing evidence of precautionary measures it may have taken.

SECTION 9

This section provides principles of comparative responsibility in the apportionment of damages. The trier of fact determines the total amount of damages claimant has sustained, and apportions this amount among all persons responsible (including claimant and non-parties). A *de minimis* rule excepts persons with trivial responsibility from apportionment.

This section also provides a special rule where workers' compensation is involved: In such case, the total damages to be apportioned are reduced by the greater of

(1) the employer's or co-employee's responsibility; or

(2) the amount of workers' compensation benefits.

Judgment is to be entered severally against all parties liable; upon subsequent motion of claimant, uncollected obligations may be reallocated among joint tortfeasors.

Proposed amendments

These amendments would clarify that the concept of comparative responsibility applies only to compensatory damages; it does not apply in the case of punitive damages.

Additionally, the amendments add a provision which sets forth the conduct to be taken into account in making determinations of comparative responsibility. Such conduct would include misuse of a product, alteration or modification of a product, improper maintenance of a product, and use of a worn out product. Each of these terms has been defined.

Finally, these amendments clarify the circumstances under which co-defendants could be jointly liable and severally liable. It accords with the current treatment provided under *Restatement (Second) of Torts.*

SECTION 10

This section provides the effect of workers' compensation benefits on liability. Damages otherwise recoverable in a products liability action are to be reduced by workers' compensation benefits. No subrogation, indemnity, contribution or lien may be had by an employer or its insurer against a product seller absent an agreement to the contrary. This section also contains a provision for adjusting damages where a products liability action is decided prior to adjudication of a workers' compensation claim.

Finally, no third-party action over against an employer is permitted. However, the employer's (or co-employer's responsibility will reduce the overall damage award in accordance with section 9.

Proposed amendments

These amendments would clarify the validity of contractual agreements whereby an employer agrees to indemnify or hold harmless a manufacturer for liability.

Additionally, the amendments add a provision contained in the Kasten bill which forecloses product liability suits against employers on a theory of dual capacity.

SECTION 11

This section provides rules concerning punitive damages. After a determination of the product seller's liability for actual damages and the amount thereof, on motion, the court may determine whether punitive damages should be awarded, and the amount thereof. Punitive damages shall be awarded only if a product seller acted with a flagrant indifference to consumer safety and if its actions were an extreme departure from accepted practice. In determining punitive damages, the court shall consider the likelihood that serious harm would arise; the extent of the product seller's awareness of such likelihood; the profitability of the misconduct; the duration of the misconduct and any concealment thereof; the attitude and conduct of the product seller's officers upon discovery of the misconduct; the financial condition of the product sellers; the total effect of other punishment imposed on the product seller; and whether claimant acted in reckless disregard of his own safety.

Punitive damages for any one claimant shall not exceed twice the amount of actual damages and in no event shall exceed $1 million. With respect to all claimants, punitive damages and prior fines shall not exceed 5% of net worth. Notwithstanding this aggregate limitation, a claimant shall always be able to recover the lesser of twice compensatory damages or his litigation expenses including reasonable attorneys fees.

Proposed amendments

The bill has been technically amended to adapt from the Kasten bill language indicating the circumstances under which a product seller manifested a "flagrant indifference" to the safety of persons harmed.

Additionally, the amendments clarify how the limitation on punitive damages would apply to a "single" claimant in cases of derivative claims and class actions.

Finally, the amendments remove the exception to the aggregate limitation on liability.

SECTION 12

This section provides limitations concerning the time in which an action must be brought.

Subsection (a) provides that a claim must be brought within three years of the time it

was discovered or should have been discovered.

Subsections (b) to (d) provide a further limitation on the rule in subsection (a). All actions must be commenced within 10 years from the date the product was first sold. However, in the event that the manifestation of the harm is delayed, or in the event of intentional misrepresentation by a product seller, the action may be commenced within 15 years from the date of first sale. These time limitations may be extended by a product seller in writing.

Proposed amendments

The time of limitation in Subsection (a) has been reduced from three years to two years to comport with the Kasten bill.

SECTION 13

This section provides that if any provision of the Act is determined to be invalid, the remaining provisions of the Act shall be unaffected.

Proposed amendments

No change.

SECTION 14

This section provides that the Act shall be effective for actions commenced on or after January 1, 1983.

Proposed amendments

These amendments add language from the Kasten bill which would make the Act effective 60 days after enactment, and applicable to all product liability actions commenced on or after that date. However, if any provision of the Act would shorten the time during which any person now has to bring an action, such person would be able to commence an action within one year from the effective date.●

WHAT THE FED HAS DONE WRONG

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 60 minutes.

● Mr. KEMP. Mr. Speaker, in October 1979, the Federal Reserve Board began a radical experiment in directly regulating the money supply. This is the first time in our history this policy has been attempted, and we have had a series of credit crunches, sky-high interest rates and, for the first time in the history of the business cycle, two back-to-back recessions in 1980–81.

In 1980, President Carter increased taxes, increased Government spending, and increased Government regulations. In 1981, President Reagan decreased taxes, spending, and regulations—yet both years we had credit crunches and double-digit interest rate recessions.

We have to look for a constant in the two approches to economic policy and that constant can be found in the monetarist experiment being pursued by the Fed.

The main thing to realize is that there is nothing that arcane or bewildering about what the Fed is doing to the U.S. dollar or economy. The monetarist experiment is simply an extreme attempt at Government regulation.

The Fed's Governors are trying on a week-to-week and month-to-month basis to determine how much money each individual American needs in his or her pocket to conduct normal business transactions. Of course, no one can really do this because no one can control the demand for money in the marketplace.

What they are doing, however, is crunching down on the money supply when they deem it too loose, and gunning the money supply when they deem it too tight. The result? Gyrating interest rates, alternating inflation, deflation, and contraction. In fact, the worst bankruptcy rates since the Great Depression, with tragically high unemployment and rapidly expanding deficits.

It is hard to see how anyone can say this policy is working. It has been a failure, and it is time to put monetarism in the museum, once and for all.

It is no great leap forward to propose a reform of our monetary system with a price rule target. Throughout our history we have conducted monetary policy, with brief exceptions during the Revolutionary and Civil Wars, by working to stabilize the value of the dollar. Not until the 1970's did we abandon a price rule policy and begin conducting monetary policy by Government fiat.

As difficult as it is to believe, this has historically been the goal of monetary policy—to maintain the value of the dollar so it can serve as a stable store of value and a reliable medium of exchange or unit of account.

Instead of having the philosopher-kings at the Fed and the Treasury guessing at the desired future supply of money and letting interest rates rise to infinity, we should let the market itself find the equilibrium between the supply of money and the demand for it. We should institutionalize a price rule which will lower interest rates and help get our economy moving again.

The marketplace itself will signal the Fed, through movement up or down in the price index, such as the spot commodity index, whether too much or too little money is being created. If the Fed is inflating then the index will rise, signaling too much money is being created. If the Fed is deflating then the index will fall, signaling that the marketplace demands more liquidity to conduct normal business transactions.

Under the Balanced Monetary Policy and Price Stability Act, the Fed will use its normal operating procedures to stabilize the value of the dollar and maintain real interest rates at normal historical levels—about 1 to 4 percent.

The present monetarist policies are wreaking havoc with the greatest economy in history. And the Carter experiment is rapidly becoming a threat to the Reagan-Republican reforms for economic renewal. We have the responsibility to work for a modest yet dramatic change in Fed policy, and the Balanced Monetary Policy and Price Stability Act is a bold initiative to open up the flow of credit and capital at the financial desert which is todays economy and once again maintain the value of the dollar while bringing down interest rates.

The private sector demand for sound, honest money, lower interest rates, and more jobs will not be denied, and we had better start moving before it is too late. At this point in the RECORD I include the following:

ANSWERS TO OBJECTIONS AGAINST ABANDONING MONETARISM

The Balanced Monetary Policy and Price Stability Act (HR7218) has that title for two good reasons. First, instead of the current practice of targeting of the money supply at any cost, the bill directs the Fed to take a more balanced approach in recognizing what goes on in the real world; specifically, the Fed would be concerned with achieving historical levels of real (inflation-adjusted) interest rates, economic growth, stable prices, and stable foreign exchange rates. Second, the "Price Stability" aspect comes from the fact that the bill establishes price stability as the overriding objective of monetary policy.

A number of objections have been raised to bills on monetary policy, which would also involve targeting interest rates, introduced in the Senate by Senator Byrd and in the House by Congressman Wright. The Balanced Monetary Policy and Price Stability Act avoids these problems because it differs from the other bills in at least two important respects. First, instead of directing the Federal Reserve to target short-term real interest rates (as the Byrd bill does)—something which the Fed has said it would find difficult to define, let alone target—HR7218 directs the Fed to do what it already does: target a monthly range of short-term market interest rates, such as the important Federal Funds rate. Second, unlike the other bills, HR7218 instructs the Fed that in setting these targets, price stability will take precedence (as measured by some index of prices, such as a commodity price index).

Informational note: What kind of price index could the Fed use? It would have to be fairly sensitive, quickly available, yet reasonably stable in the long run. The CPI and GNP deflator are comprehensive, but often respond to policy with a considerable lag, and are reported some time after the fact; so they can only be considered general guides. A number of useful indexes are possible. The Bureau of Labor Statistics (BLS) spot commodity index is an index containing 22 basic commodities; it was for years maintained by the BLS, but is now gathered by the Commodity Research Bureau, an independent research organization based in New York. In addition, the CRB still maintains a current index of commodity futures prices, based on 27 commodities. Besides this, there is the Dow Jones commodity price index, which is available daily, although it contains some volatile food items. Other possibilities include the index of industrial commodities used by the BLS in computing producer prices, or precious metals, or even a new index could be devised.

The following comments are from objections which have actually been raised against the Byrd and Wright bills, and which may be raised against HR 7218. Answers are provided.

1. "Real interest rates are not clearly identifiable; they can only be measured against the expectations of the public about inflation over the period ahead, and those expectations are neither directly measurable nor stable. Even in the past various inflation measures differ."

Answer: This objection is partly satisfied by the fact that HR 7218 directs the Fed to target nominal rather than real interest rates—which are something the Fed can control with reasonable success. One way to measuring real interest rates is to subtract the change in the GNP deflator from the current Federal funds rate. In any event, HR 7218 directs the Fed to consider other goals besides historical levels of real interest rates: sustained economic growth, stable prices and stable exchange rates. The Fed would not have to slavishly follow some arbitrary measure of real interest rates from month to month. Instead, it could view the goal of achieving historical levels of real interest rates over the course of a year—subject, of course, to the goal of price stability.

2. "Passage of the bill will fuel inflationary expectations. A requirement that the Federal Reserve set explicit interest rate targets is bound to be interpreted as an effort to speed up money growth in the face of large budget deficits."

Answer: The Fed already sets monthly targets for short-term interest rates: The Federal Open Market Committee sets a monthly range for the Federal fund{ rate. Also, the targets would not be cast in concrete; they could be changed from month to month to be consistent with the goals outlined above. So, there would be no real change in the Fed's operating tools; the change would be in the targets of monetary policy, from the quantity of money to the state of the economy. Most important, the requirement of price stability would prevent the Fed from monetizing deficits in an inflationary manner. Commodity prices (for example) cannot remain stable while the central bank is causing inflation.

3. "Interest rate targets are bound to conflict at times with money targets, leading to more confusion and uncertainty, not less."

Answer: While the bill permits the Fed to continue publishing targets for the quantity of money, these targets would have to be consistent with the other objectives. In the event of a conflict, it is clear that the monetary aggregates should give way to a targeting procedure involving economic and price stability.

4. " 'Targeting' interest rates could lead directly to 'pegging' interest rates and result in inappropriate changes in the supply of money and credit."

Answer: Once again, there are two safeguards against this. First, interest rates are not "pegged" forever; they would be set on a monthly basis, as they are now. Second, the interest rate targets would be subject to the overriding goal of stable prices, as measured by an index of current prices.

"The bill would expose the Federal Reserve to greater political pressure and erode its independence—and its credibility."

Answer: The bill does not alter the independence of the Fed, which is in any event a creature of Congress. On the contrary, by officially endorsing the overall goal of price stability—a stable value for the currency—as its ultimate objective, the bill fortifies the Fed against attack from reflationists. For example, it removes the potential threat which exists in the Byrd and Wright bills, that interest rates might be lowered at the expense of higher inflation.

[From the Wall Street Journal, Oct. 1, 1982]

LET THE SUN SHINE

Congress is starting to peer into the deep shadows of monetary policy. Senate Minority Leader Byrd has a bill directing the Federal Reserve to target the real rate of interest. Our contributor Paul McCraken calls this the "Joshua complex"—a proposal to order the sun to stand still.

This week Representatives Jack Kemp and Trent Lott came forth with a Republican alternative. Those untutored in monetary policy, which is to say nearly everyone in the capital, are running aroung saying the Republican bill is the same as the Byrd bill, except that if the goal of lower interest rates conflicts with price stability the latter should take precedence. And except for the shining sun, day is the same as night.

Any congressional proposal on monetary policy will of course cause loud grumbling at the Fed, and there is indeed much to be said for an independent central bank. But the basic thrust of the Kemp-Lott bill is sensible and moderate: We want the Fed to bring us all sorts of goodies: low inflation, high employment, low interest rates, stable exchange rates, moderate growth in the monetary aggregates and so on. But if forced to choose among all these good things, the Fed should but the emphasis on price stability.

The Fed currently operates under a congressional mandate established by a 1975 joint resolution and the 1978 Humphrey-Hawkins "full employment" act. Drawn in the hey-day of monetarism, this mandate puts the emphasis on the monetary aggregates. The law specifically instructs the Fed to report to Congress on its target ranges for monetary and credit aggregates.

This emphasis now seems misplaced. Monetarism of course still has its adherents, and surely the monetary aggregates tell us something. But last year M1 told one story and M2 told the opposite. The definition of "money" has needed repeated readjustments. The need for a few additional navigational beacons is hard to dispute.

Beyond that, the recent era of high and volatile interest rates clearly does date to October 1979, when the Fed changed its operating procedures to move the emphasis from interest rates to monetary aggregates. It's certainly plausible to suspect that these new, more-monetarist procedures have a bias toward high interest rates.

What it to be done is not so clear. The old nominal interest-rate targets had proved an engine of inflation. Targeting real rates, as the Byrd proposal suggests, is not possible technically or logically. As a practical matter, the Fed has not rigidly been following its monetarist mandate. Monetary policy has been flying by the seat of Chairman Volcker's pants.

Chairman Volcker, in our book, has done quite well, thank you. but he will not be chairman forever, and there is also a question of how a central bank wins the political support necessary for a degree of independence. We think that, given all that we've been through, this is likely to require a cogent policy framework clearly explained. So we would hope that the Fed would be able to distinguish between congressional proposals likely to be unhelpful and those likely to be helpful.

The Kemp-Lott bill would put the emphasis directly on prices, which is in any event the Fed's long-term goal. Short-term targets of sensitive prices seem a reasonable next experiment. Indeed, our guess is that the principal effect of this bill would be to create a legal mandate for what Mr. Volcker, in his private retreats, is doing already.●

FED ACCOUNTABILITY ACT OF 1982

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

● Mr. CORCORAN. Mr. Speaker, I am introducing a bill to improve the lines of communication between the Federal Reserve Board and the President and thus improve the effectiveness and accountability of our national fiscal and monetary policies. Quite simply, I propose that the Secretary of the Treasury be made a member of the Federal Reserve Board.

This is not a new proposal. Under the Federal Reserve Act of 1913, the act which created the Federal Reserve System, both the Secretary of the Treasury and the Comptroller of the Currency were members of the Board. In 1935, though, due to fears of administrative tyranny, another act of Congress excluded both officials from Board membership. I feel the time has come to reconsider the 1935 change.

The lack of harmony between the actions taken by the Fed and the policies advocated by the administration has become conspicuous at a time when unity and the strength of a team effort are needed more than ever. However, the Board and the President cannot possibly be expected to present a united front without an intermediary to mesh the monetary priorities of the Board with the fiscal priorities of the administration and the Congress. My proposal would require that the next vacancy on the seven-member board be filled by the Secretary of the Treasury and that the Secretary of the Treasury shall thenceforth be an ex officio member, whose term on the Board would expire with the expiration of his or her term as Secretary.

Mr. Speaker, I urge you and my colleagues to join me in support of this effort to synchronize the actions and attitudes of the administration and the Federal Reserve Board.●

CHICAGO'S COLUMBUS DAY PARADE OF 1982

The SPEAKER. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, the Italian navigator Christopher Columbus discovered America 490 years ago on October 12, 1492, and Chicagoans

will celebrate this monumental event in the history of the world with a gigantic parade on Monday, October 11.

We shall be honored to have Chicago's new archbishop, Joseph L. Bernardin, with us on that day, in addition to Hon. Rinaldo Petrignani, Italian Ambassador to the United States, Chicago's Mayor Jane Byrne, Illinois' Gov. James R. Thompson, U.S. Congressman MARTY RUSSO, U.S. Senator ALAN DIXON, and many other civic and political dignitaries, as well as myself. To be televised live for 2 hours by WGN-TV, the parade will be watched by about 30 million persons, and about 1 million more are expected to attend the parade in person.

Christopher Columbus, the father of all immigrants, continues to inspire all of us for his individual initiative, imagination, and resourcefulness—traits which have distinguished the American character. The voyage of Columbus symbolizes the many great contributions of Italian Americans to our beloved America, including their culture, history, and traditions so fundamental to Western civilization.

The theme of Chicago's Columbus Day Parade this year, "Leaders in Commerce and Industry: The Italian American Experience," is a tribute to Americans of Italian descent who became leaders in business, and helped our Nation to become the largest and most generous economic power in history. Some 50 leaders in these fields will be featured, and many will attend the parade in person, including Vincent Marotta, the founder of Mr. Coffee.

Mr. Speaker, the President of the United States, the Honorable Ronald Reagan; the Governor of Illinois, the Honorable James R. Thompson; and the mayor of Chicago, the Honorable Jane M. Byrne; have all issued proclamations in celebration of the Columbus national holiday in 1982, and copies of those proclamations follow:

[A Proclamation by the President of the United States of America]

COLUMBUS DAY, 1982

Nearly five centuries ago, an Italian navigator in the service of Spain opened the way to the founding of these United States. In this historic feat, Christopher Columbus embodied for us the qualities which we Americans hold dear and which are representative of us as a people: daring, determination, vision, and the courage to pursue a dream.

Although Columbus undertook his epic voyage long ago, his adventurous spirit continues to inspire us. As we reflect on the elements which made this journey one of the finest moments in history, it is fitting that we rededicate ourselves to our search for new horizons, ever mindful of Christopher Columbus and those brave seafarers on the Nina, the Pinta, and the Santa Maria.

In tribute to the achievement of Columbus, the Congress of the United States, by joint resolution, approved April 30, 1934 (48 Stat. 657), as modified by the Act of June 28, 1968 (82 Stat. 250), asked the President to proclaim the second Monday in October of each year as Columbus Day.

Now, therefore, I, Ronald Reagan, President of the United States of America, do hereby designate Monday, October 11, 1982, as Columbus Day; and I invite the people of this Nation to observe that day in schools, churches and other suitable places with appropriate ceremonies in honor of the great explorer.

I also direct that the flag of the United States be displaced on all public buildings on the appointed day in memory of Christopher Columbus.

In witness whereof, I have hereunto set my hand this 8th day of Sept. in the year of our Lord nineteen hundred and eighty-two, and of the Independence of the United States of America the two hundred and seventh.

PROCLAMATION—STATE OF ILLINOIS

Every American knows what historic event occurred in 1492, for in that year the history of the world took a dramatic leap. The voyage of Columbus, which spurred further exploration of the New World, is celebrated annually throughout the land.

Columbus and many other distinguished Italians have contributed to the growth of civilization. The Italian community is joined by Americans of every ethnic background in recognizing Columbus Day.

Italian-American residents in Illinois will be sponsoring their 26th annual Columbus Day Parade to honor their native hero.

Therefore, I, James R. Thompson, Governor of the State of Illinois, proclaim October 11, 1982, to be Columbus Day in Illinois.

PROCLAMATION—MAYOR OF CHICAGO

Whereas the Joint Civic Committee of Italian Americans is sponsoring its annual Columbus Day parade on Dearborn Street on October 11, 1982; and

Whereas, the Joint Civic Committee of Italian Americans was formed for the purpose of making the public more aware of the contributions of Italian Americans to the political, social, cultural and economic history of America; and

Whereas, the parade is held each year in tribute to Christopher Columbus, the intrepid Genovese navigator-explorer and the event is a highlight of the Fall season in Chicago; and

Whereas, the JCCIA, under the leadership of President James L. Coli, has performed an outstanding service to the community for many years and the organization has Richard Parrillo as its 1982 parade chairman and Joseph Marchetti as grand marshal:

Now, therefore, I, Jane M. Byrne, Mayor of the City of Chicago, do hereby proclaim October 11, 1982, to be Columbus Day in Chicago and urge citizens to be cognizant of the events held in connection with this worthwhile observance in appreciation of the heritage provided to all by this great navigator-explorer.

Mr. Speaker, the all-day Columbus Day celebration will begin with a concelebrated mass at Our Lady of Pompeii Church at 9 a.m., and presiding will be the Archbishop of Chicago, Joseph L. Bernardin. The concelebrants of the mass will include: Rev. Valerio Baggio, Very Rev. Angelo Calandra, C.S., Rev. Joseph Colletti, Rev. Lawrence Cozzi, C.S., Rev. Angelo Cugnidoro, Rev. Vincent Cutrara, C.S., Rev. Dino Dai-Zovi, Rev. Salvatore DeVita, C.S., Rev. John V. Dolciamore, Rev. Charles Fanelli, Rev. Florian Girometta, C.S., Father Nicholas Marro, Father Leonard Mattei, Rev. Louis Palazzola, Rev. Edward Pellicore, Rev. Ronald Scarlata, Father Robert Tonelli, Father Vincent Zarlenga, Father Peter Sordi, C.S., Rev. Giuseppe Rabbiosi, Mccj., and Father Angelo Garbin.

Special wreath-laying ceremonies will take place at 10:30 a.m. at the Columbus statue in Arrigo Park, conducted by the Order Sons of Italy, the Joint Civic Committee of Italian Americans, and the Italian American War Veterans.

The main event of our celebration, Chicago's great Columbus Day Parade, will begin at 1 p.m. and over 200 floats, bands, and marching units depicting the theme of the parade will participate. In addition to the native costumes from the various regions of Italy worn by women and children, hundreds of young people in school bands, corps of marchers, and drum and bugle corps will also participate. One of the lead units will be a contingent of costumed musicians and flagthrowers from the "Calcio in Costume" association in Florence, Italy. The musicians include trumpeters, who along with drummers provide rhythmical accompaniment for the synchronized maneuvers of the flagthrowers marching in precision. The Florentine contingent will wear costumes dating back to the days of Columbus, and was brought to Chicago for the parade by Amaretto di Saronno.

Mrs. Frank R. Petrone, the parade's theme coordinator; Ann Sorrentino, chairperson of the authentic Italian costume subcommittee; and Lawrence Spallitta, float personnel subcommittee chairman, have devoted their talents and energy again this year, and their dedicated work will contribute to another successful and splendid parade. Christopher Columbus, the discoverer of the New World, will be portrayed this year by Paul Sparacio, 2340 South 60th Court, in Cicero, Ill.

In addition to our guests of honor, general parade chairman, Richard Parrillo; grand marshal, Joseph Marchetti; Hon. George W. Dunne, president, Cook County Board of Commissioners; Dr. Claudio Ferrari, Consul General of Italy; James L. Coli, president of the JCCIA; and many other political dignitaries, civic leaders, members of the judiciary, businessmen from the community, and labor leaders will kick off the parade.

Each year the Joint Civic Committee of Italian Americans, comprised of more than 40 Italo-American civic organizations in the Chicagoland area, sponsors the Columbus Day Parade and other related activities. Many local groups cooperate with the Joint

Civic Committee in this community wide tribute to Columbus, and Anthony Sorrentino, consultant, is helping to coordinate the many varied activities as he so many years in the past has done with devotion and dedication.

One of the highlights of Chicago's Columbus Day celebration is the selection of the queen of the parade. This year, Susanne J. Guillardo Willardo, 8712 Idelwild, Highland Park, Ind., was chosen to reign as queen of the Columbus Day Parade.

Judged on her beauty, poise, and personality, Susanne, as winner of the Columbus Day Queen Contest, won $1,000 from the Joint Civic Committee of Italian Americans, $100 from Dr. Claudio Ferrari, Consul General of Italy; dinner for two at the Como Inn Restaurant, courtesy of Joseph Marchetti, parade grand marshal; and dinner for two at Gino's East, courtesy of Fred Bartoli.

The members of the queen's court are Rose M. Campanella, 9804 North Grace, Niles, Ill.; Tanya Karbowski, 1200 North Oak Park Avenue, Oak Park, Ill.; Ruth DiCristofano, 1041 South Mason Avenue, Chicago; and Rhonda Lee Frederick, 10400 South Kenton, Oak Lawn, Ill.

The chairman of the Queen Contest was Fred Mazzei, cochairperson Josephine Bianco, and the judges of the contest included Joseph Caliendo, a fur fashion designer and 5th term president of the Chicagoland Fur Club; Gilbert Cataldo, commissioner, Chicago Department of Housing; James De Leo, administrative assistant to the chief judge of traffic court; Barbara Drammis, personnel manager at the regional transportation authority; Dr. John J. Drammis, cosmetic surgeon; Rose Farina, manager of civic center events for the Chicago Council on Fine Arts; Paul A. Fosco, executive vice president of Consultants & Administrators, Inc.; Robert Franch, vice president of the First Commercial Bank; Joseph Lizzadro, past parade chairman and chairman of the board of Meade Electric Co.; Peggy Lombardo, former educator and model; the Honorable Philip Romiti, judge of the Illinois appellate court; and Laura M. Spingola, assistant commissioner for international business of the Chicago Department of Economic Development.

In addition to those watching the parade personally, millions of persons are expected to enjoy the parade via television, which this year is being sponsored by Dominick Di Matteo, of Dominick's Finer Foods: Anthony Terlato of Paterno Imports; Ron Turano, of Turano Bakeries; George and Lou Marcucci, of Gonnella Baking Co.; Joseph Marchetti, the Como Inn; Joe Rizza, Rizza Ford; Phil Stefani's; Joe Mondelli, of Kelly Mondelli's; George Miceli, of Fontana D'Or; Michael Notaro, of the Statistical Tabulating Co.; as well as Sherlock's Home and Jacques French Restaurant. The telecast of the parade will be narrated by Dominic Di Frisco and Vince Lloyd, and the reviewing stand commentators will include James L. Coli, Louis Farina, and Jerome Zurla.

Our grand Columbus Day celebration will close with a reception at the Como Inn Restaurant, 546 North Milwaukee Avenue, in Chicago, in honor of our guests, all the officers, subcommittee chairmen, and members who are participating in making the 1982 Columbus Day Parade a memorable success. Leaders of the Italo-American organizations from Illinois will also be present as well as officials from our State and city governments.

I am honored to participate as honorary parade chairman in the Columbus Day Parade. The members of the Joint Civic Committee of Italian Americans are to be commended for their continuing and dedicated hard work and the imaginative creativity that goes into the planning of a grand event such as the Chicago Columbus Day Parade. Our community and our city are proud of these citizens and of the work they are so successfully completing.

Mr. Speaker, the names of the officers and members of the 1982 Chicago Columbus Day Parade committee follow:

LIST OF OFFICERS AND MEMBERS OF CHICAGO COLUMBUS DAY PARADE

COLUMBUS DAY PARADE COMMITTEE

Richard Parrillo, General Chairman 1982; Congressman Frank Annunzio, Honorary Parade Chairman; and Joseph Marchetti, Grand Marshal.

HONORARY CHAIRPERSONS

Hon. Jane Byrne, Mayor, City of Chicago; Hon. Jerome A. Cosentino, Treasurer, State of Illinois; Dr. Claudio Ferrari, Consul General of Italy; Congressman Martin Russo; Hon. James R. Thompson, Governor, State of Illinois.

JCCIA OFFICERS

James L. Coli, President; Jerome N. Zurla, 1st Vice President; Charles C. Porcelli, 2nd Vice President; Carl DeMoon, 3rd Vice President; Anthony Terlato, 4th Vice President; Fred Bartoli, 5th Vice President; Anthony Morizzo, Treasurer; Charles Carosella, Secretary, Sam Cerniglia, Sgt.-at-Arms.

BOARD OF TRUSTEES

Richard Parrillo, Chairman; Congressman Frank Annunzio, Vice Chairman, Michael Anneca, Sam V. P. Banks, Fred Bartoli, Tony Bertuca, Doug Buffone, Rep. Ralph Capparelli, Commissioner Gilbert Cataldo, Michael Coccia, James E. Coli, James L. Coli, Senator John D'Arco, Jr., James De Leo, Pat De Leo, Dominick Di Matteo, Commissioner John L. Donovan, Nello Ferrara, Anthony J. Fornelli, Paul Fosco, Peter J. Fosco, Jr., Dr. James F. Greco, Joseph Lizzadro, Jr., Nick Lombardi, Steve Lombardo, Charles Loverde, Joseph Marchetti, Pat Marcy, Jr., Michael Notaro, Mayor John C. Porcelli, Dr. Mario O. Rubinelli, John Serpico, Joseph Spingola, Anthony Terlato, Joseph Tolitano, and Jerome N. Zurla.

CHAPLAIN

Reverend Armando Pierini, C.S.

TELEVISION SPONSORS

Pat Marcy, Jr.

THEME COORDINATOR

Theresa Petrone.

RELIGIOUS PROGRAM AND ORGANIZATIONS

Rev. Lawrence Cozzi, C.S., Chairman; Rev. Armando Pierini, C.S., Advisor; Nick Bianco, John De Bella, Michael Palello, Elvira Panarese, Chief Anthony Pilas, Anthony Pope, John Spatuzza, and Lawrence Spallitta.

AUTHENTIC ITALIAN COSTUMES

Ann Sorrentino, Chairperson; Elena Frigoletti, Mary Spallitta, and Pauline Jo Cusimano.

FINANCE AND SOUVENIR BOOK

Mayor John C. Porcelli, Chairman; Sam Cerniglia, Ann Sorrentino, and Angeline Annunzio.

BUSINESS AND PROFESSIONAL

Jack Cerone, Chairman; Carl De Moon, Vincent Lucania, Mathew J. Alagna, Anthony Apa, Charles Carosella, John Curielli, Marino Mazzei, Louis Ranieri, Michael R. Rosinia, Dr. Mario O. Rubinelli, Amedeo Yelmini, and Jerome N. Zurla.

BANDS, MARCHERS, AND TRANSPORTATION

Louis H. Rago, and Marie Palello.

LABOR COMMITTEE

TOXIC VICTIMS COMPENSATION ACT

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 30 minutes.

● Mr. LAFALCE. Mr. Speaker, today I am introducing the Toxic Victims Compensation Act. My bill embodies, in large part, the recommendations contained in the report to the Congress prepared by the Superfund 301(e) study group. The study group, created by the Superfund Act of 1980, was directed to report to the Congress on the adequacy of existing common law and statutory remedies for compensating toxic victims.

The 301(e) study group has concluded that there are many substantive and procedural barriers to recovery and that existing causes of action will allow recovery in only a few highly selected cases.

Victim compensation remains the singlemost important hazardous waste issue which has not been forcefully addressed by the Congress. The Toxic Substance Control Act, RCRA and Superfund all deal directly with the problem of environmental degradation. All are founded on the presumption that people will be protected through sound management of hazardous products and the cleanup of abandoned and inactive hazardous waste sites. In no instance do these regulatory schemes provide relief for the physical and emotional suffering of the toxic victim.

If we shift our examination from the toxic victim to the workplace, we can easily see the roots of this oversight. With the exception of black lung compensation, workers who suffer occupationally related diseases have had to overcome monumental barriers to receive some degree of compensation. The Department of Labor has estimated that perhaps as few as 2 to 5 percent of workers who have actually suffered from occupationally related diseases receive workers compensation. This is largely a function of the latency factor. Workers first experience symptoms of occupationally related illnesses several years after exposure, and, in many cases, after the worker has left the threatening work environment.

The two major barriers to compensation for toxic victims are proving causality, and the long latency period of environmentally induced diseases. In some States the statute of limitations can knock off many claims by itself. In others, the difficulty of establishing causality can be insurmountable.

Clearly, statutes of limitations serve justifiable purposes. However, in toxic substances related injuries, their operation may create a special handicap due to the latency period of so many potential injuries. It is now believed that environmentally induced cancers may take as long as 20 or 30 years to develop, extending far beyond most State statutes of limitations.

Those statutes of limitations which do not begin to run until the injured party is able or should reasonably be able to ascertain a causal connection between the injury and an exposure to an environmental hazard—the discovery rule—are, of course, advantageous to toxic victims. Such statutes are especially useful since toxic injuries may be characterized by unknown, multiple, or indeterminate causes. However, the discovery rule is, as the 301(e) study group notes, not widely applied.

Of all the types of tort actions, the toxic victim's claim represents the most troubling and overwhelming burdens of proofs. The most difficult obstacle is establishing a connection between exposure to hazardous substances and an illness or injury.

In the case of toxic torts, the obstacles are not only legal, but they are founded in the failings of science. The state of scientific knowledge and the art of medical diagnosis do not always permit legal or scientific conclusions about the causes of a particular disease. Indeed, the rigors of the scientific method itself, requiring repetition and peer review, may prevent the timely generation of proof needed to support the evolution of common law remedies.

In short, the toxic victim suing for compensation confronts difficulties proving the exact nature of the injury and the connection, both physical and temporal, between those injuries and exposure to a hazardous substance. In most States the law has not yet advanced to the point where preliminary statistical evidence establishing a causal nexus between exposure to a substance and disease is sufficient to satisfy a toxic victims burden of proof.

The law has not yet developed adequate mechanisms to protect the toxic victim. We are, I believe, confronted with two choices. We can let toxic tort law evolve through our judicial system, which I predict will take at least 20 years, or the Congress can confront the issue head on by enacting legislation which embodies the 301(e) study group's recommendations.

I have been attempting to prod Congress into action since 1978 when I introduced a Superfund bill that included a toxic victims compensation title. The bill I am introducing today was drafted over 1 year ago. I have withheld introducing the bill pending the outcome of the 301(e) study group's report. After reviewing the report, I am convinced that this bill is an appropriate response to the problems identified by the study group.

My proposal addresses the human problems caused by exposure to toxic substances. The salient features are as follows: Creates a nonexclusive Federal cause of action for toxic victims; establishes an independent office within the Environmental Protection Agency (EPA) to compensate victims of pollution related diseases and injuries regardless of fault; directs EPA to study the relationship between exposure to toxic substances and human disease and authorizes EPA to make a requisite nexus finding; modifies the proof and limitation requirements which claimants must meet, permitting the use of the presumption based on EPA's requisite nexus finding; and subrogates EPA to the rights of injured parties, thereby enabling EPA to seek reimbursement from a neglient party.

The most important element of my proposal is the establishment of the requisite nexus, or cause and effect determination, between exposure to a toxic substance and possible health effects from that exposure.

Under my proposal, three conditions must be met to establish a rebuttable presumption of guilt. These conditions include evidence of exposure to a hazardous substance, evidence that exposure can cause injury, illness, or damage, and evidence that the exposure may have been sufficient to cause injury, illness, or damage suffered by the toxic victim.

Of equal importance is the provision which establishes a 3-year statute of limitations for any such action starting on the date the illness, injury, or damage was first known to exist or should reasonably have been known to exist.

Mr. Speaker, I strongly believe, as does the 301(e) study group—that our response to the toxic waste problem will not be complete in the absence of an effective victims compensation scheme. Effective compensation cannot only ease the pain of those who have already suffered, but it will serve as a strong disincentive for generators, handlers, transporters, and disposers of toxic wastes to comply with the letter and the spirit of the laws enacted by the Congress to protect human health and the environment from the consequences of neglect and, in many cases, willful negligence.

Release of the 301(e) report lays the problem and the challenge squarely at our door, Mr. Speaker. Despite the lateness of the hours, I urge our colleagues in the 97th Congress to carefully review the bill I am introducing today. I fully intend to address and promote this issue in the 97th Congress by reintroducing the Toxic Victims Compensation Act and working for a final legislative product that incorporates the thrust of the recommendations of the 301(e) study group addresses the pain and suffering of the toxic victim.

Thank you.

TEN QUESTIONS ON THE ADMINISTRATION'S ENTERPRISE ZONES, AND A BETTER ALTERNATIVE

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WILLIAM J. COYNE) is recognized for 10 minutes.

● Mr. WILLIAM J. COYNE. Mr. Speaker, the administration has not been reluctant to express its view that Federal aid to urban areas is less than productive. In the recent Housing and Urban Development Policy Report, Federal programs designed to rebuild our cities are depicted not as part of the solution to our urban ills, but as part of the problem.

The administration is far less clear on how urban enterprise zones—the keystone of its urban aid effort—would work. These zones, according to an administration factsheet, would "create a free-market environment in depressed areas through relief from taxes, regulations and other Government burdens, privatization of some city services and involvement of private, neighborhood organizations."

Many cities, including my own city of Pittsburgh, are devising enterprise zone proposals in anticipation that the zones may be the only game in town. In view of the sharp reductions in urban aid the administration has brought about in a short 18 months, this is a wise calculation on the part of the cities.

But before we abolish existing urban aid programs such as the Economic Development Administration, before we start changing the ground rules for cities, we should take a much closer look at how these zones will work.

There are at least 10 big questions that need to be answered before we make enterprise zones the flagship of urban policy.

First, how much will the zone program cost? The answer appears to be: No one knows. While the administration estimates that 75 zones could cost nearly a billion in lost tax revenue by 1986—roughly double the amount we now spend on the highly effective urban development action grant program—a recent General Accounting Office report suggests this may be understating the actual cost.

According to the appropriately titled GAO report, Revitalizing Distressed Areas Through Enterprise Zones: Many Uncertainties Exist, revenue losses in some zones could be many times higher than those anticipated in the Treasury estimates. The GAO report also warns that:

> The Congress may not, as with a program based on appropriated funds, be able to adjust the amount spent on enterprise zones in subsequent years, as the effectiveness of the program is assessed, or as the country's fiscal climate changes. According to the CRS taxation report, tax expenditure programs may remain beyond their useful life because tax provisions are not periodically reviewed through the budget process as are direct expenditures.

Second, who benefits from the zones? Many critics, not surprisingly those representing organized labor, argue that the zones will have the effect of lowering wages while subsidizing capital investment. Even those who generally support the zone concept are skeptical of some proposed benefits. Fort Wayne, Ind., Mayor Winfield Moses told the Senate Finance Committee in April of this year that if the administration zone proposals are adopted:

> The result may be investment in labor-saving machinery, which translates into a net loss of jobs or the "selling-out" by firms which have been in the area a long time and decide to avail themselves of the capital gains incentives.

Third, will enterprise zones actually create jobs? A distinguished urban scholar, Roger Ahlbrandt, doubts that they will. His criticism, coming shortly after his service as HUD Deputy Assistant Secretary of Urban and Community Studies in the Reagan administration, is worth considering:

> There is no reason to expect enterprise zones to create a significant number of new jobs. Many studies of business investment decisions show that tax incentives are of only minor importance in the expansion or location decisions of private companies. Most mayors, city development directors and private developers are skeptical about the zone concept and would prefer grants to stimulate private investment.

Fourth, do enterprise zones actually address the needs of small business? Most new jobs come from small business. Tax problems, however, are not the No. 1 headache of most small businesses. A survey by the National Federation of Independent Businessmen indicates that adequate financial support, initial sales and managerial competence are much bigger priorities for entrepreneurs than taxes, yet this bill addresses none of those needs.

Herbert Liebenson, president of the National Small Business Association, aptly describes the situation in many urban areas:

> Most small firms are hanging on by their fingernails just trying to survive. Money's what's needed, not tax deductions.

Fifth, would enterprise zones favor one business at the expense of another? Zone proponents argue that the reduction in direct Federal aid and regulations in zone areas constitutes greenlining. Far too little thought has been given to what may develop into the brown edge around a zone, the area in which businesses faced with very similar economic conditions are unable to reap the benefits of competitors within the zone.

There is surprising agreement between business and labor as to the seriousness of this problem. According to the GAO report:

> A spokesperson for the American Federation of Labor and the Congress of Industrial Organizations said a firm outside the zone, employing many zone residents, would receive no benefit. This would lead to inequitable situations and powerful incentive for shutdowns, relocations and counterproductive competition.
>
> The Chamber of Commerce of the United States expressed the opinion that geographically bounded tax incentives are inherently inequitable and discriminatory and, therefore, inconsistent with sound federal tax policy.
>
> An official of the National Federation of Independent Business said his association is concerned that if service or retail businesses are successful in an enterprise zone, they will probably just be taking business away from firms outside a zone.

Sixth, how will the Federal Government prevent a shell game, in which an existing business enters, or perhaps leaves, a zone solely to take advantage of tax benefits—not to create new jobs?

The legislation authorizing the Economic Development Administration wisely prevents the Federal Government from subsidizing footloose businesses which add little to the new net job figure. The adminstration's enterprise zone legislation does not.

Answering a query by the GAO on this subject, the administration adopts a less than concerned attitude to a potentially serious problem. The administration says:

> While relocation in this sense is not as purely beneficial as the stimulation of an entirely new activity, bringing such economic development to the Nation's distressed areas has important social benefits and would, therefore, still be an advantageous result of the program.

Seventh, what guarantees against involuntary displacement of current zone residents—the planned beneficiaries of the legislation—are contained in the administration proposal? If the enterprise zones work according to theory, land values can be expected to rise rapidly, with the possible result that low income residents could be forced out of their homes.

The Uniform Relocation Act now offers some protection for citizens forced to move as a result of a federally-initiated project. While enterprise zones, according to their sponsors, will be a key Federal program, no such protection is included in the administration proposal. Without strong antidisplacement guarantees, enterprise zones could be a modern version of the people removal aspect of urban renewal which was so roundly criticized in the 1950's and 1960's.

Eighth, will the enactment of enterprise zone legislation open a Pandora's box, with communities competing to eliminate local health and safety codes in the hope that an antiregulatory HUD will designate a zone in their city?

William W. Goldsmith, a Cornell University professor of city and re-

gional planning, describes that possibility in a recent New York Times article:

The Administration proposes multiple zones across the country, and it encourages states to innovate with their own laws. The states, if left to their own devices, might declare wholesale war on labor's 20th century gains. One bill authorizing zones passed both houses in Illinois before being vetoed by Governor James R. Thompson, under pressure from labor and civic groups. Early versions of the bill would have eliminated building codes, minimum wages, property taxes, and general state aid; would have weakened laws protecting health, safety and the environment; and would have enforced right to work laws in specified urban zones.

Ninth, how will the passage of the Reagan administration tax act of 1981 affect the enterprise zone tax incentives?

The GAO report, while noting that the zone tax advantages may be attractive to some businesses, makes it clear that:

By reducing business taxes nationwide, the Economic Recovery Tax Act may reduce the attractiveness of business tax incentives proposed for enterprise zones.

The GAO investigators note that:

A spokesperson for the National Association of Manufacturers told us that the proposed enterprise zone tax incentives may not be substantial enough to attract manufacturers because proposed enterprise zone incentives have been mitigated by the recently passed Economic Recovery Act.

The 10th, and perhaps most important question is: Are enterprise zones the direction Federal urban policy should be taking?

Ed Humberger, of the Washington, D.C.-based Urban Development Collaborative, raises a serious question as to the direction Federal urban policy may be headed if enterprise zones are to be the key Federal program:

If no start-up capital is to be provided in this bill, what types of businesses would, in fact, be created? Are we talking about "mom and pop" stores, sweatshops, and delivery repair services that can be started with minimal capital from savings or family and friends? If the ultimate benefit of the enterprise zone proposal and, by extension, national urban policy, lies in exempting the corner candy story from taxes and the minimum wage, then we have come a long way from any vision of long term economic development in distressed areas.

Congresswoman SHIRLEY CHISHOLM expressed what I believe is a most pragmatic criticism in her testimony before the House Economic Stabilization Subcommittee. She said:

I must say of the President's enterprise zone proposal: its delayed unveiling, its unambitious scope, its minimal allocation of federal resources and its simplistic faith in the private sector are all stark commentaries on the apparent disinterest of the White House in dramatic urban revitalization. However, to repeat an old saying, "What you see is what you get."

Crafting an enterprise zone proposal makes good sense to a city in desperate need of some sort of economic revitalization assistance. What they see may well be all they get from this administration. Enterprise zones are not, however, the last word on urban development. There are other new and better ideas on rebuilding our cities, ideas premised on economic need, not academic theory.

Rebuilding our cities could be the growth industry of the 1980's and 1990's. But it will take a big capital investment—bigger than most of our urban areas can now afford.

In the short term as well as the long term, I am convinced that an investment in the repair of our cities streets, roads, bridges, public lighting, and water systems will pay off in the creation of far more jobs than will enterprise zones. The advocates of the administration's zones overlook one very important point about commerce: In order for a business to be successful, the surrounding environs must be conducive to trade. As long as our cities deteriorate, these conditions will not be met.

A proposal advanced by the International Association of Machinists lays the groundwork for a rethinking of the way we use the Federal Financing Bank so that we can use it to make long-term loans to our cities—loans which are essential if we are to tackle our massive infrastructure repair problems.

Since 1973, the Federal Financing Bank's only customers have been Federal agencies which sell their obligations to it at a lower cost than they would be able to sell on the open market, in large part because the financing bank borrows its money from the U.S. Treasury. The bank is also authorized to borrow up to $15 billion in the private capital market.

Now may be the time to allow the Federal Financing Bank to make loans through an appropriate conduit to certain local governments which develop a comprehensive aid program aimed at distressed areas. Like the enterprise zones, the assistance would be relatively targeted. Unlike the enterprise zones, it would allow local governments the breathing space to make the long range planning decisions necessary for a healthy business and residential environment. Specifically, a city could arrange for a low interest, long-term loan through the financing bank, at rates similar to the Treasury's cost of funds, to make needed infrastructure repairs.

The proponents of enterprise zones have rendered this Congress a service by focusing debate on the need for targeted urban development. In their concentration on capital-intensive approaches to revitalization, however, I believe that labor-intensive and community-oriented alternatives have received too little attention. Our colleague, Representative PARREN MITCHELL of Maryland, has begun to craft an alternative measure which recognizes the need for community planning and participation as well as the development of jobs in, for, and by the community which is designated as a distressed area. I commend the gentleman from Maryland for his leadership in this area, and I look forward to working with him on his proposal.

Mr. Speaker, in the rebuilding of our distressed neighborhoods through large scale reinvestment in public facilities, the Federal Government has not been part of the problem, as some would contend, but part of the solution. In program after program—community development block grants, urban development action grants, the Economic Development Administration—the Federal Government has played a critical role as a partner in community efforts to reverse neighborhood decline.

I am among those who favor increased targeting of Federal urban programs. To the extent that enterprise zones accomplish this, I will support the proposals. To the extent that they contribute to a reduction of direct Federal aid to urban areas, I shall oppose them.●

TAX LEGISLATION TO PROTECT COASTAL BARRIER AREAS

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. STARK) is recognized for 5 minutes.

● Mr. STARK. Mr. Speaker, major efforts are underway, both legislatively and administratively, to prevent unwise construction on the Nation's undeveloped coastal barrier islands and lands.

The barriers are critically important to the Nation's wildlife and marine industries. Moreover, they are breakwalls, blunting the impact of fierce gulf and eastern seaboard storms and hurricanes, and thus protecting the interior and more developed areas.

Construction on these islands endangers their ability to support wildlife and marine breeding grounds. The humans who build on these islands also place themselves in danger because of the frequency of killer hurricanes and winter storms.

Obviously, the public should not pick up the cost of repairing damage to structures unwisely built on the shifting sands of these islands. And last year's budget reconciliation bill includes a provision requiring the Department of the Interior to deny flood insurance to structures built on many of the previously undeveloped lands. The Interior Department recently released for public comment its map of areas to be denied insurance. The draft map involves some 188 areas in 16 States that should be defined as undeveloped coastal barriers.

Even if an area is identified as ineligible for insurance, however, a private developer can still construct housing on it—and hope for the best.

My colleague from Delaware, Mr. EVANS, has led an effort, along with 126 cosponsors, to prohibit Federal assistance in the construction of highways, bridges, and sewage treatment facilities on these barriers. This bill passed the House on September 28 by a vote of 399-4. It passed the Senate earlier and is currently in a House-Senate conference. The congressional statement of purposes on that legislation makes an eloquent explanation of the importance of protecting these barriers:

(a) FINDINGS.—The Congress finds that—

(1) habitats which are essential spawning, nursery, nesting, and feeding areas for migratory birds, aquatic organisms, and other wildlife are provided within the coastal barriers along the Atlantic and gulf coasts of the United states and the adjacent wetlands, marshes, estuaries, inlets, and near shore waters;

(2) these fish and wildlife resources and their habitats are being irretrievably damaged and lost due to development on, among, and adjacent to, such coastal barriers;

(3) certain actions and programs of the Federal Government have subsidized and encouraged such development; and

(4) a program of coordinated action by Federal, State, and local governments is critical to the more appropriate use and conservation of fish and wildlife resources and habitats within the coastal barriers.

(b) PURPOSE.—The Congress declares that it is the purpose of this Act to minimize the damage to fish, wildlife, and other natural resources associated with the coastal barriers along the Atlantic and gulf coasts by restricting future Federal expenditures and financial assistance which have the effect of encouraging development of coastal barriers, by establishing a Coastal Barrier Resources System, and by considering the means and measures by which the long-term conservation of these fish, wildlife, and other natural resources may be achieved.

Therefore, in an effort to compliment these efforts, as chairman of the Ways and Means Select Revenue Measures Subcommittee, I am today introducing a bill to deny interest expenses for loans used to finance the purchase of dwelling units on the lands which will be included in the final version of H.R. 3252/S. 1018. Since the exact areas will not be known for a while—but since it is important to slow development on these barriers—I am introducing this legislation before the end of the 97th Congress.

It is my intent to discourage further construction on areas which most parties know will be included in Interior's coastal barrier resources system. The bill would apply to construction which begins on or after January 1, 1983.

This will be the same date I will use in reintroducing the bill in the 98th Congress.

I hope that this legislation will contribute to the preservation of these barriers which are so important to the Nation's ecology and natural resources.●

WHERE THE NATION'S CREDIT GOES: $5.6 BILLION IN BANK CREDIT TIED UP IN BENDIX TAKEOVER

The SPEAKER. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 30 minutes.

● Mr. REUSS. Mr. Speaker, late last night I received a letter containing previously secret documents from the Securities and Exchange Commission which indicate that $5.6 billion in lines of credit were made available by no fewer than 28 major American banks and 11 foreign banks to the 4 corporations participating in the bizarre takeover attempts involving Martin Marietta and Bendix.

This record shows that 20 domestic and 5 foreign banks lent Bendix Corp. $675 million to finance its purchase of 15.8 million shares of Martin Marietta.

The record shows that 13 banks, all domestic, lent Martin Marietta up to $930 million to purchase 11.9 million shares of Bendix.

The SEC record shows that 14 domestic and 8 foreign banks stood ready to provide United Technologies with up to $2 billion in credit to finance its offer to buy Bendix.

The record—in this case, press accounts—shows that Allied Corp. had another $2 billion in bank credit pledged to back its offer for Bendix and Martin Marietta.

While neither United Technologies nor Allied drew on their credit lines, this $4 billion was tied up for the entire month of September and was therefore not available to other companies, small businesses, or individuals who could have used the credit for more productive uses.

The record also shows that some of these banks were allocating the Nation's scarce credit to more than one of the competing cannibals. For example, 15 banks lent to at least 2 of the 4 companies—including Ameritrust Co., Irving Trust Co., Manufacturers Hanover Trust Co., Mellon Bank N.A., the National Bank of Detroit, the First National Bank of Boston, the First National Bank of Chicago, the Wells Fargo Bank N.A., Bank of America N.T.S.A., Citibank N.A., and Continental Illinois National Bank & Trust Co. of Chicago—while 3 banks made credit available to all 3 companies for which we have records—Bankers Trust Co., Chemical Bank, and Morgan Guaranty Trust Co. of New York. A number of the banks who got burnt on Penn Square and Drysdale and who are in trouble for their foreign lending are also on this list.

The Securities and Exchange Commission requires that corporate tender offer statements list all sources of borrowed funds that will be used in a takeover attempt. I commend the SEC for making available to me, late last night, the material I have been requesting.

But did anyone in the administration raise a finger to prevent the diversion of $5.6 billion in scarce credit to the Martin Marietta-Bendix debacle? Not as far as I can see.

Indeed, the Federal Reserve—to which Congress has delegated authority for regulating our financial system—refuses to monitor or regulate bank lending for corporate takeovers. As recently as last week, when the Federal Reserve Bank presidents appeared before the House Committee on Banking, Finance and Urban Affairs, I asked these questions:

What has the Federal Reserve done in recent years to tone down the wave of unproductive corporate mergers and acquisitions that have nothing to do with new investment and of which the current example is the Bendix-Martin Marietta extravaganza?

What have the Federal Reserve Banks done to take some of the starch out of the credit-wasting Bill Agees and the rest of the lot?

And the answer of the Federal Reserve was:

The Fed traditionally has felt that the market mechanism for allocating credit was a more efficient mechanism, that it was very difficult for administering authorities to make decisions as to which credit uses are more productive.

This embarassing scene of four corporations all trying to gobble each other up, financed by some of the largest banks in the country, comes on the heels of such predacious corporate takeovers in 1981 as the takeover of Conoco by duPont, after a public battle involving Texaco, Mobil, and Seagrams, the takeover of Marathon Oil by U.S. Steel, after a public battle with Mobil, and the attempted takeover of Grumman by LTV.

Millions of ordinary Americans are not amused by this spectacular misuse of their savings by the corporate world and the banking system.

In our 1982 annual report, the Joint Economic Committee recommended that our banking system should practice credit conservation in order to channel credit into productive uses:

The Administration and the Federal Reserve should encourage the banking system to develop an effective means to deter destabilizing bursts of bank-financed lending for unproductive purposes such as large corporate takeovers and speculation in commodities, collectibles, and land. Such measures will have the effect of conserving scarce credit resources in times of need for the use of small business, farmers, housing, automobile financing, and productive capital investment.

The Allied-Bendix-Martin Marietta entanglement makes this recommendation appropriate today.

Under section 13(d)(1)(B) of the Securities Exchange Act of 1934, the names of banks extending lines of credit for corporate takeovers are to be kept confidential to prevent the contesting parties from exerting economic pressure upon banks making legitimate loans in takeover contests. The SEC fulfilled this requirement of the act. Now that both Martin Marietta and Bendix have completed their purchases of stock under their tender offers, there is no further need to maintain this secrecy.

I attach the September 30 letter to me of the Securities and Exchange Commission:

SECURITIES AND EXCHANGE COMMISSION,
Washington, D.C., September 30, 1982.

Hon. HENRY S. REUSS,
Chairman, Joint Economic Committee, Congress of the United States, Washington, D.C.

DEAR CONGRESSMAN REUSS: This is in response to your letter of September 28, 1982 on behalf of the Members of the Joint Economic Committee in which you request the identities of the banks, both foreign and domestic, or other financial institutions which provided credit to Martin Marietta Corporation ("Martin Marietta") and the Bendix Corporation ("Bendix") in their recent tender offers.

I have attached for the Committee's information a listing of the identities of the banks disclosed to the Commission by Martin Marietta and Bendix in their requests for confidential treatment. As you are undoubtedly aware, Section 13(d)(1)(B) of the Securities Exchange Act of 1934 (the "Exchange Act") prohibits the Commission from making available to the public the names of certain banks of certain banks that make loans in the ordinary course of their business to finance acquisitions of securities reported on Schedule 13D if their names are provided the Commission and the person filing the statement requests that such names not be made available to the public. The legislative history of this prohibition indicates that its purpose was to prevent the contesting parties from exerting economic pressure upon banks making legitimate loans in takeover contests.

To implement the provisions of Section 13(d)(1)(B) in tender offer filings, the Commission adopted Item 4(c) of Schedule 14D-1. The provisions for bank name confidentiality set forth in Item 4(c) are identical to those set forth in Section 13(d)(1)(B). Accordingly, upon receipt of the request for confidentiality of the identities of the banks participating in the financing of the two offers, the Commission granted confidential treatment to this information.

As mentioned above, Section 13(d)(1)(B) prohibits the Commission from making available to the public the identity of lending banks in the circumstances described in that section. In making this information available to you, we request that you take section 13(d)(1)(B) into account in considering any further use you might make of it.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

Enclosure.

REPORT OF THE DIVISION OF CORPORATION FINANCE, THE BENDIX CORP.

The following are the domestic banks with which Bendix had entered into Revolving Credit Agreements or had received oral commitments for the financing of its tender offer:

Ameritrust Company, Bank of Tokyo Trust Company, Bankers Trust Company, Chemical Bank, Crocker National Bank, Detroit Bank and Trust, Fidelity Union Bank.

Irving Trust Company, Manufacturers Hanover Trust Company, Manufacturers National Bank of Detroit, Marine Midland Bank, N.A., Mellon Bank, N.A., Morgan Guaranty Trust Company of New York, National Bank of Detroit.

Security Pacific National Bank, The First National Bank of Atlanta, The First National Bank of Boston, The First National Bank of Chicago, The First National Bank of Maryland, The Northern Trust Company, Wells Fargo Bank, N.A.

The following are the domestic banks and life insurance companies from which Bendix obtained waiver of certain negative covenants which might have impaired the ability of Bendix to effect Martin Marietta's becoming a subsidiary:

Citibank, N.A., Manufacturers Hanover Trust Company, Manufacturers National Bank of Detroit, Mellon Bank, N.A., Metropolitan Life Insurance Company, The Travelers Insurance Company.

MARTIN MARIETTA CORPORATION

The following are the domestic banks which were the source of the borrowed funds pursuant to the Credit Facility described in the Schedule 14D-1:

Ameritrust Company, Bank of America National Trust and Savings Association, Bankers Trust Company, Chemical Bank, Citibank, N.A., Continental Illinois National Bank and Trust Company of Chicago.

Manufacturers Hanover Trust Company, Maryland National Bank, Mellon Bank, N.A., Moran Guaranty Trust Company of New York, Seattle First National Bank, Toronto Dominion Bank New York Agency, Wachovia Bank and Trust Company, N.A.

ADDITIONAL BANKS EXTENDING CREDIT TO BENDIX AND UNITED TECHNOLOGIES, AS LISTED IN TENDER OFFER STATEMENTS FILED WITH THE SEC

I. BENDIX, FOREIGN BANKS

Bank of Montreal, Dresdner Bank, Banque De L'Indochine Et De Suez, Societe Generale, Midland Bank, Ltd.

II. UNITED TECHNOLOGIES, DOMESTIC BANKS

Citibank, N.A., The Chase Manhattan Bank, N.A., Morgan Guraranty Trust Co. of N.Y., Bank of America, N.T.S.A., Bankers Trust Company, Chemical Bank, Manufacturers Hanover Trust Co.

The First National Bank of Boston, Wells Fargo Bank, N.A., The Bank of New York, Irving Trust Company, The First National Bank of Chicago, Continental Illinois National Bank and Trust Company of Chicago, National Bank of Detroit.

III. UNITED TECHNOLOGIES, FOREIGN BANKS

Credit Lyonnais, Societe Generale, Commerzbank Akteingesellschaft, Dresdner BankAktiengesellschaft, Lloyds Bank International Ltd., The Royal Bank of Scotland, Ltd., The Sumitomo Bank, Ltd., Union Bank of Switzerland.●

A REFORM TO PROVIDE NONPROFIT HELP TO THE NEEDY

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I am today introducing legislation to remedy what I believe is a serious deficiency in the supplemental security income (SSI) program.

As you know, Mr. Speaker, the SSI program was established in 1974 to provide a federally guaranteed minimum income for the elderly, the blind, and the disabled. It operates under very strict guidelines as to the levels of income and assets allowed its beneficiaries. These limitations are designed to restrict the program to serving only the most desperately needy of our citizens, those who are unable to work, who have no assets to fall back on, and whose benefits from other Federal social programs are not sufficient to allow them even the most basic of existences. I believe that SSI plays a central role in the Federal Government's commitment to meeting the needs of the disadvantaged: By guaranteeing a minimum living standard, it prevents its recipients from falling through the gaps in our network of social service programs.

In 1976, an important change was made in the law to allow contributions to SSI recipients from State and local government agencies. Under this provision, assistance provided by States and localities which is based on need is not counted toward the income limitation. This allows recipients to receive extra help from non-Federal Government social programs without losing anything from their Federal benefits.

The legislation I am introducing today would simply extend this provision to include assistance from private, nonprofit organizations which is determined by the appropriate State agency to be based on need. In most circumstances, SSI recipients now lose a dollar of Federal support for every dollar of private assistance they receive. Under this provision, if a charitable group wished to help some of these elderly or blind or disabled individuals and was certified by the State to be providing that help on the sole basis of the individuals' need, it could do so without the recipient's suffering a corresponding loss in Federal aid.

Mr. Speaker, I believe this change in the SSI program is long overdue. Particularly now, when Federal social programs of all kinds are being cut back and we hear much talk of private sector voluntarism moving in to fill the gaps, we must not discourage private charitable organizations from providing whatever assistance they can. It is most appropriate for the Federal Government to guarantee a floor income for these most needy and

most vulnerable members of our population. However, it is counterproductive to allow that guarantee to prevent the private sector from raising them above that minimum-level existence. This provision would allow more flexibility in the program without altering its fundamental purpose: To insure that no American is prevented by age, blindness, or disability from achieving a basic, decent minimum standard of living.

In addition, this change would not add significantly to either the Federal bureaucracy or the Federal budget deficit. By having the States rather than the Federal Government set the standards for private aid, this bill avoids any major increase in either Federal administrative costs or Federal involvement in the operations of private charitable organizations. Moreover, this provision would add to the direct costs of the SSI program only insofar as individuals now receiving private assistance became eligible for SSI or saw their SSI benefits increase once that assistance was no longer counted toward the income limitation. Since private organizations have as a rule been discouraged from aiding SSI recipients or potential recipients—the very problem this legislation is designed to correct—this group is likely to be relatively small.

I would like to close by giving my colleagues two examples of the difficulties that have arisen under present law:

Independent Living for the Handicapped, a nonprofit organization operating in my own congressional district, uses donations from private sources to help disabled individuals establish themselves in independent living situations rather than being forced to depend on others for their most basic needs. However, any aid they provide to SSI recipients is offset by a dollar-for-dollar decrease in the SSI benefit.

Several years ago, a church in rural Virginia, the Mount Pleasant Church of the Brethren, formed a committee on the needs of the elderly to determine how best to aid the poor and elderly residents of their area. The committee decided to assist some of these residents with monthly cash payments to be used toward their rent, but again found their assistance offset by decreases in SSI benefits. As the committee members wrote to their Representative in Congress, "We as a country give the elderly enough assistance to allow them to survive and then stop * * *. And when others wish to help, to allow them some dignity as well as quality to life, our hands are bound."

Mr. Speaker, this legislation would give this church and other groups like it the freedom to help those around them who they can see are in need, who can survive with the aid of Government benefits but can do little else. I have included below the full text of the bill—a simple one, as you will see—and I would urge all Members to support it.

H.R. 7279

A bill to amend title XVI of the Social Security Act to provide that assistance based on need which is furnished to an individual by a private nonprofit organization shall be excluded from such individual's income in determining his or her eligibility for SSI benefits or the amount thereof

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1612(b)(6) of the Social Security Act is amended by inserting before the semicolon at the end thereof the following:", or which (as determined by the appropriate State agency) is based on need and furnished by a private nonprofit organization".

SEC. 2. The amendment made by the first section of this Act shall apply with respect to benefits for months after the month in which this Act is enacted.●

PERSONAL EXPLANATION

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EDGAR) is recognized for 5 minutes.

● Mr. EDGAR. Mr. Speaker, due to urgent business in my district I was not recorded on the last two rollcalls on Wednesday, September 29, rollcall Nos. 379 and 380. Had I been present and voting I would have voted "yea" on H.R. 6838, as amended, the termination of export control on pipeline equipment for the Soviet Union and "yea" on H.R. 5543, the Ocean and Coastal Resources Act.●

TELEVISION PROGRAMING FOR CHILDREN

The SPEAKER. Under a previous order of the House, the gentleman from Colorado (Mr. WIRTH) is recognized for 5 minutes.

● Mr. WIRTH. Mr. Speaker, today, I am introducing a resolution to help bring national attention to the problem of television programing for children.

By the time the average child graduates from high school he or she will have spent more time in front of the television than in classes.

The influence of television on our children has been well established. A 1972 study of the National Commission on Causes and Prevention of Violence concluded that "In a fundamental way, television helps to create what children expect of themselves and others, and what constitutes the standards of civilized society." And a report released just last month by the National Institute of Mental Health states that "almost all the evidence testifies to television's role as a formidable educator whose effects are both pervasive and cumulative."

National attention must continue to be focused on this vital matter. I am therefore introducing a resolution which would designate the week of March 13–19, 1983, as "National Children and Television Week" to encourage individuals, groups, and corporations to make efforts on behalf of better television programing for children.

Senators CRANSTON and HEINZ have introduced the resolution in the Senate. I urge my colleagues to join me in support of this important resolution.

H.J. RES. 623

Joint resolution to designate the week of March 13, 1983, as National Children and Television week

Whereas television can create an intellectual and emotional environment which can play a decisive role in shaping individual development and perception;

Whereas parents and other adults should be able to look to television to provide children with true pictures of the world and positive models for behavior;

Whereas many dedicated groups and individuals strive to improve the quality of television programming viewed by children and their families; and

Whereas the Nation has a continuing responsibility to provide appropriate, stimulating programming for children and adolescents: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of March 13, 1983, is hereby designated as "National Children and Television Week," and the President of the United States is authorized and requested to issue a proclamation calling upon the elected officials and people of the United States to observe such week through activities supporting television programs which are attentive to the needs and interests of children and those who care for them.●

U.S. COURT OF APPEALS DECISION INVOLVING THE FORMER HON. JOHN E. MOSS

The SPEAKER. Under a previous order of the House, the gentleman from Michigan (Mr. DINGELL) is recognized for 5 minutes.

● Mr. DINGELL. Mr. Speaker, I am pleased to inform the House of a recent decision by the U.S. Court of Appeals for the Ninth Circuit involving our former colleague, the Honorable John E. Moss, my predecessor as chairman of the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce.

In October of 1981, Chairman Moss, a man well-known for his belief in the constitutional rights of the Congress, was cited for contempt of court by the U.S. District Court for the Eastern District of California. Chairman Moss subjected himself to this inglorious treatment rather than allowing a private civil litigant, and a single Federal judge, to compel him to answer questions concerning certain investigatory activities of our committee.

Chairman Moss, who was represented by counsel to the Clerk of the House pursuant to procedures adopted by this House in rule 50 of our rules, had refused to answer certain questions propounded to him by a plaintiff in a civil libel suit brought against the Seattle Post-Intelligencer. Rather than provide Chairman Moss with an opportunity to present the court with the constitutional arguments and judicial precedents which properly insulate a Member of Congress from being subjected to questioning regarding his official actions the district court, at the behest of the private civil litigant placed Chairman Moss in contempt of court.

This week the Court of Appeals for the Ninth Circuit reviewed the actions of the district court and reversed the district court's decision. A three judge panel of the court of appeals unanimously remanded the case to the district court with instructions that the order holding Chairman Moss in contempt be vacated. The court of appeals noted that: "We conclude that the district court erred in holding Moss in contempt." The court found that: "Moss was in violation of no court order," and that, by appearing and testifying he had complied with the subpena served upon him to the extent necessary to render the district court's action improper.

The appellate court also stated that it agreed with Chairman Moss' contention that the district court had denied him the required and proper opportunity to present his explanation for refusing to answer certain questions.

While I applaud the action of the court of appeals in rectifying the wrong that was done by the district court I am deeply concerned, as I am sure all Members of the House are, that a Federal judge could, in such a cavalier fashion, mistreat a respected former Member of this body.

I would also like to take this opportunity to commend you, Mr. Speaker, and the leadership on both sides of the aisle, who have in this and many other occasions joined together in a nonpartisan fashion to vigilantly protect the rights of this institution.

I recommend to all Members of the House to read this court of appeals opinion which I am inserting in the RECORD at this point.

[U.S. Court of Appeals for the Ninth Circuit—No. 81-4567, USDC No. S-81-144]

FREMONT ENERGY CORPORATION, ET AL., PLAINTIFFS, *v.* THE SEATTLE POST INTELLIGENCER, THE HEARST CORPORATION, ET AL., DEFENDANTS, JOHN E. MOSS, CHAIRMAN, MOVANT-APPELLANT

OPINION

Argued and Submitted: June 18, 1982.

On Appeal from the United States District Court for the Eastern District of California Honorable Raul A. Ramirez, Presiding

Before: Merrill and Hug, Circuit Judges, and Brown,[1] District Judge.

Merrill, Circuit Judge:

John E. Moss appeals from an order of the district court for the Eastern District of California adjudging him in contempt of court for failure adequately to respond to the directions of a subpoena duces tecum.

Moss is a former member of Congress and the former chairman of the Subcommittee on Oversight and Investigation of the House Committee on Interstate and Foreign Commerce. In December 1978, that subcommittee issued a report on uranium lode mining claims on federal lands. The report apparently was critical of the activities of the Fremont Energy Corporation, and two articles in the Seattle Post Intelligencer reporting that criticism are the subject of a libel suit brought by Fremont against that newspaper in the Western District of Washington. Through its discovery efforts in that case Fremont learned that Dan Seligman, a reporter for the Post Intelligencer, had telephoned Moss concerning the report on January 23, 1979, some three weeks after Moss's final term in Congress had expired. Fremont thereupon secured the issuance of a subopena duces tecum by the Clerk of the District Court for the Eastern District of California, which subpoena was served upon Moss in Sacramento, California. It called on him to appear at the offices of the Sacramento Deposition Reporters of Sacramento, California to testify on behalf of plaintiffs. He was further instructed to bring with him "any and all reports, records, files, notes, memoranda, correspondence or other documents pertaining to certain remarks and comments more specifically described in attachment A" to the subopena.

The attachment identified five items as follows:

1. Certain remarks made by Moss to Seligman on or about January 23, 1979.

2. An official report compiled and issued by the subcommittee chaired by Congressman Moss—identified by plaintiff as the "Moss Report," also known as a Report on Uranium Lode Mining Claims on Federal Lands.

3. The subcommittee hearings on which the Moss Report was based.

4. Certain comments made to Seligman by a member of the subcommittee staff concerning Fremont Energy Corporation, the Moss Report, or the subcommittee hearings.

5. The procedures and rules of the subcommittee and of Congress during the course of the subcommittee hearings.

On March 4, 1981, in the District Court for the Eastern District of California, Moss moved to quash the subpoena claiming that its subject was privileged by the Speech or Debate Clause of the Constitution. On May 6, the court granted the motion insofar as the subpoena related to Moss' legislative activities (items 2, 3, and 5 of the attachment to the subpoena), and entered a protective order to that effect. As to the conversations with Seligman (items 1 and 4 of the attachment to the subpoena), however, the court denied the motion finding that they were not "part and parcel or essential to the deliberative process." This court dismissed Moss' appeal from the court's order for lack of finality.

Fremont conducted its deposition of Moss on August 26, 1981. Moss failed to bring to the deposition any documents meeting the specifications of items 1 and 4 of the subpoena and refused on Speech or Debate grounds to answer virtually all of Fremont's more probative questions. Fremont then applied for an order to show-cause why Moss should not be held in contempt. The court issued the requested order and scheduled a show cause hearing for October 19, 1981. At that hearing the court held Moss in contempt and ordered that he be committed to the custody of the United States Marshall "until such time as he should see fit to comply with and obey the specifics and mandate of that subpoena duces tecum." The court also awarded to Fremont the costs and attorneys fees it had incurred in taking the fruitless deposition and in pursuing the contempt order. The court stayed incarceration pending the outcome of this appeal. We conclude that the district court erred in holding Moss in contempt.[2]

We note first that because Moss was in violation of no court order, if he is in contempt, it is for failure to comply with the demands of the subpoena duces tecum. In this respect, Rule 45(f), Fed.R.Civ.P., provides:

"*Contempt.* Failure by any person without adequate excuse to obey a subpoena served upon him may be deemed a contempt of the court from which the subpoena issued."

The subpoena served on Moss directed him to appear and testify at a deposition. This Moss did. The subpoena did not direct Moss to answer any of the specific questions propounded by Fremont. If he is to be held in contempt for failure to answer questions, then, it must be pursuant to Rule 37(b)(1), Fed.R.Civ.P., which provides:

"*Sanctions by Court in District Where Deposition is Taken.* If a deponent fails to be sworn or to answer a question after being directed to do so by the court in the district in which the deposition is being taken, the failure may be considered a contempt of that court."

Since there was no such court direction,[3] Moss cannot be adjudged in contempt for failure to answer questions.

The subpoena also directed Moss to produce all documents meeting the specifications stated by Freemont. Whether any such documents actually exist, however, the record does not show. Without such a showing, we cannot be certain that a violation of the subpoena has occurred, and therefore cannot affirm the imposition of sanctions.

On a related point, Moss argues that the district court denied him an opportunity to show "adequate excuse" for any non-compliance with the subpoena and that such opportunity is required by Rule 45(f). We agree. At the contempt hearing, Moss offered to provide an explanation (which he termed "defenses") for his failure to produce. The court rejected this offer stating that it was interested only in the discussion of sanctions.

---

[1] Honorable Wesley E. Brown, Senior United States District Judge for the District of Kansas, sitting by designation.

[2] Participating as amicus curiae, the Seattle Post Intelligencer argues that the information Fremont seeks from Moss is not relevant to Fremont's libel suit under Washington law, and accordingly that we need not reach the merits of the contempt order. In this forum ancillary to the underlying libel action, we decline to pass judgment on the relevancy question. See *Horizons Titanium Corp.* v. *Norton Co., 290 F.2d 421, 425 (1st Cir. 1961).*

[3] The court's May 6 order granting in part and denying in part Moss's motion to quash the subpoena did not constitute an order "direct[ing]" him to answer specific questions. Indeed, as the court acknowledged, the order left the scope of permissible questioning far from clear.

Reversed and remanded with instructions that the order holding appellant in contempt be vacated.

MR. ROD O'CONNOR CHIEF OF VOLUNTARY SERVICES RECOGNIZED FOR OUTSTANDING SERVICE TO VETERANS AT THE ALBANY VA HOSPITAL

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. STRATTON) is recognized for 10 minutes.

Mr. STRATTON Mr. Speaker, it is my distinct honor to bring to the attention of my colleagues in the House the many accomplishments of my constituent Roderick J. O'Connor, Chief of Voluntary Service/Public Relations at the Albany, N.Y., Veterans' Administration Medical Center.

In recent weeks Rod has been honored by the New York State Legislature for his many years of service to veterans throughout the capital district area.

I think his achievements are monumental enough that Congress would want to be aware of them.

Rod O'Connor has been deeply involved in promoting the cause of our veterans in the Albany area for over 30 years. He has helped to nurture the Albany Veterans' Administration facility from its early days to the top-notch medical center it is today.

In my own experience I have dealt with Rod on numerous occasions in which he has gone out of his way to deal with the problems of individual veterans and follow them through to a successful conclusion. I have never seen any individual give so much of himself to help others.

After Navy service in World War II, Rod settled in Albany and began the very successful career that has led to the respect and support he has today in the Albany VA Medical Center as well as within the community at large. He has been honored by numerous veterans' organizations for his untiring efforts over a long period of time. These awards include the National Disabled American Veterans Award for Distinguished Service and the National American Legion Service Award for Outstanding Service to Hospitalized Veterans. The list goes on, but one can certainly see from the significance of these awards that the respect and admiration for the job Rod O'Connor does is universal.

I am honored to be able to bring Rod's accomplishments to the attention of my colleagues and hope that we in the Albany area will continue to benefit from his service for years to come.

RIGHTS OF AMERICAN CITIZENS OF ARMENIAN DESCENT MUST REMAIN INVIOLATE

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. PHILLIP BURTON) is recognized for 5 minutes.

● Mr. PHILLIP BURTON. Mr. Speaker, we have been hearing disturbing rumors recently that foreign agents may be dispatched to our shores to seek out and abduct citizens of the United States of Armenian ancestry.

We must send a message to the Turkish Government that we vigorously condemn any effort to go outside the bounds of international cooperation in searching out those who attacked Turkish diplomats. The rights of American citizens of Armenian descent must remain inviolate. We must not allow the summary justice of another nation to be visited upon our own citizens.●

NATIONAL SPINAL CORD INJURY MONTH

Mr. FOLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 249) providing for the designation of the month of October 1982 as "National Spinal Cord Injury Month," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 249

Whereas spinal cord injuries now paralyze over 500,000 Americans;

Whereas there are 20,000 new spinal cord injuries per year;

Whereas most spinal cord injuries involve young people and are thesult of motor vehicle accidents, sports and recreational activities, or of service in our Nation's Armed Forces;

Whereas lifetime costs to sustain a person with a spinal cord injury are between 1 and 5 million dollars, representing a major and expensive medical problem for this country;

Whereas research advances have permitted scientists to predict that we will be able to prevent and cure paralysis for hundreds of thousands of people;

Whereas the general public is unaware of the staggering costs and personal consequences of spinal cord injury; and

Whereas programs of the National Spinal Cord Injury Association, the Paralyzed Veterans of America and other similar organizations are dedicated to funding research and helping all paralyzed persons; and

Whereas an increase in the national awareness of the problem of spinal cord injuries may ease the burden of the victims and families of victims and may stimulate interest in increased research for the cure of spinal cord injury paralysis; Now, therefore be it

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled, That the month of October is designated as "National Spinal Cord Injury Month", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DEPOSITORY INSTITUTION ACT

The SPEAKER. Under a previous order of the House, the gentleman from Washington (Mr. FOLEY) is recognized for 5 minutes.

Mr. FOLEY. Mr. Speaker, earlier today on the adoption of the conference report on H.R. 6269, which was adopted by voice vote, I had opposed the adoption of the rule because of circumstances which I felt indicated the rule should be in a slightly different form.

This is the Depository Institution Act.

I would like to at this point state my very strong support for the conference report on the depository institutions legislation (H.R. 6267).

As someone who supported the various House bills that were considered as part of the conference, I feel very strongly that the conference report merits the support of every Member in this Chamber. I should point out that I voted against the rule to the conference report on H.R. 6267 not because I had any reservations regarding the content of the conference report, which I just stated I emphatically did not, but because I believe that the rule, particularly with its closed provision that was the subject of debate during the consideration of the rule, was unwarranted and denied my colleagues the opportunity to reflect certain very specific concerns that are strongly felt in their States.

However, let me again state that I fully support the conference report on depository institutions and would like to commend the conferees for their thoughtful work on this much needed legislation. It is my firm belief that it will be of great benefit and assistance to the thrift industry in the Pacific Northwest and to the entire country.

LEGISLATIVE PROGRAM

(Mr. UDALL asked and was given permission to address the House for 1 minute.)

Mr. UDALL. Mr. Speaker, could the distinguished majority whip tell us something about the program for the last week in November?

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. UDALL. I yield to the gentleman.

Mr. FOLEY. I will be delighted to inform the gentleman from Arizona that we have adopted today an adjournment resolution which calls for the House to return at noon on November 29.

At that time one of the earliest bills that will be considered, it is my understanding, is the nuclear regulatory legislation that was scheduled for this week and which unfortunately, because of the constraint of time, could not be considered before adjournment very shortly.

But the gentleman from Arizona, who has devoted so much time to that legislation and has made such strenuous and important contributions to it, along with some of the other Members and other committees as well as the Interior and Insular Affairs Committee, I think should be assured that the Speaker has cleared that legislation for the earliest possible consideration on the week of our return.

□ 0050

Mr. STRATTON. Mr. Speaker, will the distinguished majority whip yield?

Mr. FOLEY. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I am delighted to know that the Speaker has indicated that that conference report will be the first order of business when we return. I think in all fairness I should advise the leadership that, unfortunately, the conference report, as it came out of the other body, is very seriously flawed. There are three sections in the bill which are nongermane, which would have been ruled out of order had that particular item been proposed to the bill in the House. As the representative of the Armed Services Committee which has a very profound interest in matters nuclear, I will be constrained to raise those points of order at the appropriate time. It does not come as any surprise to my friend, the gentleman from Arizona, but I have enjoyed the opportunity of remaining here until the last moments so that we might share this thought together.

Mr. UDALL. We will work with the gentleman, if the gentleman will yield, between now and the time that it is brought up. I think the Armed Services Committee very properly has some very serious questions. We think we can resolve them or at least satisfy the gentleman from New York about some of them before we bring it to the floor.

REQUEST TO CONSIDER H.R. 6655, SMALL BUSINESS SALVAGE TIMBER SALES ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture be discharged from further consideration of the bill (H.R. 6655) to require the Secretary of the Interior to offer to sell exclusively to small business concerns not less than 30 percent of the quantity of salvage timber which is harvested from land managed by the Bureau of Land Management and offered for sale in any fiscal year, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. HARTNETT. Mr. Speaker, I reserve the right to object.

Mr. FOLEY. Mr. Speaker, will the gentleman from South Carolina yield?

Mr. HARTNETT. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, it is my understanding that if we could ask the gentleman from Ohio to call up the legislation dealing with Wolf Trap and have it considered at this time, the other bills which the gentleman has asked to have considered would subsequently be brought up without objection.

Is my understanding correct on that.

Mr. HARTNETT. That is my understanding. If you would go ahead and consider the Wolf Trap bill, I would have no objection. I could not understand the reason for the change in order, anyway.

Mr. FOLEY. If the gentleman will yield, Mr. Speaker, I wonder if I could ask the gentleman from Ohio (Mr. SEIBERLING) if he would consider at this time bringing before the House the legislation dealing with Wolf Trap.

Mr. HARTNETT. Further reserving the right to object, Mr. Speaker, I would appreciate, if the gentleman has no specific objection to the order in which the bills are brought up, if he would help me help my friend by talking about Wolf Trap first. I would be indebted to the gentleman.

Mr. SEIBERLING. If the gentleman will yield, I have no objection to taking them up in that order.

Would the gentleman then assure me that he would not object?

Mr. HARTNETT. I will assure the gentleman that, yes.

Mr. SEIBERLING. That is perfectly all right with me. I was just going in the same order that I started out with.

Mr. HARTNETT. Mr. Speaker, further reserving the right to object, there seems to be some pride of authorship, and I just thought that since Wolf Trap is so important to the Nation, it ought to come first.

Mr. SEIBERLING. Well, let us get ourselves out of the Wolf Trap.

Mr. Speaker, I withdraw my unanimous consent request.

PROVIDING FINANCIAL ASSISTANCE TO WOLF TRAP FOUNDATION FOR THE PERFORMING ARTS

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 7293) to provide financial assistance to the Wolf Trap Foundation for the Performing Arts for reconstruction of the Filene Center in Wolf Trap Farm Park, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the bill, as follows:

H.R. 7293

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Act entitled "An Act to provide for the establishment of the Wolf Trap Farm Park in Fairfax County, Virginia, and for other purposes", approved October 15, 1966 (16 U.S.C. 284-284b), is amended by adding at the end the following new sections:

"SEC. 4. (a) The Secretary is authorized to make available to the Foundation, in the form of a grant, $9,000,000 to be used for the reconstruction of the Center, subject to the provisions of this section. Such grant shall be made available in increments as needed for such purpose and only if the Foundation has agreed under terms and conditions satisfactory to the Secretary to provide, from non-Federal sources, sufficient contributions on a timely basis to complete the reconstruction of the Center.

"(b) The Secretary may make loans to the Foundation to the extent needed to complete the reconstruction of the Center and to provide for noise mitigation measures, including those on adjacent public property, in an amount equal to twice the amount of non-Federal contributions received, and provided, by the Foundation for such reconstruction work. The total amount of such loans may not exceed $8,000,000. Loans made under this subsection shall be repaid in full, with interest on any unpaid obligation at a rate determined by the Secretary of the Treasury, taking into consideration current market yields on outstanding marketing obligations of the United States with remaining periods to maturity comparable to the maturity of the loan, plus such additional charge, if any, as the Secretary may determine, for the purpose of covering other costs of servicing the loan. In determining the terms and conditions governing any loan, the Secretary shall fix a term of not more than five years from the date the loan agreement is executed.

"(c) No grants or loans may be made under this section unless the Secretary has entered into a written agreement with the Foundation under which the Foundation agrees—

"(1) to expend all funds for the reconstruction of the Center (and for construction or reconstruction of any related structures or fixtures) only in accordance with circulars published by the Office of Management and Budget applicable to Federal grants to nonprofit organizations, and in accordance with the provisions of the Davis-Bacon Act (40 U.S.C. 276a-a7);

"(2) to comply with such other terms and conditions as the Secretary deems appropriate; and

"(3) to maintain, during the term of the cooperative agreement described in section (5), and at the Foundation's expense, insurance on the Center respecting such risks, in such amounts, and containing such terms and conditions, as are satisfactory to the Secretary. Any repairs or reconstruction carried out with Funds obtained from the

receipt of the proceeds of any such insurance shall be subject to the approval of the Secretary.

"(d) The Secretary shall be responsible for overseeing the reconstruction and shall have final approval over the plans for, and location and design of, the Center, and the Foundation shall be responsible for managing the construction activities, including the selection (in accordance with the requirements referred to in paragraphs (1) and (2) of subsection (c)) of persons to perform architectural, engineering, construction, and related services.

"(e) No grants or loans may be made under this section unless the Secretary has received what the Secretary deems to be adequate written assurance from the Administrator of the Federal Aviation Administration that any easement granted to the Commonwealth of Virginia by the Administrator for construction of the Dulles Toll Road will contain noise standards ("A" weighted energy average sound level of 52 to 54 dB) and other standards set forth in the Final Environmental Impact Statement for the Dulles Airport Access Road Outer Parallel Toll Roads, prepared by the Federal Aviation Administration and issued in May of 1982, legally enforceable by the Administrator and by the Secretary which are adequate to protect the Center from undue noise pollution and other environmental degradation attributable to such toll road both during and after its construction, and will also contain legally enforceable assurances that the Commonwealth of Virginia will promptly take measures to achieve the noise levels specified in the easement. Such measures may include a partial or total ban on truck traffic on the toll road or other mitigation recommended by the Secretary and the Administrator.

"(f) The Secretary may also provide support services, as requested by the Foundation, on a reimbursable basis, for purposes of reconstruction of the Center.

"SEC. 5. (a) The Secretary is authorized and directed to enter into a cooperative agreement with the Foundation respecting the presentation of performing arts and related educational and cultural programs at the Center, and in such other areas of the park as may be agreed to. The Secretary may provide technical and financial assistance under such a cooperative agreement for such purposes, pursuant to such terms and conditions as he deems appropriate.

"(b) As a condition of entering into a cooperative agreement under this section, the Secretary shall require that—

"(1) the Foundation maintain the insurance described in section 4(c)(3) of this Act; and

"(2) the Foundation maintain its status as an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 and exempt from taxation under section 501(a) of such Code.

"(c) A cooperative agreement under this section shall provide that—

"(1) the Secretary and the Comptroller General of the United States or their duly authorized representatives shall have access to any pertinent books, documents, papers, and records of the Foundation to make audits, examinations, excerpts, and transcripts;

"(2) the Foundation shall prepare an annual report to the Secretary, which shall also be submitted to the appropriate committees of the United States House of Representatives and the United States Senate, summarizing the activities of the previous year (together with a comparison of goals and objectives with actual accomplishments) and presenting a plan for the forthcoming year; and

"(3) such cooperative agreement may be terminated at the convenience of the United States if the Secretary determines that such termination is required in the public interest.

The cooperative agreement shall contain such other terms and conditions as the Secretary deems appropriate. Until such cooperative agreement is entered into, nothing in this section shall be construed to affect or impair the validity of the agreement between the National Park Service and the Foundation dated September 16, 1980. Such agreement shall remain in force and effect until terminated under the terms and conditions of such agreement or until an agreement is entered into under this section. Nothing in this section shall be construed to affect the authority of the Secretary under any other provison of law to enter into a contract or an agreement, not conflicting with the cooperative agreement described in this section, with any other organization or entity with respect to the administration of the park.

"SEC. 6. All right, title and interest in the Center shall be vested in the United States. Nothing in this Act shall be construed to provide that the Foundations shall be considered to be a Federal agency or instrumentality for purposes of applying any law or regulation of the United States or any State.

"SEC. 7. Following disbursement of any grant under this Act for the reconstruction of the Center, the Secretary shall submit quarterly reports to the appropriate committees of the United States House of Representatives and the United States Senate setting forth the progress of the reconstruction, any present or anticipated problems of any type, the financial projections for remaining work, and the progress made by the Foundation in raising funds for purposes of the reconstruction. The report shall set forth quarterly goals respecting the reconstruction of the Center and shall compare the performance during the prior quarter to the goals set forth for that quarter.

"SEC. 8. (a) The Secretary shall cooperate with, and seek cooperation from, other Federal, State, and local agencies (including the Federal Aviation Administration) to protect the park from undue noise intrusions, air pollution, and visual degradation.

"(b) The Secretary shall monitor noise pollution which is associated with the Dulles road corridor (including the airport access and toll roads) and shall notify the Federal Aviation Administration, the Commonwealth of Virginia, and the appropriate committees of Congress if, after conferring with the Administrator of the Federal Aviation Administration, the Secretary finds that such noise pollution is exceeding the standards set forth in section 4(e). Within sixty days after any such notification, the Administrator of the Federal Aviation Administration shall take steps to reduce noise pollution so as to conform to such standards. The Secretary or the Foundation may bring an action in the United States District Court for the District of Columbia to enjoin any violation by the Commonwealth of Virginia of the easement referred in section 4(e).

"SEC. 9. A general management plan for the park shall be prepared and periodically revised in a timely manner in accordance with the provisions of section 12(b) of the Act of August 18, 1970 (84 Stat. 825; 16 U.S.C. 1a through 1a-7). Such plan shall be submitted to the Committee on Interior and Insular Affairs of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States no later than January 1, 1984, and such revisions shall be submitted to such committees of the Congress in a timely manner.

"SEC. 10. There is authorized to be appropriated not more than $17,000,000 to carry out sections 4 to 5 of this Act. No authority under this Act to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriations Acts.

"SEC. 11. As used in this Act, the term—

"(1) 'Secretary' means the Secretary of the Interior.

"(2) 'Park' means the Wolf Trap Farm Park established under this Act, including the Center.

"(3) 'Center' means the Filene Center in the Park. Such term includes all real property and fixtures which are within or directly related to the Filene Center.

"(4) 'Foundation' means the Wolf Trap Foundation for the Performing Arts organized pursuant to the District of Columbia Nonprofit Organization Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SMALL BUSINESS SALVAGE TIMBER SALES ACT OF 1982

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that the Committee on Agriculture be discharged from further consideration of the bill (H.R. 6655) to require the Secretary of the Interior to offer to sell exclusively to small business concerns not less than 30 percent of the quantity of salvage timber which is harvested from land managed by the Bureau of Land Management and offered for sale in any fiscal year, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the bill, as follows:

H.R. 6655

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Small Business Salvage Timber Sales Act of 1982".

SALES OF SALVAGE TIMBER TO SMALL BUSINESS CONCERNS

SEC. 2. (a) Of the aggregate quantity of salvage timber which is harvested from land managed by the Bureau of Land Management and which is offered for sale by the Secretary in any fiscal year, not less than 30 per centum shall be offered for sale by the Secretary to small business concerns in the manner specified in subsection (b).

(b)(1) Any offer made by the Secretary under subsection (a) to sell salvage timber to small business concerns shall provide that the Secretary will sell such salvage timber to any person who, not later than the expiration of the forty-five-day period beginning on the date such offer is made—

(A) certifies, in the manner specified by the Secretary, that such person is a small business concern, and

(B) submits a bid to buy such salvage timber the amount of which—

(i) exceeds the amount of any other bid to buy such salvage timber submitted during such period by any other person properly certified as a small business concern, and

(ii) is not less than the fair market value of such salvage timber.

(2) If, before the expiration of such period, the Secretary does not receive a bid to buy such salvage timber the amount of which is not less than the fair market value of such salvage timber from a person properly certified as a small business concern, then the Secretary may offer to sell such salvage timber to any person.

SALES OF SALVAGE TIMBER AND LAND AND RESOURCE MANAGEMENT PLANS

SEC. 3. Any sale of salvage timber harvested from land managed by the Bureau of Land Management made by the Secretary shall be consistent with any applicable land and resource management plan, especially with regard to wildlife managment.

DEFINITIONS

SEC. 4. For purposes of this Act—

(1) the term "Secretary" means the Secretary of the Interior,

(2) the term "small business concern" means any person who—

(A) is primarily engaged in the logging or forest products industry,

(B) is not owned or controlled by any other person, and

(C) does not employ more than ten individuals, and

(3) the term "salvage timber" means trees which are dead, dying, damaged, or down.

SCOPE OF APPLICATION

SEC. 5. Section 2 of this Act shall not apply to offers to sell salvage timber in any fiscal year beginning before the date of the enactment of this Act.

COMMITTEE AMENDMENTS

The SPEAKER. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: Page 2, line 5, after the word "Management" insert "(exclusive of any such timber which is incidental to the normal annual timber sale offering)".

Page 2, line 6, strike "shall" and in lieu thereof insert "may".

Page 2, lines 12 and 13, strike "forty-five-day" and in lieu thereof insert "fifteen-day".

Page 3, line 15, after "Interior," insert "except that in section six such term means the Secretary of Agriculture,".

Page 3, line 20, strike paragraph (B) and in lieu thereof add a new paragraph as follows:

"(B) is not owned or controlled by any other person, or corporation which is not a small business as defined in this Act, and".

Page 3, line 22, strike "ten" and in lieu thereof insert "twenty-five".

Page 3, strike line 25, and in lieu thereof insert "are insect-infested, dead, damaged, or down, and associated trees.".

Page 4, line 4, after the period add a new sentence as follows:

"The requirements of this Act may be waived by the Secretary in cases of catastrophic timber losses resulting from wind, fire, earthquake, volcanic eruption, mass soil movement, or other emergencies when the Secretary determines that salvage timber must be removed in such quantities or in such limited periods of time that application of such requirements would be impracticable or would result in significant waste of salvage timber.".

Page 4, line 4, insert a new section as follows:

"SEC. 6. (a) Not withstanding any other provisions of law, the Secretary of Agriculture, referred to in this section as "the Secretary", may sell individual trees or small numbers of trees located on National Forest System lands which are determined by the Secretary to be dead, diseased, damaged, dying, or down, as low volume per acre sanitation timber harvests under the following conditions:

(1) the appraised value of the sale is less than $10,000;

(2) the appraised value of the sale is equal to or greater than the estimated costs associated with the sale; and

(3) the sale is determined by the Secretary to be consistent with multiple use management.

(b) Sales under this section need not be subject to advertising or competitive bidding but may be made pursuant to negotiations with persons who have located an indicated an interest in purchasing timber described in subsection (a).

(c) (1) The Secretary shall establish and administer a special small salvage fund into which all proceeds from the sale of trees under this section shall be deposited. To the extent provided by appropriations acts, amounts in the fund shall be available to the Secretary for payment of all expenses related to such sales.

(2) The Secretary shall periodically transfer any amounts in the fund in excess of $1,000,000 to the Secretary of the Treasury to be credited to miscellaneous receipts.

(d) the Secretary shall issue such regulations as may be necessary to carry the provisions of this section.

(e) the provisions of this section shall become effective on October 1, 1982.".

page 4, after line 4, insert a new section as follows:

"SEC. 7. The Secretary of the Interior may convey, without consideration, to any person claiming to have been deprived of title to any portion of real property in Lane County, Oregon, as a result of the Bureau of Land Management survey entitled" Resurvey and Subdivision of Section 31, Township 21 South, Range 1 West", dated June 27, 1957, all right, title, an interest of the Untied States in and to such portion of real property if application therefor, accompanied by such proof of title, description of land, and other information, as the Secretary of the Interior may require, is received by such Secretary within 5 years after the date of enactment of this Act.".

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendments be considered as read, printed in the RECORD, and that they be considered en bloc.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to authorize the Secretary of the Interior to offer to sell exclusively to small business concerns not less than 30 percentum of the quantity of salvage timber which is harvested from land managed by the Bureau of Land Management and offered for sale in any fiscal year, and for other purposes."

A motion to reconsider was laid on the table.

REVISING BOUNDARIES OF SARATOGA NATIONAL HISTORICAL PARK IN THE STATE OF NEW YORK

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1540) to revise the boundaries of the Saratoga National Historical Park in the State of New York, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1540

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. In order to preserve certain lands historically associated with the Battle of Saratoga and to facilitate the administration and interpretation of the Saratoga National Historical Park (hereinafter in this Act referred to as "the park"), the boundary of the park is hereby revised to include the area generally depicted on the map entitled "Saratoga National Historical Park," numbered 80,001, and dated March 23, 1979.

Sec. 2. (a) Except as provided in subsection (b), within the boundary of the park, the Secretary of the Interior (hereinafter in this act referred to as the "Secretary"), is authorized to acquire lands and interests therein by donation, purchase with donated or appropriated funds, or exchange. Except for the tract identified on the aforesaid map as tract number 01-132, which was authorized to be acquired by section 115 of the Act of March 5, 1980 (94 Stat. 71), The Secretary may not acquire (except by donation) fee simple title to those lands depicted on the map as proposed for less than fee acquisition. The map shall be on file and available for public inspection in the office of the National Park Service, Department of the Interior.

(b)(1) Appropriated funds may not be used to acquire lands or interests therein within the park without the consent of the owner except when—

(A) the Secretary determines that such owner is subjecting, or is about to subject, the property to actions which would significantly degrade its value as a component of the park; or

(B) the owner fails to comply with the provisions of paragraph (2).

The Secretary shall immediately notify the owner in writing of any determination under subparagraph (A). If the owner immediately ceases the activity subject to such notification, the Secretary shall attempt to negotiate a mutually satisfactory solution prior to exercising any authority provided by subsection (a) of this section.

(2) If an owner of lands or interests therein within the park intends to transfer any such lands or interest to persons other than the owner's immediate family, the owner shall notify the Secretary in writing of such intention. Within 45 days after receipt of such notice, the Secretary shall respond in writing as to his interest in exercising a right of first refusal to purchase fee title or lesser interests. If, within such 45 days, the Secretary declines to respond in writing or expresses no interest in exercising such right, the owner may proceed to transfer such interests. If the Secretary responds in writing within such 45 days and expresses an interest and intention to exercise a right of first refusal, the Secretary shall initiate an action to exercise such right within 90 days after the date of the Secretary's response. If the Secretary fails to initiate action to exercise such right within such 90 days, the owner may proceed to otherwise transfer such interests. As used in this subsection with respect to a property owner, the term "immediate family" means the spouse, brother, sister, parent, or child of such property owner. Such term includes a person bearing such relationships through adoption and a stepchild shall be treated as a natural born child for purposes of determining such relationship.

(c) Subsection (b) shall not apply with respect to tract number 01-142.

(d) When an owner of property within the park desires to take an action with respect to his property, he shall request, in writing, a prompt written determination from the Secretary as to the likelihood of such action provoking a determination by the Secretary under the provisions of subsection (b)(1)(A). The Secretary is thereupon directed to promptly issue such owner a certificate of exemption from condemnation for such actions proposed by the owner which the Secretary determines to be compatible with the purposes of the park.

(e)(1) An owner of improved property which is used solely for noncommercial residential purposes, or for commercial agricultural purposes found to be compatible with the General Management Plan, on the date of its acquisition by the Secretary may retain, as a condition of such an acquisition, a right of use and occupancy of the property for such residential or agricultural purposes. The right retained may be for a definite term which shall not exceed twenty-five years, or in lieu thereof, for a term ending at the death of the owner. The Secretary shall pay to the owner the fair market value of the property on the date of such acquisition, less the fair market value, of the term retained by the owner.

(2) Except for tract number 01-142, paragraph (1) shall not apply to property which the Secretary determines to be necessary for the purposes of administration, development, access, or public use.

(f) Any owner of lands or interests therein within the park who desires to have such lands or interests acquired by the Secretary may notify the Secretary in writing of such desire. It is the intention of the Congress that, upon receipt of such notification, and on the condition that such acquisition will transpire at fair market value and in accordance with other conditions acceptable to the Secretary, the Secretary shall endeavor to acquire such lands or interests therein within six months of the date of receipt of such notice from the owner.

SEC. 3. Section 2 of the Act approved June 22, 1948 (62 Stat. 571; 16 U.S.C. 159d), is amended to read as follows:

"SEC. 2. The Secretary of the Interior is authorized to accept all or any portion of the General Philip Schuyler Mansion property, real and personal, situated at Schuylerville, New York, comprising approximately fifty acres.".

SEC. 4. There are hereby authorized to be appropriated after October 1, 1983, such sums as may be necessary, but not to exceed $1,000,000 for the acquisition of lands and interests therein, to carry out the purposes of this Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REVISING BOUNDARIES OF CUMBERLAND ISLAND NATIONAL SEASHORE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 6882) to revise the boundaries of the Cumberland Island National Seashore and to provide compensation for certain facilities on the seashore.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the bill, as follows:

H.R. 6882

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) notwithstanding any other provision of law, the Secretary of the Interior shall reimburse the Okefenoke Rural Electric Membership Corporation for the cost incurred by such corporation in installing transmission lines, transformers, and electric meters on Cumberland Island in the State of Georgia before the date of the enactment of this Act. Such reimbursements shall provide for payment of only the costs of so much of such facilities as are used for purposes of supplying electric energy to that area on Cumberland Island which is within the Cumberland Island National Seashore at the time such payment is made. The amount of such payment shall be reduced by an amount equal to the sum of all reimbursement for such facilities paid by any governmental or nongovernmental source to the Okefenoke Rural Electric Membership Corporation before the date on which payment is made under this Act.

(b) There is authorized to be appropriated to carry out the provisions of subsection (a) not more than $338,000.

SEC. 2. Section 1 of the Act of October 23, 1972 (86 Stat. 1066), is amended by striking out "numbered CUIS 40,000D" and substituting "numbered CUIS 40,000E".

AMENDMENT IN THE NATURE OF A SUBSTITUTE

Mr. SEIBERLING. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. SEIBERLING:

Strike out all after the enacting clause and substitute:

That (a) notwithstanding any other provision of law, the Secretary of the Interior shall reimburse the Okefnoke Rural Electric Membership Corporation for the cost incurred by such corporation in installing transmission lines, transformers, and electric meters which serve the administrative needs of the Federal Government within Cumberland Island National Seashore in the State of Georgia. No such payment shall be made unless—

(1) the Corporation has entered into a written agreement with the Secretary which provides for—

(A) the continued adequate provision of electrical service by the Corporation at reasonable rates to satisfy the administrative needs of the Seashore, as determined by the Secretary; and

(B) the prompt repayment to the Secretary of any amounts paid by the Secretary under this Act, plus interest, in the event of the Corporation's future failure to provide electrical service under terms provided pursuant to paragraph (A); and

(2) the Secretary has performed an audit of the Corporation's records to determine the amount appropriately due the Corporation under the terms of this Act, which amount so determined by the Secretary shall constitute the maximum amount to be paid.

The amount so determined by the Secretary shall be reduced by an amount equal to the sum of all reimbursement for such facilities paid to the Corporation by any governmental or non-governmental source before the date on which payment is made by the Secretary under this Act.

(b) There is authorized to be appropriated to carry out the provisions of subsection (a) not more than $338,000.

SEC. 2. Section 1 of the Act of October 23, 1972 (86 Stat. 1066), is amended by striking out "numbered CUIS 40,000D" and substituting "numbered CUIS 40,000E".

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER. The question is on the amendment in the nature of a substitute offered by the gentleman from Ohio (Mr. SEIBERLING).

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 7293, H.R. 6655, S. 1540, and H.R. 6882.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

AMENDING SECTIONS 10 AND 11 OF THE ACT TO ESTABLISH SLEEPING BEAR DUNES NATIONAL LAKESHORE IN THE STATE OF MICHIGAN

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3787) to amend sections 10 and 11 of the act of October 21, 1970 (Public Law 91-479; 16 U.S.C. 460x), entitled "An act to establish in the State of Michigan the Sleeping Bear Dunes National Lakeshore, and for other purposes," with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 9, line 15, strike out all after "(c)." down to and including line 19, and insert "If the Secretary and such willing seller are unable to agree to a fair purchase price, that question may, by mutual consent be submitted to the appropriate United States District Court for adjudication.".

Page 10, strike out line 24 and all that follows over to and including "condemnation" in line 4 on page 11, and insert "If the owner does not accept such offer, the Secretary may file for condemnation".

Mr. SEIBERLING (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. BROWN of Colorado. Reserving the right to object, Mr. Speaker, I would like to inquire of the gentleman from Ohio what the change in the bill is.

Mr. SEIBERLING. If the gentleman will yield, the change in the bill was, first, to drop out a special fund which we provided from the proceeds of land sales; second, to drop out the arbitration clause, which the Senate objected to; and, third, to impose a ceiling, a specific ceiling, on the authorizations for land acquisition.

□ 0100

Mr. BROWN of Colorado. Does the measure, as amended, provide for expenditures during fiscal 1983?

Mr. SEIBERLING. No.

Mr. BROWN of Colorado. I thank the gentleman, and Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Ohio?

There was no objection.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair would advise the Members that we are waiting for the defense measure to come back from the Senate. We are waiting for the Senate to approve the adjournment resolution.

In the meantime we understand that there is a compromise on the Defense Production Act. That will be the only piece of legislation.

LEGISLATIVE PROGRAM

(Mr. FOLEY asked and was given permission to address the House for 1 minute.)

Mr. FOLEY. Mr. Speaker, this is the time of year when Members are about to depart to their respective districts for the purpose of discussing with their constituents the issues of this political season.

As we await the final action of the Defense Production Act and the adjournment resolution from the Senate, I am sure all of us on this side of this aisle, members of the leadership and members of the Democratic Party would like to wish our colleagues on the other side of the aisle a happy, a pleasant, if not totally successful recess, at least one in which they will have an opportunity to discuss the issues and to meet the challenges of the period.

We do seriously want to thank our colleagues for their cooperation on the matters that have been brought forth before the House tonight. I know it has been late. One that sometimes tries the patience of Members. But we have disposed of a number of important issues and matters.

We have only one or two left, at which time I think we can look forward to the adjournment resolution.

The parties who have previously discussed the Defense Production Act are attempting now to arrange a compromise on the extension of that act for a 6-month period, and following that it is my understanding that the Senate will take up the adjournment resolution and complete that matter, and that is the only other matter that stands betwen our own adjournment.

DEFENSE PRODUCTION ACT AMENDMENTS OF 1982

Mr. PATTERSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 2375) to extend the Defense Production Act of 1950; to amend section 719 of such act to transfer the authorities and functions of the Cost Accounting Standards Board; to establish a Commission on Strategic and Critical Materials Stock Piling Needs; and to establish a White House Conference on Productivity, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. BRODHEAD. Reserving the right to object, Mr. Speaker, I do so for the purpose of clarifying with the gentleman from Arkansas (Mr. BETHUNE) and with the majority whip, that an agreement has been reached that the House will have an opportunity to consider H.R. 5540 during the upcoming lameduck session. Is that understanding correct?

Mr. BETHUNE. Mr. Speaker, will the gentleman yield?

Mr. BRODHEAD. I yield to the gentleman from Arkansas.

Mr. BETHUNE. Of course we have considered H.R. 5540 for some 10 hours, and had exhaustive debate on it. I have no objection whatsoever to reconsidering that at any time. I believe in bringing bills to the floor and discussing them, and would certainly have no objection to that.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Speaker, it is our understanding that with this colloquy between the gentleman from Arkansas and the gentleman from Michigan the matter will be scheduled for further consideration during the period of the postelection session.

With that understanding, I believe that the parties are agreed to proceed now with the consideration of an extension of the Defense Production Act.

Mr. BRODHEAD. Mr. Speaker, based on those assurances from the gentleman from Arkansas (Mr. BETHUNE) and the gentleman from Washington (Mr. FOLEY), I shall not object.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the text of the Senate bill, S. 2375.

(For S. 2375, see prior proceedings of the House today.)

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. PATTERSON

Mr. PATTERSON. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. PATTERSON: Strike out all after the enacting clause and insert in lieu thereof the following:

That the first sentence of section 717(a) of the Defense Production Act of 1950 (50 U.S.C. App. 2166(a)) is amended by striking

out "September 30, 1982" and inserting in lieu thereof "March 31, 1983."

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. PATTERSON

Mr. PATTERSON. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. PATTERSON: Amend the title to read "A bill to extend the expiration date of the Defense Production Act of 1950."

The title amendment was agreed to.

A motion to reconsider was laid on the table.

REQUEST FOR CONSIDERATION OF S. 2398, PROVIDING FOR INCREASED PARTICIPATION BY UNITED STATES IN AFRICAN DEVELOPMENT FUND

Mr. PATTERSON. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the Senate bill (S. 2398) to provide for increased participation by the United States in the African Development Fund and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. WYLIE. Reserving the right to object, Mr. Speaker, I do so to ask the gentleman from California to explain the provisions of the bill.

Mr. PATTERSON. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from California.

Mr. PATTERSON. I thank the gentleman for yielding.

I would indicate to the gentleman that this bill was passed by the subcommittee that I chair with full participation, all Members voting, and it was passed on a voice vote without exception on the full Committee on Banking, Finance and Urban Affairs.

The bill has also been passed by the Senate. And the President has written all Members of Congress in support of this legislation. It would essentially provide for up to $50 million per year for a period of 3 years of participation in the African Development Fund. The United States has honored that commitment for a number of years. This completes the cycle. This is included in the budget. This has been recommended by the President, by the Secretary of State and the Secretary of Treasury.

Appropriation of these funds would be authorized for appropriation at the rate of $50 million a year for the fiscal years 1983, 1984, and 1985. Outlays would lag considerably beyond the approval of the participation. The U.S. contribution will come to about 14.2 percent of the total replenishment.

The President requested this legislation, has written to both the Speaker, the minority leader, and Members of Congress to ask for its prompt consideration. Efforts to get it on the calendar over the past few weeks have been unsuccessful because of the press of House business. Now we have an opportunity this evening to pass this legislation, and I would urge the House to do so.

Mr. WYLIE. Mr. Speaker, further reserving the right to object, and I will not object, I will say that the President has requested that this legislation be enacted and the Secretary of State has suggested that it should be passed before the lameduck session.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California (Mr. PATTERSON).

Mr. BROWN of California. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. YOUNG of Florida (at the request of Mr. MICHEL) for today and yesterday, on account of attending a funeral.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MOLINARI) to revise and extend their remarks and include extraneous matter:)

Mr. LEACH of Iowa, for 60 minutes, today.

Mr. SHUMWAY, for 30 minutes, today.

Mr. KEMP, for 60 minutes, today.

Mr. COLLINS of Texas, for 30 minutes, today.

Mr. CORCORAN, for 5 minutes, today.

(The following Members (at the request of Mr. YOUNG of Missouri) to revise and extend their remarks and include extraneous matter:)

SENATE BILLS AND JOINT RESOLUTIONS REFERRED

Bills and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 534. An act for the relief of Frank L. Hulsey; to the Committee on the Judiciary.

S. 1088. An act to promote the goal of economic and social self-sufficiency for American Indians, Hawaiian Natives, and Alaskan Natives; to the Committee on Interior and Insular Affairs.

S. 1510. An act for the relief of Apolonio P. Tumamao and others; to the Committee on the Judiciary.

S. 2297. An act to amend title 11, United States Code, to improve the protections for shopping centers and their tenants under the Bankruptcy Code; to the Committee on the Judiciary.

S. 2552. An act to protect the safety of intelligence personnel and certain other persons; to the Committee on the Judiciary.

S. 2671. An act to provide for the establishment of a Commission on the Bicentennial of the Constitution; to the Committee on Post Office and Civil Service.

S. 3002. An act to increase the authorization of appropriations for the Allen J. Ellender Fellowship program, and for other purposes; to the Committee on the Education and Labor.

S.J. Res. 228. Joint resolution to provide for the designation of the week beginning on October 24, 1982, as "National Tourette Syndrome Awareness Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 236. Joint resolution to designate the week of October 24 through 28, 1982, as "National Water Resources Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 237. Joint resolution designating November 14, 1982, as "National Retired Teachers Day"; to the Committee on Post Office and Civil Service.

S.J. Res. 246. Joint resolution to authorize and request the President of the United States to issue a proclamation designating the week of October 3, 1982, through October 9, 1982, as "National Port Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 260. Joint resolution to designate the period commencing January 1, 1983, and ending December 31, as the Tricentennial Anniversary Year of German Settlement in America"; to the Committee on Post Office and Civil Services.

SENATE ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The SPEAKER announced his signature to enrolled bills and joint resolution of the Senate of the following title:

S. 188. An act to authorize the Secretary of Agriculture to convey certain lands in the Gallatin National Forest, and for other purposes;

S. 1777. An act relating to the establishment of a permanent boundary for that portion of the Acadia National Park as lies within the town of Isle au Haut, Maine;

S. 2586. An act to authorize certain construction at military installation for fiscal year 1983, and for other purposes.

S. 2874. An act to amend the act of March 16, 1934, as amended, to credit entrance fees for the migratory-bird hunting and conservation stamp contest to the account which pays for the administration of the contest;

S.J. Res. 197. Joint resolution to provide for the designation of the week of October 17 through October 23, 1982, as "Myasthenia Gravis Awareness Week"; and.

S.J. Res. 235. Joint resolution to proclaim March 21, 1983, as "National Agriculture Day."

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2035. An act to authorize certain employees of the U.S. Department of Agriculture charged with the enforcement of animal quarantine laws to carry firearms for self-protection and to improve the quality of table grapes for marketing in the United States;

H.R. 5930. An act to extend the aviation insurance program for 5 years;

H.R. 6422. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain land previously conveyed to the State of Connecticut;

H.R. 6782. An act to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans, to increase the rates of dependency and indemnity compensation for surviving spouses and children, and to modify and improve the educational assistance programs administered by the Department of Labor; and for other purposes; and

H.J. Res. 599. Joint resolution making continuing appropriations for the fiscal year 1983, and for other purposes.

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills and a joint resolution of the House of the following title:

On September 30, 1982:

H.R. 4623. An act to amend titles 10, 14, 37, and 38, United States Code, to codify recent law and to improve the Code.

On October 1, 1982:

H.R. 3881. An act to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain lands conveyed to the Arkansas Forestry Commission, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such lands to such Commission;

H.R. 5154. An act to amend the Lanham Trademark Act to prohibit any State from requiring that a registered trademark be altered for use within such State, and to encourage private enterprise with special emphasis on the preservation of small business;

H.R. 6133. An act to authorize appropriations to carry out the provisions of the Endangered Species Act of 1973 for fiscal years 1983, 1984, and 1985, and for other purposes;

H.R. 6168. An act to amend title 18, United States Code, to provide a criminal penalty for threats against former Presidents, major Presidential candidates, and certain other persons protected by the Secret Service, and for other purposes;

H.R. 6454. An act to amend title 18, United States Code, to clarify the applicability of offenses involving explosives and fire;

H.R. 6956. An act making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1983, and for other purposes; and

H.J. Res. 207. Joint resolution to require the Secretary of the Interior to place a plaque at the U.S. Marine Corps War Memorial honoring Joseph Rosenthal, photographer of the scene depicted by the memorial.

RECESS

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the House stand in recess subject to the call of the Chair.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

Mr. MICHEL. Mr. Speaker, reserving the right to object, and I shall not object, I would like to have the assurance that given our assent to that unanimous-consent request, there would be clear understanding that there would be no legislative business and we would simply be in recess awaiting the adjournment resolution.

Mr. FOLEY. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Washington.

Mr. FOLEY. There would be no legislative business considered except the awaiting of the report of the adjournment resolution by the Senate.

Mr. MICHEL. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Washington (Mr. FOLEY)?

There was no objection.

The SPEAKER. The House stands in recess. There will be no other business remaining. We will reconvene as soon as the House is aware of the fact that the Senate has passed the adjournment resolution. We will recall the House and adjourn the House until November 29, 1982.

In the event the Speaker is not in the chair, he wants to wish everybody a successful election and a happy Thanksgiving.

□ 0230

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. FOLEY) at 2 o'clock and 32 minutes a.m., Saturday, October 2, 1982.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 421. Concurrent resolution providing for an adjournment of the two Houses from Friday, October 1, or Saturday, October 2, to Monday, November 29, 1982.

The message also announced that the Senate had passed bills and a joint resolution of the following titles, in which the concurrence of the House is requested:

S. 1964. An act to designate certain lands in the Mark Twain National Forest, Mo., which comprise about 17,562 acres, and known as the Irish Wilderness, as a component of the National Wilderness Preservation System;

S. 1965. An act to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System;

S. 2052. An act for the relief of Raul M. Melgar, Maria Cristina Rey de Melgar, Steven Marcelo Melgar, and Serrana Ivon Melgar;

S. 2116. An act for the relief of Carols Mebrano Gatson;

S. 2710. An act to establish the Charles C. Deam Wilderness in the Hoosier National Forest, Ind.;

S. 3039. An act to provide for the use of certain fees collected from visitors to Grand Canyon National Park, and for other purposes; and

S.J. Res. 268. Joint resolution congratulating the American Public Transit Asssociation.

ADJOURNMENT

Mr. YOUNG of Missouri. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore. Pursuant to the House concurrent resolution, the Chair declares the House adjourned until Monday, November 29, 1982, at 12 o'clock noon.

Thereupon (at 2 o'clock and 33 minutes a.m., Saturday, October 2, 1982), pursuant to House Concurrent Resolution 421, the House adjourned until Monday, November 29, 1982, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4887. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact of U.S. readiness of the Army's proposed sale of certain defense articles to Japan (Transmittal No. 82-89), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

4888. A letter from the General Counsel, Department of Defense, transmitting a copy of Executive Order 12383, "Amendments to the Manual for Courts-Martial, United States," pursuant to article 36(b) of the Uniform Code of Military Justice, 10 U.S.C. 836(b); to the Committee on Armed Services.

4889. A letter from the Acting Secretary of Defense (Health Affairs), transmitting a review of the special pays for military health professionals for the period July 1, 1980, to June 30, 1982, pursuant to Public Law 96-284; to the Committee on Armed Services.

4890. A letter from the Assistant Secretary of Defense (Facility Requirements and Resources), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Air Force Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

4891. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the keypunch function at the naval shipyard, Norfolk, Va., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

4892. A letter from the Principal Deputy Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the administrative telephone service function at the naval shipyard, Norfolk, Va., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

4893. A letter from the Chairman, Export-Import Bank of the United States, transmitting a report on loan, guarantee, and insurance transactions supported by Eximbank

during July 1982 to Communist countries; to the Committee on Banking, Finance and Urban Affairs.

4894. A letter from the District of Columbia Auditor, transmitting a report entitled: "The Washington Convention Center," pursuant to section 455(d) of Public Law 93-198; to the Committee on the District of Columbia.

4895. A letter from the Acting Assistant Secretary on Indian Affairs, Department of the Interior, transmitting reports on the status of tribally controlled community colleges, the needs of tribally controlled community colleges, and the existing and planned physical facilities of tribally controlled community colleges, pursuant to section 106(e), 107(c)(2), and 111 of Public Law 95-471; to the Committee on Education and Labor.

4896. A letter from the Secretary, Federal Trade Commission, transmitting a proposed trade regulation rule concerning governing funeral industry practices, pursuant to section 21(a)(1) of the Federal Trade Commission Improvements Act of 1980; to the Committee on Energy and Commerce.

4897. A letter from the Chairman, Federal Energy Regulatory Commission, transmitting the Committee's annual report covering the period from October 1, 1980, through September 30, 1981, fiscal year 1981; to the Committee on Energy and Commerce.

4898. A letter from the General Counsel, Department of Energy, transmitting notice of a meeting relating to the international energy program to be held on October 6, 7, 8, 1982, in San Francisco, Calif.; to the Committee on Energy and Commerce.

4899. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting a report covering the period April through June 1982 on imports of crude oil, residual fuel oil, refined petroleum products, natural gas, and coal; reserves and production of crude oil, natural gas, and coal; refinery activities; and inventories; together with data on exploratory activity, exports, nuclear energy, and electric power, pursuant to section 11(c)(2) of the Energy Supply and Environmental Coordination Act of 1974; to the Committee on Energy and Commerce.

4900. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles and services to Japan (Transmittal No. 82-89), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4901. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions of Ambassador-at-Large-designate Richard Thomas Kennedy, pursuant to section 304(b)(2) of Public Law 96-465; to the Committee on Foreign Affairs.

4902. A letter from the Assistant Secretary of State for Congressional Relations, transmitting a report of items proposed for removal from the U.S. munitions list that no longer warrant export controls under section 38, pursuant to section 38(f) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4903. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of a proposed license for the export of defense articles or services sold commercially under a contract to Australia (Transmittal No. MC-16-82), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on Foreign Affairs.

4904. A letter from the Administrator, Agency for International Development transmitting the determination to continue assistance in support of the Opportunities Industrialization Centers International Project in Ghana during fiscal year 1982, pursuant to section 123(e) of the Foreign Assistance Act of 1961; to the Committee on Foreign Affairs.

4905. A letter from the Secretary of the Interior, transmitting notice of the receipt of an application for a loan under the Small Reclamation Projects Act of 1956 from the Fallbrook Public Utility District, California pursuant to section 10 of the act; to the Committee on Interior and Insular Affairs.

4906. A letter from the Chief Judge, U.S. Court of Appeals, transmitting notice that the Judicial Council of the First Circuit passed a resolution in order to maintain the orderly processing of bankruptcy case in the wake of *Northern Pipeline* and the impending cessation of the Supreme Court's stay on October 4, 1982, pursuant to 28 U.S.C. 332(d); to the Committee on the Judiciary.

4907. A letter from the Secretary of Transportation, transmitting a report on an application by the First American Bulk Carrier Corp. to construct two bulk/container vessels in a foreign shipyard and its effect on the shipyard mobilization base, pursuant to section 615 of Public Law 97-35; to the Committee on Merchant Marine and Fisheries.

4908. A letter from the Secretary of Transportation, transmitting a report on an application by the United States Lines, Inc., to reconstruct one barge carrier in a foreign shipyard and its effect on the shipyard mobilization base, pursuant to section 615 of Public Law 97-35; to the Committee on Merchant Marine and Fisheries.

4909. A letter from the Secretary of Transportation, transmitting a report on an application by the Aeron Marine Shipping Co. to acquire a maximum of two new bulk ships in a foreign shipyard and its effect on the shipyard mobilization base, pursuant to section 615 of Public Law 97-35; to the Committee on Merchant Marine and Fisheries.

4910. A letter from the Secretary of Transportation, transmitting a report on an application by the Ogden Marine, Inc., to Construct two dry bulk ships in a foreign shipyard and its effect on the shipyard mobilization base, pursuant to section 615 of Public Law 97-35; to the Committee on Merchant Marine and Fisheries.

4911. A letter from the Secretary of Transportation, transmitting a report on an application by Delta Steamship Lines, Inc., to construct up to 10 containerships in a foreign shipyard and its effect on the shipyard mobilization base, pursuant to section 615 of Public Law 97-35; to the Committee on Merchant Marines and Fisheries.

4912. A letter from the Secretary of Transportation, transmitting a report of an application by Equity Maritime, Inc., to construct a maximum of six ore/bulk/oil carriers in a foreign shipyard and its effect on the shipyard mobilization base, pursuant to section 615 of Public Law 97-35; to the Committee on Merchant Marine and Fisheries.

4913. A letter from the Secretary of Transportation, transmitting a report on an application by Moore McCormack Bulk Transport to retrofit three tankers in a foreign shipyard and its effect on the shipyard mobilization base, pursuant to section 615 of Public Law 97-35; to the Committee on Merchant Marine and Fisheries.

4914. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a Corps of Engineers report on Four River Basins, Fla., in response to resolutions adopted December 30, 1969, by the U.S. Senate Committee on Public Works, and a similar resolution adopted July 14, 1970, by the Committee on Public Works and Transportation of the House of Representatives; to the Committee on Public Works and Transportation.

4915. A letter from the Chairman, U.S. International Trade Commission, transmitting the Commission's 31st quarterly report on trade between the United States and the nonmarket economy countries, pursuant to section 410 of the Trade Act of 1974; to the Committee on Ways and Means.

4916. A letter from the Chairman, National Transportation Safety Board, transmitting the Board's 1984 budget submission, pursuant to section 304(b)(7) of Public Law 93-633; jointly, to the Committees on Appropriations, Energy and Commerce, and Public Works and Transportation.

4917. A letter from the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, transmitting reports on the adequacy of existing common law and statutory remedies in providing legal redress for harm caused by release of hazardous substances into the environment, pursuant to section 301(e) of Public Law 96-510; jointly, to the Committees on the Judiciary and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Committee on Government Operations. Report on unauthorized and excessive fees charged to small business for loan packaging, insurance, and legal work on SBA guaranteed loans. (Rept. No. 97-915). Referred to the Committee of the Whole House on the State of the Union.

H.R. 1514: Mr. YATES.

H.R. 1515: Mr. YATES.

H.R. 1516: Mr. YATES.

H.R. 1517: Mr. YATES.

H.R. 1968: Mr. ANTHONY and Mr. SMITH of New Jersey.

H.R. 2331: Mr. BRODHEAD, Mr. WIRTH, Mr. MARKEY, and Mr. JAMES K. COYNE.

H.R. 2333: Mr. MCEWEN.

H.R. 2493: Mr. FITHIAN.

H.R. 2936: Mr. SEIBERLING.

H.R. 3396: Mr. YATES.

H.R. 3597: Mr. FOGLIETTA.

H.R. 4147: Mr. SMITH of Oregon.

H.R. 4454: Mr. HOWARD.

H.R. 4498: Mr. RANGEL.

H.R. 4562: Mr. DOWNEY.

H.R. 4588: Mr. RATCHFORD.

H.R. 4710: Mr. LANTOS and Mr. YATES.

H.R. 4808: Mr. OXLEY.

H.R. 4931: Mr. CARMAN, Mr. WEBER of Minnesota, and Mr. BROOMFIELD.

H.R. 5082: Mr. RITTER, Mr. NELLIGAN, Mr. LUNGREN, and Mr. TAUKE.

H.R. 5600: Mr. APPLEGATE, Mr. BARNARD, Mr. DREIER, Mr. EDWARDS of Oklahoma, Mr. FITHIAN, Mrs. HECKLER, Mr. MCKINNEY, and Mr. WILLIAMS of Ohio.

H.R. 5705: Mr. PHILLIP BURTON, Mr. JOHN L. BURTON, Mr. COELHO, Mr. JAMES K. COYNE, Mr. LEBOUTILLIER, and Mr. LOWERY of California.

H.R. 5717: Mr. SOLOMON, Mr. DECKARD, Mr. ENGLISH, Mrs. BOUQUARD, Mr. NELLIGAN, Mr. HORTON, and Mr. DE LUGO.

H.R. 5727: Mr. HOWARD.

H.R. 5818: Mr. HUBBARD.

H.R. 6009: Mr. BEARD.

H.R. 6054: Mr. HARTNETT and Mr. MARLENEE.

H.R. 6073: Mr. DANIEL B. CRANE and Mr. LATTA.

H.R. 6135: Mr. ENGLISH.

H.R. 6165: Mr. HOWARD.

H.R. 6371: Mr. DANIEL B. CRANE.

H.R. 6386: Mr. WHITEHURST, Mr. EDGAR, and Mr. FLORIO.

H.R. 6418: Mr. PAUL.

H.R. 6430: Mr. MCCOLLUM and Mr. WOLF.

H.R. 6492: Mr. BURGENER, Mr. GINGRICH, and Mr. WYLIE.

H.R. 6529: Mr. DASCHLE.

H.R. 6531: Mr. OBERSTAR.

H.R. 6538: Mr. GINGRICH, Mr. LUNGREN, Mr. GEPHARDT, Mr. BIAGGI, Mr. SHAW, Mr. ECKART, and Mr. DAVIS.

H.R. 6591: Mr. CLAUSEN.

H.R. 6716: Mr. WEBER of Ohio and Mr. DANIEL B. CRANE.

H.R. 6779: Mr. TRAXLER, Mr. WILLIAMS of Montana, Mr. YOUNG of Alaska, Mrs. CHISHOLM, Mr. OBERSTAR, Mr. ENGLISH, Mr. SIMON, Mr. CLINGER, Mr. SYNAR, and Mr. FRENZEL.

H. Res. 483: Mr. ROBERTS of Kansas, Mr. WHITEHURST, Mr. STENHOLM, and Mr. MADIGAN.

H. Res. 598: Mr. DYMALLY.

H. Res. 600: Mr. ROTH, Mr. ALBOSTA, Mr. KINDNESS, Mr. YATRON, Mr. DAVIS and Mr. ROBERTS of South Dakota.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 5133: Mr. WINN.
H.R. 6467: Mr. LANTOS.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

632. By the SPEAKER: Petition of the Steuben County Board of Supervisors, Bath, N.Y., relative to medicaid costs; to the Committee on Energy and Commerce.

633. Also, petition of the City Council, Virginia Beach, Va., relative to the exemption of muncipal corporations from Federal antitrust laws; to the Committee on the Judiciary.

634. Also, petition of the Conference of delegates of the California State Board, California, relative to U.S. immigration laws; to the Committee on the Judiciary.

635. Also, petition of the Governing Board, the First Presbyterian Church of Grand Forks, N. Dak., relative to tuition tax credits; to the Committee on Ways and Means.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 746

By Mr. FLORIO:

(Amendment to the amendment in the nature of a substitute.)

—Page 6, after line 22, insert the following:

" (E) a rule relating, in whole or in part, to the control of toxic or hazardous pollutants, substances, or wastes;".

H.R. 6514

By Mrs. SCHROEDER:

(Substitute for employer sanctions.)

—Page 3, strike out line 8 and all that follows through page 4, line 23, and insert in lieu thereof the following:

"SEC. 274A. (a)(1)(A) It is unlawful for a person or other entity to hire for employment in the United States an unauthorized alien (as defined in paragraph (3)) and to fail to comply, with respect to that alien's employment, with the terms of the National Labor Relations Act (29 U.S.C. 151 et. seq.), the Fair Labor Standards Act of 1938 (29 U.S.C. 203 et. seq.), and the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et. seq.).

" (B) The Secretary of Labor shall notify the Attorney General whenever an employer has been determined by the Secretary to have failed to comply with a term of the Fair Labor Standards Act of 1938 or the Occupational Safety and Health Act of 1970, and the Chairman of the National Labor Relations Board shall notify the Attorney General whenever an employer has been determined by the Board to have failed to comply with a term of the National Labor Relations Act. For purposes of subparagraph (A), a person or other entity is deemed to have failed to comply with a term of the respective Act if the Attorney General is notified under this subparagraph of the person's or entity's failure to comply with that term of that Act.

"(C) Upon notification under subparagraph (B), the Attorney General may initiate an investigation to determine whether a violation of subparagraph (A) has occurred. If the Attorney General determines that such a violation has occurred, the Attorney General shall commence an administrative proceeding under subsection (b) with respect to that violation.

"(2) Whenever the Attorney General has a reasonable cause to believe that a person or entity has engaged in a pattern or practice of hiring, recruiting, or referring for employment in the United States unauthorized aliens after the date of the enactment of this section, the Attorney General may commence a proceeding under subsection (b).

Page 4, line 24, strike out "(6)" and insert in lieu thereof "(3)".

Page 5, after line 4, insert the following:

"(4) Unless otherwise provided by Act of Congress, this subsection shall not apply to the hiring, recruiting, or referring of individuals for employment on or after the end of the three-year period beginning on the date of the enactment of this section.

"(b)(1) The Attorney General shall commence any proceeding under this subsection by filing a notice of proposed violation with an administrative law judge. The person or entity named in such notice of proposed violation shall be provided an opportunity for a hearing before the judge within 30 days after the date of receipt of the notice.

"(2) In a proceeding initiated against a person or entity pursuant to subsection (a)(1), if the judge determines by a preponderance of the evidence that the person or entity has violated that subsection with respect to an unauthorized alien, the judge shall enter an order imposing on the person or entity a civil penalty of $5,000 for each such unauthorized alien.

"(3)(A) In a proceeding initiated against a person or entity pursuant to subsection (a)(2), if the judge determines by a preponderance of the evidence that the person or entity has violated that subsection, the judge shall enter an order—

"(i) requiring the person or entity to cease and desist from hiring, recruiting, or referring for employment in the United States any alien whom the person or entity knows to be an unauthorized alien with respect to that employment, and

"(ii) prohibiting the person or entity from hiring (during a period of three years from the effective date of the order) for employment in the United States any individual without complying with the requirements of subsection (c) with respect to each individual hired or considered for such employment.

"(B) A person or entity that fails to comply the terms of an order issued under subparagraph (A) shall be subject to a civil penalty of $1,000 for each such failure. Such penalty shall be assessed by an administrative law judge after notice and opportunity for a hearing.

"(C) The Attorney General shall review each order issued under subparagraph (A) for its effectiveness two years after the date of its issuance and may terminate such order at such time.

"(4)(A) If a person or entity against whom a civil penalty is assessed under this section fails to pay the penalty within the time prescribed in such order, the Attorney General shall file a suit to collect the amount in any appropriate district court of the United States. In any such suit or in any other suit seeking to review an administrative law judge's determination or order under this section, the suit shall be determined solely upon the administrative record upon which the determination or order was based and the judge's findings of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

Page 5, amend lines 5 through 9 to read as follows:

"(c) The requirements referred to in subsection (b)(3)(A)(ii) are, in the case of a person or other entity hiring an individual for employment in the United States, that—

Page 5, line 13, strike out "is eligible" and all that follows through "(a)(1)(A)" on line 15 and insert in lieu thereof "is not an unauthorized alien".

Page 6, beginning on line 19, strike out ", recruited, or referred".

Page 6, beginning on line 25, strike out ", recruiting, or referral".

Page 7, beginning on line 2, strike out "in the case of the hiring of the individual" and insert in lieu thereof "if later".

Page 7, strike out line 8 and all that follows through page 11, line 15.

Page 11, lines 16 and 23, strike out "(e)" and "(f)", respectively, and insert in lieu thereof "(d)" and "(e)", respectively.

Page 12, strike out line 3 and all that follows through page 13, line 22, and insert in lieu thereof the following:

"(f) Within three years after the date of the enactment of this section, the President shall prepare and transmit to Congress a comprehensive report concerning the implementation and enforcement of this section, including the assessment of the President as to whether the implementation of this section has resulted in—

"(1) a decline in the number of employment opportunities for unauthorized aliens,

"(2) a decline in the number of violations of protective labor laws,

"(3) a pattern of unlawful discrimination against United States citizens and aliens, other than unauthorized aliens, or

"(4) has created an unnecessary regulatory burden on employers,

and whether the provisions of this section have otherwise been carried out satisfactorily.".

(2)(A) The amendment made by paragraph (1) shall apply to the hiring, recruiting, and referring of individuals for employment in the United States on and after the date of the enactment of this Act.

Page 13, line 23, strike out "(D)" and insert in lieu thereof "(B)".

Page 14, strike out lines 9 through 13.

Page 15, beginning on line 5, strike out "the first day of the seventh month beginning after".

(Three-year sunset to employer sanctions.)

—Page 5, after line 4, insert the following:

"(7) Unless otherwise provided by Act of Congress, this subsection shall not apply to the hiring, recruiting, or referring of individuals for employment on or after the end of the three-year period beginning on the date of the enactment of this section.".

—Page 12, line 17, strike out the closing quotation marks and the period that follows them.

Page 12, after line 17, insert the following:

"(h) The President and the United States Civil Rights Commission shall each monitor and report to Congress, not later than 30 months after the date of the enactment of this Act, as to whether or not the implementation of this section has resulted in discrimination in employment other than on the basis of an individual's being an unauthorized alien. If either reports that such implementation has resulted in such discrimination, unless otherwise provided by Act of Congress, this section shall not apply to the hiring, recruiting, or referring of individuals for employment on or after the end of the three-year period beginning on the date of the enactment of this section.".

(Change in continuous employment sanction.)

—Page 3, beginning on line 19, strike out "subsequent to the date of the enactment of this Act and in accordance with paragraph (1)".

(Modification of employer penalty provision.)

—Page 8, strike out line 15 and all that follows through page 11, line 15, and insert in lieu thereof the following:

"(d)(1) Whenever the Attorney General has reasonable cause to believe that a person or entity has or is engaged in a violation of paragraph (1) or (2) of subsection (a), the Attorney General shall provide such person or entity with notice and the opportunity to request a hearing respecting the violation within 30 days after the date of receipt of such notice. Any hearing so requested shall be conducted before an administrative law judge in accordance with section 554 of title 5, United States Code.

"(2) If the administrative law judge determines by a preponderance of the evidence that the person or entity has violated paragraph (1) or (2) of subsection (a), the Attorney General shall issue and cause to be served on such person or entity an order to cease and desist from such violation. The Attorney General shall review such order for its effectiveness two years after its date of issuance and may terminate such order at such time.

"(3) If a person or entity fails to comply with an order of the Attorney General under paragraph (2), the Attorney General may commence proceedings in any district".

(Deleting H-2 provisions.)

—Strike out section 211 (that is, page 67, line 11, through page 75, line 20), and strike out the corresponding item in the table of contents and redesignate succeeding sections (and cross references thereto) accordingly.

EXTENSIONS OF REMARKS

TRIBUTE TO L. H. FOUNTAIN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 28, 1982

● Mr. BIAGGI. Mr. Speaker, At the conclusion of this session of Congress, we have the sad task of saying farewell to one of our best friends and most respected colleagues, L. H. FOUNTAIN, the gentleman from Tarboro, N.C.

Since his election to the 83d Congress, L. H. FOUNTAIN has represented with great distinction and pride the people of the Second Congressional District of the Tar Heel State. L. H. is a proud native son of North Carolina having been born in the small village of Leggett. Before his election to Congress, he had a distinguished career in State government in North Carolina including a term in the State senate and a stint as the reading clerk of the senate during the years 1936 to 1941.

In the House, L. H. has served with unique distinction as a member of the Government Operations and House Foreign Affairs Committee. L. H., as the chairman of the Subcommittee on Intergovernmental Relations and Human Resources, is clearly the resident expert in the House on the workings of the various branches of our intergovernmental system

In 1959, L. H. was the author of a landmark bill which established the Advisory Commission on Intergovernmental Relations (ACIR). L. H. has served as a member of the ACIR since its inception. In addition, he is a member of the Presidential Advisory Committee on Federalism.

L. H. FOUNTAIN has been my friend throughout my 14 years in this House. We have worked together on several projects including helping my home city of New York during its troubled fiscal days in the late 1970's. I sought and benefited from his counsel and knowledge and hope that all is well for him in his return to private life. He will be sorely missed by the House, as he has been one of our most effective Members over the past three decades. While we lament over his decision to retire, we know his wife and family are probably very pleased and can take pride in all that L. H. FOUNTAIN did for the people of North Carolina and the Nation in his career.●

CONNECTICUT JUSTICE FOR CHILDREN COLLABORATION

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. MOFFETT. Mr. Speaker, at the forum on the effects of the New Federalism on the children of Connecticut, we heard from a distinguished advoate for children and their families. Mr. David Cunningham, executive director of the Connecticut Justice for Children Collaboration, offered cogent, thoughtful insights on the field of juvenile justice and the role of service providers in their communities. I commend the following statement to you all:

STATEMENT OF DAVID W. CUNNINGHAM

(The Collaboration is a statewide membership organization designed to service and support over 500 community-based children and youth serving agencies across Connecticut.)

I have been asked to address specifically the topic of Juvenile Justice; to do that is to point out that total federal allocation nationwide for Juvenile Justice services is only $70 million and for Connecticut is only $1.1 million. Over the past several years, one-half to two-thirds of that money in Connecticut has been directed towards community-based services for status offenders and has funded several model programs: the Emergency Shelter Services, Crisis Intervention Services, and Networkers for children's services on a regional basis. A very small amount of money, a dramatic payoff. Like the other services discussed this morning, they work.

Children and Youth Service Providers have labored hard and long over the past three years so that—

The law has been changed so that status offenders are no longer considered delinquent

Community services are assuming responsibility for servicing this population . . .

Detention is not being used . . . police, schools, courts, youth service bureaus, Department of Children and Youth Services are working together to better service this population, as well as the serious offender population

All of this is being done in a climate where three main criticisms are being leveled against the field. One that we cost too much; two, the services do not have an impact; and three, that they break apart families. In this climate each year, an attempt is made to sweep away the millions of dollars for children's programs including the $70 million for Juvenile Justice. The end result is this:

Professionals in the Juvenile Justice field and all children's service professionals, as the self-appointed dragon slayers of today's society's many woes, hold a firm conviction that the "human condition" must change, and that the cause is so great that they are willing to devote their lives to the purpose of helping others in need.

Today this group of people appear held back and constrained. There are economic and political restrictions that prevent them from doing the job they want to do. The profession lacks prestige; some argue that it is unnecessary. The work load is most often enormous, intrusive, and all consuming. They suffer from a lack of high quality training, and indeed feel poorly equipped to slay the dragon. To further compound their discomfort, human service professionals are being called upon to articulate policy to legislators, bureaucrats and citizens before they are clear what that policy is. It is indeed a frightening and discouraging time. It is difficult to be an exciting, vibrant, reforming group of people; they are, however, determined in every positive sense of the word entrenched.

Drug abuse, juvenile crime, suicide, unemployment are all crises faced in our society today which seem imponderable. Solving these problems is to date a matter of hope. Despite millions of dollars and man hours invested, there is no community in this nation which can claim that its children are not being abused, its teenagers are not running away, its babies are not being born to adolescent mothers. One concern rises above the others and that is the children are out of control. That is declared by parents, politicians, professionals, and children themselves. What appears to be true is that people, our society as a whole, feel out of control of their children. In sharing the responsibility of resolving these problems, there is little sense of commitment or integrity. We speak of sharing responsibility as if it were a choice. It is not a choice. Everyone is responsible. The interrelatedness is clear—The child who commits a crime is in fact part of a family of which a child commits a crime; and part of a community of which a family of which a child commits a crime; and part of a state of which a community of which a family of which a child commits a crime; and part of a nation of which a state of which a community of which a family of which a child commits a crime. At the same time a nation at war is certainly a state of war is community at war is a family at war. It is all interrelated. And yet, historically when the child has been out of control of his or her parents, the community service system was called in to fill that role. When the community could not control the child, the state system clearly set controls through the use of courts, detention and commitment processes. Indeed at either community or state level temporary controls could be placed on the child. It was demonstrated time and again, however, that when those controls were terminated the child either returned to out-of-control behavior and became involved in more serious behavior or made it on his or her own, separate from family.

It could not be demonstrated that a significant change had been made in the way that the child's family was able to support him or her. Temporary improvements in the child's condition were sometime evident, thus service providers have been reinforced and have felt basically as if they were on

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

the right track. However, the results have been temporary, questionable, and costly and often separated the child from the family hence the criticisms we cost too much, we don't have an impact and we break apart families.

Therefore, the Juvenile Justice field in particular, and the children's service field in total is being called upon to change. Most certainly, we are still being asked to control the child. We have learned that to control a child means that the family must be involved in the nurturing, respecting, and supporting the child. We have also learned that when families are under stress they cope through mechanisms which surprise us. When there is a little stress a family will cope by holding family meetings, placing new rules, and getting outside counseling, etc. When the family is under a lot of stress in order to cope members of the family will do such outrageous things as abusing their children, running away from home, etc. We have come to realize that these are all attempts, no matter how outrageous, to help the family survive. It is clearly because the children are the most courageous, the least inhibited, and consider themselves to be absolutely dependent upon their families for survival that they often serve as the messengers of this problem.

It is the children to whom we turn our attention and it is the children to whom we have delivered the antidote. However, just like the child has difficulty being healthier than the family, and the family has responsibility for nurturing its children, and the community service system has a responsibility to nurture its families. In order to believe that these problems can be solved, this nation must pull together and support the community services which are supporting these families. Trying is not doing, Hoping is not doing, Doing is doing. Community services are doing what is needed, and must be supported.

In order to meet the challenge, community services are changing. We are working with families as whole units, supporting the natural functions of families. We have learned that families must have certain structure and certain functions in order to be healthy, and we are willing to apply that technology to our own field, though we are often unsupported for doing it.

We have learned to be more cost-effective. We are training ourselves as managers, we are in fact moving into the field of retrenchment planning and teaching ourselves how to cut budgets effectively.

We are committing ourselves to a continuum of care and embracing residential programs and preventive services both as essential components of a service delivery system working together to make sure that children don't fall through the cracks.

We are strengthening our relationship with the community at large working more closely with business to identify common concerns. Also knowing that if we want to ask businesses for contributions to our organizations (which is not new for us, we have been doing that for many years) that we must be as concerned as they are about where their money comes from and we must respect the profit motive. A business which does not have a profit cannot give that profit to private, non-profit agencies.

We are working more closely with legislators. This year, for the first time in Connecticut, we will be offering training to all legislative candidates in order to provide them with information before they actually hold office to both enhance their campaign and to enhance their hopeful tenure as legislators. We are also willing to look at revenue sources with legislators. Historically, we have been willing to negotiate appropriations and have not paid much attention to finance and revenue committees. Our dialogue with them is increasing and we are willing to contribute ideas as to where the money should come from that should pay for these needed services.

We have made a decision not to compete for funds. Through the Committee on Public Expenditures for Connecticut's Children, a broad range of children's services have come together and said that one children service is not more important than the other. They will not go to the legislature in a competitive position, rather they will commit themselves to a continuum of care.

All the presentations made today will point out the many crises these families can face. The Juvenile Justice field is just one field addressing these family needs but just like the child who needs support and nurturance from the family and the family which needs support and nurturance from the community, the community service system needs support and nurturance from this nation.

We are not the enemy, we are the messengers, and for that we often get punished. If we accept that we are community leaders and toward the cause of improving community supports for families to nurture their children, we are willing to be the front runners. We can deliver; we will make it work; we will need your support.

I would like to close with a poem written anonymously for the women's movement which I think is certainly relevant to the children's movement as well:

I swear it
I swear it on my common woman's head
I am common as a common loaf of bread
And will rise.

Thank you.●

PROGRESS MADE IN DEVELOPING SAFER PESTICIDES

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. BROWN of California. Mr. Speaker, during this session the Department Operations, Research, and Foreign Agriculture Subcommittee, which I chair, has spent considerable time and effort in oversight and legislative activities involving pesticide regulation. During 5 days of oversight hearings and innumerable meetings and negotiating sessions involving legislative proposals, questions concerning the impact of the Federal Insecticide, Fungicide, and Rodenticide Act on pesticide industry innovation repeatedly arose. Industry representatives voiced concern that the regulatory system and public disclosure requirements in the FIFRA statute might be discouraging long-term private sector commitment to pesticide research and development activity.

In developing legislation, passed by the House on August 11 of this year, amending the FIFRA, an effort was made to resolve many of the regulatory and administrative problems which industry was able to document during the course of the subcommittee's deliberations. While no party to the protracted process of negotiation is completely satisfied with the end result, I am convinced that real progress was made toward a balanced yet accountable regulatory system.

I am pleased to note several recent articles and announcements regarding the discovery of new, safer pesticides. These products are the first commercial results of research programs begun several years ago by leading private sector firms. Many scientists have suggested that even better, more effective compounds are on the horizon, products which will help farmers in their perennial battle with bugs, weeds, and plant diseases. The distinguishing feature of most new pesticide products is their biological selectivity. At far lower rates of application, most new pesticides are more efficacious and less hazardous to the environment. This is good news for everyone.

As the Department Operations, Research, and Foreign Agriculture Subcommittee continues its oversight activities, in the next Congress, close attention will be directed to the impact of the EPA's pesticide regulatory program on the commercialization of new, scientifically advanced pesticides and control technologies. Right now, it looks like the innovative process is basically healthy and perhaps ready to enter a phase of even more significant breakthroughs.

But we must guard against becoming overconfident and relaxing our research efforts. I am deeply distrubed by the deep cuts which have been made in the research budget at the Environmental Protection Agency and will continue to work toward restoring the unwise reductions which have already been made. Many of the coming breakthroughs in this field are the result of years of research programs funded by the Federal Government. While I applaud the private sector work in bringing these research discoveries to commericalization, I want to point out that these new technologies did not spring forth suddenly simply due to private sector efforts.

I hope that my colleagues take the time to read the following article from the Journal of Commerce.

The article follows:

[From the Journal of Commerce, Sept. 14, 1982]

NEW PRODUCTS LOOMING IN AGRICHEMICAL INDUSTRY

(By C. A. Carpenter)

KANSAS CITY, MO.—After 20 years of experience with the environmental movement, the agrichemical industry appears to be on the brink of a major explosion in new products that could mean the difference between feeding or starving the world, accord-

ing to a research scientist in the United States Department of Agriculture.

Herbicides will dominate pesticide chemistry over the next decade, said Philip C. Kearney, research chemist with the USDA Pesticides Degradation Laboratory in Beltsville, Md. Mr. Kearney made the opening speech for the 184th national meeting of the American Chemical Society. He is the recipient this year of the 13th Burdick and Jackson International Award for Research in Pesticide Chemistry, given for his outstanding contributions in pesticide research over the 20 years he has been with the USDA.

The amounts and kinds of pesticides used in American agriculture over the last two decades have changed dramatically. In 1962, for example, 63 percent of the pesticides were insecticides, or roughly 460 million pounds of insecticides were produced out of a total of 730 million pounds of pesticides, Mr. Kearney said.

But as a result of the environmental movement and subsequent formation of various government regulatory bodies that placed severe restrictions on the use of certain insecticides and policies that emphasized safety and environmental compatability, the United States today has become largely a herbicide-producing nation. Herbicides make up about 55 percent of the U.S. pesticides market today, or roughly 800 million pounds of herbicides are produced annually out of a total 1.46 billion pounds of pesticides. The sale value has risen to well over $4 billion from about $340 million in 1962, Mr. Kearney.

While the herbicides market grew, more research on toxicology and environmental effects of pesticides resulted in major blows for the insecticide in market. Twenty years ago the chlorinated hydrocarbon insecticides, primarily DDT, aldrin, dialdrin, endrin, heptachlor and chlordane, predominated. Since then, events resulting from the growing concern over pesticide safety led to either cancellation or restrictions on their use.

U.S. production of fungicides, by comparison with the herbicides, has grown modestly from 117 million pounds to 156 million pounds a year. Fungicide imports have increased, amounting to over $24 million in 1980—up about 60 percent in one year.

Now after two decades of research in the chemistry of plants, soils, water and air, the herbicides industry is increasingly introducing new compounds.

New herbicides appearing in the marketplace include a new generation of pyridinyl oxy phenoxy propanates that are used for selective control of pests on grass weeds in a number of broadleaf crops. The Du Pont Co.'s recent introduction of Gleen, which cost the company over $35 million just for development, is one example. In addition, there are a number of new sulfonyl urea-based herbicides that are active in small quantities. While the immediate future for this new series is in small grain production, Mr. Kearney said its ultimate potential is unlimited.

Genetic engineering is expected to take on significant importance in the development of new herbicides. By providing the potential to modify the plant, genetic engineering "will allow us to extend the life of many compounds with long records of safety into new cropping systems," he said. Progress in this field is already taking shape with compounds called striacines.

As Mr. Kearney examined future pesticide chemistry, he said: "Our research will still be directed towards solving applied problems in global agriculture in the areas of production and conservation with both applied and basic research. What do we face as a nation with regard to the future of agricultural research? Productivity and conservation must be two of our important goals. Pesticide chemistry will play an important role in meeting" these goals.●

ENERGY-EFFICIENCY RATINGS FOR HOMES OFFERED UTILITIES, SPECIAL LOANS OFFERED BY LENDERS FOR ENERGY-SAVING HOMES

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. OTTINGER. Mr. Speaker, this October an exciting experiment gets underway in Massachusetts that will offer unusually attractive loans to buyers of energy-efficient homes and make such homes accessible to consumers who could not otherwise afford them. The experiment grows out of a concept presented last year at a hearing on "Energy Efficiency Labels for Buildings" before the Subcommittee on Energy Conservation and Power, which I chair.

At that hearing, the subcommittee learned that home buyers who are interested in buying energy-efficient houses may be penalized because they are unable to qualify for the mortgage on a more expensive, but more efficient home. Because a house that is well insulated and contains other energy-saving features often carries a higher price tag than a similar home without such improvements, lenders may be reluctant to grant a mortgage for the more expensive house to a buyer with a modest income. Lenders may not take into consideration the fact that the more efficient home requires lower fuel costs, thus making it easier for the home buyer to meet higher monthly mortgage payments.

The Federal Home Loan Mortgage Corporation ("Freddie Mac"), which buys from primary lenders a large number of the home loans made in this country, testified at our hearing that it was willing to consider purchasing loans with more lenient guidelines over the buyers' income, if the home contained energy-efficient features. In its testimony, Freddie Mac noted that it is often difficult for the lending community, however, to judge accurately the likely energy costs of a house. The Mortgage Corporation suggested that a nationwide energy rating system be developed which could provide the housing and finance industry with a method by which energy-efficient properties could be identified. Freddie Mac, among other witnesses from the building and lending industry, suggested that utilities might be the institution best qualified to provide energy-efficiency ratings. Utilities could easily determine the rating as part of the energy audit they currently offer to residential customers under the Residential Conservation Service, Freddic Mac suggested. Under the federally mandated RCS program, utilities offer to inspect a customer's home and recommend energy-saving devices and measures.

I am delighted to report that the innovative concept proposed at our hearing is currently being applied on an experimental basis in Massachusetts, primarily through the enthusiasm and cooperation of utilities, lenders, and real estate agents in that State. Starting next month, Mass Save, a nonprofit organization formed by Massachusetts utilities to conduct RCS audits, will offer energy-efficiency ratings to 600 homes throughout the State as an additional component of the audits.

The project, which was initiated by the Alliance to Save Energy and Energyworks with funding from the Department of Energy, has developed a simple, standardized energy rating that would enable all users—whether consumers, lenders, real estate agents or appraisers—to compare the energy efficiency of different properties.

As part of the project, numerous lenders in Massachusetts have agreed to make loans with higher-than-usual ratios of debt to the borrower's income for homes considered energy-efficient by the Mass Save rating. In addition, in cases where buyers would like to make energy-efficiency improvements, Massachusetts lenders have agreed to augment the house mortgage to provide long-term financing for those improvements. The lenders expect that the annual fuel savings from these improvements will offset the additional loan payments. Finally, loans that use the Mass Save rating as documentation for a more generous debt-to-income ratio, will be accepted both by Freddie Mac and the other major purchaser of home mortgages, the Federal National Mortgage Association or Fannie Mae.

If the project is considered successful, it is expected that Mass Save would offer the rating on a statewide basis as part of the RCS audits. In addition, a successfully applied rating could be of enormous use to other States and localities interested in providing improved information to homeowners, homebuyers, and local lenders about energy efficiency.

Although this rating system was developed for existing homes, it would be equally applicable to new houses. As we discovered at our hearing, homebuilders often have little incentive to build efficient homes with higher first costs because they fear that such homes will be beyond the reach of many prospective buyers. A credible

efficiency rating would be a boon to such builders, as well as to home buyers.

It is important to note that the energy efficiency rating was developed in consultation with both lenders and utilities and drew upon the impressive results of energy conservation research funded by the Department of Energy. This project is an excellent example of how the Department of Energy can support the private sector in developing information that is useful to consumers as well as to the industries most closely associated with home buying. I would particularly like to commend the Massachusetts utilities for their interest and imagination in providing accurate information and improved lending conditions to their residential customers.

I will be following the results of the Massachusetts labeling program with great interest. I look forward to inviting the participants in the project to testify on their experience before the Subcommittee on Energy Conservation and Power next year.●

EDWARD RODRIGUEZ

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. COELHO. Mr. Speaker, I rise today to bring to the attention of my colleagues a man whose energy and dedication to his community and church merits praise, Mr. Edward Rodriguez. Throughout his lifetime, Mr. Rodriguez has exemplified the kind of citizen that America can be proud of. He has spent many long and hard hours assisting in church-related projects, school activities, club functions, and community development. Although his list of accomplishments is lengthy, I would like to especially commend his efforts in getting the Stratford I.D.E.S. Hall renovated, a building which for the last 60 years has remained the same. I would also like to commend his active membership with the Western Dairymen's Association and the Knights of Columbus, two worthy organizations with which he has shared his time and energy. It is indeed rare to encounter an individual who possesses the high level of concern and commitment to his community that Mr. Rodriguez does and I am proud to have someone of his integrity and worthiness in California.

Mr. Rodriguez is being honored at a dinner in Stratford, Calif., on October 9, for serving as the 1982 State supreme president for the I.D.E.S. Supreme Council and for his outstanding contributions to the life and spirit of his church and community. I am pleased to be among those who applaud his accomplishments, and I wish him all the best in the years ahead.●

ANWAR EL SADAT

HON. BOB SHAMANSKY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. SHAMANSKY. Mr. Speaker, this is a critical time in the Middle East, a time when the region is poised between the chance for a true and lasting peace on the one hand and further conflict on the other. I believe that it is particularly appropriate that, given this situation, we honor the memory of Anwar Sadat.

President Sadat's foresight and concern for his people enabled him to recognize and make peace with Israel. In return, he was able to secure for Egypt the return of the Sinai.

I was in Egypt as a private citizen when Sadat returned from his historic visit to Jerusalem. The Egyptian leaders, including President Sadat, had had enough of war. They decided to do what was best for Egypt and her people—to negotiate peace with Israel. The Camp David accords followed soon thereafter.

President Sadat's courageous decision set an example that his Arab brethren have been reluctant to emulate. This pathfinder of peace risked everything for his people, and he succeeded in his efforts on their behalf. Peace with Israel is possible, if a leader is bold enough to seek it.

I pray that the other Arab leaders will place the needs of their people for peace above all else.●

MONTANA, GATEWAY TO THE OLYMPICS

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. WILLIAMS. Mr. Speaker, in 1988, the Winter Olympics will be held in Calgary, Alberta, Canada.

The Olympics is one of the world's most acclaimed sports events. The Winter Olympics in Calgary will draw visitors from all over the world. Many of these visitors will also undoubtedly visit the United States. We can look forward to a healthy surge in the tourism industry as a result of these Olympics. Montana is particularly looking forward to this increase in visitors—our tourism industry is the third largest industry in our State.

The entire southern border of Alberta, Canada, is contiguous to the State of Montana. Anyone traveling overland to Calgary from the United States will pass through Montana. Montana looks forward to hosting all visitors to the 1988 Winter Olympics with our beautiful scenery, exciting snowmobiling and fine skiing.

Mr. Speaker, today it gives me great pleasure to offer the following concurrent resolution declaring Montana the official gateway to the 1988 Winter Olympics. My resolution recognizes that all potential visitors traveling by land from the United States to Canada for the games will receive a warm welcome in Montana. The resolution is as follows:

CONCURRENT RESOLUTION

To declare Montana, "The Official United States Gateway to the 1988 Calgary Olympics".

Whereas the 1988 Winter Olympics will be held at Calgary, Alberta, Canada;

Whereas United States citizens by the thousands will be journeying to Calgary to join the festivities with our Canadian neighbors;

Whereas Montana is contiguous with the entire southern border of Alberta and is a natural passageway to the Winter Olympics in Calgary;

Whereas the State of Montana and the Province of Alberta have long been friendly neighbors; and

Whereas Alberta can be entered from the United States, traveling by land, only by way of Montana: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That Montana is declared the "Official United States Gateway to the 1988 Calgary Olympics".●

SOVIET JEWRY IMMIGRATION SHOULD BE TOPIC OF SHULTZ/GROMYKO TALKS

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. MARKEY. Mr. Speaker, when U.S. Secretary of State George Shultz meets for the first time with Soviet Foreign Minister Andrei Gromyko, I feel it is imperative that Secretary Shultz discuss the plight of Soviet Jews with him.

Throughout my tenure in Congress, I have made it a priority to speak out for the human rights of Soviet Jews and other oppressed minorities in the Soviet Union. Today, a truly tragic situation exists due to the deteriorating numbers of Soviet Jews who are granted permission to emigrate from the U.S.S.R.

Since the State Department is now conducting a review of its position vis-a-vis the Soviet Union, and Secretary Shultz is meeting with his counterpart from the Soviet Union, I believe the time is ideal for a discussion of this abrogation of the Helsinki accords.

The facts are that, one, emigration of Soviet Jews has fallen to an alarmingly low rate; approximately 200 people per month have been allowed to leave recently, rather than the thousands we saw leaving in the mid

to late 1970's. Two, Hebrew and Jewish cultural classes have been broken up with threats, intimidation and arrests. Three, more than 65 Soviet Jewish scientists have been stripped of their degrees and made nonpersons in their professions due to their desire to emigrate from the U.S.S.R. Fourth, prisoners of conscience are suffering more deprivation than is usual even in the harsh Soviet labor camp system. And fifth, the arrest of all but a few of the unofficial Helsinki accord monitors has led to the recent dismantling of the group.

For all these reasons, Mr. Speaker, I would like to strongly urge the issue of human rights in the Soviet Union be brought up in the meetings held with Soviet officials.●

TRIBUTE TO HON. JOHN RHODES

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 28, 1982

● Mr. BIAGGI. Mr. Speaker, it is an honor for me to join with many of my colleagues on both sides of the aisle in paying tribute to a great man—JOHN RHODES.

For the past 30 years, the people of the First District of the State of Arizona have been provided with the highest quality of representation by JOHN RHODES. JOHN, despite many time-consuming legislative and leadership duties on the minority side, prided himself for his constituent service in his vast congressional district.

The date December 6, 1973, will be remembered by JOHN RHODES and by those who compile the history of the House of Representatives. It was on that date that JOHN was elected the minority leader. He was reelected in the 94th, 95th, and 96th Congresses, to this important position. While minority leader, JOHN established an enduring reputation as a great leader and a fair man. The years during which JOHN was minority leader were turbulent ones in our Nation's history—difficult ones at times for the Republican Party. Yet JOHN, undaunted by events, provided his party and this House with exceptional leadership service and dedication which no one who had the pleasure to serve with him will ever forget.

In this Congress, JOHN has served on the Rules Committee and has remained an important leadership figure. His decision to retire saddens us in the sense that we are losing a good colleague. Yet we are happy for JOHN as a person for he can resume living his life the way he wants to. I am sure his wife Betty and his four children will welcome the newfound accessibility to JOHN.

It was my distinct privilege to have known JOHN as a friend these past 14 years. In my eyes and in those of many of my colleagues, JOHN has always been a man of great stature. He is textbook material for anyone writing about this institution and how to be effective in it. I wish JOHN a most pleasant return to private life and hope that all his days are happy and productive in whatever way he sees fit.●

NATIONAL SPINAL CORD INJURY MONTH

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. WALGREN. Mr. Speaker, I deeply appreciate the support of my colleague, Mr. FORD of Michigan, and the help of the House leadership yesterday in bringing to the full House, House Joint Resolution 598, my bill to designate October 1982 as "National Spinal Cord Injury Month." I am pleased that the House approved the bill.

House Joint Resolution 598, cosponsored by 44 Members of the House, has also been introduced as Senate Joint Resolution 249 in the Senate by Senator KENNEDY. The House cosponsors are as follows:

LIST OF COSPONSORS

Mr. Waxman, Mr. Leland, Ms. Mikulski, Mr. Hammerschmidt, Mr. Weiss, Mr. Tauzin, Mr. Bailey of Pennsylvania, Mr. St Germain, Mr. Gradison, Mr. George Brown of California, Mr. Santini, Mr. Lagomarsino, Mr. Dunn, Mr. Rudd, Mr. Roe, Mr. Frost, Mr. Stark, Mr. Fauntroy, Mr. Sunia, Mr. Fascell.

Mr. Synar, Mr. James Hansen, Mr. Whitehurst, Mr. Wylie, Mr. Barnes, Ms. Oakar, Mr. Frenzel, Mr. Edgar, Mr. Scheuer, Mr. Winn, Mr. Martinez, Mrs. Heckler, Mr. Vento, Mr. Stokes, Mr. Hughes, Mr. Matsui, Mr. Ford of Tennessee, Mr. Marriott, Mr. Montgomery, Mr. Hendon, Mr. DeNardis, Mr. Pepper, Mr. Coleman, Mr. Hyde.

Spinal cord injury and the resulting paralysis is one of the most serious and most expensive medical problems of our time. It is not a remote condition or rare disease. Over 500,000 Americans are now paralyzed because of spinal cord injuries. It can happen to anyone at any time—particularly from sports accidents or home accidents like falling off a ladder. Most of the newly injured are young men, from motor vehicle accidents and athletics.

Spinal cord injury is a traumatic occurrence. Louise McKnew, the mother of a spinal-cord-injured son, put it this way:

It's more than just being stuck in a wheelchair. It's an ongoing trauma, an insatiable consumer of energy, time and psychological strength. The emotional hurt is relentless—and it gets harder, not easier.

It requires major life adjustments and major expenses.

It is estimated that for the Federal Government, the annual costs for the support and care of spinal-cord-injured persons is approximately $3 billion. On top of that is another $3 billion in private expenditures. And as treatments improve and people with spinal cord injuries live longer, costs will rise even more.

For the individual, costs are staggering. A modified van can cost $25,000. Wheelchair batteries can be $80 to $90 each. Then there are the costs for nurses and aides, physical therapy, rehabilitation, and other medical expenses.

Clearly, this Nation must do more, conduct more medical research, provide more education, and training opportunities, expand rehabilitation programs, improve housing and accessibility to buildings, and improve tax policies.

This resolution is but one small step to bring public awareness to the problem and may serve as an impetus to accelerate research into cures of spinal cord injury and paralysis. It is the least this Congress can do.

I am particularly grateful for the help of the Paralyzed Veterans of America and the National Spinal Cord Injury Association for their support and help.

I hope my colleagues will join me in approving House Joint Resolution 598.●

THE ACCOMPLISHMENTS OF DANA SHEESLEY

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. COELHO. Mr. Speaker, I would like to draw the attention of my colleagues to the outstanding accomplishments of one of my constituents, Dana Sheesley. At the age of 18, Dana has received more awards and honors than many of us obtain in a lifetime. Just recently, she was selected as one of the 4-H Club's 1982-83 Diamond Star winners. This award is the highest award attainable for 4-H involvement in the State of California, and I would like to personally commend her on this achievement. However, I would also like to voice my admiration of all the hours Dana has spent, not just with the 4-H club, but in community involvement, assisting voluntarily with such worthy organizations as Muscular Dystrophy, the Heart Fund, church organizations, and the PTA to name a few. She exemplifies the finest qualities of America. Her spirit of voluntarism, her devotion to her community and to her nation serve as examples for each of us to follow. We would

do well to have more citizens like her. I am pleased to applaud Dana's accomplishments, and I extend my best wishes to her for a long, happy, and successful future.●

A TRIBUTE TO PETER ASIAF

HON. BRIAN J. DONNELLY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. DONNELLY. Mr. Speaker, 11 days before he assumed the Presidency of the United States, John F. Kennedy addressed this admonition to the Massachusetts Legislature:

When an some future date the high court of history sits in judgment on each of us, recording whether in our brief span of service we fulfilled our responsibilities to the State, our success or failure, in whatever office we hold, will be measured by the answers to four questions: First, were we truly men of courage . . . Second, were we truly men of judgment . . . Third, were we truly men of integrity . . . Finally, were we truly men of dedication?

In the legislature that day was Peter Asiaf, who 2 years earlier had succeeded his late brother John as State representative from Brockton and Avon. This year, as Peter retires after a long and distinguished career in the Massachusetts House of Representatives, he can take satisfaction in knowing that all four tests posed by the wise young President-elect can be answered with an unqualified "yes."

The district Peter has represented has undergone many changes over the past two decades, yet every 2 years Peter has been reelected virtually by acclamation. To natives and newcomers alike, he is known affectionately as "Uncle Peter." His career of legislative service has had many highlights, to numerous to itemize here. His crowning achievement, though, is Massasoit Community College. Massasoit has grown into a vital part of the greater Brockton community and one of the outstanding institutions in the Massachusetts community college system. It owes its existence and its success to Peter's tireless efforts on its behalf in the legislature.

Peter's legislative accomplishments are considerable, but they represent only a fraction of his contributions. He has worked closely with entertainer Danny Thomas in the founding and continuing support of the St. Jude Children's Research Hospital. He was a founder of the Lebanese-American Federation and served as its president for five terms. He was founder and first president of the Lebanon-American Club, and a founder of the World Lebanese Union. In 1973, the Government of Lebanon honored by inducting him in the National Order of the Cedar, with the rank of chevalier. He has been active in virtually every local charitable organization and fundraising drive. Typical of his involvement was his service as general chairman of the drive to construct St. Theresa's Church in Brockton.

Peter's distinguished public service began many years before he was elected to the legislature, and we can be sure it will not cease with his retirement from the legislature.

Five members of the Massachusetts delegation in this House, Representatives EARLY, FRANK, MARKEY, MOAKLEY, and I, have had the privilege of serving alongside Peter Asiaf in the Massachusetts House of Representatives. His example of committed representation of his constituents has been a model to us all. I am sure my colleagues join with me in saluting him for his accomplishments and in wishing him well on his retirement.●

A TRIBUTE TO JAMES A. WILLIAMS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. FLORIO. Mr. Speaker, we must all agree that labor is the backbone of this country and that labor leaders must be individuals with foresight and understanding in order to deal with our rapidly changing economic environment.

It is my pleasure to take this time to pay tribute to James A. Williams whose dedication to the Glaziers union and his leadership qualities have brought him the Salute to Labor Award from his local chapter of Unico National on October 16.

It was not too long before Jim's leadership abilities surfaced and he was elected president of Glaziers Union Local 252 in 1975. Then just a few years later, he was named business agent for 2 years before being elected business manager of local 252.

In addition to the position of responsibility Jim has attained, he is active as a member of the COPE committee of the Atlantic City, N.J., Building Trades Council. He is an executive board member and trustee of funds for his local, and Vice President of the Eastern States Conference of Glaziers.

And in his community, Jim gives of his time and energy to such organizations as the Variety Club, Vietnam Veterans Committe, the Mercy Vocational School, and Muscular Dystrophy.

I would like to ask the House to join me in congratulating James A. Williams for being honored and given an award he obviously deserves. Thank you, Mr. Speaker.●

GIVE COAL PIPELINES A CHANCE

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. ROSENTHAL. Mr. Speaker, I wish to bring to the attention of the House an editorial which appeared in the August 28 edition of Newsday entitled "Give Coal Pipelines a Chance." I do so to illustrate a growing concern that America must not be lulled into the belief that energy insufficiency is a bad dream of the past.

Since the administration has, in its infinite wisdom, decreed that competitive energy industries are America's only salvation from the stranglehold of oil producing nations, we must also insure that methods of transporting our domestic energy resources remain in a competitive framework. According to the Consumer Federation of America, "on average, one-half of the price of coal is due to transporation costs", and as utilities shift to coal-fired generating stations, it is obvious that the consumer is going to foot the bill. Coal slurry pipelines deserve a chance to compete for the transportation of that coal and ease the consumers' burden.

One final note, Mr. Speaker. I find it interesting in view of the rail industry's objections to this bill, that the only existing coal slurry pipeline in this country is operated by a railroad. Obviously, they recognize the cost benefits of this form of coal transportation.

The Newsday article follows:

[From Newsday, Aug. 28, 1982]

GIVE COAL PIPELINES A CHANCE

Railroad lobbylists are crying poverty in Washington in an attempt to stop legislation that would make it easier to carry coal by pipeline from the mines to the industries and utilities that burn it.

The railroads would have Congress believe that coal-slurry pipelines might drive them out of business. But their arguments are fraught with inconsistencies and irony.

Most freight railroads are doing fine, due in no small measure to deregulation during the Carter administration. Burlington Northern posted earnings of $419 million last year; Union Pacific made $572 million—and neither paid federal income taxes because of a variety of write-offs and breaks. Even the beleaguered Conrail made money.

Railroads now ship two-thirds of the nation's coal to market, and their rates have risen by 50 per cent since early 1979. Slurry pipelines, which carry coal granules mixed with water or oil, could provide competition. But they would have to run under some of the rails that crisscross the country, and the railroads don't want to allow them to do that.

A bill now before Congress would grant pipeline companies the power of eminent domain. The railroads decry the measure as a giveaway to special interests, but the charge rings hollow in view of their own history. Without eminent domain, they

wouldn't be where they are today. And the safeguards proposed in the pipeline bill should prevent the horrendous abuses perpetrated by the railroads in the 1800s and early 1900s.

There are potential problems with slurry pipelines. Most of them have to do with water, which is scarce in much of the West, where many pipelines would originate. And the water that remains at the other end of the pipe after the coal has been removed would be far from clean.

But the water problems stand apart from the right-of-way question. They would have to be resolved for each pipeline, based on state and interstate water laws and environmental constraints. Unless Congress grants the pipelines the power of eminent domain, however, those issues may never even be explored.●

OUR ECONOMIC DIFFICULTIES

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. ADDABBO. Mr. Speaker, I would like to take this opportunity to share with my colleagues an article written by my good friend, Irving Zuckerman. Irving is the former Assistant Director for Planning and Budget, Office of Coal Research, Department of Interior, and has proven himself as an astute observer of our economic difficulties. I trust that my colleagues will be interested in this enlightening article.

The article follows:

VITAL CAPITAL STRUCTURE CLARIFICATION

(By Irving Zuckerman)

My tax accountant recently pointed to opinions that differ as to whether recovery is or isn't taking place. Several of his clients have gone out of business, and several more are teetering on the edge. "Why do we dangle in uncertainty?", he asks in desperation. So our discussion resumed:

Me: Well, suppose we were walking along the beach, and there is a man drowning, and . . .

Him: For heavens sakes, why can't economists give direct answers?

Me: Hold on there. My reference to the beach and the drowning man is real. I was getting to the life-guard who thought that there are lots of bathers on the beach who should be expected to volunteer to save the drowning man.

Him: In other words, the life-guard in the story represents the do-less approach of government, the life-guard being government. And the drowning man is the economy, I take it. So you are opposed to a voluntary economic policy? You think it is the job of government . . .

Me: I simply mean that when shifting public policy, government still has a positive part to play, not merely for emergency but also for reform of laws.

Him: Let's get back to the "drowning economy". Assume that you are a major decisionmaker with a magic wand to carry out what you have in mind. What is to be done?

Me: Should I first describe the situation, and then describe how I would choose the objectives, and how I would aim for accomplishing the objectives? If I begin with proposed actions you might judge them on the basis of you own, instead of on the basis of what I have in mind to accomplish.

Him: What would your first action be? Simple question.

Me: With other actions to follow, with reform programs and recovery programs also in mind, the first action would be a suspension of foreclosures of farms and homes. That action would be part of a package of actions. I basically have in mind to concentrate at this time on corporate and other business debt, across the board. Corporate debt, particularly of non-financial corporations. The capital structure on the whole is quite sick in that debt-financing has been over-used under the stimulus of the deduction of interest payments, and the added stimulus for debt-financing from a long period of inflation. It would have been nice if we had had a law requiring all bonds to have a standard provision to make them convertible after 5 or 7 years or so.

Him: Would you now apply such a law to all existing corporate bonds as well as to new financing? Or would it be a gradual application to existing bonds?

Me: A sudden avalanche of conversions into common stock could destabilize Boards of Directors of the corporations. I would provide some alternatives in the process of conversion to give those directors control over the conversion operation. There could be an operation to convert bonds to preferred stock, with those preferred dividends made as deductible as interest payments. Preferred stock is non-voting. Also, the corporations can defer preferred dividends cumulatively in emergency periods. Also, there would be a lowering of the break-even points, since a capital cost would have been converted to a share of profit, which is what it really is.

Him: In other words, you would be converting loans into investments, and removing the need for repayments. It would pool the present capital-contributors in the capital structure, all of whom should be investors.

Me: If you add current interest payments for the U.S. and current dividend payments for the U.S., the economy is doing quite OK. That total of earnings for capital provided has been stable even during the recent confused years of the economy. It is when we treat interest payments as a cost rather than as a distribution to capital that problems are intensified—like difficulty to compete in foreign markets well enough. Also, product prices now need to cover high fixed costs before the equity interests can have earnings.

Him: If I understand you, those who now have interest incomes from the corporations would be receiving preferred dividends from the corporations in the same amounts. There would be no maturity date for the preferred stock as normally. The holder of the preferred stock would recover investment by selling the preferred stock in the open market instead, the same as he would with a bond, but he would lose something probably in market value, wouldn't he?

Me: Probably, but bonds are not holding their own in the open market in any event, and if the economy is improved in general he participates in the improvement. The special preferred stock would provide a special preferred dividend that would be as taxable as the interest income he would have received from the bond.

Him: What about the corporation after the substitution of equity for debt?

Me: There are many corporations with little or no long-term debt. Such a company does not fear economic fluctuations much. It would seem that stable companies would be more attractive to investors.

Him: What about taxes. Without the deduction for interest payments, the corporation would have a larger tax on profits, unless the special dividend is made as deductible as the interest payments. But the right to that special dividend on the special preferred stock could be passed and accumulated, and it does not call for repayment because it has no maturity date.

Me: I would like to allow corporations to buy their own bonds and preferred stocks in the securities markets without paying income taxes on any profits of such purchase. I might also consider allowing the corporation a partial tax deduction to encourage a gradual conversion over the years toward making the preferred stocks convertible to common. When a corporation would buy its own bonds and preferred stocks in open market, it could be for ready cash or with cash resulting from issuance of common stock.

Him: Assuming it would be good for the economy as a whole to have a law for converting bond-financing to stock-financing, is it really necessary to go for 100 percent equity financing? Why not a 50 percent like we now have when stocks are purchased on margin in the securities markets?

Me: This is a simplified version I am describing, so as to emphasize the essentials. But there is a lot to be said for simplifying our system so that it can be better understood. So when I look at it from the standpoint of the economy as a whole it would seem that needless complications should be avoided.

Him: I am inclined to like provisions in new corporation financing resembling the home mortgages, in that each year's payment of interest, which would still be as a bond for the first 5 years of so, would be accompanied by an installment of debt-principal.

Me: As a general principal it is doubtful that it is economically healthy to have bonds longer than 10 years. We need more pay-as-you-go economic practices. We have been pushing too many of our industrial finance costs into the future, and then the future has to carry its own costs as well as those of the past.

Him: We already have accountancy standards involving soundness, and I can see that my clients would be better off now if that *had* been a law providing for sound financing practice from the standpoint of the economy as a whole.●

THE PRESIDENT AND PUBLIC HOUSING

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. AuCOIN. Mr. Speaker, recently, in prefacing his announcement of a new public housing project in New Jersey, the President said,

In spite of all our cuttings, there are things that government has to do and should do.

I have no problems with providing needed housing assistance in the district of the distinguished lady from New Jersey, MILLICENT FENWICK. But I do have problems with the President's intellectual honesty.

If the President really believes that one of the things Government should do is provide decent housing for the poor and the elderly, he failed to get the word out to his Budget Director, David Stockman. Because the truth is that the President sent Congress a subzero housing budget, requesting excessive rescissions in public housing programs and proposing cancellations of hundreds of thousands of commitments for new or rehabilitated units, already approved. Every attempt the Congress has made to mitigate the effects of and human misery caused by such policies has been resisted by the President.

I strongly object to the President's housing charade. The administration does not care about the housing needs of the low income and elderly in our urban and rural areas unless, apparently a few of the remaining crumbs can be dropped in a way that will insure the administration tighter political control of a Senate that will further decimate housing assistance programs.●

SALUTE TO MEMORIAL DAY NURSERY, PATERSON, N.J.

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. ROE. Mr. Speaker, on Friday, October 15, the residents of the city of Paterson, my congressional district and State of New Jersey will assemble in commemoration of the 95th anniversary of the Memorial Day Nursery, the first specially planned and designed children's day care center in our Nation; nestled in the city of Paterson, the first industrial city of our Nation; in the State of New Jersey, the cradle of industry and research in our Nation. I know that you and our colleagues here in the Congress will want to join with me in extending our heartiest congratulations to the supporters, officers and faculty of the Memorial Day Nursery on this most noteworthy occasion.

At the outset let me commend to you the diligence and foresight that has been extended by the people of Paterson who have participated in its founding and operations throughout the past 95 years. I particularly commend to you the founders and members of its board of managers responsible for the establishment and administration of the Memorial Day Nursery. The current officers of the board of managers are, as follows: Emma L. Conlon, president; Richard Ward, first vice president; Gordon Meyer, second vice president; Joan White, recording secretary; Bertha O'Donnell, corresponding secretary; Walter A. Lindell, treasurer; and Georgette Hauser, director of the nursery.

Mr. Speaker, over the past half century a great change has been taking place in the social and economic structure of the United States: mothers have been joining the labor force in ever-increasing numbers. At the present time, over half of all the children in America have mothers who work outside the home. More than 43 million women are now employed in every area of public and private employment and are continuing to develop new opportunities. They have made, and continue to make, increasingly important contributions to our Nation. Of these 43 million working women, over 18 million simultaneously perform the vitally important role of mother.

America's children represent new life and new hope for the future of our Nation and the world. They are regarded as our Nation's most precious resource and are our future's productive citizens and responsible leaders of tomorrow.

Back in October 1887, 95 years ago, in the city of Paterson working mothers achieved a safe and positive environment for day time assistance and supervision of their children through the establishment of a so-called pioneer children's day nursery which has flourished over the years to become a most valuable quality day care center for the children of working mothers: The Memorial Day Nursery.

Mr. Speaker, with your permission I would like to insert at this point in our historic journal of Congress a profile on the history of the Memorial Day Nursery which has intertwined the industrial activities, love of parents, and quality care for children that have spanned almost a century of growth in our Nation. This brief history compiled from the writings of two distinguished citizens from the northeastern region of our country, the Honorable Dorothy Patterson Rude, an outstanding news correspondent in the Paterson area, and the Honorable Emma T. Conlon, president of the board of managers of the Memorial Day Nursery, is, as follows:

THE MEMORIAL DAY NURSERY, PATERSON, N.J.

On October 1887, the Children's Day Nursery of Paterson, now the Memorial Day Nursery, was born out of the compassion of a handful of ladies and a church organization.

The City of Paterson was a booming industrial center in those days. "Lyons of America"—"The Silk City"—"Locomotive Capitol of the World"—"The Colt Revolver" were a few of its proud titles.

Paterson was a vital, dynamic city. It was the mecca for immigrants from all over Europe who had come to America to seek a better life for themselves and their families in a new land.

There were jobs; lots of them. So many, in fact, that the mill owners couldn't get enough men to keep the machinery running, so they began to recruit women to work in their industrial complex.

Wives and mothers for the most part were happy for the chance to add a few dollars to their meager incomes. But there was one obstacle. What to do with their children? Older children were left to fend for themselves and for many of the little ones, a neighbor, family friend, or elderly grandmother were called upon to take care of them during the day while their mothers were at work.

This was disturbing to the wives of the mill owners. They talked about it over tea and at club meetings, and the idea emerged to set up a program of day care.

The City Mission Auxiliary of the Society for Church Work of the Church of the Redeemer, one of the city's most elite parishes, moved to adopt it as a project.

On October 1, 1887, a number of its members met to form the Children's Day Nursery of Paterson. Its specific purpose; "dispensing daily care to the children of working mothers."

The good ladies saw themselves as only doing their duty, certainly not as pioneers. But they were pioneers, breaking ground for what was to become the present-day day care movement that is now accepted and demanded as one of the "rights" in a democratic society.

A rented house at 399 Straight Street in Paterson, New Jersey was the Day Nursery's first home.

Here mothers brought their children any time beginning at six o'clock in the morning and returned to pick them up, sometimes as late as seven o'clock at night. For this they paid five cents, a nickel a day. And it wasn't long before the House on Straight Street was being called, "the nickel house."

Then as now, a program little changed over its 95-year history, the nursery provided the children with breakfast, lunch and snacks, provided recreation, training and all the elements of early childhood education. There were, also, and still are, generous helpings of tender, loving care.

From the beginning, the Day Nursery had to race to keep up with the demand.

The "nickel house" soon grew too small.

A larger house up the street was made available by one of its donors. It was the mansion of the late Mayor Beckwith, and it looked like it might have the accommodations for a permanent home. This was early in 1901, but on the last day of that year, there came the announcement that Mrs. Garret A. Hobart, one of the nursery's early supporters, and widow of the Vice President, was donating a tract of land at Grand and Hamilton Streets, and a $25,000 contribution toward a new and permanent home for the nursery. It was a memorial gift, in memory of her daughter, Fannie Beckwith Hobart.

Miss Hobart was only 17, when she was stricken with diphtheria and died while at school in Switzerland. Although just a teenager, she had already demonstrated an interest and a willingness to involve herself with needy children, and the memorial was considered most fitting.

In gratitude the Nursery Board voted to change the nursery's name to the present, Memorial Day Nursery of Paterson.

The cornerstone for the new building was laid on September 29, 1903, and the new Memorial Day nursery opened its doors on October 15, 1904. This was the first building in the State of New Jersey which had been planned and designed for a day care center.

Again, a pioneering spirit was reflected.

On the platform for the dedication ceremonies were the Reverend David Magie, Pastor of the Presbyterian Church of the Redeemer, of which Mrs. Hobart was a member, and the Very Reverend Dean McNulty of St. John's Roman Catholic Cathedral. Benediction was given by the Reverend Dr. David Hamilton of St. Paul's Episcopal Church.

This was long before the ecumenical movement was even dreamed of. Yet it was symbolic of the commitment of the nursery from its beginnings to "care for children of all nationalities, color and creed."

That the Day Nursery was ahead of its time was demonstrated also in another of its ancillary services. This was the Babies' Dairy, a forerunner of today's government-funded nutrition program.

Infants who were brought to the Day Nursery were given thorough medical examinations before admission. Those who showed nutritional deficiencies or problems were put on a formula developed to meet their individual nutritional needs. The formulas were prepared in the nursery's diet kitchen by a registered nurse-dietitian. They were then placed in sterile bottles and packed into zinc-lined containers, surrounded by ice. A 24-hour supply was given to each mother each day, and the next morning she would bring back the bottles for a refill.

Babies as young as four months and occasionally younger were accepted for care, and children up to age nine. School age children attended nearby School 3, and returned to the nursery for lunch and after school snacks to await their parents.

Attendance at the nursery during the first month, October 1887, began with 4 children. It quickly moved to 62 children from 45 families for an aggregate of 1844 days of care during its first year.

Last year, 130 children ages 2 years to 9 years were enrolled at the nursery, and the waiting list is 150 names long.

Through depression and recession, in boom times and inflation, times of war and interludes of peace, the Memorial Day Nursery has continued to serve the working mothers of the community. Although federal programs and controls are now a part of the overall operation, the support now, as from the beginning, has come from those dedicated and committed individuals who give generously of themselves and their resources.

In its darkest hours, it was these good people who come forward with the help and support needed to keep the nursery program alive.

"And there always will be." stated Mrs. Frank T. Conlon, president of the present Board of Managers. Other officers are Mr. Richard Ward, 1st Vice President, Mr. Gordon Meyer, 2nd Vice President, Joan White, Recording Secretary, Bertha O'Donnell, Corresponding Secretary, and Mr. Walter A. Lindell, Treasurer. Mrs. Peter H. Hauser is Director of the Nursery.

On October 14, 1904, Mr. Hobart Tuttle, brother of Mrs. Hobart, the donor, in his dedicatory address spoke these words prophetic in retrospect:

"Today the Building is completed, the work goes on." The work of the Memorial Day Nursery, now 95 years old, goes on!

Mr. Speaker, It is indeed appropriate that we reflect on the deeds and achievements of our people who have contributed to the quality of life here in America. In commemorating the 95th anniversary of the founding of the Memorial Day Nursery, I appreciate the opportunity to present the foregoing to you and seek this national recognition of the magnificient efforts manifested by the foresight and expertise of the people of the city of Paterson and the lasting achievements that can be attained with people working together in a common endeavor.

We commend the supporters and administrators of the Memorial Day Nursery throughout these past 95 years with special commendations to the founders of the nursery and especially Mrs. Garret A. Hobart whose contribution of land and funds provided the necessary foundation to establish a quality day care center which truly serves as a lasting memorial to her daughter, Fannie Beckwith Hobart. They have sought and achieved a quality of excellence in our community which bespeaks the pioneering efforts of our forefathers and the traditions of a freedom-loving people dedicated to the American principles of democracy and a good family life for themselves and future generations to enjoy. We do indeed salute the officers and members of the Memorial Day Nursery of Paterson in observance of the 95th anniversary of its founding.●

NATURAL GAS PRICES SEEN RISING

HON. ROBERT A. YOUNG

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. YOUNG of Missouri. Mr. Speaker, throughout this Congress I have been working to protect residential and commercial consumers against unreasonably high prices for natural gas. Since the enactment of the Natural Gas Policy Act (NGPA) of 1978, natural gas prices have escalated rapidly and have increased at a rate greater than the Consumer Price Index. Continued rising natural gas prices for essential residential, commercial, agricultural, and industrial uses will impose severe economic dislocations and hardships, and will adversely affect commerce.

Mr. Speaker, as you may know, there are predictions for a very cold winter and energy costs are due to skyrocket. I have introduced legislation aimed toward promoting the economic well-being of the United States and its citizens by eliminating certain natural gas price increases that are unrelated to the costs of producing such natural gas. My two bills, H.R. 6531, the Natural Gas Consumer Relief Act and H.R. 6850, the Natural Gas Fair Pricing Act would affect the NGPA in an expressed desire to control the rise of natural gas prices, yet, at the same time, provide incentives for further exploration and development of gas supplies.

Mr. Speaker, the Laclede Gas Co. in St. Louis has informed me that since the enactment of the NGPA prices for the energy consumption for an average size home, using about 900 therms annually for space heating has more than doubled in 5 years. These prices will continue to rise unless the NGPA is amended. It will be the residential consumers that will bear an increasing share of the burden of unreasonably high prices for natural gas in the future.

Mr. Speaker, I would like to include in the RECORD today data supplied to me by the Laclede Gas Co. that compares the energy consumption of an all-gas home versus electric energy consumption for the same domestic appliances, that is, space heating, water heating, cooking, and clothes drying. Additional electric consumption for lighting, radio, television, et cetera, is not included in this cost comparison study. This is data for a home using about 900 therms annually for space heating and an additional 420 therms for other domestic uses. The gas data graphically illustrates the impact of the Natural Gas Policy Act on the cost of gas since its enactment in October 1978. During this period, the commodity cost of gas to the Laclede Co. from its supplier has escalated from 15 cents per therm to 40 cents presently. This is a 66-percent increase.

I urge my colleagues to take a look at these figures as an example of the severe impact on gas consumers the NGPA has had. Higher prices are a tough problem for consumers, particularly in this period of prolonged economic recession.

Year at Jan. 1	Electric cost	Gas cost
1977	$451	$307
1978	457	338
1979	545	397
1980	616	492
1981	715	505
1982	801	652

Note.—This data is for an average size home using about 900 therms annually for space heating and an additional 420 therms for other domestic uses.●

COMMUNITY ECONOMIC PLANNING

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. CONYERS. Mr. Speaker, the General Oversight Subcommittee of

the Banking, Finance and Urban Affairs Committee is currently holding hearings on the desirability of establishing a national development bank. These hearings have examined the Reconstruction Finance Corporation, a national investment bank that operated successfully during the 1930's. I can think of few economic inquiries as vital as the subcommittee's hearings on a development bank.

In this connection, I wish to bring to the attention of my colleagues an article on community economic planning and development banking written by Dr. Derek Shearer, director of urban studies at Occidental College. Dr. Shearer ably served as a director of the National Co-op Bank during the Carter administration. Along with Martin Carnoy of Stanford University, he authored a major work on the U.S. economy, its prospects and needs, entitled, "Economic Democracy: The Challenge of the 1980's."

Shearer's article, "Popular Planning," illustrates the success that certain communities across the Nation have had in creating their own development plans and banking institutions. Certainly these examples are replicable in other localities. The article appeared originally in the New York Times, March 16, 1982. The article follows:

[From the New York Times, March 16, 1982]

POPULAR PLANNING

(By Derek Shearer)

SANTA MONICA, CALIF.—As the economic renaissance promised by Reaganomics fails to appear, calls for economic planning will be heard from leading businessmen and politicians. Will such planning, when it inevitably comes, be participatory?

The investment banker Felix G. Rohatyn and the economist Lester Thurow advocate a system of top-down national planning whereby financial experts, appointed Government officials, and a few labor leaders spend public money to prop up the economy. Neither Reaganomics nor Mr. Rohatyn's top-down planning addresses the legitimate complaints most Americans had when they supported candidate Ronald Reagan's call for local control and a reduced national bureaucracy.

Santa Monica's city government, elected in 1981 on a platform of economic democracy, is striving to be an exemplar of locally controlled planning. The City Council and other officials believe that President Reagan's "new federalism" should be built on principles of participation, not royalism. For example, the city required one developer to include 100 units of affordable rental housing, a day-care center, a public park, and incentives to use public transit. In another development, a proposed 12-story office building downtown was reduced to three stories in which offices, apartments, and food stores are mixed.

Like most cities, Santa Monica, which is surrounded on three sides by Los Angeles, faces both reduced growth in local revenues and drastic cutbacks in funds formerly received from the Federal and state governments. At the same time, high interest rates make the bond market increasingly inaccessible to Santa Monica, and other cities.

Santa Monica's new government will be struggling just to find enough revenues to maintain the city's roads and sewers. The City does not have the capital resources necessary for extensive economic planning. Reaganomics, offered as a stimulus to business and a return of power to local government, is wreaking havoc on local economies and reducing the ability of citizens to control their own lives.

Some national planning will be necessary. The Federal Government should take an equity position in key industries—for example, steel, cars, energy, finance—and then require board representation for union and community leaders. A genuine "safety net"—a decent, guaranteed family income—should replace the maze of welfare payments. With a system of real economic security and greater participation in corporate decisionmaking, workers would be more willing to plan jointly with management for the equitable short-term sacrifices needed to revitalize industry.

Local democratic planning would begin with neighborhood-based programs that privide residents with technical help to come up with an assessment of the goods and services needed by their community. This might include public amenities like parks and street repairs, and private needs like particular kinds of stores or, simply, jobs for the unemployed.

Most important, cities would obtain capital to plan for new jobs and neighborhood improvements from municipally owned banks that would loan funds and provide equity for development projects.

In Santa Monica, democratic local planning is heading in this direction:

A neighborhood organization includes a new supermarket in its assessment of needs. The city planning staff does a feasibility study, then the city development bank provides the loan. The store is set up as a cooperative, owned and managed by neighborhood residents; jobs are provided for youth in the area, and residents gain a local market that includes day-care facilities and a nutrition center.

The city development bank might also make loans to small-scale manufacturing businesses in, say, new technology, but insist that the firms be organized as employee-owned enterprises, have profit-sharing plans, or at least employ Santa Monica residents. The city could form joint ventures with private developers and take a piece of the action in return for loans or startup capital. Santa Monica might do this on its municipal peir. Instead of turning over redevelopment to a private firm, the city would act as its own innovative developer.

Nationally, local development banks and planning commissions could stimulate development of new enterprises and balanced growth by fostering a mixture of enterprises—some employee-owned, especially in communities hard-hit by plant closings

A system of public investment and democratic planning would not solve all of America's ills overnight, but it would call on the millions of Americans from neighborhoods to shop floors who are currently excluded from economic decision-making.●

MR. ENTREPRENEUR JOE HRUDKA

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. MOTTL. Mr. Speaker, in 1965, a 26-year-old Joe Hrudka took $50 worth of materials down to the basement of his Parma home to develop a better auto exhaust gasket. He did. Hrudka started a business making gaskets called Mr. Gasket which he sold in 1971 for $17 million. At the age of 32, he retired.

Now, a restless Hrudka is back in business again.

A graduate of John Marshall High School in Cleveland, Hrudka got his first taste of the business world helping his father run a neighborhood bar.

An article carried in the Cleveland Press, before it stopped the presses this year dealt with the inspiring Hrudka success story:

Hrudka attended Bowling Green for one semester before leaving college for good. "I thought if the professors were as smart as they were supposed to be, they would be out there making a fortune," he said.

He tried a number of ventures including running a car wash and drag racing before inventing the gasket that brought him fame and fortune. He had set out to improve the gasket being used in race cars because they often blew out at high temperatures.

"I never thought I would be coming back. I wasn't looking for something to do," Hrudka said. "But some of the old people were discharged over the years, and my brother left the company and we started thinking about developing a little line to compete with Mr. Gasket.

"When W. R. Grace & Co. (purchaser of Mr. Gasket in 1971) heard of our plans, they said, 'Rather than go in business against your old company, why not buy it back?' That probably was one of the quickest deals W. R. Grace ever made."

"We would be the first company in the country to go public twice," that is if the stock is again offered in Mr. Gasket, Hrudka said. "That seems like a fun thing to do. Life is like a book and this is a chapter that I didn't know was coming up."

Mr. Gasket is now a subsidiary in Hrudka's American Industries Inc. The other four subsidiaries are Hayes Inc., Lakewood Industries, Blackjack and Hickey Enterprises. All are in the auto aftermarket, the business of manufacturing parts for auto repair and service.

He finds that field "one of the most exciting and fast growing" and projects that sales will reach $200 to

$300 million in the next couple of years.

"I didn't just buy this company to get back," he said. "I want it to grow and be profitable."

Hrudka always wanted to be in business for himself. "I just felt that if you could work for yourself, you would have a much nicer life."

Hrudka spent 3 of his 10 retirement years restoring his home, Roundwood Manor, the former Van Sweringen estate in Hunting Valley's Daisy Hill. He also had a home in Palm Springs, Calif., which was featured on "60 Minutes," and in Palm Beach, Fla. That house was formerly owned by Perry Como. The out-of-town properties have since been sold.

A framed aerial view of the Roundwood estate hangs on a wall in Hrudka's office. "Sometimes I walk around it, and I still can't believe I live there."

At one time he owned 110 cars, but he has sold most of them. "I still have the finest collection of '57 Chevys," he said. "I own 16 of them. That car was the backbone of the industry. It still looks good, and it's still one of the most favored cars among collectors."

As the Cleveland Press article would imply, Joe Hrudka is still a favorite in the automotive parts business and his return has been heralded by representatives in the industry.

Hrudka's business is in the 23d district as is the home where he got his start. I want to express the thanks of the 23d district for not only the jobs Hrudka generated, but also for giving us all an inspirational story of his dynamic career with many more successful chapters to write.

You can bet your '57 Chevy on it.

THE ADMINISTRATION'S "DIRTY WATER AGENDA"

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 30, 1982

● Mr. HOWARD. Mr. Speaker, it is with considerable concern that I call the attention of our colleagues to the enclosed communication by Mr. Jack Lorenz, executive director of the Izaak Walton League, which appeared in the September 21 edition of the New York Times.

Mr. Lorenz, in his letter, calls attention to articles which appeared in the Times on September 12 and 13, detailing the administration's plans to weaken controls on water pollution from textile mills and sewage treatment plants. These article produced an immediate reaction in my home State of New Jersey, and particularly in my congressional district. Ours is a coastal district where the condition of the ocean waters determines the condition of our resort economy. Obviously any weakening of water pollution control enforcement works to the detriment of my constituency. As a direct result of these articles, our distinguished colleague, Congressman BOB ROE, chairman of the Subcommittee on Water Resources from Dr. John Hernandez, Deputy Administrator of the Environmental Protection Agency. We let Dr. Hernandez know that the House of Representatives will not tolerate any weakening of our water pollution standards and pledged that, if events prove it necessary, we will introduce whatever amendment may be necessary to strengthen the act.

Mr. Speaker, I submit herewith Mr. Lorenz' letter as it appeared in the Times.

[From the New York Times, Sept. 21, 1982]

THE ADMINISTRATION'S "DIRTY WATER AGENDA"

To the Editor:

Two recent news articles (Sept. 12 and 13) detailed the Reagan Administration's plans to weaken controls on water pollution from textile mills and sewage treatment plants. While these articles begin to explore the problem, they don't go far enough in indicating just how severely the Administration's actions would undercut progress in attaining clean water.

The implementation of uniform, nationwide industrial pollution-control standards, required by Congress in the Clean Water Act of 1972 and 1977, has led to the recovery of some of our most polluted waters. But despite the Environmental Protection Agency's assertions of its commitment to the existing clean-water program (news story Sept. 15), that agency is working to systematically eliminate those uniform, nationwide standards in favor of the less restrictive—and far less effective—case-by-case pollution-control approach.

Ironically, at the same time that the Administration is trying to return to case-by-case pollution controls, it is preparing proposals to weaken the very state water-quality standards on which that approach is based.

While this is the most fundamental change in the clean-water program being undertaken by the Administration, it is not the only one. The Administration's approach, or "dirty water" agenda, also includes:
